## Questions for the Candidates

**A**T AN April 9 Senate hearing, the Air Force warned that it faces a future shortage of some 800 fighters, the aircraft needed to ensure US air dominance. The public shrugged.

It is time to accept that the erosion of US airpower—and of the US military generally—doesn't move the people. A Gallup Poll says 74 percent of Americans think we spend either "too much" or the right amount on defense. It's no surprise, therefore, that military problems (except for the Iraq War) rarely intrude on the Presidential campaign. No candidate has made a special point of rebuilding our worn-out forces.

Such serene indifference has an expiration date. The next President, on Inauguration Day, will confront some nasty, complex, and unavoidable problems, as President Bush hands over a force pushed to near-collapse by underfunding and overuse.

With serious problems besetting the Air Force, the three candidates should be asked a few questions, if only to kick off a process of educating the public. Herewith are our offerings:

You may or may not be aware that the USAF fleet of fighters, bombers, airlifters, tankers, and other airplanes is the smallest and oldest in history. Over the past 23 years, it has shrunk 40 percent (down from 7,000 to 4,300 aircraft), yet average aircraft age has simultaneously soared from 13.6 years to 24 years because we didn't buy new ones. Are you concerned about relying on such a geriatric fleet? If so, what are you going to do about it?

Gen. John D. W. Corley, head of USAF's Air Combat Command, points out that an astounding 86 cents of every "modernization" dollar spent on these "legacy" airplanes goes to keep them safe and flyable, with only 14 cents of the dollar actually paying for increased capability. Does that seem wasteful to you?

USAF considers 2,250 fighters to be a rock-bottom requirement through 2025. Lt. Gen. Daniel J. Darnell, deputy chief of staff for operations, told Senators on April 9 that a gap of 800 fighters will open up between 2017 and 2024. The biggest cause is laggard production of the new F-35; at the currently planned rate of 48 per year, acquisition

of all 1,763 fighters will take three decades. You have a choice of solutions: speed F-35 purchases, patch up old F-16s and A-10s to fill the gap, or live with the problem. Any of the three will cause pain. Which will it be?

Bush has begun expanding the Army and Marine Corps, tapping Air Force accounts to help pay for it. Do you support this? If "Yes," then tell us: What can be achieved with 92,000 more "boots on the ground" that is more important than assuring US air dominance?

### **The nation's military enters "a period of consequences."**

In 2001, a Pentagon mobility study and subsequent analysis of alternatives found that the US needed a fleet of at least 222 C-17 airlifters. That was before the 9/11 attacks, the Global War on Terrorism, and the Afghanistan and Iraq wars, which expanded mobility needs again. Yet today, DOD proposes to shut down C-17 production at only 190 aircraft. What do you make of this decision?

Certain officials within the Office of the Secretary of Defense have cut nearly 200 fighters from USAF's F-22 program, leaving a mere 183. However, the Air Force says it needs a minimum of 381 Raptors to equip its 10 Air and Space Expeditionary Forces. This is the first new air superiority fighter to reach the Air Force in three decades. Pentagon chief Robert M. Gates admits he is now punting the next move to you. Do you, or do you not, support additional F-22 production?

If the answer is "Not," then you must know of some other means by which USAF can be sure of defeating increasingly powerful adversary fighters and air defense systems. What is it?

USAF was compelled to cut 60,000 airmen from its active force to find the money for weapon modernization (see above). Is it ever OK to force a service into such a trade-off?

Today's Pentagon leadership harbors the view that the United States does not now and will not anytime soon face a traditional "peer" or "near-peer" rival. Do you agree that neither China nor Russia fit that description? Also:

This view serves as the basis of a reorientation of our forces away from high-performance fighters, warships, and other "conventional war" systems and toward light infantry and similar elements optimized to deal with "irregular" opponents. Do you believe it is more important to emphasize irregular combat over potential slugfests with major national military forces?

Speaking of preparations for irregular, Iraq-like operations: Can you see yourself taking America into another such war anytime soon?

The relative defense-spending burden on American taxpayers is at historically low levels—equivalent to about 3.4 percent of Gross Domestic Product (not counting the costs of wars in Iraq and Afghanistan, which have nothing to do with maintaining a strong military). Under Ronald Reagan, equipping, manning, and sustaining the force took six percent. Today's Chairman of the Joint Chiefs of Staff, Adm. Michael G. Mullen, calls for raising today's DOD budget modestly to the equivalent of four percent of GDP, or \$600 billion a year. Do you believe that level is affordable?

Top Air Force leaders say it will take an additional \$20 billion a year to fix the service's hardware woes. Do you believe *that* level is affordable?

Come to think of it, how do you define "affordable"? Will you apply the same standard to popular entitlement programs such as Social Security, Medicare, and Medicaid?

In September 1999, then-candidate George W. Bush delivered a major defense policy speech—his first—at the Citadel in South Carolina. In it, he laid out his goals for the armed forces. "Moments of national opportunity," he said, "are either seized or lost, and the consequences reach across decades." He titled the speech, "A Period of Consequences."

We now are entering this period of consequences, and things don't look good. The armed forces have gotten older, mostly smaller, and lacking in the resources needed for the long haul in a dangerous world.

The membership of the Air Force Association eagerly awaits word on how you plan to turn things around. ■

# Raytheon AESA

Active Electronically Scanned Array Radar

See all. Target all.

Raytheon's proven multi-mode, multi-platform AESA technology can simultaneously guide multiple missiles to multiple targets widely spaced in azimuth, elevation and range, with unprecedented precision. Leveraging our vast Mission Systems Integration capabilities, AESA technology enables various platforms to gather, process and share information, air-to-air and air-to-ground, with a speed and reliability far greater than any other radar. In short, it provides today's aircraft with a revolutionary level of situational awareness, and the vast operational advantages that go with it.

## A Question of Influence

Robert S. Dudley's editorial [*Beyond the F-22 Problem, March, p. 2*] and Rebecca Grant's article [*Why Airmen Don't Command, March, p. 46*] lament the decline in Air Force political clout which they claim limits command opportunities for the service's most senior officers and constrains its acquisition programs. This seems wrong for two reasons. First the Air Force isn't that powerless, and, second, it has been the champion of the cause of its own limitation.

It should not be surprising that the ground combat services, the Army and the Marine Corps, fare relatively better when the nation is engaged in ground combat as it is in Iraq and Afghanistan than when it is not. This happened also during Korea and Vietnam. The budget share for at least the Army always fades when the wars are over. If the Air Force wants to know what it really feels like to be fourth in line most of the time, just consult with Army leaders who face constant poaching from the marines, the National Guard, and special operations. The nation's aerospace giants may be seeking some of the Army's business these days, but only after maxing out at the Air Force and Navy tables first. The Air Force surely isn't that unaware of the division in the R&D and procurement budgets.

The Air Force has been a champion of jointness, which helps stymie interservice rivalries and the opportunities for the Air Force to assert the Billy Mitchell thesis. In the supposedly bad old days before Goldwater-Nichols, the Air Force not only dreamed of but actually achieved the 50 percent mark as its budget share. With jointness comes the notion that marines should be in charge of strategic forces and naval officers in charge of ground combat. This is a brew of the Air Force's own making. Again, ask the Army about joint command billets.

But I do not worry much for the Air Force's future. When we lose our taste for counterinsurgency, which we surely will, the advantages of long-range strike and air attacks will again come to the fore.

Moreover, the combined force air component commander's post is likely to be the seat of power in future wars. Central control of fires is a conquering argument and one the Air Force successfully makes. How often is the air boss a naval officer or a soldier?

Harvey M. Sapolsky  
Cambridge, Mass.

I found the article [*Why Airmen Don't Command, March, p. 46*] quite fascinating. After I finished it, I referred back to the editorial. Robert S. Dudley highlights the question of why the Pentagon doesn't take the Air Force seriously: "Why, on an issue of supreme importance to the Air Force, does the Pentagon find itself unable to agree with USAF's leadership?" I would suggest the answer to that question can be found in the conclusions drawn by Rebecca Grant in her article: "Get in the game."

SMSGt. Jim Gordon,  
USAF (Ret.)  
Laurel, Md.

In response to the article, I must say that once again Ms. Grant misses the point in her zealous promotion of USAF. If you start with Air Force doctrine, we ourselves hold that airpower must be commanded by airmen, and that the JFACC will usually be an Air Force officer, because we supply the preponderance of the air forces. To think, then, that the command of very "ground force heavy" commands like EUCOM and CENTCOM will frequently

**To advocate aerospace power and a strong national defense.**

**To support the United States Air Force and the Air Force family.**

## Letters

fall to anyone other than a ground combat commander is a bit naive. Secondly, if you examine the education and training of Air Force officers, we (understandably) promote "air mindedness," and the command and control of air and space assets. However, unless you deliberately educate and train our airmen in the command and control of ground forces (as part of a balanced joint education), you will not create a large pool of airmen who are prepared to lead ground-centric operations. Lastly, in the very same issue, on p. 54 ["DOD Senior Leadership"], anyone can see the results of how we do business. By my very simple count of the photographs there, a USAF officer commands three of the 10 combatant commands (TRANSCOM, STRATCOM, and NORTHCOM). The remaining commands score as Army, two; Marines, one; and Navy, four. Politics will always play a role (perhaps a rereading of Clausewitz is in order). But instead of blaming Machiavellian politics, as does Ms. Grant in her conclusion, we might profit more by re-examining how we develop leaders to be true joint warfighters.

Col. Thomas Huizenga  
Bagram AB, Afghanistan

Rebecca Grant's article asked [an important] question. While her conclusions were certainly valid, I believe she may have missed a key factor in our modern Air Force. Unfortunately, USAF leadership is too focused on the instrument of airpower, the airplane, than the actual warrior's application of airpower. USAF generals for the most part are pilots and they grudgingly (if ever) remove themselves from their first love, the airplane. To become a general, these officers spend a monastic existence in the presence of their airplane and crew, assuming they are in a crewed aircraft. Many of these officers never experience any other life than that of an operations squadron, group, and then wing commander. Many never learn how to motivate their subordinates because as a rule, they are usually serving as highly paid technicians flying their airplanes.

If all line officers are considered "airmen" why do we segregate them as rated and nonrated? Why do we overlook officers who have mastered many key elements of airpower just because they can't fly an airplane? Why do we advance officers who have only mastered flying an airplane and haven't a clue where the gas, technicians, ammo, security, parts, infrastructure, or computer support come from? While

I believe pilots can and should have key input to air operations, I cannot conceive of a single reason why other officers could not be in a leadership position soliciting that input.

If being a "good stick" was vital to knowing about airpower, Giulio Douhet, an artillery officer, was a dismal failure. His seminal book, *Command of the Air*, in 1921 should have been overlooked and never incorporated into the curriculum of the Air Corps Tactical School. Fortunately, our early airpower pioneers got their start as Army officers and then transitioned to aircraft—many had a distinct appreciation of the concerns, limitations, and unique characteristics of the Army. Perhaps this was the reason they didn't throw out Douhet's theories and built Eighth Air Force and orchestrated the strategic bombing campaign against Hitler's Germany.

Maybe we're grooming the wrong people for leadership? I deployed as ADVON for a hostile entry NEO and was also tasked with briefing the CONOPS to a unit assigned to provide CAS. I was wearing the uniform my CG—an Army two-star—sent me in: a sanitized flight suit with only rank on it. My briefing was well-received and the unit immediately went to work refining their task. I was welcomed into their squadron and given the combination to the cipher lock of their ops center. Four days later, the mission was scrubbed by the NCA and I reverted to wearing all prescribed badges and patches. I was no longer welcomed in that ops squadron because I was nonrated. Until they saw my lack of flight wings, they never questioned my briefing or competence.

I believe it's clear what is wanted in regional commands: a broad knowledge of military, social, and economic concepts; employment of a vast spectrum of military forces; an extensive knowledge of military theory (and not just airpower) and history (from both sides); a willingness to assemble your forces based on the situation at hand and resources available; and a warrior's heart. You can find a FedEx pilot with tons of hours, but does he have the other qualities?

Lt. Col. David J. Wallace,  
USAF (Ret.)  
Kokomo, Ind.

Rebecca Grant really makes the case for something I have argued for a number of years—joint promotion processes at the flag and general officer level.

Since implementation of Goldwater-

Panasonic recommends Windows Vista® Business.

# LEGALLY, WE CANNOT SAY IT WILL DELIVER ENEMY COORDINATES TO YOUR F-16.

We admit, many of the Panasonic Toughbook® deployments for the US Air Force are top secret. But we will say, whether you're in action or in training, the new Toughbook 52 will be your durable and reliable information lifeline. With the power of a desktop PC, it flies through multiple programs and displays them on a 15.4" widescreen LCD. And the Toughbook 52 is built to outlast mission after mission—with a shock-mounted hard drive, magnesium alloy case, spill-resistant keyboard and retractable handle. While we're not privy to the strategies you'll be planning, we can safely say the Toughbook 52 will get the job done.

Nichols over two decades ago, the services have individually wrestled with how to meet their requirements for "jointness." While serving on the Joint Staff during Desert Shield/Desert Storm, I saw firsthand how difficult it was to conduct that campaign following the principles of jointness as directed by Goldwater-Nichols. We've come a long way since then and certainly the ability to fight jointly is much improved.

Another positive step towards truly institutionalizing jointness would be to create a promotion system for flag and general officers at the two-, three-, and four-star level. Officers can and should be selected for flag rank within their respective service, but beyond that, senior leadership needs to think and act with a more "purple" perspective. Though officers might be assigned to joint positions, my experience shows that when a policy issue needs to be addressed, the majority leans towards siding with the perspective of their respective service. Perhaps it's their cultural upbringing, but it could also be the knowledge that crossing their service could adversely affect their promotability within their service.

Promotion based upon a joint system, and conducted by a joint board, would work to eliminate that problem and ensure that all services have equal opportunity to command regional combatant commands based upon their joint qualifications vice a particular service affiliation.

Capt. Frank Roberts,  
USN (Ret.)  
Virginia Beach, Va.

As military personnel, we should all be concerned about the lack of procurement of documented USAF aircraft needs and the filling of high command positions by USAF personnel. The failure of qualified USAF officers to lead in the command positions such as CINCPAC has undoubtedly been a detriment to getting USAF Pacific aircraft requirements funded and also continues to degrade the Air Force's ability to compete weapon system requirements vs. other services.

As far as the CINCPAC position, the regrettable charade by certain Senate Armed Services Committee members definitely prevented a long needed Air Force commander to head up the CINCPAC position. In that position, the well-qualified USAF person could have highlighted Pacific Theater aircraft requirements and also the needs of the other services. Don't forget that the combined use of arms of our services did us well in Desert Storm, but we also

have the reality that USAF flew some 80 percent of the key combat sorties vs. 20 percent for our US Navy/Marine brethren.

If and when we become engaged in a large crisis or conflict involving China and possibly Russia, we will need all our USAF documented aircraft requirements to carry out the commander's mission statement and to daily meet

the air sortie requirements for the combat theaters.

Lt. Col. Sid Howard,  
USAF (Ret.)  
Oklahoma City

As usual, Rebecca Grant hit the nail on the head. I particularly appreciated her detailed review of the Senate Armed Services Committee hearing of Gen.

## IN A COMBAT ZONE, THIRST SHOULD NOT BE THE ENEMY.

The MECO Lightweight Water Purifier – the LWP – can be set up and operated by one soldier in 45 minutes or less. It provides safe potable water to early entry, highly mobile forces throughout the spectrum of conflict in peace and war, and will provide quality water support to remote units and detachments where distribution of bulk water is not feasible or practical. It's extremely simple to operate with virtually hands-free functionality. Yet the advanced process controls allow the operator to treat ANY WATER – ANYWHERE without special chemicals, training or equipment modifications.

The MECO LWP is presently deployed at several Forward Operating Bases in central Baghdad, Iraq and Afghanistan – fighting the war on terror.

For more information visit [www.mecomilitary.com](http://www.mecomilitary.com) or call 1 (866) 363-0813.

Gregory S. Martin's nomination to command US Pacific Command.

Regardless of anyone's personal politics, Senator McCain's intransigent pettiness cost the nation the capable, honorable service of General Martin when he subsequently withdrew his nomination and prematurely retired.

As a "disclaimer," I am not related to General Martin. It was my privilege to be the USAFE director of personnel (2000-01) when he was the commander, United States Air Forces in Europe.

Col. Frances C. Martin,  
 USAF (Ret.)  
 Interlachen, Fla.

Ms. Rebecca Grant does a major disservice to not only your readers but to the reality of the confrontation between Sen. John McCain and Gen. Gregory Martin on Oct. 6, 2004. Just five days prior to this confirmation hearing, Darleen Druyun had finally come clean regarding all of her lies and told her federal sentencing judge that she had steered lucrative Air Force contracts to Boeing for her and her family's financial gain in the form of jobs. On top of that, the Air Force leadership at that time had been doing its level best to stymie the efforts of Senator McCain in finding

out what was happening regarding the KC-767 sweetheart deal with Boeing. Since General Martin had been over Druyun from July 1998 to January 2000 as the principal deputy, Office of the Assistant Secretary of the Air Force for Acquisition, Senator McCain rightfully took the opportunity to ask General Martin how Druyun's deceit/deception could have gone unnoticed by the Air Force leadership. What General Martin said in response was truly amazing: (1) He (Martin) was not an expert in

contracting; (2) he (Martin) questioned if Druyun actually committed the crimes she stood accused of; and (3) he (Martin) had never seen Druyun act in an inappropriate manner while he worked with her. Perhaps General Martin was just incompetent in that acquisition job, but when he couldn't acknowledge Druyun's guilty plea in federal court nearly a week earlier, any rational observer would have questioned his ability to command.

I consider the whole Darleen Druyun

Strayer University is an Air University ABC School

episode the greatest single blemish on the reputation of USAF since its founding in 1947. Yet revisionist commentators such as Ms. Grant are imparting a whole new spin on things (i.e., Senator McCain simply didn't want an Air Force general in command of the Pacific).

Ed Slana  
Fairhope, Ala.

I read the subject article and I offer the following analysis from a retired enlisted perspective as to why our "leaders" don't command. In my 30 years in the Air Force (1976-2006), I had the rare privilege of working directly for general officers and working closely with several others. All were great men and managers, but not all of them great leaders. Let me explain. In the Air Force for many years, an officer who was considered "general officer material" was a pilot (there are several exceptions but they are not the norm) and more specifically a fighter pilot.

One has to ask how much leading a fighter pilot does in the cockpit as a young pilot. Not much is the only answer, and it shows as they matriculate up the ranks to a point where they

finally begin to lead a large group of people, normally as a group/wing commander. They have honed their skills as managers of time, space, and of course money, but not people. This is where I believe they fall short on leadership. You don't lead things, you lead people, and it takes years of study and hands-on practice to become a great leader.

Change is needed; maybe the answer is a two track system—pilots forever and pilots to leaders. Until our Air Force gets this message, I don't think these "command" opportunities will become more plentiful. I thoroughly enjoyed being in the Air Force and I admire the men and women I worked for and always will, but change is needed.

CMSgt. D. B. Barton,  
USAF (Ret.)  
Montgomery, Ala.

I am constantly amazed that the Air Force thinks so highly of itself. To answer the question of why airmen don't command is very simple. The vast majority of airmen don't deserve to command at that level.

Until recent years, most airmen had seen very little actual combat, if any

**The Finest Air Force Ring  
Out There. Period.**

14K Gold

When I set out to design a ring worthy of a U.S. Airman, I knew it had to be beyond comparison. It had to be instantly recognizable, affordable to all ranks and of the highest quality. My USAF ring is just that.

Each ring is made one-at-a-time to your exact specifications from the finest precious metals. It is cast into a solid piece - without gluing, soldering or any chance of falling apart. Heavy in weight, extreme in detail and made in America, by me, Mike Carroll.

*P.S. It's also guaranteed 100%*

at all. I consider combat being when you hear the bullets passing by your head, not shooting over the horizon at a target you never see. The Air Force doesn't teach officers to command at the level the article talks about. And, with the ingrained culture throughout the Air Force, the vast majority of airmen plan on getting out and retiring instead of planning on serving well beyond the traditional 20-year career. In other words, it's been my experience that most airmen lack the dedication to go all the way.

Quite simply, the Air Force needs to quit whining and crying and just grow up. The Air Force is over 60 years old now, and it's still looking for its identity.

I'm sorry if an airman has to go on convoy duty with the Army. I'm sorry if airmen have to suck it up and go out into the field with members of the other services. But when you raised your hand and took the pledge, you knew what you were getting into. The vacation is over, folks.

Joseph Carroll  
Robins AFB, Ga.

#### Protracted Nuclear War

Actually, the notion of protracted nuclear war predates the Reagan Administration [*"Protracted Nuclear War," March, p. 56*]. The Carter White House and Secretary of Defense Harold Brown conducted an extensive review of nuclear policy in 1977 to 1980.

Ambassador Leon Sloss was the author of the study that was ultimately sent to the White House. You will find many references to this study and the content of the resulting Presidential Directive 59 in the press archives of that time period.

The Reagan Administration adopted and later amplified this doctrine by including ballistic missile defense.

Col. J. E. Scholz,  
USAF (Ret.)  
Vienna, Va.

#### Ground Force Taskings

Otto Kreisher's article "The Ground Force Taskings Go On" in your March 2008 issue of *Air Force Magazine* [p. 42] brought back some very vivid memories of my 1965 tour in Vietnam.

In 1965, I was a C-47 and C-54 airborne radio operator, AFSC A29372, assigned to the 33rd Air Base Squadron, Tan Son Nhut AB, South Vietnam. As an NCO and an aircrew member, I was used to a certain way of life that normally included air-conditioned sleeping quarters and no additional duties.

One day after I had returned from an in-country C-47 supply mission, I was told to report to the squadron first sergeant. Upon reporting to our

first sergeant, I was informed that I would be "pulling guard duty" at the Caravel Hotel in downtown Saigon the very next day.

When I protested to our first sergeant that (1) I was an aircrew member and therefore shouldn't be performing guard duty except when it was to guard the aircraft I was flying on, and (2) the Army was responsible for the security of Saigon—not the Air Force—I was told to be at the squadron orderly room at 0600 the next day.

Upon arriving at the squadron orderly room the next day, I was issued an M-16 rifle and four clips of ammunition and then, together with about 10 other airmen and NCOs, I was driven to the Caravel Hotel in downtown Saigon.

My post was on the roof of the Caravel Hotel and I remained there, quite alone with no food or drink for the next eight hours, when I was relieved by another Air Force NCO. The only "enemy" that I encountered during my eight-hour shift were rather large Vietnamese rats running rampant on the roof of the hotel.

After performing this additional duty four times during a 60-day period, I was finally removed from the Caravel Hotel guard duty roster when I failed to report for my appointed guard duty shift. You see, the day before my shift I was sent TDY to Thailand on board a C-47 and our aircraft had a serious maintenance problem that required both the flight mechanic and me to remain with our aircraft for the next seven days.

Needless to say, I was never assigned to guard the Caravel Hotel again, nor was I assigned any other additional duties during the remainder of my tour in Vietnam.

At least someone in my chain of command recognized that taking an aircrew member out of his primary AFSC to perform guard duty in downtown Saigon, just was not the smart thing to do.

CMSgt. Ken Witkin,  
USAF (Ret.)  
Fort Washington, Md.

### The Air Mail Fiasco

Note that in your article "The Air Mail Fiasco" in the March issue, there is an error on p. 65. In the middle column on that page, it states that Maj. Gen. Oscar Westover "died in a crash when trying to land an AT-17 in a crosswind in 1938."

In fact, Major General Westover was killed while piloting a Northrop A-17AS on Sept. 21, 1938 (as he was attempting to land at the Burbank, Calif., airfield). The Cessna AT-17 Bobcat, a twin-engined advanced trainer, first entered

the Army Air Corps around 1940. So the AT-17 did not yet exist in 1938.

Lt. Col. Ed Sienkiewicz,  
USAF (Ret.)  
Robins AFB, Ga.

"The Air Mail Fiasco" story: Of the solutions the Air Corps looked to [in order to] gain "instrument flying" training, John Correll left out one of the more historical points of that story—the Air Corps' purchase of Edwin Link's Blue Box Trainers (simulator), Link's first military sale. Link continued to upgrade and enhance his trainer over the years, selling over 10,000 "Blue Boxes." Most WWII aviators trained in them—and we know the rest of the story.

Col. Tom Spada,  
USAF (Ret.)  
Charlotte, N.C.

### A Study in Stripes

I enjoyed the article "A Study in Stripes" in the March issue [p. 66]. When I enlisted in the Air Force in January of 1951, the Air Force still used the Army rank structure. After basic training, I was a student and then an instructor in the Career Guidance School at Lowry Air Force Base. I was a one-striper (private first class), but then got promoted to corporal. That meant I could eat in the NCO Mess. I went to breakfast the day after getting the two stripes sewed on and the mess checker greeted me with, "Good morning, Corporal." George Patton was never prouder of a promotion. I was then sent to Long Beach Municipal Airport [Calif.] to work in the orderly room of a reserve training unit. I got promoted to a three-striper. I could answer the phone, "Orderly Room, Sergeant Edwards." Then the rank structure changed and I had to answer, "Orderly Room, Airman Edwards." I immediately applied for Officer Candidate School.

Col. Kenneth W. Edwards,  
USAF (Ret.)  
Corvallis, Ore.

### The Force Was With Her

Congratulations are certainly in order for Jennifer Sinsel, on being chosen as AFA's National Teacher of the Year for 2007 ["The Force Was With Her," *March*, p. 71]. I would like to point out that she is also a member of NASA's Network of Educator Astronaut Teachers (NEAT) as well. NEAT comprises 200 finalists for the 2003 educator astronaut class. Their mission is to target exactly what you mentioned in the article: a lack of interest in science as well as mathematics, technology, and engineering. All NEAT teachers are invited to NASA space

centers each summer (since 2004) to participate in seminars and behind-the-scenes tours of NASA facilities. All of us work to bring wonder to science and build motivation for today's students to study these fields.

As local school districts continue to fight for funds in a time of increasing costs, it is extremely important for NASA to keep helping us by providing professional development and resources and materials.

Congratulations again to Jennifer and a big thank you to NASA for the NEAT Program.

SMSgt. Casey Teliczan,  
USAF (Ret.)  
Cedar Springs, Mich.

### Classics

I reckon you'll get more than just this reference to your stating that the "max range" of the P-38 Lightning was "450 mi"—especially when the Yamamoto "raid" was 500 miles ["*Airpower Classics: P-38, March*, p. 80]. We flew our F-5s 800 to 900 miles every day from San Savero, Italy, usually landing with a fair amount of gas remaining. We ran out of film before gas unless we got chased by the bad guys. The P-38 was the bird in which Charles Lindbergh refined the low RPM-full throttle cruise, which made fighter legs a lot longer with or without drop tanks. Your magazine gets better each year, and so does my memory of firing up sitting between those musical engines at age 20.

Col. David Winn,  
USAF (Ret.)  
Colorado Springs, Colo.

In many earlier publications, it always states that the Germans called the P-38 the "Fork-tailed Devil." I just want to report that the Germans I knew, and that included myself back in the early days, called it the "Doppelschwanz Jaeger" (double-tail fighter). Devil (Teufel) might have been used by the Japanese, but it is not a common word in German except for the religious connotations.

I was a young teenager at that time, riding my bicycle to school along a country road, dropping into the next ditch when I heard the very distinct noise of the Lightning's two engines. The GIs must have been bored at times because they had great fun using their Lightnings and their Mustangs in strafing lone bicycle or motorbike riders or single cows in fields. We were envious at times. I have flown other things since then, but I still wish I could have flown a P-38.

## Gigged by McCaffrey; UAV Absurdity; China Moves Out ....

### Make Your Case Now

The US armed forces—especially the Air Force—urgently need to be reset and modernized, and the defense community must now make that case to political leaders who believe the military can be run on the cheap. So said Barry R. McCaffrey at a Capitol Hill seminar in March.

McCaffrey, a 1991 Gulf War Army division commander, later national drug war czar, and now a military commentator and consultant, said that it's "been a failure of those in uniform for the last seven years" that they've anticipated the outcome of a political debate about social programs versus discretionary spending, and given political leaders "the answer they'd like to hear" rather than an honest military assessment.

McCaffrey observed that former Defense Secretary Donald H. Rumsfeld told the uniformed leadership to expect "dramatically lower" budgets, and they in turn designed their forces "to live inside" expected funding. However, McCaffrey said it's "nonsense" that the nation can't afford the military it needs.

"I do not believe this country is an impoverished nation that can barely afford" the existing defense budget, he said. "I don't think this is a serious argument" when national leaders can quickly agree to send out \$600 checks to individuals "to pay their cable TV bills," he asserted.

McCaffrey urged agency heads to "get an ethically sound defense argument, put it on a piece of paper, and submit it for consideration. Then let the political debate take place." He said if the case is made soundly enough, "the American people will ... respond to that argument."

Specifically, McCaffrey said it would probably take "5.2 percent of GNP for five years to get ourselves out of this mess we've put ourselves in" by constraining military spending too much for too long.

The Air Force, he said, is "grossly underfunded," chronically \$18 billion to \$20 billion short in meeting its annual recapitalization needs. That's "basically a month's burn rate" of the cost of the wars in Iraq and Afghanistan, he added. It is "completely outrageous" that the Air Force must accept a 98-year aircraft replacement cycle.

"To be blunt, the tool of choice to maintain the peace 20 years from now is the United States Air Force," McCaffrey asserted. "You've got to pay for it in advance, and it costs a lot of money."

The Air Force is being asked to make do with 183 F-22s, which McCaffrey called a gimmick, and not a credible plan for control of the air. The Raptor is "a prerequisite to us preserving our ability to act ... to guarantee that the Navy can operate, and guarantee that our C-17s can land." At that level, the Air Force can only actually use "90 or 100 F-22s," if 40 are in training, 20 are in the shop, and 20 more are being held out "to protect against another threat." What's left puts the F-22 in the category of "a special-purpose ... aircraft" rather than a front-line fighter. He thinks the Air Force ought to have at least 350 F-22s.

"The principle axiom of US military power is, don't ever get in a fair fight," McCaffrey observed. "You need to stay two generations or more ahead of your competition."

In any future conflict, "clearly, option No. 1 is airpower.

Photo by Jim Dunn

*The F-22 is in danger of becoming too special, says McCaffrey.*

It's not rolling around in the mud throwing hand grenades at somebody 20 feet away."

McCaffrey said the country has "had it" with the wars in Southwest Asia, and is "going to tell us, 'Don't you do that again.'" However, there's the classic danger of shaping the force for the last war. He doesn't want the Army "trying to invent a force that could have gone into Iraq—minus the idiocies of Secretary Rumsfeld—and won." Air and naval power will be the principle guarantors of freedom of action and the tools of deterrence in the coming decades, he asserted.

The next President of the US must reset the military, "particularly if you don't want to fight. If you ... don't like having 34,000 killed and wounded, then you have to put a deterrence capability in place that's politically and militarily credible."

McCaffrey criticized Rumsfeld for making major strategic changes by executive fiat, with no national debate at all. He said Rumsfeld pulled American forces out of Western Europe, South Korea, Japan, and elsewhere, and moved them to bases in the heartland of the US, without then buying "the air and naval power to credibly project them back into their battle areas." He also faulted Congress for not stepping in as it was happening and demanding more explanations.

The situation now demands that the US buy 600 C-17s, a figure that McCaffrey said is not only realistic but necessary, given that the US is so dependent on air mobility to deploy forces quickly. The C-17, he said, is also not an Air Force or even a military asset but "national transportation capability," and one that will be essential in responding to any major humanitarian crisis at home or abroad. It's also a capability "you can't buy ... off the market."

The C-17 is especially important to the war in Afghanistan, especially if "Pakistan goes sour" and the US cannot depend on port facilities in that country.

Back in the late 1990s, when he was an Army general, McCaffrey said the senior uniformed leadership agreed to go to a "single fleet" of strategic airlifters—namely, the C-17. The C-5 is so old and unreliable, it should probably be relegated to use as "a flowerpot," he added.

The defense community "had better start talking" to the three

main Presidential candidates now if the defense funding crisis is to be addressed properly.

"Write your white paper right now; don't waste it on the last eight months of the [Bush] Administration," McCaffrey admonished, "and let's get out there and have a debate that doesn't fall back on '60s twaddle."

### View From the Mud

Internal Pentagon slugfests over roles and missions are "asinine," given that service budget shares remain at about one-third each, despite several Quadrennial Defense Reviews, retired Army Gen. Barry McCaffrey said at a Capitol Hill symposium in March. What's needed is some common sense, he said.

Despite the zero-sum battle for dollars, the force has made huge strides in jointness over the last 20 years, McCaffrey said, and should do even better with some clear thinking.

For example, he said, it should be obvious who ought to be in charge of unmanned aerial vehicles.

"It is patently absurd to not see that airspace ought to be integrated in a joint manner. There ought to be a single agency doing this ... probably [the] Air Force," McCaffrey said. The Pentagon leadership last year rebuffed the Air Force's push to be made executive agent for UAVs flying above 3,500 feet. USAF argued that it could save money by reducing duplication of effort, get the most out of UAVs by putting them where they're needed most, and deconflicting the thousands of such vehicles in the battlespace with manned aircraft. The Army argued that its division commanders have to have their own UAVs, and clear airspace above their operating areas in which to fly them.

It is "completely stupid to block out huge pieces of airspace because [an infantry division commander] wants to fly a Predator overhead," McCaffrey said. "I do not understand why we cannot have a joint commander ... do that." He said the likely reason is decades of distrust of the Navy and Air Force among the ground services, going back to World War II, when they believed they'd been left uncovered by airpower.

He floated the idea that an Army or Marine division ought to be a joint command, "and the No. 2 guy ought to be an Air Force one-star" because of the hundreds of Air Force people embedded with a division—"inside it, never mind flying in support of it"—as the ground forces' connection to aircraft overhead.

McCaffrey said he's baffled as to why the Air Force's role in the two ongoing wars seems unsung. He noted that "a rifle platoon ... can get a B-1 bomber overhead in 20 minutes," and C-130s are precision-air-dropping supplies to units at "9,000 feet in the Hindu Kush, ... putting them inside the platoon perimeter."

### China Rising

China continues to grow and modernize its military at a brisk and disturbing pace, and is taking steps to rapidly move beyond simply being a regional power, the Pentagon said in its most recent annual review of China's military capabilities and trends, released in March.

The review notes a continued spending spree by China on advanced new systems, both imported from abroad and developed indigenously, and the basing of an ever-growing force of aircraft and ballistic missiles on the coast of the Taiwan Strait. It marked a growing number of Chinese cyber intrusions into the defense networks of the US and other countries worldwide, possibly as practice runs in the event of armed conflict. China is also spending heavily on space systems and counterspace systems, all with an eye toward blunting those capabilities in which the US enjoys an edge.

At the same time, China is working hard to professionalize

its military ranks, reducing numbers of troops somewhat but raising the quality of the people and systems it retains.

Although the US "welcomes the rise of a stable, peaceful, and prosperous China," that country is quickly shifting focus from fielding massive ground forces to being "capable of fighting and winning short-duration, high-intensity conflicts along its periphery against high-tech adversaries," according to the report. The Pentagon reiterated its 2006 Quadrennial Defense Review assertion that China has the "greatest potential to compete militarily with the United States."

The report specifically highlighted progress in Chinese missiles of every kind—"advanced cruise missiles, medium-range ballistic missiles, anti-ship ballistic missiles designed to strike ships at sea, including aircraft carriers"—and its test of direct-ascent anti-satellite weapons.

China's defense spending now dwarfs that of its neighbors, according to its own published figures and Pentagon estimates. By its own account, China upped its military spending by nearly 20 percent in 2007, and over the last 12 years, it has raised annual defense spending at roughly the same pace as its economy is growing.

The self-reported Chinese military budget for 2007 is about \$46 billion; however, because it doesn't count whole categories of spending, such as research and development, and purchases of military hardware abroad, the figure under-reports the true scope of China's military outlays. The Pentagon pegs China's military budget for 2007 at between \$97 billion and \$139 billion—roughly double to triple what Russia or Japan spend on defense, and five to seven times India's outlay.

While China's defense spending is about a third that of the US—not counting military operations in Iraq or Afghanistan—due to a profound difference in the pay and benefits received by Chinese troops versus their US counterparts, the relative percentage of each country's budget that goes to buying capital equipment such as aircraft, tanks, and naval vessels is narrowing rapidly.

This year's report on China's military power, unveiled at a Pentagon press conference, is the first that represents the US government's "unified view," according to David Sedney, deputy assistant secretary of defense for East Asia. It collated the estimates of the State Department, intelligence community, National Security Council, and other agencies, along with that of the Defense Department, he said.

Sedney noted an acceleration in China's cyber intrusions in US and other nations' sensitive defense networks. It's not easy to know how much China may have seen and copied, or whether it corrupted some databases deliberately, Sedney said. Although Chinese hackers have not penetrated the most sensitive networks, "they gain an awful lot" by rooting around in unclassified areas where there is useful "scientific and technological material," such as in contracting databases. The Pentagon is constantly reviewing what should be classified and more vigorously protected, he said.

The China report notes some small decreases in certain types of hardware in the Chinese inventory, but David Helvey, the Pentagon's director of China, Taiwan, and Mongolia affairs, said this is indicative of the modernization effort.

"I would ... point out that as China's military forces improve, in terms of the quality of their equipment, you'll also see the retirement of older platforms and airframes." This is a clear indication of "a military that is undergoing a comprehensive transformation."

Sedney reiterated an oft-stated demand that China provide more "transparency" in its defense planning and spending, saying that unless China's military aims and capabilities are made clear, other countries will have to hedge their military posture relative to that of China. ■

# Are we ready for CSAR-X?

## We were born ready.

## The tradition continues.

In the world of vertical flight, one name stands above the rest. Sikorsky has been carrying American service men and women to safety for 60 years. When you think about it, it's what we do best. And it's one of many reasons why the right-sized, right-priced HH-92 is the right choice for the U.S. Air Force Combat Search and Rescue system. Smart, tough, network-connected, and technologically advanced, the HH-92 is also the most survivable solution – when lives are on the line, there's only one name to know.

Sikorsky.

**Sikorsky**

A United Technologies Company

Did you know? The HH-92's fly-by-wire system gives it the smallest vulnerable area of any CSAR-X alternative.

[www.sikorsky.com](http://www.sikorsky.com)

## F-16 Crash Claims Pilot

Second Lt. David J. Mitchell, 26, of Amherst, Ohio, died March 14 when the F-16 he was piloting crashed during a training mission in a remote area three miles south of Alamo Lake, Ariz. His body was found in a ravine near the aircraft wreckage.

Mitchell, from the Ohio Air National Guard's 180th Fighter Wing in Toledo, was assigned to the 62nd Fighter Squadron at Luke AFB, Ariz., since November 2007 as a student pilot. He had a total of 237 flying hours, with about 26 in the F-16. A safety and accident investigation was ongoing as of late March.

## Airman Killed in Helicopter Crash

SSgt. Christopher S. Frost, 24, of Waukesha, Wis., was killed March 3 in the crash of an Iraqi Army Mi-17 helicopter near Baiji, Iraq, during a dust storm. The crash also claimed the lives of seven members of the Iraqi Air Force who were onboard.

Frost, a six-year Air Force veteran, was

a public affairs specialist who had deployed in September 2007 to the Multinational Security Transition Command-Iraq from the 377th Air Base Wing at Kirtland AFB, N.M.

## Debris To Fall Soon

The US military believes that all debris created in space from February's successful destruction of a nonfunctioning, deorbiting intelligence satellite will re-enter the atmosphere and burn up by around early June, Air Force Gen. Kevin P. Chilton, commander of US Strategic Command, said March 4.

Chilton said this assessment was "more optimistic" than earlier predictions that indicated that it might take "six months to a year" for all remnants of the school bus-sized satellite to come down to Earth.

US defense officials stated that the pulverizing collision Feb. 20 between the doomed satellite and a modified ship-launched anti-missile missile outside of

## CV-22s May Deploy to Combat This Year

The Air Force said in March it is considering sending the CV-22 Osprey tilt-rotor aircraft on its first combat deployment later this year. The "potential first deployment" is possible "in the fall of 2008" after the conclusion of the flying phase of initial operational test and evaluation in June, Lt. Gen. Daniel J. Darnell, deputy chief of staff for air, space, and information operations, plans and requirements, told a House oversight panel March 11.

Air Force Special Operations Command is buying 50 CV-22s to replace the command's aged MH-53 Pave Low helicopters, all of which will be retired by October. While USAF expects to reach initial operational capability with the CV-22 in Fiscal 2009, deploying them to combat before IOC would avoid a capability gap between the formal combat-ready date and the MH-53 phaseout, service officials have said.

AFSOC had nine CV-22s in its possession as of March, including four primary mission aircraft, one test asset, and four being used for training pilots. Deploying the CV-22s before formal IOC "presents challenges," Marine Corps Col. Matt Mulhern, Osprey program director with Naval Air Systems Command, said March 18. "We have very limited numbers of CVs out there, so we are sharing them between test and training," he said.

Mulhern said CV-22s that would deploy are expected to possess the interim forward-firing gun system that his office is pursuing for the Osprey fleet until a more refined follow-on system is introduced. The interim gun features a GAU-17/A that fires a 7.62 mm round, he said.

The Air Force expects to have all 50 of AFSOC's CV-22s in the fleet by 2017, but AFSOC and US Special Operations Command would like to get them earlier. "There are opportunities in the production line to accelerate that, and so we are seeking some funding in order to do that," Adm. Eric T. Olson, SOCOM commander, told the Senate Armed Services Committee March 4. The current delivery rate is "too slow," he said.

USAF photo by TSgt. Scott T. Sturkol

the atmosphere over the Pacific Ocean left debris in the lower echelons of space no larger than the size of a football.

#### **Nuclear Rotation Eyed for B-52s**

Gen. T. Michael Moseley, Air Force Chief of Staff, said March 12 he expects Air Combat Command to soon begin rotating B-52 squadrons between their nuclear and conventional roles.

Testifying before the Senate Appropriations subcommittee, Moseley said one

squadron would rotate for six months or a year at a time into the nuclear mission, while two other B-52 squadrons would perform in the conventional role, since the Air Force still needs the ability to deploy to the Pacific or the Middle East quickly.

The move is one of many that USAF has instituted or plans to do to improve safety and oversight of the nation's nuclear weapons after the errant transfer of six nuclear warheads on a B-52 flight from

North Dakota to Louisiana in August 2007. Moseley acknowledged that the new plan could require that USAF maintain a total aircraft inventory of 76 B-52s vice the 56 that are currently budgeted. ACC and the Air Staff hadn't yet determined the final number, he said.

#### **B-1B Flies With Synthetic Fuel Mix**

*As two family members grieve, a caisson bearing the flag-draped coffin of Air Force Maj. Robert Francis Woods proceeds toward his grave site at Arlington National Cemetery, Va. Woods died June 26, 1968 when his O-2A Skymaster crashed in a remote mountainous area of what was then North Vietnam. US officials in November announced identification of his remains.*

## Boeing Protests KC-X Award, Northrop Calls it "Fair"

Boeing lodged a formal protest March 11 to the Government Accountability Office over the Air Force's Feb. 29 award to Northrop Grumman of the multibillion-dollar KC-X tanker contract. The Chicago-based company alleged that USAF's evaluation process—which judged the Northrop Grumman KC-30 to be clearly superior to Boeing's KC-767—was "seriously flawed and resulted in the selection of the wrong airplane."

Meanwhile Northrop Grumman Chairman and CEO Ronald Sugar said March 13 the Air Force's evaluation was fair and called on lawmakers to let the GAO process play out and then allow the KC-45A program to move forward. "To do anything different," he cautioned, "frankly, would undermine the integrity of the overall procurement process." The GAO had 100 days from the receipt of the protest to rule. The Air Force issued a stop-work order to Northrop Grumman after the protest.

Boeing said March 11 that while the Air Force did start out trying to run a "fair, open, and transparent competition," the process developed what Mark McGraw, Boeing vice president for tankers, called "irregularities." The competition was close, and the many accommodations made to keep Northrop Grumman's larger KC-30 from being disqualified added up to a narrow win for it, he said.

The KC-30, which USAF now designates KC-45A, is based on European Airbus' A330 commercial aircraft. Some lawmakers also questioned the decision since, at first glance, they said it appeared to represent a setback for American manufacturing to the benefit of European Airbus and its parent company EADS.

"This is not a done deal," Rep. John P. Murtha (D.-Pa.), chairman of the House Appropriations defense subcommittee, told reporters March 5 after holding a hearing on the tanker award. Instead he said his committee would scrutinize the award to ensure it best promotes national security. "All this committee has to do is stop the money and this program's not going to go forward," he said during the hearing.

Sue C. Payton, USAF's acquisition executive, refuted any alleged unfairness and lack of transparency in the evaluation process. "To put it very succinctly, we did an awful lot more in this particular source selection than in any other source selection to be open, transparent, and fair to the offerors," she told a Senate oversight panel March 12.

Gillespie House, as it is now known, will serve as joint service living quarters.

Gillespie, 44 at the time of his death, was deployed from Luke AFB, Ariz., to help mentor soldiers of the Afghan National Army. Earlier, two roads, one at Luke and one at Bagram AB, Afghanistan, were dedicated in his name.

## CSAF Favors GDP Standard

Tying the annual defense budget to four percent of the nation's gross domestic product makes sense and it appears to be an opportune time to take up the issue at a national level, Gen. T. Michael Moseley, Air Force Chief of Staff, said Feb. 28.

Doing so would ease the services' existing shortfalls—USAF says, for example, it is running \$20 billion short each year—and allow each military branch to plan more efficiently and effectively over the long term, he told defense reporters. This is more difficult to do under the current system of using emergency supplemental wartime appropriations to address pressing shortfalls.

"What some of us have been saying is why don't we look at something that is about four percent as a floor and try to get the supplemental business into the baseline budget," Moseley said. In rough numbers, increasing the defense budget to four percent of GDP would bring in an extra \$80 billion to \$100 billion annually over current levels, he said.

## Modernize or Suffer, General Warns

The Air Force is at a critical point in maintaining air, space, and cyberspace dominance and must field new aircraft

to fly at supersonic speeds burning the synthetic fuel blend that USAF wants its entire inventory cleared to use by early 2011.

The B-1B conducted the four-and-a-half hour flight over White Sands Missile Range, N.M., with all four of its General Electric F101-GE-102 turbofan engines burning the fuel mix of 50 percent traditional JP-8 aviation fuel and 50 percent synthetic kerosene derived from natural gas under a method called the Fischer-Tropsch process.

The bomber aircrew performed a full complement of operational maneuvers, including both low speed and supersonic flight, USAF said. Initial postflight comments from the crew indicated they observed no anomalies and encountered no problems.

## Fallen Airman Honored at Eggers

The US military March 2 dedicated a building at Camp Eggers in Afghanistan to Air Force MSgt. Randy Gillespie, who died July 9, 2007 in Herat, Afghanistan, from small-arms-fire inflicted wounds.

## Senior Staff Changes

**NOMINATIONS: To be General:** Stephen R. Lorenz. **To be Lieutenant General:** Dana T. Atkins, Allen G. Peck, Vern M. Findley II, John T. Sheridan.

**CHANGES:** Maj. Gen. Robert R. Allardice, from Cmdr., Coalition AF Transition Team, Multinational Security Transition Command-Iraq, ACC, Baghdad, Iraq, to Dir., Strategy, P&P, CENTCOM, MacDill AFB, Fla. ... Brig. Gen. C.D. Alston, from Dir., Space & Nuclear Ops., Dep. C/S, Ops., P&R, USAF, Pentagon, to Dir., Nuclear Ops., P&R, Dep. C/S, Ops., P&R, USAF, Pentagon ... Lt. Gen. (sel.) Dana T. Atkins, from Spec. Asst. to the Cmdr., PACAF, Hickam AFB, Hawaii, to Cmdr., 11th AF, Elmendorf AFB, Alaska ... Brig. Gen. (sel.) Norman J. Brozenick Jr., from Dep. Dir., Studies & Analyses, Assessments, & Lessons Learned, USAF, Pentagon, to Asst. Commanding Gen. Jt. Spec. Ops. Command, SOCOM, Ft. Bragg, N.C. ... Brig. Gen. Michael W. Callan, from Cmdr., 23rd AF, SOCOM, Hurlburt Field, Fla. to Vice Cmdr., 17th AF, USAFE, Sembach AB, Germany ... Brig. Gen. Richard T. Devereaux, from Cmdr., 82nd Tng. Wg., AETC, Sheppard AFB, Tex., to Dep. Dir., Air, Space, & Info., AMC, Scott AFB, Ill. ... Brig. Gen. Eric E. Fiel, from Dep. Commanding Gen., Jt. Spec. Ops. Command, SOCOM, Ft. Bragg, N.C., to Dir., Center for Force Structure, Rqmts., Resources, & Strat. Assessments, SOCOM, MacDill AFB, Fla. ... Lt. Gen. (sel.) Vern M. Findley II, from Dir., Strategy, Plans & Policy, CENTCOM, MacDill AFB, Fla., to Vice Cmdr., AMC, Scott AFB, Ill. ... Maj. Gen. Maurice H. Forsyth, from Dep. Combined Forces Air Component Cmdr., CENTCOM, Al Udeid AB, Qatar, to Commandant, AWC, AETC, Maxwell AFB, Ala. ... Brig. Gen. Byron C. Hepburn, from Command Surgeon, AMC, Scott AFB, Ill., to Cmdr., AF Medical Spt. Agency, Bolling AFB, D.C. ... Brig. Gen. Frank J. Kisner, from Dir., Center for Force Structure, Rqmts., Resources, & Strat. Assessments, SOCOM, MacDill AFB, Fla., to Cmdr., Spec. Ops. Command Europe, EUCOM, Stuttgart-Vaihingen, Germany ... Maj. Gen. Ronald R. Ladnier, from Cmdr., Tanker Airlift Control Ctr., AMC, Scott AFB, Ill., to Cmdr., 17th AF, USAFE, and Air Component Cmdr. to AFRICOM, Sembach AB, Germany ... Gen. (sel.) Stephen R. Lorenz, from Cmdr., AU, AETC, Maxwell AFB, Ala., to Cmdr., AETC, Randolph AFB, Tex. ... Brig. Gen. Otis G. Mannon, from Dep. Dir., Spec. Ops., Joint Staff, Pentagon, to Cmdr., 82nd Tng. Wg., AETC, Sheppard AFB, Tex. ... Brig. Gen. Susan K. Mashiko, from Cmdr., Mil. Satellite Comm. Systems Wg., AFSPC, Los Angeles AFB, Calif., to Vice Cmdr., SMC, AFSPC, Los Angeles AFB, Calif. ... Maj. Gen. Stephen J. Miller, from Commandant, AWC, AETC, Maxwell AFB, Ala., to Cmdr., AF Doctrine Dev. & Education Center, AETC, Maxwell AFB, Ala. ... Brig. Gen. Ellen M. Pawlikowski, from Vice Cmdr., SMC, AFSPC, Los Angeles AFB, Calif., to Dep. Dir., NRO, Chantilly, Va. ... Lt. Gen. (sel.) Allen G. Peck, from Cmdr., AF Doctrine Dev. & Education Center, AETC, Maxwell AFB, Ala., to Cmdr., AU, AETC, Maxwell AFB, Ala. ... Brig. Gen. Douglas J. Robb, from Cmdr., 81st Medical Group, AETC, Keesler AFB, Miss., to Command Surgeon, AMC, Scott AFB, Ill. ... Maj. Gen. Winfield W. Scott III, from Spec. Asst. to the Cmdr., AMC, Scott AFB, Ill., to Cmdr., 18th AF, AMC, Scott AFB, Ill. ... Lt. Gen. (sel.) John T. Sheridan, from Dep. Dir., NRO, Chantilly, Va., to Cmdr., SMC, AFSPC, Los Angeles AFB, Calif. ... Maj. Gen. (sel.) Mark S. Solo, from Dep. Dir., Air, Space, & Info. Ops., AMC, Scott AFB, Ill., to Cmdr., Tanker Airlift Control Ctr., AMC, Scott AFB, Ill. ... Brig. Gen. Alfred J. Stewart, from Cmdr., 21st Expeditionary Mobility Task Force, AMC, McGuire AFB, N.J., to Cmdr., AF Recruiting Service, AETC, Randolph AFB, Tex. ... Brig. Gen. Suzanne M. Vautrinot, from Cmdr., AF Recruiting Service, AETC, Randolph AFB, Tex., to Dep. Cmdr., Jt. Functional Component Command-Network Warfare, STRATCOM, Ft. Meade, Md. ... Brig. Gen. (sel.) Daniel O. Wyman, from Command Surgeon, PACAF, Hickam AFB, Hawaii, to Cmdr., 81st Medical Group, AETC, Keesler AFB, Miss.

**SENIOR EXECUTIVE SERVICE RETIREMENTS:** Donald L. Cazel II, Kathryn M. Halvorson.

**SES CHANGES:** Ricky L. Peters, to Dir., P&P, AF Research Lab., AFMC, Wright-Patterson AFB, Ohio ... Sharon K. Puschmann, to Asst. Auditor General, Acq. & Log. Audits, AF Audit Agency, Wright-Patterson AFB, Ohio ... Patsy J. Reeves, to Dir., Contracting, ASC, AFMC, Wright-Patterson AFB, Ohio ... John W. Steenbock, to Dep. Dir., Manpower, Personnel, & Svcs., AFMC, Wright-Patterson AFB, Ohio ... Thomas S. Wells, to Dir., 711th Human Performance Wg., AF Research Lab, AFMC, Wright-Patterson AFB, Ohio. ■

risk being outclassed in a future conflict and becoming irrelevant, said Gen. Bruce Carlson, commander of Air Force Materiel Command, Feb. 27.

"Soon we could be flying against aircraft and air defense systems that our older aircraft were not intended to fly against," Carlson said during a visit to Air University at Maxwell AFB, Ala. "And if we don't have the freedom to operate in hostile territories, we risk fighting the next conflict on our home territory."

Carlson said the almost constant state of war for more than 17 years has taken its toll on the Air Force. For example, required maintenance on the F-15 has skyrocketed from 600 hours to 700 hours more than official estimates, he said. "We're getting into unknown territory because we've been

flying airframes longer than expected," he said. "We didn't build these aircraft to last this long."

## Senators Seek Empowered Guard

Sen. Patrick Leahy (D-Vt.) and Sen. Christopher Bond (R-Mo.), co-chairmen of the National Guard Caucus, announced new legislation in mid-March to "empower the Guard for its modern-day missions." Together with Rep. Thomas Davis (R-Va.) and Rep. Gene Taylor (D-Miss.), they introduced S 2760 and HR 5603, two identical follow-on National Guard Empowerment bills that, according to Leahy's statement, would "obligate the Department of Defense to pay greater attention to the mission of homeland defense and to further empower the National Guard to carry out its missions in support of civil authorities at home."

Their initiative builds on the earlier Guard Empowerment bill. That effort led to language in the Fiscal 2008 defense authorization act that elevated the head of the National Guard Bureau to four-star status. Now they also want to try again to secure a seat for the NGB chief on the Joint Chiefs of Staff.

## Schwartz Stands By C-17 Ceiling

A fleet of 205 C-17s and 111 modernized C-5s appears to be the right mix of strategic airlift, even with the growth of the Army and Marine Corps and factoring in recent changes to the Pentagon's upgrade plans for the C-5, Air Force Gen. Norton A. Schwartz, commander of US Transportation Command, told a Senate oversight panel March 12.

The Pentagon leadership, in February, restructured C-5 modernization by opting to upgrade the engines on only 52 of USAF's 111 C-5s, vice all of them, although they will all still receive new avionics. Despite this, Schwartz said he stands by the recommendation he made in November 2007 that called for the 205-111 mix and

**Wheels Up:** An A-10 from the 75th Fighter Squadron, Moody AFB, Ga., rests on the runway at Edwards AFB, Calif., after a March 25 emergency landing. ## Chilton Reaffirms Need for RRW

Although world dynamics have shifted abruptly since the end of the Cold War, the need for nuclear weapons remains indefinitely, Air Force Gen. Kevin P. Chilton, commander of US Strategic Command, said March 4.

"I believe we are going to need a nuclear deterrent in this country for the remainder of this century," he told defense reporters in Washington, D.C. Indeed, as long as there are nations with enough nuclear weapons to destroy the United States, "we will have to deter those types of countries," he said.

Because of this, it is all the more critical to develop and field a new nuclear warhead design called the Reliable Replacement Warhead, along with a flexible support infrastructure for production and maintenance of the weapons, Chilton said.

The US is committed with Russia to reducing its operational nuclear forces to between 1,700 and 2,200 warheads in 2012. There is talk of going beyond that in a new round of arms reduction talks.

With RRW and the new infrastructure, there is "an opportunity not only perhaps to lower the deployed warheads, but certainly to lower the number of warheads that we have on the shelf," the general said. This would be possible since there would be more confidence in the reliability and maintainability of the RRW compared to existing designs, especially in the absence of detonation tests, he said. Further, the responsive infrastructure would hedge against strategic uncertainty, Chilton said.

The modern RRW design would also have safety and security features to thwart terrorists from being able to use it if they somehow acquired one, he said.

Congress has been wary of the Administration's plans with RRW and has allowed development to proceed only at a deliberately slow pace. Chilton said the time is now to act on this issue one way or the other. "This is not something we can continue either not to talk about or push down the road to future generations," he said.

keeping the C-17 production line open for the time being as a hedge in case the C-5 upgrade work should falter.

Another reason Schwartz said he cautions against more than 205 C-17s is the need to maintain a healthy balance between the nation's organic airlift and the ancillary capabilities provided by the Civil Reserve Air Fleet. "I caution about overbuilding the organic fleet," he said.

## GPS Satellite Launched

The Air Force and its industry partners successfully launched a modernized Global Positioning System Block IIR satellite into space March 15 from Cape Canaveral AFS, Fla., aboard a United Launch Alliance Delta II rocket. The satellite, designated GPS IIR-19M, is the sixth of eight modernized GPS IIR spacecraft that Lockheed Martin built and subsequently upgraded to provide increased signal power, accuracy, and resistance to jamming.

The mission was the third consecutive successful launch of a GPS IIR-M satellite since October 2007. The remaining two Block IIR-M satellites are scheduled to go into orbit in 2008.

Two days prior, the Air Force launched a classified National Reconnaissance Office intelligence satellite into orbit from Vandenberg AFB, Calif., aboard a ULA Atlas V booster. The mission was the first Atlas V launch from Vandenberg.

## B-1B Accident on Guam

A B-1B bomber was damaged March 7 during a ground mishap at Andersen AFB, Guam, but there were no injuries, according to Air Combat Command. The B-1B had stopped on the island while transiting home to Ellsworth AFB, S.D., from the Singapore Air Show.

The bomber had taken off from Andersen for home, but soon returned after the aircrew declared an in-flight emergency. Upon landing, the aircraft taxied to the designated spot off the runway to be met by emergency response vehicles. The aircraft stopped there, but then unexpectedly rolled into two emergency vehicles, causing the damage. An investigation was ongoing as of late March.

The incident was the second involving a bomber at Guam in a two-week period. On Feb. 23, a B-2A stealth bomber crashed after takeoff from Andersen.

## Services Reaffirm C-27 Commitment

Gen. T. Michael Moseley, Air Force Chief of Staff, signed a letter Feb. 27 with Army Chief of Staff Gen. George W. Casey Jr. that reiterates both services' commitment to the C-27 transport aircraft program "on the current fielding timeline and in accordance with the current beddown plan."

The existing plan has been to buy 78 C-27s, including 24 for the Air Force. But speaking to defense reporters the next day, Moseley said he anticipates that the joint number will grow to "about 125 airplanes." Air National Guard and even active duty units may fly USAF's inventory of them, he said. Air Force Special Operations Command is also exploring a gunship variant.

## First Air Force Reserve Space Wing

The Air Force activated the 310th Space Wing, the first Air Force Reserve space wing, March 7 at Schriever AFB, Colo. At the time of the standup, the unit, previously known as the 310th Space Group, had about 600 reservists in 16 subordinate units at Schriever,

## The War on Terrorism

### Operation Iraqi Freedom—Iraq

#### Casualties

By April 18, a total of 4,039 Americans had died in Operation Iraqi Freedom. The total includes 4,028 troops and 11 Department of Defense civilians. Of these deaths, 3,295 were killed in action with the enemy while 744 died in noncombat incidents.

There have been 29,780 troops wounded in action during Operation Iraqi Freedom. This number includes 16,483 who were wounded and returned to duty within 72 hours and 13,297 who were unable to return to duty quickly.

#### B-1 Destroys Torture Compound

A B-1B Lancer bomber destroyed an al Qaeda torture compound and prison in Zenbaraniyah, Iraq, on March 10. It dropped six GBU-38s in a coordinated strike with Multinational Force-Iraq and Iraqi forces.

The town, south of Baghdad, had been an al Qaeda hotbed until local militias began combating the terrorist influence. The B-1B strike removed the last remnants of al Qaeda from the area, said MNF-I officials.

#### Iraqi Air Force Building More Capability

The Iraqi Air Force is making significant progress in its goal to support Iraq's armed forces in a counterinsurgency fight, and will be fielding new offensive capabilities in the next few years to fill the roles currently performed by coalition aircraft.

Maj. Gen. Robert R. Allardice, commander of the Coalition Air Force Transition Team, told reporters March 17 that the 360 airmen under his command have been working with Iraqis to expand and build up the country's meager air assets.

In March 2007, when Allardice arrived in Iraq, the IAF featured only about 700 personnel and 28 aircraft ready to fly. By the end of 2007, with the help of the CAFTT, the IAF flew about 300 sorties a week and boasted a force of 1,350 personnel with an additional 450 students in training, he said.

As the IAF grows, the force is taking on more missions that coalition air assets have been performing, including combat support in countering terrorists. Training capacity for Iraqi pilots and maintainers is expanding.

The aircraft inventory is also growing, with the IAF expected to have about 100 operational aircraft by the end of 2008, Allardice said. About half that force will be helicopters, such as UH-1 Hueys and Mi-17 utility helicopters.

Most of the IAF's offensive capabilities are built around their rotary aircraft, using forward-firing rocket pods. But its three C-130s are also in high demand for battlefield mobility, as are its smaller Cessna 208 Caravans for missions such as surveillance and reconnaissance.

IAF helicopters are already performing medical evacuation missions on the battlefield. In 2009, the Iraqis plan to procure a dedicated counterinsurgency aircraft that will directly support Iraqi troops in the field.

### Operation Enduring Freedom—Afghanistan

#### Casualties

By April 12, a total of 488 Americans had died in Operation Enduring Freedom. The total includes 487 troops and one Department of Defense civilian. Of these deaths, 293 were killed in action with the enemy while 195 died in noncombat incidents.

There have been 1,928 troops wounded in action during OEF. This number includes 751 who were wounded and returned to duty within 72 hours and 1,177 who were unable to return to duty quickly.

#### C-130 Crews Set New Airdrop Record

The aircrews of the 774th Air Expeditionary Squadron at Bagram AB, Afghanistan, set a new airdrop record in February when the unit delivered about one million pounds of cargo, including humanitarian aid to villages and supplies to forward bases in the country.

The mark was a 40 percent increase from January operations and broke the previous airlift record set in September 2007. Supporting the 774th AES were the Army's 11th Quartermaster Rigger Detachment and Combined Joint Special Operations Task Force riggers.

Buckley, and Peterson AFBs, Colo., and Vandenberg AFB, Calif., supporting Air Force Space Command, Air Combat Command, Air Force Cyber Command, and the Department of Commerce. The wing is expected to grow to more than 800 personnel.

#### New Protest Filed Over KC-135

Alabama Aircraft Industries Inc. filed a new legal protest against the Air Force March 12 concerning a \$1.1 billion maintenance contract for the KC-135 tanker. AAI lodged the complaint—its second since September 2007 in the ongoing dispute—based on the belief that USAF failed to comply with an earlier Government Accountability Office ruling in the company's favor.

AAI (formerly Pemco Aviation) lost out to Boeing last September in the original competition, but won a protest with GAO last December over how the Air Force evaluated the risk in Boeing's proposal. USAF agreed to go back and re-evaluate, but after doing so, it concluded in early March that Boeing deserved the contract. GAO had 100 days to rule after receipt of the complaint.

#### Renuart Says ONE Is Essential

Modernizing the sensor systems that monitor the national airspace remains the No. 1 unfunded requirement of US Northern Command, Gen. Victor E. Renuart Jr., who heads the command as well as NORAD, told the Senate Armed Services Committee March 6. Until that occurs, Operation Noble Eagle remains essential for the foreseeable future, he said.

"The systems that we use to identify traffic in our national aerospace are aging," Renuart told the panel. "We are working on some advanced technologies to allow us to perform that via broader means." But in the meanwhile, "the ability to put eyes and, if you will, radars on an air threat is critical to us," he said of the fighters and airborne surveillance platforms that patrol US skies as part of ONE.

He also said ONE aircraft have "a key role to play" in monitoring for "low observable and cruise missiles." So for the future, he said, "I see that role continuing. I see it to be vital to our national defense. And I would continue to recommend to the Secretary that we keep that force available to us."

#### B-52s Flex Muscles in Pacific

Four B-52 bombers made history March 6 when they simultaneously hit mock targets at four separate training ranges spread out across an 11,200-square-mile perimeter during an exercise from Andersen AFB, Guam. Called Quad Lightning, the mission was

# Powering Freedom.™

Pratt & Whitney designs and builds the most advanced military engines in the world. the first-ever of its kind in the Pacific since USAF has maintained a continuous bomber presence on the island to dissuade aggression in the region.

"Flying four sorties to different regions of the area of responsibility with simultaneous times over target demonstrates our capability to strike anytime and anywhere, with overwhelming firepower," said Lt. Col. Patrick Matthews, commander of the 96th Expeditionary Bomb Squadron. The B-52s arrived in late February at Andersen, replacing B-2As that had been there since late October 2007.

### World War II Airman Identified

The Department of Defense announced March 10 that it had identified the remains of Aviation Cadet Ernest G. Munn, an airman missing since the crash of an AT-7 trainer aircraft during a Nov. 18, 1942 navigator training flight out of Mather Field, Calif. Munn, of St. Clairsville, Ohio, was one of four men aboard the AT-7.

Hikers found wreckage of the AT-7 in 1947 on Darwin Glacier in the Sierra Nevada mountain range, but it was not until 2005 that frozen human remains were found that were subsequently identified by the Joint POW/MIA Accounting Command as Cadet Leo M. Mustonen of the ill-fated flight. Hikers in 2007 found more remains near the 2005 site that JPAC researchers identified as belonging to Munn.

### First UAV Unit Ready to Test

The Air Force stood up the 556th Test and Evaluation Squadron, its first operational test squadron for unmanned aircraft systems, during a ceremony March 5 at Creech AFB, Nev., its home. The new unit will support UAV operations worldwide, through force development evaluations, the development of training, tactics, and procedures, systems expertise, and fulfilling urgent need requests from commanders in theater.

As of mid-March, the 556th TES already had three new MQ-1 Predator UAVs in its inventory and anticipated receiving a fourth by the end of the year. It is scheduled to receive four MQ-9 Reaper UAVs, larger cousins to the Predator, in 2010.

### Guard Needs Modern Aircraft, Too

Air National Guard boss Lt. Gen. Craig R. McKinley told a House oversight panel Feb. 28 that the Air Guard's "biggest problem" is recapitalizing the fleet, just as it is for the active force. However, McKinley declared that apart from the need just to build new airplanes, "we've got to look at how to do that in proportion so that active, Guard, and Reserve get those airplanes."

When asked by Rep. Norman Dicks (D-Wash.) how many new airplanes the Air Guard would get out of the Air Force's Fiscal 2009 budget request, McKinley replied, "We won't get any new aircraft." But the ANG is receiving some new MQ-1 Predator unmanned aerial vehicles in Fiscal 2008, he noted.

### SOCOM Eyes Minigunship

US Special Operations Command is interested in a minigunship based on the C-27 airframe, Navy Adm. Eric T. Olson, head of the command, told the Senate Armed Services Committee March 4.

SOCOM has notional plans to replace Air Force Special Operations Command's current AC-130 gunships, but since a successor platform isn't anticipated until before the middle of next decade, it wants to pursue the "prototype development" of a "Gunship Light" concept built around the smaller C-27 airframe, Olson said.

The Air Force's unfunded requirements list for Fiscal 2009 includes a \$74.8 million request for two C-27s for this purpose. The AC-27 would carry a 30 mm gun, USAF officials have said.

### New Bomber in 2018 Can Be Done

Skeptics of the Air Force's assertion that it can field an impressive new long-range bomber in 2018 are misinformed, Gen. T. Michael Moseley, Chief of Staff, said Feb. 28.

"The ability to field a system by 2018, if you integrate existing technologies, is doable," Moseley said during a meeting with defense writers in Washington, D.C. "Those that say the technologies don't exist likely don't understand flying machines and building flying machines."

## Cyber Command Details Emerge, but Hq. Date Slips

Air Force Cyber Command will have a numbered air force designated 24th Air Force, four wings, and more than 65 squadrons collectively, including units from the Air National Guard and Air Force Reserve Command, USAF announced March 14.

Two of the wings will be new: the 450th Electronic Warfare Wing and the 689th Cyberspace Wing. They will be located on an interim basis at Lackland AFB, Tex., and Scott AFB, Ill., respectively. They will join the 688th Information Operations Wing (formerly the Air Force Information Operations Center) and the 67th Network Warfare Wing, both at Lackland.

USAF says it remains on track to declare the command ready for initial operations on Oct. 1, despite the fact that no permanent headquarters location will be assigned by then. The announcement of AFCYBER headquarters was expected prior to initial operational capability, but the final decision is no longer expected before late 2009.

The Air Force isn't saying specifically which sites it is considering. Alabama, Arkansas, California, Colorado, Louisiana, Massachusetts, Mississippi, Missouri, Nebraska, New Jersey, New Mexico, Ohio, Texas, Utah, and Virginia have expressed interest in hosting AFCYBER headquarters or some associated unit in their states.

Moseley said the Air Force has been clear with industry that it wants them to utilize existing engines, sensors, weapons, weapons bays, etc., and integrate them into a platform that provides the range, payload, and persistence that USAF wants.

### Study Finds Military Pay Competitive

The Pentagon's commission reviewing military compensation believes that current military pay is competitive with the civilian sector, agreeing with a Congressional Budget Office report issued in the summer of 2007.

Like CBO, the February 2008 10th Quadrennial Review of Military Compensation report recommends that comparisons should include more than the standard Regular Military Compensation

(basic pay, housing and subsistence allowances, and federal tax breaks).

The Pentagon commission recommends including RMC, health care, retirement, and state and local tax advantages, or what's called Military Annual Compensation, as the basis for future comparisons. Without it, says the QRMC report, the result is "an incomplete analysis that substantially understates the value" of the military compensation package.

With it, says QRMC, the military can show that it provides a "more generous" package relative to civilian compensation. According to the report, using MAC, the average enlisted member earned about \$10,600 more in 2006 than a civilian counterpart; a typical officer received \$17,800 more. ■

## News Notes

■ The Air Force said in early March it delivered the 2,000th mine-resistant ambush protected vehicle to the US Central Command area of responsibility, exceeding the Pentagon's delivery goals. The MRAPs are flown to the theater via C-5s, C-17s, or Russian-built An-124s from Charleston AFB, S.C.

■ SrA. Shane Reid received the Airman's Medal on March 18 at his deployed location with the 379th Air Expeditionary Wing in Southwest Asia. Reid helped rescue an elderly couple trapped in a burning vehicle in late 2006 in Orlando, Fla.

■ The Senate in March confirmed the promotion of Lt. Gen. Stephen R. Lorenz to the grade of general to take command of Air Education and Training Command at Randolph AFB, Tex. He succeeds Gen. William R. Looney III, who has led AETC

since June 2005 and is retiring after 36 years of service.

■ An RC-135 Rivet Joint electronic surveillance aircraft surpassed 50,000 flight hours during a mission March 12 in Southwest Asia for Operation Enduring Freedom. The aircraft, in service since 1962, is the first Rivet Joint and the first C-135 airframe, in general, to reach this milestone, USAF said.

■ The first F-35 test aircraft, AA-1, successfully completed its first airborne refueling tests March 12, said prime contractor Lockheed Martin. The airplane completed multiple tanker engagements with a specially instrumented KC-135 tanker near the company's assembly plant in Fort Worth, Tex.

■ A 22-pound BDU-33 nonexplosive dummy bomb inadvertently fell March 13 from an F-16 fighter from the Oklahoma

Air National Guard's 138th Fighter Wing, hitting an apartment complex in Tulsa, but injuring no one. The F-16 was en route to a range in Kansas to practice bombing runs.

■ The Air Force Academy celebrated the 50th anniversary of its astronautics department, the world's oldest, on March 7. Air Force Secretary Michael W. Wynne said the department has "launched the careers of countless space pioneers and helped establish America's asymmetric space dominance."

■ The Department of Defense presented the 2007 Modeling and Simulation Award March 11 to the Air Force's Distributed Mission Operations Center at Kirtland AFB, N.M. The center won for Virtual Flag, the distributed, joint virtual training exercises that it runs four times a year. ■

A close-up photograph of a soldier in a desert environment, looking down intently at a device in his hands. The scene is bathed in a warm, orange light, suggesting a sunset or sunrise. In the background, other soldiers and military equipment are visible in a dusty, open area.

# *When every minute counts...*

What matters most in that golden hour is connecting survivors to their rescuers. The mission is critical – it's about saving lives. The HOOK2® Combat Search and Rescue Radio System uniquely supports all phases of a CSAR event.

*it just works.*

In addition to the direct line-of-sight communications between the trusted AN/PRC-112G® Radio and Quickdraw2® Interrogator, the new SATCOM Base Station enables rescue forces to communicate over-the-horizon with an AN/PRC-112G Radio. Assured communications...when every minute counts.

## End Strength Bipolarity

**D**oes the Air Force want to shrink to an active duty end strength of 316,000 airmen, or does it actually want to expand to 330,000 troops?

The answer is: Yes.

In Feb. 27 testimony before a House committee, Secretary of the Air Force Michael W. Wynne said, "I must stand by the 316,000" figure in USAF's budget request. A few minutes later, he declared, "We really would prefer to hedge our bet at 330,000."

At which point Chairman Ike Skelton (D-Mo.) sighed, "I kind of feel like Mark Twain, [who once said], 'The more is explained to me, the more I don't understand it.'"

He's not alone. We know that USAF today has 329,000 airmen. Whether that end strength is going up or down, though, is a topic snarled in the arcana of federal budgets and Pentagon politics.

Wynne himself is not confused. Far from it. He is simply trapped by what he officially must say.

Where did 316,000 come from? At the end of 2004, USAF had 376,600 actives. Service leaders, desperately seeking funds to support recapitalization, laid plans to cut 60,000 airmen, leaving 316,600. The last increment of 13,000 airmen was to go in 2009.

Since then, however, demands have held steady in all areas and actually increased in some. Even with reorganizations, AFSO 21 process improvements, base closures, and other efficiencies, a force of 316,600 airmen is too small.

Therefore, USAF's top officials no longer endorse the planned personnel cuts. The problem is that the service continues to be bound to the Bush Administration's budget, which uses the 316,000-troop target. "I must support the President's budget as it was submitted," Wynne said, adding that, in his "personal opinion," it would be better to halt the cutting and instead boost the number of airmen. Similarly, Gen. T. Michael Moseley, Chief of Staff, testified that "this is an affordability issue," and "while we support the President's budget, we're working hard inside those fiscal limits."

Even as USAF defended the President's budget, it sent to Congress an "unfunded requirements" list containing a request for \$385 million in 2009 to expand active duty manpower to 330,000 airmen.

A recent USAF report to Congress noted that 316,600 airmen would leave the service staffed at only 96 percent of requirements in 2009 and at an average of 95 percent through 2015.

This shortfall was calculated using sophisticated manpower tools to determine the number of airmen needed. The shortfall will have a "significant impact" on USAF's ability to perform its missions and will create "critical" capabilities gaps, the report states.

Increasing operating tempo could cause large numbers of airmen to start "voting with their feet" and exiting the service *en masse*. An immediate combat concern centers on a looming shortfall of roughly 5,300 airmen in the aircraft maintenance and munitions career fields. The units dependent on these front-line airmen, critical to generating Air Force combat power, have traditionally been fully staffed. The requirement for maintenance and munitions personnel is increasing because old aircraft are flying and breaking more.

The cuts were also planned under the assumption that USAF's ground force taskings would end, but the Air Force now has 6,200 airmen performing land force jobs.

Because of the President's budget topline, the need to prop up modernization and recapitalization accounts, and various Congressional restrictions on retiring old aircraft, the Air Force cannot find the money to solve its manpower problem on its own. Maintaining end strength within the existing budget would require USAF to close 15 major bases—an idea that is obviously a non-starter. The problem will only grow worse. The budget asserts that end strength will remain at 316,600 for years to come, but the need will continue to

grow—from 330,200 airmen in 2009 to 335,700 airmen in 2015.

Why? The missions keep expanding. US Africa Command and its air component will need airmen, as will Cyber Command. The Air Force will add four wings of Predator and Reaper unmanned vehicles and a new Global Hawk reconnaissance UAV wing.

Also on the horizon is the CSAR-X rescue helicopter fleet, which will add a net of 40 aircraft to the CSAR inventory. The F-35 fleet is similarly forecast to be larger than the combined F-16 and A-10 fleets it replaces.

The Army and Marine Corps, meanwhile, are moving in the opposite direction, adding a combined 92,000 troops. More soldiers and marines will require battlefield airmen to travel with them, and Air Force lift to move them. USAF is building a battlefield airman wing to support a larger Army.

All told, USAF's report finds a shortfall of nearly \$12 billion in personnel accounts through 2015. Unless additional airmen can be brought into the mix, and soon, the manpower shortfall will continue to grow—with resulting damage to combat power and national security. ■

## About the Almanac

On the following pages appears a variety of information and statistical material about the US Air Force—its people, organization, equipment, funding, activities, bases, and heroes. This Almanac section was compiled by the staff of *Air Force Magazine*. We especially acknowledge the help of the Secretary of the Air Force Office of Public Affairs, Air Staff agencies, major commands, and reserve components in bringing up to date the comparable data from last year's Almanac.

A word of caution: Personnel figures that appear in this section in different forms will not always agree (nor will they always agree with figures in major command, field operating agency, and direct reporting unit reports or in the "Guide to USAF Installations Worldwide") because of different cutoff dates, rounding, differing methods of reporting, or categories of personnel that are excluded in some cases. These figures do illustrate trends, however, and may be helpful in placing force fluctuations in perspective.

# The Air Force in Facts and Figures

## ■ 2008 USAF Almanac

# Structure of the Force

### How the Air Force Is Organized

There is considerable variation in how the major commands and subordinate units of the Air Force are organized. This overview describes both the typical organization chain and USAF's Air and Space Expeditionary Force.

The **Department of Defense (DOD)** is a Cabinet agency headed by the Secretary of Defense. It was created in 1947 to consolidate pre-existing military agencies—the War Department and the Navy Department. Subordinate to DOD are the three military departments (Army, Navy, and Air Force), each headed by a civilian secretary.

The **Joint Chiefs of Staff (JCS)** constitute the corporate military leadership of DOD. The Chairman and vice chairman of the JCS serve full-time in their positions. The service chiefs are the military heads of their respective services, although JCS responsibilities take precedence.

The **Department of the Air Force** is headed by the Secretary of the Air Force, who is supported by a staff called the Secretariat. The Chief of Staff, USAF, heads the Air Staff, and the military heads of the major commands report to the Chief of Staff.

Most units of the Air Force are assigned to one of the **major commands**. Major commands are headed by general officers and have broad functional responsibilities. Commands may be divided into **numbered air forces**.

The fundamental unit of the working Air Force is the **wing**. The typical Air Force base is built around a wing. Some wings are commanded by a general officer, while others are headed by a colonel. An objective wing contains an **operations group**, which includes aircrews, intelligence units, and others; a **maintenance group**, which includes maintenance squadrons; a **support group**, which includes such functions as civil engineers, logistics readiness, and security forces; and a **medical group**.

Most individual officers and airmen are assigned to a **squadron**, which may be composed of several **flights**.

In addition to these units, there are numerous others, including centers, field operating agencies, and direct reporting units.

#### **Air and Space Expeditionary Force**

To relieve chronic optempo problems stemming from back-to-back deployments and operations, the Air Force developed an expeditionary concept initially called the Expeditionary Aerospace Force. The term EAF has since been supplanted by the term Air and Space Expeditionary Force (**AEF**). The term AEF also refers to a basic organizational unit. USAF groups its power projection and support forces into 10 AEF "buckets of capability." The 10 AEFs are grouped into five pairs.

Initially, these five pairs of AEFs rotated through a 15-month cycle, with each pair assigned to one of five 90-day periods. In fall 2004, USAF revised its AEF arrangement, extending the cycles to 20 months, divided into five 120-day periods. The Air Force also incorporated its on-call forces into the standard AEF rotation.

During each 120-day period, a designated pair of AEFs is vulnerable to deployment. Each AEF comprises combat air forces (**CAF**), mobility air forces (**MAF**), and limited supply, high demand (**LS/HD**) forces consisting of various active duty, ANG, and AFRC units.

USAF's LS/HD forces include battle management, combat search and rescue, command and control, and reconnaissance assets. They are in near constant use and, consequently, rotate more frequently than most CAF and MAF elements.

The new expeditionary system began with Cycle 1 in October 1999. Cycle 4, which began June 1, 2003, included two temporary stopgap AEFs, designated AEF Blue (June 1-Oct. 31, 2003) and AEF Silver (Nov. 1, 2003-Feb. 29, 2004), formed in the wake of Operation Iraqi Freedom. They mostly comprised forces not used in the war. During the Blue and Silver deployments, USAF was able to reconstitute its wartime forces for return to the standard rotation cycle. ■

The title General of the Army for Henry H. Arnold was changed to General of the Air Force by an act of Congress May 7, 1949. The position of Chief of Staff was established by a DOD-approved Army-Air Force Transfer Order issued Sept. 28, 1947.

<sup>a</sup>The Army Air Corps became a subordinate element of the Army Air Forces June 20, 1941. Since the Army Air Corps had been established by statute in 1926, its disestablishment required an Act of Congress, which did not take place until 1947. Between March 9, 1942, and Sept. 18, 1947, the Army Air Corps continued to exist as a combatant arm, and personnel of the Army Air Forces were still assigned to the Army Air Corps.

**NORTHROP GRUMMAN**

DEFINING THE FUTURE™

©2006 Northrop Grumman Corporation

**Space has never had a bigger  
impact on the ground.**

When U.S. and Allied Forces have their lives on the line, we need to make sure they are armed with the best intelligence to get the job done. Northrop Grumman gives them that advantage. From advanced space platforms and communications to sophisticated command and control systems, we provide the advantage from space for superiority on the ground.

WorldView-1 made history as the most advanced commercial imaging satellite ever flown. ITT made the imaging sensor that helped make history. Capturing data 3x faster, with an image footprint 3x larger than any other commercial satellite, it's not hard to see why. And since our advanced technology already exists, we can scale it to your project without re-inventing the wheel. Which means less time, less cost and less room for error. For a picture perfect operation, visit [itt.com/imagine](http://itt.com/imagine).

# We made WorldView-1 the fastest eye in the sky. Imagine what we can do for you.

## USAF Personnel by Geographic Area

(As of Sept. 30, 2007)

**Total military personnel** **333,495**

**US territory and special locations** **273,735**

**Total in foreign countries** **59,760**

**Western and Southern Europe** **31,161**

|                     |        |
|---------------------|--------|
| Germany             | 14,583 |
| UK                  | 8,952  |
| Italy               | 4,083  |
| Turkey              | 1,503  |
| Spain               | 298    |
| All other countries | 1,742  |

**East Asia and Pacific** **21,001**

|                     |        |
|---------------------|--------|
| Japan/Okinawa       | 12,818 |
| South Korea         | 8,048  |
| All other countries | 135    |

**Africa, Near East, South Asia** **540**

|                     |     |
|---------------------|-----|
| Saudi Arabia        | 69  |
| Kuwait              | 46  |
| Egypt               | 31  |
| All other countries | 394 |

**Western hemisphere** **364**

|                     |     |
|---------------------|-----|
| Canada              | 84  |
| Panama              | 1   |
| All other countries | 279 |

**Other areas** **6,694**

## Specialties in the Enlisted Force

(As of Sept. 30, 2007)

| Code | Career Field                            | Assigned       | Percent    |
|------|---|----------------|------------|

# Budgets

## 2008 USAF Almanac

### Terms Explained

Funding levels can be expressed in several ways. **Budget authority** is the value of new obligations that the federal government is authorized to incur. These include some obligations to be met in later years. Figures can also be expressed in **outlays** (actual expenditures, some of which are covered by amounts that were authorized in previous years).

Another difference concerns the value of money. When funding is in **current** or **then-year** dollars, no adjustment for inflation has taken place. This is the actual amount of dollars that has been or is to be spent, budgeted, or forecast. When funding is expressed in **constant dollars**, or **real dollars**, the effect of inflation has been factored out to make direct comparisons between budget years possible. A specific

year, often the present one, is chosen as a baseline for constant dollars.

Normally, Congress first authorizes payment, then appropriates it. **Authorization** is an act of Congress that establishes or continues a federal program or agency and sets forth guidelines to which it must adhere. **Appropriation** is an act of Congress that enables federal agencies to spend money for specific purposes.

### Air Force Budget—A 10-Year Perspective

(Budget authority in millions of current and constant FY09 dollars; excludes costs of the Global War on Terror.)

| Current dollars               | FY99             | FY00             | FY01             | FY02             | FY03             | FY04             | FY05             | FY06             | FY07             | FY08             |
|-------------------------------|------------------|------------------|------------------|------------------|------------------|------------------|------------------|------------------|------------------|------------------|

# Persistence. Reliability. Flexibility.

The cost-effective MQ-1 Predator and MQ-9 Reaper unmanned aircraft systems empower the Air National Guard (ANG) with the precision capability to detect, identify, and strike time-sensitive targets instantly while supporting the Global War On Terrorism.

Fifteen ANG squadrons will soon be Predator and Reaper equipped.

*Supporting America's Army and Marines, Predator and Reaper remain unmatched at home and deployed.*

# ABE: THE PERFECT F-16 BORESIGHT SOLUTION.

AAI's Advanced Boresight Equipment — known on flight lines as ABE — is the perfect solution to align sensors and systems for today's fleet of U.S. Air Force F-16 Fighting Falcons.

ABE technology leads the industry in speed, accuracy, repeatability, and ease of use, and it's the alignment system of choice for most of today's generation of military aircraft platforms — as well as tomorrow's.

For instance, current flight tests of the next-generation F-35 Lightning II Joint Strike Fighter are carried out with sensors and systems aligned by ABE. And, the Air Force has ordered ABE systems for its C-130 gunships, C-17 Globemaster III transports, and C-130 AMP aircraft.

Other U.S. military platforms using ABE are the Navy/Marine Corps AH-1W, MH-60R, AH-1Z, and AV-8B, and the U.S. Army's AH-64D and Armed Reconnaissance Helicopter.

Our ABE team has developed more than 60 off-the-shelf, aircraft-unique boresight adapters, including those that meet alignment requirements for F-16 and F-15 fighters.

To learn more, e-mail [ABE@aaicorp.com](mailto:ABE@aaicorp.com) or call 800-655-2616.

*ABE is the perfect solution for sensor and system alignment on F-16 Fighting Falcons.*

### Senior Executive Service

As part of the 2004 defense budget, Congress authorized DOD to implement a new performance-based pay system for SES members. On Jan. 1, 2004, a new SES pay scale reflecting only the minimum and maximum levels of pay replaced the old fixed SES pay levels (ES-1 through ES-6). The pay scale does not include locality pay.

#### SES Pay System Structure

Certified SES performance appraisal system  
 Noncertified SES performance appraisal system

#### Minimum

\$114,468  
 \$114,468

#### Maximum

\$172,200  
 \$158,500

### Housing Allowance

(Effective Jan. 1, 2008)

| Pay Grade | With Dependents | Without Dependents |
|-----------|-----------------|--------------------|
| O-10      | \$1,587.30      | \$1,290.30         |
| O-9       | 1,587.30        | 1,290.30           |
| O-8       | 1,587.30        | 1,290.30           |
| O-7       | 1,587.30        | 1,290.30           |
| O-6       | 1,428.90        | 1,183.20           |
| O-5       | 1,377.30        | 1,139.40           |
| O-4       | 1,214.10        | 1,055.70           |
| O-3       | 1,004.70        | 846.60             |
| O-2       | 857.10          | 670.80             |
| O-1       | 767.40          | 565.50             |
| O-3E      | 1,079.70        | 913.80             |
| O-2E      | 974.10          | 776.70             |
| O-1E      | 900.60          | 668.40             |

**HIGH-RISK MISSIONS  
CALL FOR THE  
LOW-RISK HH-71.**

The HH-71 is the only all-weather, combat-proven helicopter already flying the CSAR mission. It has over 130,000 flight hours including 21,500 desert landings without incident. BERP IV advanced rotor blades further reduce acoustic signature, and minimize brownout and whiteout. Its small footprint allows more landing options and faster, safer ingress. Three engines provide an unmatched margin of safety. And only the HH-71 offers 360 degrees field of fire with overlapping weapons coverage. No other helicopter maximizes survivability for warfighters in peril and for CSAR crews who rescue them. Learn more at [HH71proven.com](http://HH71proven.com).

**HH-71** COMBAT-PROVEN  
MISSION-READY

## USAF Aircraft Flying Hours

(In thousands, as of Sept. 30, 2007)

# When it's go time

*...I just know it works.*

This pilot isn't thinking about net-centric environments and seamless interoperability. In the heat of the battle, he's focused on one thing only – making life or death decisions.

At General Dynamics, we know conceptual buzzwords don't mean a thing at times like these. What matters is this pilot has the concrete capabilities he needs to make superior decisions with speed, precision and confidence. That's why we are working to arm the tactical warfighter with robust, intuitive and informative solutions that always work, anywhere, anytime.

With our proven leadership in systems integration and information assurance, we are engineering the transformational solutions that will ensure this warfighter always has the technological upper hand, whenever and wherever it matters most.

Victory Medal

## World War II Through Korean War (in order of precedence)

American Defense Service Medal

Women's Army Corps Service Medal

American Campaign Medal

Asiatic-Pacific Campaign Medal

European-African-Middle Eastern Campaign Medal

World War II Victory Medal

Army of Occupation Medal

Medal for Humane Action

Korean Service Medal

Philippine Defense Ribbon

Philippine Liberation Ribbon

Philippine Independence Ribbon

Philippine Presidential Unit Citation

ROK Presidential Unit Citation

United Nations Service Medal

Republic of Korea Korean War Service Medal

# Currently Awarded Devices

**Bronze Star**  
represents participation in campaigns or operations, multiple qualifications, or an additional award to any of the various ribbons on which it is authorized.

**Bronze Oak Leaf Cluster**  
represents second and subsequent entitlements of awards.

**Valor Device**  
represents valor and does not denote an additional award. Only one may be earned on any ribbon. It is worn to the wearer's right of any clusters on the same ribbon.

**Mobility Device**  
is worn with the Armed Forces Reserve Medal to denote active duty for at least one day during a contingency. A number to the right of the device denotes the total number of mobilizations.

**Silver Star**  
is worn in the same manner as the bronze star, but each is worn in lieu of five bronze service stars.

**Silver Oak Leaf Cluster**  
represents the sixth, 11th, etc., entitlements or is worn in lieu of five bronze OLCs.

**A Device**  
is worn with the Overseas Ribbon Short to denote service north of the Arctic Circle. Only one is worn on the ribbon. It is worn to the wearer's right of any clusters on the same ribbon.

**Hourglass Device**  
is issued for the Armed Forces Reserve Medal in bronze for 10 years of service, silver for 20, and gold for 30 years.

**Silver and Bronze Stars**  
When worn together on a single ribbon, silver stars will be worn to the wearer's right of any bronze star.

**Silver/Bronze Oak Leaf Clusters**  
Silver OLCs are worn to the wearer's right of the bronze OLCs on the same ribbon.

# Previously Awarded Devices

**Berlin Airlift Device**  
is worn with the Army of Occupation Medal to denote service of 90 consecutive days in direct support of the Berlin Airlift, June 26, 1948, to Sept. 30, 1949.

**Arrowhead Device**  
is worn with Army and Air Force campaign medals to denote participation in combat parachute, glider, or amphibious assault landing.

**Disk "Wintered Over" Device**  
is worn with the Antarctica Service Medal to denote multiple "winters over"—bronze for one winter; gold, two; silver, three.

# Berets

Seven USAF specialties are authorized to wear a colored beret along with the crest of that particular field.

Combat Control

Tactical Air Command and Control

Pararescue

Tactical Airlift Liaison Officer/ALO

Security Forces

Weather Parachutist

Survival Evasion

# USAF Badges

Shown here are current wings and badges as seen in AFI 36-2923. The basic level of wings or badges is illustrated. Most wings and badges have two other categories of accomplishment—senior and either commander, master, or chief. A star centered above the badge indicates the senior level, while a star surrounded by a wreath above the badge represents the master level.

**Together, we can** help freedom fly.  
And fly and fly and fly and fly.

Air superiority begins with readiness superiority — which is where team Parker comes in. We deliver higher levels of reliability, maintainability, and sustainability by providing support solutions to OEM standards. Offering innovative contracting. And implementing lifetime support.

Want to maximize readiness and minimize costs? Go to Parker for the performance-based logistics, technology insertions, reliability improvement programs, and customized options that will let freedom fly. And keep on flying until the war is won.

To learn more, call us at **(949) 809-8400**, or visit [www.parker.com/aerocscd/military](http://www.parker.com/aerocscd/military).

**FACT: PROVEN CAPABILITY, LOWER RISK.**

The search and rescue mission of the U.S. Air Force has never been more complex. First selected for its proven capabilities and lower risk, the HH-47 is ideally suited to fulfill this critical requirement. Able to operate at higher altitudes, day or night in adverse weather, the HH-47 provides superior range, speed and payload. It's a powerful commitment to every warfighter in harm's way.

# Watch Your Savings Soar with The AFAVBA Banking Center.

## Earn high yields and a \$25 Bonus Deposit†

The AFAVBA Banking Center is proud to offer AFA Members and their families a wide variety of banking products and services. Accounts feature high-yields and are FDIC insured up to \$100,000 in aggregate per customer so you can be assured your deposits are secure.

### As an AFA member, you have exclusive access to:

- High-Yield Money Market Savings — **2.50% APY\***
- Jumbo Money Market Account — **2.75% APY\***
- Certificates of Deposit
- FREE Checking
- Interest Checking
- FREE Direct Deposit
- FREE Online Bill Pay
- 24/7 Online Account Access
- ATM/Debit Card fee reimbursements\*\*

In addition, accounts feature low minimum opening deposits and no monthly fees. It all adds up to one thing: The AFAVBA Banking Center offers AFA members one of the best banking experiences in the nation. Show your support and open an account today. Visit [www.afavbabankingcenter.com](http://www.afavbabankingcenter.com), or call **1-800-229-9505**.

### High-Yield Money Market Savings

# \$25 BONUS DEPOSIT

Open an account with the required minimum deposit, and receive a \$25 Bonus Deposit.† Simply provide promotional code **AF078** when you open your account. Hurry, this offer expires on August 31, 2008.

\* Annual Percentage Yields (APYs) are accurate as of 4/4/08. APY comparisons to respective national averages as of 4/1/08. National averages from Bankrate, Inc. The APY for the High Yield Money Market Savings, Jumbo Money Market and Interest Checking is variable and subject to change. Earnings may be reduced if fees are incurred. The CD APY is fixed. A penalty will be imposed for early withdrawal. The minimum balance required to earn interest is \$1.00 for High Yield Money Market Savings, \$25 for Interest Checking, \$200 for Money Market accounts, \$8,000 for CDs and \$100,000 for Jumbo Money Market accounts. \*\* Receive up to \$6.00 in ATM fee reimbursements per statement cycle. † An initial deposit of \$200 for High Yield Money Market Savings, Interest Checking and Money Market accounts, \$8,000 for CDs and \$100,000 for Jumbo Money Market accounts is required by 8/31/08 to receive the \$25 incentive. Free checking accounts are excluded from this incentive. The incentive will automatically be deposited into your account within 30 days of account funding. Bonus deposit is reportable on IRS form 1099-INT. Deposit processing services provided by The Huntington National Bank. Deposit products are FDIC insured by one of the participating financial institutions to the full extent of the law.

# Guide to Aces

## Some Famous Firsts

|                      |   |
|----------------------|---|
| <b>May 28, 1918</b>  | First AEF-trained AEF ace: Capt. Edward V. Rickenbacker   |
| <b>Dec. 7, 1941</b>  | First AAF victories of WW II (Pearl Harbor): Lts. Harry W. Brown, Philip M. Rasmussen, Lewis M. Sanders, Gordon H. Sterling Jr., Kenneth M. Taylor, George S. Welch |
| <b>Dec. 16, 1941</b> | First AAF ace of WW II: 1st Lt. Boyd D. Wagner  |
| <b>Nov. 8, 1950</b>  | First jet-to-jet victory (Korean War): 1st Lt. Russell J. Brown   |
| <b>May 20, 1951</b>  | First USAF ace of the Korean War: Capt. James Jabara  |
| <b>Nov. 30, 1951</b> | First USAF ace of two wars (WW II and Korea): Maj. George A. Davis Jr. (7 in WW II and 14 in Korea)   |
| <b>Jan. 2, 1967</b>  | First (and only) USAF ace with victories in WW II and Vietnam: Col. Robin Olds (12 in WW II and 4 in Vietnam)   |
| <b>Aug. 28, 1972</b> | First USAF ace of Vietnam: Capt. Richard S. Ritchie   |

*Left: James Jabara, the first USAF ace of the Korean War. Jabara scored 15 victories before the end of the war.*

*Right: Robin Olds is the only USAF ace with aerial victories in both World War II and the Vietnam War.*

By tradition, anyone with five official aerial victory credits is an ace. In compiling this list of aces who flew with the US Air Force and predecessor organizations (the Air Service, Air Corps, and Army Air Forces), *Air Force Magazine* relies on USAF's official accounting of aerial victory credits, which is the responsibility of the Air Force Historical Research Agency, Maxwell AFB, Ala.

Air Force historians have kept the official records of aerial victories by USAF pilots and crew members since 1957. The Office of the Air Force Historian initially published four separate listings—for World War I, World War II, the Korean War, and the Vietnam War. The four volumes were corrected, updated, and combined into one comprehensive volume. AFHRA continues to correct records and updates its online listing ([www.maxwell.af.mil/au/afhra](http://www.maxwell.af.mil/au/afhra)).

The criteria that the Air Force established for awarding aerial victory credits varied from war to war, and therefore one cannot make direct comparisons of aces across all wars.

In many cases during World War I, several aviators worked together to down a single aircraft. The Air Service awarded one whole credit to each aviator who contributed to the victory. A single victory could—and often did—result in three or four victory credits.

In World War II and Korea, the criteria were changed. The service divided one credit among all aviators who contributed to destruction of an enemy airplane. With the awarding of fractional credits, a single victory could result in no more than one credit.

The rules were changed again in the Vietnam War. When an F-4 downed an enemy aircraft, USAF would award two full aerial victory credits—one to the frontseater and one to the backseater. As in World War I, a single victory resulted in multiple victory credits.

Thus, the standards for World War II and Korea were more restrictive than those for World War I and Vietnam.

*Continued on p. 86*

ON THE NETWORK.

NO WARFIGHTER STANDS ALONE.

A fully networked military connects all warfighters, so each is stronger and safer. By seamlessly integrating joint assets in real time, all forces have the right information at the right time for faster, more decisive action. Boeing's leadership in network-enabled operations for combat systems, aircraft, satellite and communication systems is helping bring the benefits of this transformation to our forces today. To ensure no warfighter ever stands alone.

 **BOEING**

## American Aces of World War I

**Eddie Rickenbacker (26)**

|                               |    |
|-------------------------------|----|
| Rickenbacker, Capt. Edward V. | 26 |
| Luke, 2nd Lt. Frank Jr.       | 18 |
| Vaughn, 1st Lt. George A.     | 13 |
| Kindley, 1st Lt. Field E.     | 12 |
| Springs, 1st Lt. Elliott W.   | 12 |
| Landis, 1st Lt. Reed G.       | 10 |
| Swaab, 1st Lt. Jacques M.     | 10 |
| Baer, 1st Lt. Paul P.         | 9  |
| Cassady, 1st Lt. Thomas G.    | 9  |
| Hamilton, 1st Lt. Lloyd A.    | 9  |
| Wright, 1st Lt. Chester E.    | 9  |
| Clay, 1st Lt. Henry R. Jr.    | 8  |
| Coolidge, Capt. Hamilton      | 8  |
| Donaldson, 2nd Lt. John O.    | 8  |
| Erwin, 1st Lt. William P.     | 8  |
| Hunter, 1st Lt. Frank O'D.    | 8  |
| Jones, 2nd Lt. Clinton        | 8  |
| Meissner, Capt. James A.      | 8  |
| Stenseth, 1st Lt. Martinus    | 8  |
| White, 2nd Lt. Wilbert W.     | 8  |
| Burdick, 2nd Lt. Howard       | 7  |

In World War I, pilots who shared victories were each given one credit. This list uses the World War I counting rule.

|                                |   |                                |   |
|--------------------------------|---|--------------------------------|---|
| Chambers, 1st Lt. Reed M.      | 7 | Keating, 1st Lt. James A.      | 5 |
| Cook, 1st Lt. Harvey W.        | 7 | Knowles, 1st Lt. James Jr.     | 5 |
| Creech, 1st Lt. Jesse O.       | 7 | Larner, 1st Lt. G. DeFreest    | 5 |
| Holden, 1st Lt. Lansing C.     | 7 | Luff, 1st Lt. Frederick E.     | 5 |
| Robertson, 1st Lt. Wendel A.   | 7 | O'Neill, 2nd Lt. Ralph A.      | 5 |
| Rummell, 1st Lt. Leslie J.     | 7 | Owens, 2nd Lt. John S.         | 5 |
| Schoen, 1st Lt. Karl J.        | 7 | Porter, 2nd Lt. Kenneth L.     | 5 |
| Sewall, 1st Lt. Sumner         | 7 | Ralston, 1st Lt. Orville A.    | 5 |
| Beane, 1st Lt. James D.        | 6 | Seerley, 1st Lt. John J.       | 5 |
| Biddle, Capt. Charles J.       | 6 | Strahm, Capt. Victor H.        | 5 |
| Brooks, 2nd Lt. Arthur R.      | 6 | Todd, 2nd Lt. Robert M.        | 5 |

| Meyer, Col. John C.           | 26              | WW II, Korea |
| Rickenbacker, Capt. Edward V. | 26 <sup>b</sup> | WW I         |
| Mahurin, Col. Walker M.       | 24.25           | WW II, Korea |
| Schilling, Col. David C.      | 22.50           | WW II        |
| Johnson, Lt. Col. Gerald R.   | 22              | WW II        |
| Kearby, Col. Neel E.          | 22              | WW II        |
| Robbins, Maj. Jay T.          | 22              | WW II        |
| Christensen, Capt. Fred J.    | 21.50           | WW II        |
| Wetmore, Capt. Ray S.         | 21.25           | WW II        |
| Davis, Maj. George A. Jr.     | 21              | WW II, Korea |
| Voll, Capt. John J.           | 21              | WW II        |
| Whisner, Capt. William T. Jr. | 21              | WW II, Korea |
| Eagleston, Col. Glenn T.      | 20.50           | WW II, Korea |
| Lynch, Lt. Col. Thomas J.     | 20              | WW II        |
| Westbrook, Lt. Col. Robert B. | 20              | WW II        |
| Gentile, Capt. Don S.         | 19.83           | WW II        |

Walker Mahurin (24.25) and Walter Beckham (18)

<sup>b</sup>Under World War II and Korean War counting rules, Rickenbacker would have been credited with 24.33 victories. The change would not alter his position on this list.

# Hq. Air Force

## ■ 2008 USAF Almanac

The Department of the Air Force incorporates all elements of the Air Force and is administered by a civilian Secretary and supervised by a military Chief of Staff. The Secretariat and the Air Staff help the Secretary and the Chief of Staff direct the Air Force mission.

# HAF

## Headquarters Air Force

**Headquarters** Pentagon, Washington, D.C.

**Established** Sept. 18, 1947

**Secretary** Michael W. Wynne

**Chief of Staff** Gen. T. Michael Moseley

### ROLE

**Organize**, train, and equip air and space forces

### MISSION

**Deliver** sovereign options for the defense of the United States of America and its global interests—to fly and fight in air, space, and cyber-space

### FORCE STRUCTURE— SECRETARIAT

One Secretary  
One undersecretary  
Four assistant secretaries  
Two deputy undersecretaries  
Five directors  
Five offices

### FORCE STRUCTURE— AIR STAFF

One Chief of Staff  
One vice chief of staff  
One Chief Master Sergeant of the Air Force  
Six deputy chiefs of staff  
Three directors  
Eight offices

### PERSONNEL

(as of Sept. 30, 2007)

An F-16 of the 20th Fighter Wing, Shaw AFB, S.C., flies near the Pentagon as part of Noble Eagle.

**SECRETARIAT, PENTAGON, WASHINGTON, D.C.**

**AIR STAFF, PENTAGON, WASHINGTON, D.C.**

# Major Commands

## 2008 USAF Almanac

A major command is a subdivision of the Air Force assigned a major part of the Air Force mission and directly subordinate to Hq. USAF. In general, there are two types of major commands: functional and geographical.

# Air Combat Command

**Headquarters** Langley AFB, Va.

**Established** June 1, 1992

**Commander** Gen. John D.W. Corley

### MISSIONS

**Operate** USAF bombers (active and ANG and AFRC gained); USAF's CONUS-based (active and gained) fighter, reconnaissance, battle management, and command and control aircraft and intelligence and surveillance systems

**Organize**, train, equip, and maintain combat-ready forces for rapid deployment and employment to meet the challenges of peacetime air sovereignty and wartime combat requirements

**Provide** combat airpower to America's warfighting commands (Central, European, Northern, Pacific, and Southern); nuclear, conventional, and information operations forces to STRATCOM; air defense forces to NORAD

### COROLLARY MISSIONS

**Monitor** and intercept illegal drug traffic

**Test** new combat equipment

### FORCE STRUCTURE

Four numbered air forces: **1st**, Tyn-dall AFB, Fla.; **8th**, Barksdale AFB, La.; **9th**, Shaw AFB, S.C.; **12th**, Davis-Monthan AFB, Ariz.

One primary subordinate unit: USAF Warfare Center, Nellis AFB, Nev.

27 wings

Four groups

### OPERATIONAL ACTIVITY

(as of Sept. 30, 2007)

Flying hours: 27,316 per month

### Major operations

Enduring Freedom (Afghanistan); Iraqi Freedom (Iraq); Noble Eagle (US)

### Major training exercises

Amalgam Dart Series; Amalgam Phantom; Ardent Century; Atlantic Strike; Blue Advance; Blue Flag; Eager Tiger; Eagle Resolve; Eastern Falcon; Ellipse Echo; Falcon Condor; Falcon Nest; Foal Eagle; Global Lightning; Global Thunder; Green Flag East and West; Initial Link; Internal Look; Iron Falcon; Maple Flag; New Horizons Series; Northern Edge; Panamax; Positive Force; Red Flag; Terminal Fury; Ulchi Focus Lens; Unified Endeavor; Vigilant Shield; Virtual Flag

## Air Education and Training Command

**Headquarters** Randolph AFB, Tex.

**Established** July 1, 1993

**Commander** Gen. William R. Looney III

### MISSIONS

**Recruit**, train, and educate professional, expeditionary-minded airmen to sustain the combat capability of America's Air Force

**Provide** basic military training, initial and advanced technical training, flying training, and professional military and degree-granting professional education

**Conduct** joint, readiness, and Air Force security assistance training

### FORCE STRUCTURE

Two numbered air forces and an educational headquarters: **2nd**, Keesler AFB, Miss.; **19th**, Randolph AFB, Tex.; **Air University**, Maxwell AFB, Ala.

Three DRUs: Air Force Recruiting Service and Air Force Security Assistance Training Squadron, Randolph AFB, Tex., and 59th Medical Wing, Lackland AFB, Tex.

16 wings  
Three groups  
Two squadrons

### OPERATIONAL ACTIVITY

(as of Sept. 30, 2007)  
Flying hours: 43,646 per month

### PERSONNEL

# Air Force Space Command

# AFSPC

**Headquarters** Peterson AFB, Colo.

**Established** Sept. 1, 1982

**Commander** Gen. C. Robert Kehler

## MISSIONS

**Operate** and test ICBM forces for STRATCOM; missile warning radars, sensors, and satellites; national space-launch facilities and operational boosters; worldwide space surveillance radars and optical systems; worldwide space environmental systems; position, navigation, and timing systems

**Provide** command and control for DOD satellites; missile warning to NORAD/NORTHCOM and STRATCOM; space weather support to entire DOD

**Produce** and acquire advanced space systems

## COROLLARY MISSIONS

**Develop** and integrate space support for the warfighter

**Serve** as lead command for all USAF UH-1 helicopter programs

## OTHER RESPONSIBILITIES

**Provide** communications, computer, and base support to NORAD; technology safeguard monitors to support

launches of US satellites on foreign launch vehicles

**Supply** range and launch facilities for military, civil, and commercial space launch

## FORCE STRUCTURE

Two numbered air forces: **14th**, Vandenberg AFB, Calif.; **20th**, F.E. Warren AFB, Wyo.

Two major product centers: Space and Missile Systems Center, Los Angeles AFB, Calif.; Space Innovation and Development Center, Schriever AFB, Colo.

# AFSOC

**Air Force Special Operations Command** Headquarters Hurlburt Field, Fla.

**Established** May 22, 1990

**Commander** Lt. Gen. Donald C. Wurster

## MISSIONS

**Serve** as America's specialized airpower, delivering special operations power anytime, anywhere

**Provide** Air Force special operations forces for worldwide deployment and assignment to regional unified commands

**Tasked** for seven mission areas: shaping and stability operations; battlefield air operations; information operations; intelligence, surveillance, and reconnaissance; SOF mobility; precision engagement; and agile combat support

## FORCE STRUCTURE

Two wings  
Three groups  
Two squadrons  
USAF Special Operations School

## OPERATIONAL ACTIVITY

(as of Sept. 30, 2007)  
Flying hours: 3,927 per month

## Major operations

Enduring Freedom (Afghanistan); Iraqi Freedom (Iraq); Global War on Terror; Noble Eagle (US)

## PERSONNEL

# Air Reserve Components

■ 2008 USAF Almanac

The Air Reserve Components for USAF are the Air National Guard and Air Force Reserve Command. Air Force Reserve Command stood up as a major command Feb. 17, 1997. The change in status, authorized by Congress in the Fiscal 1997 National Defense Authorization Act, was based on the experience gained from the Air Force Reserve component mobilization for Operations Desert Shield and Desert Storm.

## Air Force Reserve Command

# AFRC

**Headquarters** Robins AFB, Ga.

**Established** Feb. 17, 1997

**Commander** Lt. Gen. John A. Bradley

### MISSIONS

**Support** the active duty force **Serve** in such missions as fighter, bomber, airlift, aerial port operations, aerial refueling, rescue, special operations, aeromedical evacuation, aerial fire fighting, weather reconnaissance, space operations, airborne air control, flying training, flight testing, and aerial spraying

**Provide** support and disaster relief in the US

**Support** national counterdrug efforts

**Handle** administration of USAF's individual mobilization augmentees

### FORCE STRUCTURE

Air Force Reserve Command Recruiting Service

Air Reserve Personnel Center, Denver

Three numbered air forces: **4th**, March ARB, Calif.; **10th**, NAS JRB Fort Worth, Tex.; **22nd**, Dobbins ARB, Ga.

35 wings

Six groups

### OPERATIONAL ACTIVITY

Enduring Freedom (Afghanistan); Iraqi Freedom (Iraq); Noble Eagle (US)

## Field Operating Agencies

A field operating agency (FOA) is a subdivision of the Air Force that carries out field activities under the operational control of an Hq. USAF functional manager. FOAs have the same administrative and organizational responsibilities as major commands.

### Air Force Agency for Modeling and Simulation

Hq.: Orlando, Fla.  
 Estab.: June 3, 1996  
 Cmdr.: Col. Louis W. Olinto

#### MISSION, PURPOSE, OPERATIONS

**Responsible** for supporting development and use of the realistic global battlespace for training, acquisition, analysis, test and evaluation, and operations

**Implement** Air Force, joint, and DOD modeling and simulation (M&S) policies and standards

**Manage**, coordinate, and integrate major USAF and joint M&S programs and initiatives

**Support** corporate USAF M&S operations while promoting and supporting technology improvements

#### STRUCTURE

Three divisions in Orlando, Fla.  
 C4ISR Visualization Center, Pentagon

#### PERSONNEL

|              |    |           |
|--------------|----|-----------|
| Active duty  |    | 16        |
| Officers     | 14 |           |
| Enlisted     | 2  |           |
| Civilians    |    | 13        |
| <b>Total</b> |    | <b>29</b> |

### Air Force Audit Agency

Hq.: Washington, D.C.  
 Estab.: July 1, 1948  
 Dir.: Robert E. Dawes

#### MISSION, PURPOSE, OPERATIONS

**Provide** all levels of Air Force management with independent and quality internal audit service

**Produce** audit products that evaluate the efficiency, effectiveness, and economy of Air Force programs and activities

#### STRUCTURE

Four directorates at Arlington, Va., Brooks City-Base, Tex., March ARB, Calif., and Wright-Patterson AFB, Ohio

Three regional offices  
 16 field offices

#### PERSONNEL

|           |     |
|-----------|-----|
| Civilians | 747 |

| <b>Total</b>       |    | <b>232</b> |

### Air Force Communications Agency

Hq.: Scott AFB, Ill.  
 Estab.: June 13, 1996  
 Cmdr.: Col. Carl Williamson

#### MISSION, PURPOSE, OPERATIONS

**Provide** C4ISR capabilities to the warfighter through architecture and lead command management of the Air Force ground, air, and space network—the ConstellationNet

**Direct** integration of systems into the network, assuring decision superiority; drive innovative information technology solutions for Air Force warfighters by generating progressive standards, architectures, and force structure policies and guidance

**Deploy** engineering and network operations strike teams worldwide for assured Air Force network combat power

#### STRUCTURE

Five functional areas

#### PERSONNEL

## Air Force Cost Analysis Agency

Hq.: Arlington, Va.  
Estab.: Aug. 1, 1992  
Exec. Dir.: Richard K. Hartley

**MISSION, PURPOSE, OPERATIONS**  
Develop independent life-cycle cost estimates of major weapon and information systems; estimates and cost factors for modernization planning, long-range planning, divestiture, and flying hour program; cost-estimation tools, techniques, methodologies, and databases

Conduct special cost reviews for the Air Force Secretariat and for other organizations as directed

Research emerging changes in technologies, acquisition priorities, and industry

### STRUCTURE

Five divisions  
Seven operating locations

### PERSONNEL

|             |    |    |
|-------------|----|----|
| Active duty |    | 20 |
| Officers    | 17 |    |
| Enlisted    | 3  |    |
| Civilians   |    | 56 |
| Total       |    | 76 |

## Air Force Financial Services Center

Hq.: Ellsworth AFB, S.D.  
Estab.: Sept. 14, 2007  
Cmdr.: Col. Judy Perry

### MISSION, PURPOSE, OPERATIONS

Provide travel and military pay services and support to active and reserve component military and civilian personnel across the Air Force

Serve as the single financial services center for transactions formerly conducted at 93 base-level finance offices

Expedite travel and military pay services through a centralized processing center and a full-service contact center, which is scheduled to begin operations in October 2008

### STRUCTURE

Two directorates

### PERSONNEL

|             |     |     |
|-------------|-----|-----|
| Active duty |     | 105 |
| Officers    | 5   |     |
| Enlisted    | 100 |     |

| Total       |     | 108 |

## Air Force Flight Standards Agency

Hq.: Oklahoma City  
Estab.: Oct. 1, 1991  
Cmdr.: Col. Christopher S. Ceplecha

**MISSION, PURPOSE, OPERATIONS**  
Develop, standardize, evaluate, and certify USAF policy, procedures, and equipment for flight operations and centrally manage USAF air traffic control and landing systems

Represent USAF in FAA airspace management and ATC issues and DOD in international airspace and ATC issues

Provide procedures for ATC, airfield, operational evaluation of ATC systems, airspace management, and terminal instrument procedures

AIR FORCE Magazine / May 2008

### STRUCTURE

Three directorates

## Air Force Frequency Management Agency

Hq.: Alexandria, Va.  
Estab.: Oct. 1, 1991  
Cmdr.: Col. Gary W. Klabunde

### MISSION, PURPOSE, OPERATIONS

Plan, provide, and preserve access to the electromagnetic spectrum for Air Force and selected DOD activities in support of national policy objectives, systems development, and global operations

Develop and implement spectrum guidelines and instructions to support the Air Force mission

Coordinate actions to resolve spectrum interference incidents involving DOD, private sector, federal, and international users; formulate and articulate US positions at World Radio Conference

Coordinate orbital locations and spectrum needs for DOD satellites at the international level

Provide functional management for the spectrum management career field and oversee curriculum for the Electromagnetic Spectrum Management Course and the JTF Spectrum Management Course

### STRUCTURE

Two directorates

### PERSONNEL

## Air Force Global Cyberspace Integration Center

Hq.: Langley AFB, Va.  
Estab.: Aug. 1, 1997  
Dir.: Stan C. Newberry

### MISSION, PURPOSE, OPERATIONS

Team with major commands, joint and coalition partners, national agencies, industry, and academia to develop, integrate, and standardize air, space, and cyberspace components

Manage C2 and cyber innovation, experimentation, and transition efforts including Joint Expeditionary Force Experiment (JEFX)

Plan, program, and guide capability based planning, requirements, architectures, and integration of USAF warfighting networks, combat support, and C2 systems

Serve as lead command for tactical datalinks to include joint interoperability of tactical C2 systems, joint and coalition C2 interoperability data standards, air component information management, and SATCOM terminal management

### STRUCTURE

Four directorates

### PERSONNEL

|                    |     |     |

## Air Force Historical Research Agency

Hq.: Maxwell AFB, Ala.  
Estab.: May 25, 1979  
Dir.: Charles F. O'Connell Jr.

### MISSION, PURPOSE, OPERATIONS

Collect, preserve, and manage historical document collection and oral history program

Research, write, and publish books and other studies on USAF history

Provide historical support to USAF, DOD, other government agencies, and the public

Record and disseminate USAF history, including the role of airpower in national security

Operate research facilities and automated historical data system

Determine the lineage and honors of USAF units; maintain official emblem records

Verify Air Force aerial victory credits

### STRUCTURE

## Air Force Intelligence Analysis Agency

Hq.: Pentagon  
 Estab.: Feb. 2, 2001  
 Dir.: Steve A. Cantrell

### MISSION, PURPOSE, OPERATIONS

**Provide** tailored, substantive intelligence, special security services, and imagery products to the Secretariat and the Air Staff

**Function** as a national-level center of excellence for analysis of foreign air and air defense tactics and training and effects-based targeting

**Serve** as Air Force intelligence focal point for Intelligence Force Protection policy and counterterrorism

**Represent** Air Force A2 on National Intelligence Estimates and in other DOD and national intelligence forums

**Manage** interagency civil air analysis

**Direct** global tactics analysis reporting program for the theater air components

**Provide** National Capital Region security and information system services for USAF

### STRUCTURE

Nine divisions

### PERSONNEL

| <b>Total</b> |    | <b>123</b> |

## Air Force Intelligence, Surveillance, and Reconnaissance Agency

Hq.: Lackland AFB, Tex.  
 Estab.: June 8, 2007  
 Cmdr.: Maj. Gen. John C. Koziol

### MISSION, PURPOSE, OPERATIONS

**Organize**, train, equip, and present assigned personnel and capabilities to conduct intelligence, surveillance, and reconnaissance for combatant commanders and the nation

**Implement** and oversee execution of USAF policy and guidance to expand Air Force ISR capabilities to meet current and future challenges

### STRUCTURE

70th Intelligence Wing  
 480th Intelligence Wing  
 National Air & Space Intelligence Center  
 Air Force Technical Applications Center

### PERSONNEL

Data incomplete; realignment of resources under way

## Air Force Legal Operations Agency

Hq.: Bolling AFB, D.C.  
 Estab.: Sept. 1, 1991  
 Cmdr.: Brig. Gen. Richard C. Harding

### MISSION, PURPOSE, OPERATIONS

**Administer** Air Force's civil litigation and military justice programs and provide legal

research technology to all Air Force Judge Advocate Corps members

**Advise** in military justice and civil law matters encompassing courts-martial, environmental, acquisition, claims, litigation, employment and patent actions, and legal assistance

**Command** the Air Force Judge Advocate General's School, which is the hub of legal training for Air Force counsel, paralegals, and support staff

**Support** the Department of Justice with regard to all phases of litigation, civil or criminal, pertaining to the Air Force, and share training responsibilities for Air Force and other DOD attorneys and paralegals

### STRUCTURE

Four directorates

The commander is also the Air Force chief of safety. AFSC publishes *Flying Safety*, *Wingman*, and *Weapons Journal*.

## Air Force Security Forces Center

Hq.: Lackland AFB, Tex.  
 Estab.: March 17, 1997  
 Cmdr.: Col. Robert W. Tirevold

### MISSION, PURPOSE, OPERATIONS

Develop USAF security forces guidance, policy, and training requirements to safeguard and protect personnel and resources

Prepare guidance on air base defense operations and security forces continuation training; mission-related security and law enforcement operations; resource protection; anti-terrorism; conduct USAF-level installation vulnerability assessments

Develop and implement base-level and combat arms training and ground combat weapons maintenance programs

Manage USAF corrections program and activities; DOD military working dog activities; contingency taskings

### STRUCTURE

Three divisions

Three detachments at Ft. Leavenworth, Kan., NAS Miramar, Calif., and Charleston NWC, S.C.

### PERSONNEL

|                    |     |            |

## Air Force Services Agency

Hq.: San Antonio  
 Estab.: Feb. 5, 1991  
 Cmdr.: Col. Frederic C. Ryder

### MISSION, PURPOSE, OPERATIONS

Provide combat support to commanders directly in support of the Air Force mission

Provide community service programs that enhance the quality of life for Air Force members and their families

Manage Air Force nonappropriated central funds and operate central systems such as banking, investments, purchasing, data flow, insurance, and benefit programs

### STRUCTURE

Eight directorates

### PERSONNEL

SSgt. Michael Ragsdale reviews weather data.

## Air Force Technical Applications Center

Hq.: Patrick AFB, Fla.  
 Estab.: July 7, 1959  
 Cmdr.: Col. Mark W. Westergren

### MISSION, PURPOSE, OPERATIONS

Monitor compliance with several international treaties, including the 1974 Threshold Test Ban Treaty and 1976 Peaceful Nuclear Explosions Treaty

Operate the US Atomic Energy Detection System, a global network of subsurface, surface, airborne, and space-based sensors that detect nuclear explosions

### STRUCTURE

Analysis Center, Patrick AFB, Fla.  
 Operational sites/detachments worldwide

### PERSONNEL

|              |     |            |
|--------------|-----|------------|
| Active duty  |     | 525        |

| Enlisted     | 405 |            |
| <b>Total</b> |     | <b>525</b> |

### EQUIPMENT

Multiple seismic arrays and single-instrument locations consisting of seismometers and associated data acquisition systems and workstations

Several hydroacoustic recording locations. More than 100 sensors and 35 support satellites, with associated ground systems instrumentation and data-processing equipment

## Air Force Weather Agency

Hq.: Offutt AFB, Neb.  
 Estab.: Oct. 15, 1997  
 Cmdr.: Col. Patrick M. Condray

### MISSION, PURPOSE, OPERATIONS

Maximize the nation's aerospace and ground combat effectiveness by providing

accurate, relevant, and timely air and space weather information to DOD, coalition, and national users and by providing standardized training and equipment to Air Force weather forces

### STRUCTURE

Air Force Combat Climatology Center, Asheville, N.C.

Air Force Combat Weather Center, Hurlburt Field, Fla.

Solar observatories, operating locations, and detachments around the world

### PERSONNEL

# Direct Reporting Units

A direct reporting unit (DRU) is a subdivision directly subordinate to Hq. USAF, separate from any major command or FOA because of a unique mission, legal requirements, or other factors. DRUs have the same administrative and organizational responsibilities as major commands.

## Air Force District of Washington

Hq.: Bolling AFB, D.C.  
 Estab.: July 15, 1994  
 Cmdr.: Maj. Gen. Frank Gorenc

### MISSION, PURPOSE, OPERATIONS

**Provide** Air Force component to the Joint Force Hq.-National Capital Region; USAF voice for planning and implementing cross-service solutions throughout the National Capital Region  
**Organize**, train, equip, and deploy forces for AEFs and homeland defense, civil support, national special security events; flagship ceremonial and musical capability in support of NCR and global interests  
**Ensure** 40,000 USAF members assigned worldwide have operating and UCMJ support  
**Perform** MAJCOM-level responsibilities

### STRUCTURE

Headquarters staff  
 Three groups: Mission Support Group, Medical Group, and Operations Group  
 One wing

### PERSONNEL

|                    |       |              |

| <b>Total</b>       |       | <b>5,630</b> |

## Air Force Operational Test and Evaluation Center

Hq.: Kirtland AFB, N.M.  
 Estab.: Jan. 1, 1974  
 Cmdr.: Maj. Gen. Stephen T. Sargeant

### MISSION, PURPOSE, OPERATIONS

**Test** and evaluate new weapon systems in realistic battlespace environments to provide decision-makers accurate, balanced, and complete assessments of mission capability  
**Maintain** an operational focus, from concept development to system fielding, to ensure warfighters have the right tools to win tomorrow's battles

### STRUCTURE

Five detachments at Edwards AFB, Calif., Eglin AFB, Fla., Nellis AFB, Nev., Peterson AFB, Colo., and Kirtland AFB, N.M.  
 11 operating locations

### PERSONNEL

|                    |     |            |
|--------------------|-----|------------|

## US Air Force Academy

Hq.: Colorado Springs, Colo.  
 Estab.: April 1, 1954  
 Supt.: Lt. Gen. John F. Regni

### MISSION, PURPOSE, OPERATIONS

**Develop** and inspire young men and women to become Air Force officers with knowledge, character, and discipline  
**Produce** dedicated Air Force officers and leaders  
**Instill** leadership through academics, military training, athletic conditioning, and character development

### STRUCTURE

The cadet student body is designated the Cadet Wing. The wing is composed of four groups consisting of 10 squadrons each, with about 110 cadets assigned to a squadron. Each squadron consists of members of all four classes.

### PERSONNEL

|                    |       |              |
|--------------------|-------|--------------|
| Active duty        |       | 2,199        |
| Officers           | 939   |              |
| Enlisted           | 1,260 |              |
| Reserve components |       | 136          |
| ANG                | 0     |              |
| AFRC               | 136   |              |
| Civilians          |       | 1,285        |
| <b>Total</b>       |       | <b>3,620</b> |

### EQUIPMENT

73 aircraft

Cadets complete four years of study for a bachelor of science degree, choosing from 32 different academic majors. Four primary areas of development are stressed in military art and science, theoretical and applied leadership experiences, aviation science and airmanship programs, and military training.

# Auxiliary

An Air Force auxiliary is an organization created by statute which the Secretary of the Air Force may use to fulfill the Air Force's noncombat programs and missions. The Civil Air Patrol (CAP) is the only USAF auxiliary to date.

## Civil Air Patrol

Hq.: Maxwell AFB, Ala.  
 Estab.: Dec. 1, 1941  
 Natl. Cmdr.: Brig. Gen. Amy S. Courter, CAP (acting)  
 Exec. Dir.: Don Rowland

### MISSION, PURPOSE, OPERATIONS

**Provide** vital operational capabilities in support of aerial and ground search and rescue (SAR), disaster relief, a nationwide communications network, and counterdrug and homeland security missions  
**Conduct** 90 percent of all inland SAR missions as tasked by the Air Force Rescue Coordination Center  
**Build** strong citizens for the future by providing leadership training, technical education, scholarships, and career education to young men and women, ages 12 to 21, in the CAP Cadet Program  
**Promote** and support aerospace education, both for its own members and the general public, and conduct a national school enrichment program at the middle- and high-school levels

### STRUCTURE

CAP is a nonprofit, 501 (c) (3) corporation with a national headquarters that oversees:  
 Eight regions  
 52 wings (each state, Puerto Rico, and Washington, D.C.)  
 1,521 squadrons

### PERSONNEL

# Guide to Air Force Installations Worldwide

■ 2008 USAF Almanac

## Major Active Duty Installations

**Altus AFB**, Okla. 73523-5000; 120 mi. SW of Oklahoma City. **Phone:** 580-482-8100; DSN 866-1110. **Majcom:** AETC. **Host:** 97th Air Mobility Wing. **Mission:** trains aircrew members for C-17 and KC-135 aircraft. **History:** activated January 1943; inactivated May 1945; reactivated January 1953. **Area:** 7,746 acres. **Runways:** 13,440 ft., 9,000-ft. parallel runway, and 3,515-ft. assault strip. **Altitude:** 1,381 ft. **Personnel:** permanent party military, 1,464; DOD civilians, 1,166. **Housing:** single family, 796; visiting, VOQ/VAQ, 315; TLF, 30. **Clinic.**

**Andersen AFB**, Guam, APO AP 96543-5000; 2 mi. N of Yigo. **Phone:** (cmcl, from CONUS) 671-366-1110; DSN 315-366-1110. **Majcom:** PACAF. **Host:** 36th Wing. **Mission:** Pacific center for power projection, regional cooperation, and multinational training; serves as a logistic support and staging base for aircraft operating in the Pacific and Indian Oceans. **Major tenants:** Det. 5, 22nd Space Operations Sq. (AFSPC); 613th Contingency Response Gp. (AMC); 734th Air Mobility Sq. (AMC); Helicopter Combat Support Sq. 5 (US Navy). **History:** activated 1945. Named for Gen. James Roy Andersen, who was chief of staff, Hq. AAF, Pacific Ocean Areas, and lost at sea in February 1945. **Area:** 20,270 acres. **Runways:** 11,182 ft. and 10,555 ft. **Altitude:** 612 ft. **Personnel:** permanent party military, 2,108; DOD civilians, 1,561. **Housing:** single family, officer, 236, enlisted, 1,153; unaccompanied, UOQ, 74, UAQ/UEQ, 1,018; visiting, VOQ, 23, VAQ/VEQ, 519, TLF, 232. **Clinic.**

**Andrews AFB**, Md. 20762-5000; 10 mi. SE of Washington, D.C. **Phone:** 301-981-1110; DSN 858-1110. **Host:** 316th Wing. **Mission:** provides contingency response capability critical to national security, including emergency reaction rotary-wing airlift for the National Capital Region. **Major tenants:** Hq. AFOSI; Air National Guard Readiness Center; 89th AW (AMC); 113th Wing (ANG), F-16; 459th ARW (AFRC), KC-135; Naval Air Facility; Marine Aircraft Gp. 49, Det. A; Air Force Review Boards Agency. **History:** activated May 1943. Named for Lt. Gen. Frank M. Andrews, military air pioneer and WWII commander of the European Theater, killed in aircraft accident May 3, 1943 in Iceland. **Area:** 6,853

acres. **Runways:** 9,755 ft. and 9,300 ft. **Altitude:** 281 ft. **Personnel:** permanent party military 5,502; DOD civilians, 3,247. **Housing:** single family, 886; visiting, 61, TLF, 20. **Hospital.**

**Arnold AFB**, Tenn. 37389; approx. 7 mi. SE of Manchester. **Phone:** 931-454-1110; DSN 340-1110. **Majcom:** AFMC. **Host:** Arnold Engineering Development Center. **Mission:** supports acquisition and sustainment of aerospace systems by conducting flight simulation research, development, and evaluation testing for DOD, other government agencies, and commercial aerospace firms with the world's largest complex of wind tunnels, jet and rocket engine test cells, space simulation chambers, and hyperballistic ranges. **History:** base dedicated June 25, 1951. Named for Gen. of the Army H.H. "Hap" Arnold, wartime Chief of the Army Air Forces. **Area:** 39,081 acres. **Runway:** 6,000 ft. **Altitude:** 1,100 ft. **Personnel:** permanent party military, 79; DOD civilians, 255. **Housing:** single family, officer, 19, enlisted, 21; visiting, 40. **Medical aid station and small VA clinic.**

**Aviano AB**, Italy, APO AE 09604; adjacent to Aviano, 50 mi. N of Venice. **Phone:** (cmcl, from CONUS) 011-39-0434-30-1110/1113; DSN 314-632-1110. **Majcom:** USAFE. **Host:** 31st Fighter Wing. **Mission:** LANTIRN-equipped F-16 operations and mobile radar control and surveillance operations. **Major tenants:** Hq. 401st Air Expeditionary Wing (USAFE). **Geographically Separated Units (GSUs):** Det. 2, 401st AEW Pristina (Kosovo) Serbia; Det. 1, 401st AEW, Sarajevo, Bosnia; 774th Expeditionary Air Base Gp., Istres AB, France; 31st RED HORSE Flt. and 31st Munitions Sq., Camp Darby, Italy; 31st Munitions Support Sq., Ghedi AB, Italy; 99th Ex. Recon. Sq., RAF Akrotiri, Cyprus; 496th Air Base Sq., Morón AB, Spain. **History:** one of the oldest Italian air bases, dating to 1911. USAF began operations 1954. **Area:** 1,331 acres. **Runway:** 8,596 ft. **Altitude:** 413 ft. **Personnel:** permanent party military, 3,500; DOD civilians, 260. **Housing:** 681 govt.-leased (189 officer, 592 enlisted); unaccompanied, UAQ/UEQ, 812; visiting, 74, DV, 6. **Clinic** (contracted with local hospital).

**Barksdale AFB**, La. 71110-5000; in Bossier City. **Phone:** 318-456-1110; DSN 781-1110. **Majcom:** ACC. **Host:** 2nd Bomb Wing. **Mission:** B-52H operations and training. **Major tenants:** 8th Air Force (ACC); Air Force Cyber Command (Provisional); 917th Wing (AFRC), A-10, B-52H; 8th Air Force Museum. **History:** activated Feb. 2, 1933. Named for Lt. Eugene H. Barksdale, WWI airman killed in an August 1926 crash. **Area:** 22,000 acres (18,000 acres reserved for recreation). **Runway:** 11,756 ft. **Altitude:** 166 ft. **Personnel:** permanent party military, 7,306; DOD civilians, 1,164. **Housing:** single family, officer, 131, enlisted, 592; unaccompanied, 996; visiting, VOQ, 139, VAQ, 100, TLF, 24. **Superclinic.**

**Beale AFB**, Calif. 95903-5000; 13 mi. E of Marysville. **Phone:** 530-634-3000; DSN 368-1110. **Majcom:** ACC. **Host:** 9th Reconnaissance Wing. **Mission:** U-2, KC-135, and Global Hawk operations. **Major tenants:** 940th ARW (AFRC), KC-135; 7th Space Warning Sq. (AFSPC), PAVE PAWS; 548th Intelligence Gp. (ACC). **History:** originally US Army's Camp Beale; transferred to Air Force in 1948; became Air Force base in April 1951. Named for Brig. Gen. E.F. Beale, Indian agent in California prior to Civil War. **Area:** 22,944 acres. **Runway:** 12,000 ft. **Altitude:** 113 ft. **Personnel:** permanent party military, 3,742; DOD civilians, 718. **Housing:** single family, officer, 159, enlisted, 1,294; unaccompanied, 545; visiting, VOQ, 53, VAQ/VEQ, 125, TLF, 46. **Clinic.**

**Bolling AFB**, D.C. 20032-5000; 3 mi. S of US Capitol. **Phone:** 703-545-6700; DSN 227-0101. **Host:** 11th Wing. **Mission:** supports Hq. USAF and 36,000 USAF members worldwide; oversees USAF Band and USAF Honor Guard. **Major tenants:** Air Force Chief of Chaplains; Air Force District of Washington; Air Force Surgeon General; Air Force Medical Operations Agency; Defense Intelligence Agency; Air Force Legal Operations Agency; 497th Intelligence Gp. (ACC). **History:** activated October 1917. Named for Col. Reynal C. Bolling, first high-ranking Army Air Service officer killed in WWI. **Area:** 607 acres. **Runway:** Hellpad only. **Altitude:** 20 ft. **Personnel:** permanent party military, 1,408; DOD civilians, 822. **Housing:** single family, officer, 372, enlisted, 411; unac-

accompanied, UAQ/UEQ, 267; visiting, VOQ, 119, VAQ/VEQ, 48, TLF, 100. **Clinic.**

**Buckley AFB, Colo.** 80011-9524; 8 mi. E of Denver. **Phone:** 720-847-9011 DSN 847-9011. **Majcom:** AFSPC. **Host:** 460th Space Wing. **Mission:** provides global surveillance, space-based missile warning, and space communications operations. **Major tenants:** 140th Wing (ANG); Aerospace Data Facility; Navy/Marine Reserve Center; Army Aviation Support Facility. **History:** activated April 1, 1942 as a gunnery training facility. Named for 1st Lt. John H. Buckley, a WWI flier, killed Sept. 17, 1918. ANG assumed control from US Navy in 1959. Became active duty Air Force base Oct. 2, 2000. **Area:** 3,832 acres. **Runway:** 11,000 ft. **Altitude:** 5,663 ft. **Personnel:** permanent party military, 3,626; DOD civilians, 3,337. **Housing:** two dorms and 351 single-family units. **Clinic.**

**Cannon AFB, N.M.** 88103-5000; 7 mi. W of Clovis. **Phone:** 505-784-1110; DSN 681-1110. **Majcom:** AFSOC. **Host:** 27th Special Operations Wing. **Mission:** MC-130W and MQ-1 operations. **History:** activated August 1942. Named for Gen. John K. Cannon, WWII commander of all Allied air forces in the Mediterranean Theater and former commander, Tactical Air Command. **Area:** 3,789 acres, excluding range. **Runways:** 10,000 ft. and 8,200 ft. **Altitude:** 4,295 ft. **Personnel:** permanent party military, 2,470; DOD civilians, 392. **Housing:** single family, officer, 143, enlisted, 1,501; unaccompanied, 835; visiting, 57, TLF, 36. **Ambulatory care clinic.**

**Charleston AFB, S.C.** 29404-5000; 10 mi. from downtown Charleston. **Phone:** 843-963-2100; DSN 673-8400. **Majcom:** AMC. **Host:** 437th AW. **Mission:** C-17 operations. **Major tenant:** 315th AW (AFRC assoc.). **History:** activated October 1942; inactivated March 1946; reactivated August 1953. **Area:** 6,033 acres (including auxiliary airfield). **Runway:** 9,000 ft.; joint-use airfield. **Altitude:** 46 ft. **Personnel:** permanent party military, 4,169; DOD civilians, 1,450. **Housing:** single family, officer, 726, enlisted, 641; unaccompanied, UOQ, 85; UAQ/UEQ, 587; visiting, VOQ, 156, VAQ/VEQ, 40, TLF, 40. **Clinic.**

**Columbus AFB, Miss.** 39710-1000; 7.5 mi. NW of Columbus. **Phone:** 662-434-7322; DSN 742-1110. **Majcom:** AETC. **Host:** 14th Flying Training Wing. **Mission:** Specialized Undergraduate Pilot Training (T-1, T-6, T-37, T-38). **History:** activated 1942 for pilot training. **Area:** 5,325 acres. **Runways:** 12,000 ft., 8,000 ft., and 6,300 ft. **Altitude:** 219 ft. **Personnel:** permanent party military, 1,165; DOD civilians, 570. **Housing:** single family, 517; unaccompanied, UOQ, 234, UAQ/UEQ, 166; visiting, 73, DV, 4, TLF, 20. **Clinic.**

**Davis-Monthan AFB, Ariz.** 85707-5000; within Tucson. **Phone:** 520-228-1110; DSN 228-1110. **Majcom:** ACC. **Host:** 355th FW. **Mission:** A-10 combat crew training; OA-10 and FAC HC-130 training and operations; EC-130H; HH-60 Paveway; and CSAR operations. **Major tenants:** 12th Air Force (ACC); 309th Aerospace Maintenance and Regeneration Group (AFMCR), DOD's single location for regeneration, maintenance, parts reclamation, preservation, storage, and disposal of excess DOD and government aerospace vehicles; 943rd Rescue Gp. (AFRC), HH-60; 55th ECG (ACC); 563rd RQG (AFSOC); US Customs and Border Protection. **History:** activated 1927. Named for two local aviators: 2nd Lt. Samuel H. Davis, killed Dec. 28, 1921, and 2nd Lt. Oscar Monthan, killed March 27, 1924. **Area:** 10,633 acres. **Runway:** 13,643 ft. **Altitude:** 2,404 ft. **Personnel:** permanent party military, 6,900; DOD civilians, 1,970. **Housing:** single family, officer, 125, enlisted, 1,129; unaccompanied, 756; visiting, VOQ, 20, VAQ/VEQ, 61, DV, 165, TLF, 50. **Clinic.**

**Dover AFB, Del.** 19902-7209; 6 mi. SE of Dover. **Phone:** 302-677-3000; DSN 445-3000. **Majcom:** AMC. **Host:** 436th AW. **Mission:** C-5 and C-17 operations; operates largest DOD aerial port facility; houses military's East Coast mortuary. **Major tenant:** 512th AW (AFRC assoc.). **History:** activated December 1941; inactivated 1946; reactivated February 1951. **Area:** 3,400 acres. **Runways:** 12,900 ft. and 9,600 ft. **Altitude:** 28 ft. **Personnel:** permanent party military, 3,350; DOD civilians, 1,040. **Housing:** single family, officer, 50, enlisted, 657; unaccompanied, UAQ/UEQ, 504; visiting, VQ, 251, TLF, 0. **Clinic.**

**Dyess AFB, Tex.** 79607-1980; WSW border of Abilene. **Phone:** 325-696-1110; DSN 461-1110. **Majcom:** ACC. **Host:** 7th BW. **Mission:** B-1 operations. **Major tenant:** 317th Airlift Gp. (AMC), C-130. **History:** activated April 1942; deactivated December 1945; reactivated as Abilene AFB September 1955. In December 1956, renamed for Lt. Col. William E. Dyess, WWII fighter pilot who escaped from a Japanese prison camp, killed in P-38 crash in December 1943. **Area:** 6,342 acres (including off-base sites). **Runway:** 13,500 ft. **Altitude:** 1,789 ft. **Personnel:** permanent party military, 5,370; DOD civilians, 435. **Housing:** single family, officer, 108, enlisted, 515; unaccompanied, 808; visiting, 137, TLF, 39. **Clinic.**

**Edwards AFB, Calif.** 93524; adjacent to Rosamond. **Phone:** 661-227-1110; DSN 527-1110. **Majcom:** AFMCR. **Host:** 95th Air Base Wing. **Mission:** The Air Force Flight Test Center is AFMCR's center of excellence for research, development, test, and evaluation of aerospace systems from concept to combat. It operates the US Air Force Test Pilot School. **Major tenants:** AFRL's Propulsion Directorate (AFMCR); Dryden Flight Research Center (NASA); Air Force Operational Test and Evaluation Center, Det. 5; 31st Test and Evaluation Squadron (ACC); Marine Aircraft Group 46, Det. Bravo. **History:** activities began in September 1933 when the Muroc Bombing and Gunnery Range was established. In 1942, it was designated Muroc Army Air Base. Renamed in 1949 for Capt. Glen W. Edwards, killed June 5, 1948 in crash of a YB-49 "Flying Wing." **Area:** 301,000 acres. **Runways:** 21, from 4,000 to 39,000 ft. **Altitude:** 2,302 ft. **Personnel:** permanent party military, 2,665; DOD civilians, 3,360. **Housing:** officer, 194; enlisted, 603; unaccompanied, UOQ, 80; UEQ; 670. **Medical and dental clinics.**

**Eglin AFB, Fla.** 32542; 2 mi. SW of the twin cities of Niceville and Valparaiso; 7 mi. NE of Fort Walton Beach. **Phone:** 850-882-1110; DSN 872-1110. **Majcom:** AFMCR. **Host:** 96th ABW. **Mission:** The Air Armament Center is responsible for the development, acquisition, testing, and deployment of all air-delivered weapons. **Major tenants:** AFRL's Munitions Directorate (AFMCR); 33rd FW (ACC), F-15; 53rd Wing (ACC); 919th Special Operations Wing (AFRC) at Duke Field, MC-130; Air Force Armament Museum; Army 6th Ranger Training Battalion; Naval School Explosive Ordnance Disposal. **History:** activated 1935. Named for Lt. Col. Frederick I. Eglin, WWI flier killed in aircraft accident Jan. 1, 1937. **Area:** 463,452 acres. Eglin is the nation's largest Air Force base in terms of acreage, covering an area roughly two-thirds the size of Rhode Island. **Runways:** 12,000 ft. and 10,000 ft. **Altitude:** 85 ft. **Personnel:** permanent party military, 7,127; DOD civilians, 3,884 (excluding Hurlburt Field). **Housing:** single family, officer, 285, enlisted, 1,767; unaccompanied, UAQ/UEQ, 933; visiting, VOQ, 169, VAQ/VEQ, 156, TLF, 87. **Hospital.**

**Eielson AFB, Alaska** 99702-5000; 26 mi. SE of Fairbanks. **Phone:** 907-377-1110; DSN 317-377-1110. **Majcom:** PACAF. **Host:** 354th FW. **Mission:** F-16C/D operations; oversees Pacific

Alaska Range Complex and Red Flag-Alaska. **Major tenants:** Arctic Survival School (AETC); 168th Air Refueling Wing (ANG), KC-135; 353rd Combat Training Sq. **History:** activated October 1944. Named for Carl Ben Eielson, Arctic aviation pioneer who died in an Arctic rescue mission in November 1929. **Area:** 19,790 acres (including 16 remote sites, 63,195 acres). **Runway:** 14,500 ft. **Altitude:** 534 ft. **Personnel:** permanent party military, 2,930; DOD civilians, 633. **Housing:** single family, officer, 181, enlisted, 1,243; unaccompanied, UOQ, 8, UAQ, 522, UEQ, 16; visiting, VOQ, 206, VAQ/VEQ, 328, TLF, 40. **Outpatient clinic.**

**Ellsworth AFB, S.D.** 57706-5000; 12 mi. ENE of Rapid City. **Phone:** 605-385-5056; DSN 675-5056. **Majcom:** ACC. **Host:** 28th BW. **Mission:** B-1 operations. **Major tenants:** Det. 21, Belle Fourche Electronic Scoring Site; Det. 8, 372nd Training Sq. (AETC); Det. 226, AFOSI; Air Force Financial Services Center. **History:** activated January 1942 as Rapid City AAB; renamed June 13, 1953 for Brig. Gen. Richard E. Ellsworth, killed March 18, 1953 in RB-36 crash. **Area:** 5,411 acres. **Runway:** 13,500 ft. **Altitude:** 3,276 ft. **Personnel:** permanent party military, 3,664; DOD civilians, 484. **Housing:** single family, officer, 413, enlisted, 1,508, unaccompanied, 728; visiting, 80, DV, 8, TLF, 29. **Clinic.**

**Elmendorf AFB, Alaska** 99506-5000; bordering Anchorage. **Phone:** 907-552-1110; DSN 317-552-1110. **Majcom:** PACAF. **Host:** 3rd Wing. **Mission:** C-12, C-17, E-3B Airborne Warning and Control System, F-15, and F-22A operations. Hub for air traffic to and from Far East. **Major tenants:** Alaskan Command; 11th Air Force (PACAF); Alaskan NORAD Region. **History:** activated July 1940. Named for Capt. Hugh Elmendorf, killed Jan. 13, 1933. **Area:** 13,100 acres. **Runways:** 10,000 ft. and 7,500 ft. **Altitude:** 213 ft. **Personnel:** permanent party military, 6,642; DOD civilians, 840. **Housing:** single family, officer, 112, enlisted, 1,910; unaccompanied, UAQ/UEQ, 850; visiting, VOQ, 178, VAQ/VEQ, 195, TLF, 86. **Hospital.**

**Fairchild AFB, Wash.** 99011-9588; 10 mi. WSW of Spokane. **Phone:** 509-247-1110; DSN 657-1110. **Majcom:** AMC. **Host:** 92nd Air Refueling Wing. **Mission:** KC-135R operations. **Major tenants:** 336th Training Gp. (USAF Survival School, AETC); 141st ARW (ANG). **History:** activated January 1942. Named for Gen. Muir S. Fairchild, USAF vice chief of staff at his death in 1950. **Area:** 5,823 acres; 530,205 acres used for survival school. **Runway:** 13,901 ft. **Altitude:** 2,426 ft. **Personnel:** permanent party military, 2,749; DOD civilians, 700. **Housing:** single family, officer, 167, enlisted, 889; unaccompanied, VOQ, 126, VAQ, 180, TLF, 42. **Clinic.**

**F.E. Warren AFB, Wyo.** 82005-5000; adjacent to Cheyenne. **Phone:** 307-773-1110; DSN 481-1110. **Majcom:** AFSPC. **Host:** 90th SW. **Mission:** Minuteman III ICBMs and UH-1N operations. **Major tenants:** 20th Air Force (AFSPC); Air Force ICBM Museum. **History:** activated as Ft. D.A. Russell July 4, 1867; under Army jurisdiction until 1949, when reassigned to USAF; renamed in 1930 for Francis Emory Warren, Wyoming Senator and first state governor. **Area:** 5,866 acres. Missile site area covering more than 12,600 sq. mi. in Wyoming, Colorado, and Nebraska. **Runway:** none. **Altitude:** 6,142 ft. **Personnel:** permanent party military, 1,361; DOD civilians, 1,149. **Housing:** privatized single-family units, 617; TLF, 57. **Clinic.**

**Goodfellow AFB, Tex.** 76908-4410; SE of San Angelo. **Phone:** 325-654-1110; DSN 477-1110. **Majcom:** AETC. **Host:** 17th Training Wing. **Mission:** trains intelligence, fire protection, and special instruments personnel for US military and

DOD and international agencies. **Major tenants:** 344th Military Intelligence Battalion (Army); Center for Information Dominance det. (Navy); USMC det.; NCO Academy. **History:** activated January 1941. Named for Lt. John J. Goodfellow Jr., WWI observation airplane pilot killed in combat Sept. 14, 1918. **Area:** 1,136 acres. **Runway:** none. **Altitude:** 1,900 ft. **Personnel:** permanent party military, 1,582; DOD civilians, 861. **Housing:** single family, officer, 2, enlisted, 96; unaccompanied, UOQ, 144, UAQ/UEQ, 236; visiting, VOQ, 114, VAQ/VEQ, 321, TLF, 31. **Clinic.**

**Grand Forks AFB, N.D.** 58205-5000; 16 mi. W of Grand Forks. **Phone:** 701-747-3000; DSN 362-3000. **Majcom:** AMC. **Host:** 319th ARW. **Mission:** KC-135R operations. **History:** activated 1956. Named after town of Grand Forks, whose citizens bought the property for the Air Force. **Area:** 4,830 acres. **Runway:** 12,351 ft. **Altitude:** 911 ft. **Personnel:** permanent party military, 2,429; DOD civilians, 1,112. **Housing:** single family, officer, 148, enlisted, 756; unaccompanied, UAQ/UEQ, 370; visiting, VOQ, 5, VAQ/VEQ, 2, TLF, 27. **Hospital.**

**Hanscom AFB, Mass.** 01731-5000; 17 mi. NW of Boston. **Phone:** 781-377-1110; DSN 478-1110. **Majcom:** AFMC. **Host:** 66th ABW. **Mission:** Electronic Systems Center manages development and acquisition of command and control systems. **Major tenants:** AFRL's Space Vehicles Directorate-Hanscom; AFRL's Sensors Directorate-Hanscom. **History:** activated 1941. Named for Laurence G. Hanscom, a pre-WWII advocate of private aviation, killed in a lightplane accident in 1941. **Area:** 846 acres. **Runway:** no flying mission; transient USAF aircraft use runways of Laurence G. Hanscom Field, state-operated airfield adjoining the base. **Altitude:** 133 ft. **Personnel:** permanent party military, 1,769; DOD civilians, 2,316. **Housing:** single family, officer, 314, enlisted, 470; unaccompanied, UAQ/UEQ, 122; visiting, 148, TLF, 47. **Clinic.**

**Hickam AFB, Hawaii** 96853-5000; 9 mi. W of Honolulu. **Phone:** 808-449-7110 (Oahu military operator); DSN 315-449-7110. **Majcom:** PACAF. **Host:** 15th AW (C-17, C-37, C-40). **Mission:** C-17, C-37, C-40 operations. **Major tenants:** PACAF; 13th AF; 154th Wing (ANG), C-17, C-130, F-15, KC-135R; Joint POW/MIA Accounting Command. **History:** activated September 1938. Named for Lt. Col. Horace M. Hickam, aviation pioneer killed in crash Nov. 5, 1934. **Area:** 2,761 acres. **Runways:** Four joint-use runways shared with Honolulu Arpt.: 12,357 ft., 12,000 ft., 9,000 ft., and 6,952 ft. **Altitude:** 13 ft. **Personnel:** permanent party military, 5,016; DOD civilians, 1,405. **Housing:** single family, officer, 586, enlisted, 703; unaccompanied, UAQ/UEQ, 767; visiting, VOQ, 157, VAQ/VEQ, 115, TLF, 40. **Clinic.**

**Hill AFB, Utah** 84056-5990; 25 mi. N. of Salt Lake City. **Phone:** 801-777-1110; DSN 777-1110. **Majcom:** AFMC. **Host:** 75th ABW. **Mission:** Ogden Air Logistics Center provides worldwide engineering and logistics management; maintains the A-10, C-130, F-16, and F-22; handles logistics management and maintenance for Minuteman ICBMs; provides sustainment and logistics support for space and C3I programs; overhauls and repairs landing gear for all USAF (and 70 percent of DOD) aircraft; operates and maintains the Utah Test and Training Range. **Major tenants:** 388th FW (ACC); 419th FW (AFRC), F-16; Hill Aerospace Museum; Defense Enterprise Computing Center (DISA); Defense Distribution Depot Hill Utah; Defense Logistics Agency; 372nd Recruiting Gp. (USAF). **History:** activated 1940. Named for Maj. Ployer P. Hill, killed Oct. 30, 1935 while test flying the first B-17. **Area:** 6,797 acres; 962,076 acres (UTTR). **Runway:** 13,500 ft. **Altitude:**

3, F-15C/D, KC-135R, and HH-60 operations. **Major tenants:** 353rd Special Operations Gp. (AFSOC); 390th Intelligence Sq.; 82nd Reconnaissance Sq. (ACC); 733rd Air Mobility Support Sq. (AMC); 1-1 Air Defense Artillery Battalion (Army); Commander Fleet Activities Okinawa (Navy). **History:** occupied by US forces in April 1945. Named for city of Kadena, Okinawa. **Area:** 11,210 acres. **Runway:** 12,100 ft. **Altitude:** 146 ft. **Personnel:** permanent party military, 8,000; DOD civilians, 1,800. **Housing:** single family, officer, 1,495 enlisted, 5,296; unaccompanied, UOQ, 35, UAQ/UEQ, 1,629; visiting, VOQ, 226, VAQ/VEQ, 222, TLF, 122. **Clinic.**

**Keesler AFB, Miss.** 39534-5000; located in Biloxi. **Phone:** 228-377-1110; DSN 597-1110. **Majcom:** AETC. **Host:** 81st TRW. **Mission:** conducts Air Force, joint service, and international training for basic electronics, communications electronic systems, communications computer systems, air traffic control, airfield management, command post, air weapons control, weather, precision measurement, education and training, financial management and comptroller, information management, manpower and personnel, and medical, dental, and nursing specialties. **Major tenants:** 2nd Air Force (AETC); 45th Airlift Sq. (AETC), C-21; 403rd Wing (AFRC), C-130, WC-130. **History:** activated June 12, 1941. Named for 2nd Lt. Samuel R. Keesler Jr., a native of Mississippi and WWI aerial observer killed in action Oct. 9, 1918. **Area:** 3,554 acres, excluding off-base housing. **Runway:** 6,600 ft. **Altitude:** 33 ft. **Personnel:** permanent party military, 7,500; DOD civilians, 3,600. **Housing:** 456; post-Katrina construction ongoing; visiting, 1,028, TLF, 80. **Keesler Medical Center.**

**Kirtland AFB, N.M.** 87117-5606; SE quadrant of Albuquerque. **Phone:** 505-846-1110; DSN 246-1110. **Majcom:** AFMC. **Host:** 377th ABW. **Mission:** The Nuclear Weapons Center provides acquisition, modernization, and sustainment of nuclear system programs for DOD and DOE. The 498th Armament Systems Wing sustains nuclear munitions and cruise missiles. **Major tenants:** 58th SOW (AETC), CV-22, HC-130, MC-130, HH-60, MH-53, UH-1. Missile Defense Agency's Airborne Laser Program Office; Air Force Distributed Mission Operations Center; Air Force Nuclear Weapons and Counterproliferation Agency; Det. 1, 342nd TRS, Pararescue and Combat Rescue Officer School; Air Force Office of Aerospace Studies; Air Force Operational Test and Evaluation Center; AFRL's Space Vehicles and Directed Energy Directorates (AFMC); 150th FW (ANG), F-16; Defense Threat Reduction Agency; Sandia National Laboratories; National Nuclear

Security Administration (DOE); Air Force Inspection Agency; Air Force Safety Center; Space Development and Test Wing (AFSPC). **History:** activated January 1941. Named for Col. Roy C. Kirtland, aviation pioneer who died May 2, 1941. **Area:** 52,678 acres. **Runways:** two, each 13,000 ft.; 10,000 ft.; and 6,000 ft. **Altitude:** 5,352 ft. **Personnel:** permanent party military, 3,784; DOD civilians, 1,974. **Housing:** single family, officer, 187, enlisted, 891; unaccompanied, UAQ/UEQ, 828; visiting, VOQ, 181, VAQ/VEQ, 216, DV, 38, TLF, 39. **Air Force-VA joint medical center.**

**Kunsan AB**, South Korea, APO AP 96264-5000; 8 mi. SW of Kunsan City. **Phone:** (cmcl, from CONUS) 011-82-63-470-1110; DSN 782-1110. **Majcom:** PACAF. **Host:** 8th FW. **Mission:** F-16C/D operations. **Major tenants:** US Army's Charlie and Delta Batteries, 2nd Battalion, 1st Air Defense Artillery; US Army Contracting Command Korea. **History:** built by the Japanese in 1938. **Area:** 2,157 acres. **Runway:** 9,000 ft. **Altitude:** 29 ft. **Personnel:** permanent party military, 2,447; DOD civilians, 31. **Housing:** unaccompanied, UOQ, 247, UAQ/UEQ, 2,648; visiting, VOQ, 27, VAQ/VEQ, 60. **Clinic.**

**Lackland AFB**, Tex. 78236-5000; 8 mi. SW of downtown San Antonio. **Phone:** 210-671-1110; DSN 473-1110. **Majcom:** AETC. **Host:** 37th TRW. **Mission:** provides basic military training for recruits entering Air Force, ANG, and AFRC; conducts ground combat (base support) courses, English language training for international and US military students, and specialized maintenance and security training in Spanish to military forces and government agencies from 26 Latin American nations. **Major tenants:** Air Force Intelligence, Surveillance, and Reconnaissance Agency; 433rd AW (AFRC), C-5; 149th FW (ANG), F-16; 67th Network Warfare Wing (ACC); National Security Agency/Central Security Service Texas; 59th Medical Wing; Air Force Security Forces Center; Cryptologic Systems Gp. (AFMC). **History:** activated 1941. Named for Brig. Gen. Frank D. Lackland, early commandant of Kelly Field flying school, who died in 1943. **Area:** 9,572 acres. **Runway:** 11,550 ft. **Altitude:** 691 ft. **Personnel:** permanent party military, 18,480; DOD civilians, 5,197. **Housing:** single family, officer, 151, enlisted, 1,060; unaccompanied, enlisted, 1,243; visiting, 2,760, TLF, 96. **Wilford Hall Medical Center.**

**Lajes Field**, Azores, Portugal, APO AE 09720-5000; Terceira Island, 900 mi. W of Portugal. **Phone:** (cmcl, from CONUS) 011-351-295-57-1110; DSN from US 535-1110, from Europe 535-1110. **Majcom:** USAF. **Host:** 65th ABW. **Mission:** provides support to US and allied aircraft and personnel transiting the Atlantic, through US military and host-nation coordination. **Major tenants:** 65th ABW; 729th AMS (AMC). **History:** US operations began at Lajes Field 1943. **Area:** 1,192 acres. **Runway:** 10,865 ft. **Altitude:** 180 ft. **Personnel:** permanent party military, 835; DOD civilians, 197. **Housing:** single family, officer, 74, enlisted, 368; unaccompanied, UOQ, 10, UAQ/UEQ, 240; visiting, 242, TLF, 30. **Clinic.**

**Langley AFB**, Va. 23665-5000; 3 mi. N of Hampton. **Phone:** 757-764-1110; DSN 574-1110. **Majcom:** ACC. **Host:** 1st FW. **Mission:** F-15 and F-22A operations. **Major tenants:** ACC; Air Force Rescue Coordination Center; Air Force Global Cyberspace Integration Center; USAF Heritage of America Band; 480th Intelligence Wg. (ACC). **History:** activated Dec. 30, 1916. Langley is the first military base in the US purchased and built specifically for military aviation. Named for aviation pioneer and scientist Samuel Pierpont Langley, who died in 1906. **Area:** 2,900 acres. **Runway:** 10,000 ft. **Altitude:** 11 ft. **Personnel:** permanent party military, 8,861; DOD civilians, 2,016.

**Housing:** single family, officer, 328, enlisted, 1,053; unaccompanied, 1,053; visiting, VOQ, 78, VAQ/VEQ, 153, TLF, 60. **Hospital.**

**Laughlin AFB**, Tex. 78843-5000; 6 mi. E of Del Rio. **Phone:** 830-298-3511; DSN 732-1110. **Majcom:** AETC. **Host:** 47th FTW. **Mission:** SUPT (T-1, T-6, T-38). **History:** activated July 1942. Named for 1st Lt. Jack Thomas Laughlin, Del Rio native, B-17 pilot, killed Jan. 29, 1942. **Area:** 5,343 acres. **Runways:** 8,852 ft., 8,316 ft., and 6,236 ft. **Altitude:** 1,081 ft. **Personnel:** permanent party military, 883; DOD civilians, 879. **Housing:** single family, officer, 297, enlisted, 219; unaccompanied, UOQ, 340, UEQ, 130; visiting, VQ, 90, DV, 6, TLF, 20. **Clinic.**

**Little Rock AFB**, Ark. 72099-4940; 17 mi. NE of Little Rock (Jacksonville). **Phone:** 501-987-1110; DSN 731-1110. **Majcom:** AETC. **Host:** 314th AW. **Mission:** C-130 training base; trains crew members from all services and 31 nations. **Major tenants:** 463rd Airlift Gp. (AMC), C-130; 189th AW (ANG), C-130; US Air Force Mobility Weapons School (ACC); Hq. Ark. ANG. **History:** activated Oct. 9, 1955. **Area:** 6,600 acres. **Runway:** 12,000 ft. **Altitude:** 310 ft. **Personnel:** permanent party military, 4,887; DOD civilians, 459. **Housing:** single family, 1,221; unaccompanied, 840; visiting, 183. **Clinic,** no emergency room.

**Los Angeles AFB**, Calif. 90245-4657; in El Segundo, 3 mi. SE of Los Angeles Arpt.; base housing and support facilities 18 mi. S of the main base, in San Pedro. **Phone:** 310-653-1110; DSN 633-1110. **Majcom:** AFSPC. **Host:** Space and Missile Systems Center. **Mission:** responsible for research, development, acquisition, on-orbit testing, and sustainment of military space and missile systems. **History:** activated as Air Research and Development Command's Western Development Division July 1, 1954. **Area:** 57 acres at Los Angeles AFB and 156 acres at Ft. MacArthur Military Family Housing Annex. **Runway:** none. **Altitude:** 95 ft. **Personnel:** permanent party military, 1,361; DOD civilians, 1,068. **Housing:** privatized, 617 units, TLF, 57. **Clinic.**

**Luke AFB**, Ariz. 85309-5000; 20 mi. WNW of downtown Phoenix. **Phone:** 623-856-1110; DSN 896-1110. **Majcom:** AETC. **Host:** 56th FW. **Mission:** F-16 operations; conducts USAF and allied F-16 pilot and crew chief training. **Major tenant:** 944th FW (AFRC), F-16. **History:** activated 1941. Named for 2nd Lt. Frank Luke Jr., observation balloon-busting ace of WWI and first American aviator to receive the Medal of Honor, killed in action Sept. 29, 1918. Luke is the largest fighter training base in the world. **Area:** 4,624 acres, plus 1.7 million-acre Barry M. Goldwater Range. **Runways:** 10,012 ft. and 9,904 ft. **Altitude:** 1,085 ft. **Personnel:** permanent party military, 5,008; DOD civilians, 935. **Housing:** single family, 598; unaccompanied, UAQ/UEQ, 704; visiting, 161, TLF, 44. **Clinic.**

**MacDill AFB**, Fla. 33621-5000; on the Interbay Peninsula in southern Tampa. **Phone:** 813-828-1110; DSN 968-1110. **Majcom:** AMC. **Host:** 6th AMW. **Mission:** KC-135 operations. **Major tenants:** SOCOM; CENTCOM; Joint Communications Support Element; NOAA Aircraft Operations Center. **History:** activated April 15, 1941. Named for Col. Leslie MacDill, killed in aircraft accident Nov. 8, 1938. **Area:** 5,767 acres. **Runways:** 11,420 ft. and 7,167 ft. **Altitude:** 6 ft. **Personnel:** permanent party military, 4,182; DOD civilians, 1,271. **Housing:** single family, officer, 45, enlisted, 629; unaccompanied, UAQ/UEQ, 610; visiting, VOQ, 112, VAQ/VEQ, 130, TLF, 5. **Clinic.**

**Malmstrom AFB**, Mont. 59402-5000; 1.5 mi. E of Great Falls. **Phone:** 406-731-1110; DSN 632-

1110. **Majcom:** AFSPC. **Host:** 341st SW. **Mission:** Minuteman III ICBM operations, UH-1N. **Major tenant:** 819th RED HORSE (ACC). **History:** activated Dec. 15, 1942. Named for Col. Einar A. Malmstrom, WWII fighter commander killed in air accident Aug. 21, 1954. Site of SAC's first Minuteman wing. **Area:** 3,716 acres, plus about 23,500 sq. mi. for missile sites. **Runway:** closed. **Altitude:** 3,460 ft. **Personnel:** permanent party military, 3,357; DOD civilians, 518. **Housing:** single family, officer, 216, enlisted, 828; unaccompanied, UAQ/UEQ, 850; visiting, 53, TLF, 30. **Clinic.**

**Maxwell AFB**, Ala. 36112-5000; 1 mi. WNW of Montgomery. **Phone:** 334-953-1110; DSN 493-1110. **Majcom:** AETC. **Host:** 42nd ABW. **Mission:** Air University conducts professional military, graduate, and professional continuing education for precommissioned and commissioned officers, enlisted personnel, and civilians. Its elements include Air War College; Air Command and Staff College; Air Force Doctrine Development and Education Center; Muir S. Fairchild Research Information Center; Center for Strategy and Technology; National Space Studies Center; Cyberspace and Information Operations Study Center; School of Advanced Air and Space Studies; Air Force Officer Accession and Training Schools; Ira C. Eaker College for Professional Development; College for Enlisted Professional Military Education; Community College of the Air Force; Air Force Institute for Advanced Distributed Learning; Squadron Officer College. **Major tenants:** Civil Air Patrol; 908th AW (AFRC), C-130; Air Force Historical Research Agency; 754th Electronic Systems Gp.; USAF Counterproliferation Center. **History:** activated 1918. Named for 2nd Lt. William C. Maxwell, killed in air accident Aug. 12, 1920. **Area:** 3,028 acres (includes Gunter Annex). **Runway:** 8,000 ft. **Altitude:** 172 ft. **Personnel:** permanent party military, 2,463; DOD civilians, 3,888. **Housing:** single family, officer, 364, enlisted, 377; unaccompanied, UAQ/UEQ, 211; visiting, 2,246, TLF, 30. **Clinic.**

**McChord AFB**, Wash. 98438-1109; 8 mi. S of Tacoma. **Phone:** 253-982-1110; DSN 382-1110. **Majcom:** AMC. **Host:** 62nd AW. **Mission:** C-17 operations. **Major tenant:** 446th AW (AFRC assoc.). **History:** activated May 5, 1938. Named for Col. William C. McChord, killed Aug. 18, 1937. **Area:** 4,639 acres. **Runway:** 10,100 ft. **Altitude:** 323 ft. **Personnel:** permanent party military, 4,007; DOD civilians, 1,149. **Housing:** single family, officer, 112, enlisted, 865; unaccompanied, UOQ, 2, UAQ/UEQ, 627; visiting, VOQ, 68, VAQ/VEQ, 230, TLF, 20. **Dispensary.** Madigan Army Medical Center is located 4 mi. SE.

**McConnell AFB**, Kan. 67221-5000; SE corner of Wichita. **Phone:** 316-759-6100; DSN 734-1110. **Majcom:** AMC. **Host:** 22nd ARW. **Mission:** KC-135 operations. **Major tenants:** 184th Intelligence Wing (ANG); 931st Air Refueling Gp. (AFRC assoc.). **History:** activated June 5, 1951. Named for the three McConnell brothers, WWII B-24 pilots from Wichita—Lt. Col. Edwin M. McConnell (died Sept. 1, 1997), Capt. Fred J. McConnell (died in a private airplane crash Oct. 25, 1945), and 2nd Lt. Thomas L. McConnell (killed July 10, 1943). **Area:** 3,533 acres. **Runways:** two, 12,000 ft. each. **Altitude:** 1,371 ft. **Personnel:** permanent party military, 2,431; DOD civilians, 403. **Housing:** single family, officer, 83, enlisted, 506; unaccompanied, UAQ/UEQ, 615; visiting, VOQ, 42, VAQ/VEQ, 44, TLF, 45. **Clinic.**

**McGuire AFB**, N.J. 08641-5000; 18 mi. SE of Trenton. **Phone:** 609-754-1100; DSN 650-1100. **Majcom:** AMC. **Host:** 305th AMW. **Mission:** C-17 and KC-10 operations. **Major tenants:** 21st Expeditionary Mobility Task Force (AMC); Air Force Expeditionary Center, Ft. Dix, N.J.; N.J.

# Major Air Force Installations Overseas

Civil Air Patrol; 108th ARW (ANG), KC-135; 514th AMW (AFRC assoc.). **History:** adjoins Army's Ft. Dix. Formerly Ft. Dix AAB; activated as Air Force base 1948. Named for Maj. Thomas B. McGuire Jr., P-38 pilot, second leading US ace of WWII, Medal of Honor recipient, killed in action Jan. 7, 1945. **Area:** 3,598 acres. **Runways:** 10,001 ft. and 7,129 ft. **Altitude:** 133 ft. **Personnel:** permanent party military, 5,189, DOD civilians, 995. **Housing:** single family, officer, 275, enlisted, 2,089; unaccompanied, UAQ/UEQ, 767; visiting, VOQ, 40, VAQ/VEQ, 444, TLF, 30. **Clinic.**

**Minot AFB, N.D.** 58705-5000; 13 mi. N of Minot. **Phone:** 701-723-1110; DSN 453-1110. **Majcom:** ACC. **Host:** 5th BW. **Mission:** B-52 operations. **Major tenant:** 91st SW (AFSPC), Minuteman III, UH-1N. **History:** activated January 1957. Named after the city of Minot, whose citizens donated \$50,000 toward purchase of the land for USAF. **Area:** 4,732 acres, plus additional 330 acres for missile sites spread over 8,500 sq. miles. **Runway:** 13,200 ft. **Altitude:** 1,668 ft. **Personnel:** permanent party military, 4,590; DOD civilians, 598. **Housing:** single family, officer, 241, enlisted, 1,053; unaccompanied, 951; visiting, 51, TLF, 15. **Clinic.**

**Misawa AB, Japan,** APO AP 96319-5000; within Misawa city limits. **Phone:** (cmcl. from CONUS) 011-81-176-53-5181 ext. 226-3075; DSN 315-226-5181. **Majcom:** PACAF. **Host:** 35th FW. **Mission:** F-16CJ operations. **Major tenants:** Misawa Security and Operations Center (ACC); Naval Carrier Task Force 72; Joint Tactical Ground Station; Naval Air Facility; Naval Security Gp. Activity; 750th Military Intelligence Det. (Army); Japanese Air Self-Defense Force (JASDF). **History:** occupied by US forces September 1945. **Area:** 3,865 acres. **Runway:** 10,000 ft. **Altitude:** 119 ft. **Personnel:** permanent party military, 3,769; DOD civilians, 398. **Housing:** single family, officer, 298, enlisted, 1,810; unaccompanied, UOQ, 40, UAQ/UEQ, 951; visiting, VOQ, 82, VAQ/VEQ, 44, TLF, 40. **Hospital.**

**Moody AFB, Ga.** 31699-5000; 10 mi. NNE of Valdosta. **Phone:** 229-257-1110; DSN 460-1110. **Majcom:** ACC. **Host:** 23rd Wing. **Mission:** A-10, HC-130, HH-60, pararescue, and force protection operations. Its units include 23rd Fighter Group, 347th Rescue Group, and 820th Security Forces Group. **History:** activated June 1941. Named for Maj. George P. Moody, killed May 5, 1941. **Area:** 6,050 acres. **Runways:** 9,300 ft. and 8,000 ft. **Altitude:** 235 ft. **Personnel:** permanent party military, 4,000; DOD civilians, 350. **Housing:** single family, officer, 32, enlisted, 271; unaccompanied, 714; visiting, VOQ, 37, VAQ/VEQ, 19, TLF, 32. **Clinic.**

**Mountain Home AFB, Idaho** 83648-5000; 50 mi. SE of Boise. **Phone:** 208-828-1110; DSN 728-1110. **Majcom:** ACC. **Host:** 366th FW. **Mission:** F-15C and F-15E operations. **Major tenants:** 266th Range Sq. **History:** activated August 1943. **Area:** 9,112 acres. **Runway:** 13,500 ft. **Altitude:** 3,000 ft. **Personnel:** permanent party military, 3,985; DOD civilians, 535. **Housing:** single family, officer, 144, enlisted, 919; unaccompanied, 883; visiting, VOQ, 40, VAQ/VEQ, 50, DV, 5, TLF, 15. **Hospital.**

**Nellis AFB, Nev.** 89191-5000; 8 mi. NE of Las Vegas. **Phone:** 702-652-1110; DSN 682-1110. **Majcom:** ACC. **Host:** 99th ABW. **Mission:** USAF Warfare Center manages advanced pilot training and tactics development and integrates test and evaluation programs. Its 98th Range Wing oversees a 15,000 sq.-mile Nevada Test and Training Range Complex and two emergency airfields. 57th Wing, A-10A, F-15C/D/E, F-16C/D, F-16CJ, F-22A, HH-60G, Predator MQ-1/9. 57th

Wing missions include Red Flag exercises (414th Combat Training Sq.); graduate-level pilot training (USAF Weapons School); support for Army exercises (549th Combat Training Sq.); training for international personnel in joint firepower procedures and techniques (Hq. USAF Air Ground Operations School); and USAF Air Demonstration Sq. (Thunderbirds). 53rd Wing, at 17 locations nationwide, serves as focal point for combat air forces in electronic warfare, armament and avionics, chemical defense, reconnaissance, and aircrew training devices, and operational testing and evaluation of proposed new equipment and systems. 505th Command and Control Wing builds the predominant air and space command and control ability for combined joint warfighters through training, testing, exercising, and experimentation. **Major tenants:** Aerospace Integration Center; Triservice Reserve Center; 58th and 67th Intelligence Gp. (ACC); 58th and 66th RQS (ACC); 820th RED HORSE (ACC); and 896th Munitions Sq. (AFMC). **History:** activated July 1941 as Las Vegas AAF with Army Air Corps Flexible Gunnery School; closed 1947; reopened 1948. Named for 1st Lt. William H. Nellis, WWII P-47 fighter pilot, killed Dec. 27, 1944. **Area:** Main base is 14,000 acres. NRC occupies 3 million acres of restricted air-land use and an additional 7,000 sq.-mile military operating area shared with civilian aircraft. **Runways:** 10,119 ft. and 10,051 ft. **Altitude:** 1,868 ft. **Personnel:** permanent party military, 8,251; DOD civilians, 2,808. **Housing:** single family, officer, 88, enlisted, 1,190; unaccompanied, 1,190; visiting, VOQ, 340, VAQ/VEQ, 354, TLF, 60. **Air Force-VA joint hospital.**

**Offutt AFB, Neb.** 68113-5000; 8 mi. S of Omaha. **Phone:** 402-294-1110; DSN 271-1110. **Majcom:** ACC. **Host:** 55th Wing. **Mission:** worldwide reconnaissance, intelligence, information warfare, treaty verification, and command and control operations. **Major tenants:** STRATCOM; Joint Intelligence Center (STRATCOM); Air Force Weather Agency; National Airborne Operations Center (JCS); USAF Heartland of America Band. **History:** activated 1896 as Army's Ft. Crook. Landing field named for 1st Lt. Jarvis J. Offutt, WWI pilot who died Aug. 13, 1918. **Area:** 4,039 acres. **Runway:** 11,700 ft. **Altitude:** 1,048 ft. **Personnel:** permanent party military, 8,207; DOD

civilians, 2,122. **Housing:** single family, officer, 291, enlisted, 1,349; unaccompanied, 793; visiting, 171, TLF, 60. **Clinic.**

**Osan AB, South Korea,** APO AP 96278-5000; 38 mi. S of Seoul. **Phone:** (cmcl. from CONUS) 011-82-31-661-1110; DSN 315-784-1110. **Majcom:** PACAF. **Host:** 51st FW. **Mission:** A/OA-10, and F-16C/D operations. **Major tenants:** 7th Air Force (PACAF); 5th RS (ACC), U-2R; Det. 1, 33rd Rescue Sq. (PACAF), HH-60; 303rd Intelligence Sq. (AFISRA); 731st Air Mobility Sq. (AMC); Charlie and Delta Batteries, 7th Battalion, 35th Air Defense Artillery (Army). **History:** originally designated K-55; runway opened December 1952. Renamed Osan AB in 1956 for nearby town that was the scene of first fighting between US and North Korean forces in July 1950. **Area:** 1,674 acres. **Runway:** 9,000 ft. **Altitude:** 38 ft. **Personnel:** permanent party military, 5,530; DOD civilians, 103. **Housing:** single family, officer, 113, enlisted, 80; unaccompanied, UOQ, 390, UAQ/UEQ, 4,987; visiting, VOQ, 350, VAQ/VEQ, 20, DV, 350, TLF, 15. **Hospital.**

**Patrick AFB, Fla.** 32925-3237; 2 mi. S of Cocoa Beach. **Phone:** 321-494-1110; DSN 854-1110. **Majcom:** AFSPC. **Host:** 45th SW. **Mission:** supports DOD, NASA, Navy (Trident), and other government agency and commercial missile and space programs. Host responsibilities include Cape Canaveral AFS and tracking stations on Antigua and Ascension islands. **Major tenants:** Defense Equal Opportunity Management Institute; Air Force Technical Applications Center; 920th Rescue Wing (AFRC), HC-130, HH-60; 2nd Brigade, 87 Division (Army); Naval Ordnance Test Unit (Navy); Joint Task Force for Joint STARS at Melbourne, Fla. **History:** activated 1940. Named for Maj. Gen. Mason M. Patrick, Chief of AEF's Air Service in WWI and Chief of the Air Service/Air Corps, 1921-27. **Area:** 2,341 acres. **Runway:** 9,000 ft. **Altitude:** 9 ft. **Personnel:** permanent party military, 4,000; DOD civilians, 1,831. **Housing:** single family, enlisted, 524; unaccompanied, UAQ/UEQ, 204; visiting, VOQ, 96, VAQ/VEQ, 102, TLF, 51. **Clinic.**

**Peterson AFB, Colo.** 80914-5000; at eastern edge of Colorado Springs. **Phone:** 719-556-

## Minor Active Duty Installations

In addition to the installations listed above, the Air Force has a number of minor installations. These air stations perform various missions, including space operations and missile warning. Here is a listing of such installations with state (or APO), ZIP code, and major command.

|   |                  |
|---|------------------|
| Brooks City-Base, San Antonio, Tex. 78235-5115 (AFMC)                   | DSN 240-1110     |
| Cape Canaveral AFS, Fla. 32925-5000 (AFSPC)                             | DSN 467-1110     |

Named for Brig. Gen. Robert F. Travis, killed Aug. 5, 1950. **Area:** 6,383 acres. **Runways:** two, approx. 11,000 ft. each. **Altitude:** 62 ft. **Personnel:** permanent party military, 8,443; DOD civilians, 3,511. **Housing:** single family, officer, 148, enlisted, 1,057; unaccompanied, UAQ/UEQ, 873; visiting, VQ, 340, TLF, 46. **David Grant Medical Center.**

**Tyndall AFB, Fla.** 32403-5000; 12 mi. E of Panama City. **Phone:** 850-283-1113; DSN 523-1113. **Majcom:** AETC. **Host:** 325th FW. **Mission:** F-15 and F-22 operations; trains USAF F-15 and F-22 pilots. **Major tenants:** 1st Air Force/Air Forces Northern (ANG); Continental US NORAD Region; 53rd Weapons Evaluation Gp. (ACC); Air Force Civil Engineer Support Agency. **History:** activated Dec. 7, 1941. Named for 1st Lt. Frank B. Tyndall, WWI fighter pilot killed July 15, 1930. **Area:** 29,102 acres. **Runways:** 10,000 ft., 9,000 ft., and 7,000 ft. **Altitude:** 18 ft. **Personnel:** permanent party military, 4,280; DOD civilians, 687. **Housing:** single family, officer, 123, enlisted, 727; unaccompanied, UAQ/UEQ, 448; visiting, 648, TLF, 94. **Clinic.**

**US Air Force Academy, Colo.** 80840-5025; N of Colorado Springs. **Phone:** 719-333-1110; DSN 333-1110. **Host:** USAFA. **Mission:** educates and develops young men and women to become Air Force officers. **History:** established April 1, 1954. Moved to permanent location August 1958. **Area:** 18,500 acres. **Runways:** 4,500 ft., 3,500 ft., and 2,300 ft. **Altitude:** 7,200 ft. **Personnel:** permanent party military, 1,890; DOD civilians, 1,995. **Housing:** single family, officer, 231, enlisted, 978; unaccompanied, 130; visiting, 90, TLF, 30. **Hospital.**

**Vance AFB, Okla.** 73705-5000; 3 mi. SSW of Enid.

**Phone:** 580-213-5000; DSN 448-7110. **Majcom:** AETC. **Host:** 71st FTW. **Mission:** provides Joint SUPT in T-1, T-6, and T-38 aircraft. **History:** activated November 1941. Named for Lt. Col. Leon R. Vance Jr., Enid native, 1939 West Point graduate, and Medal of Honor recipient, killed July 26, 1944. **Area:** 2,000 acres. **Runways:** 9,200 ft., 9,200 ft., and 5,001 ft. **Altitude:** 1,307 ft. **Personnel:** permanent party military, 1,085; DOD civilians, 145. **Housing:** single family, 229; unaccompanied, UOQ, 200, UAQ/UEQ, 109; visiting, 54, TLF, 10. **Clinic.**

**Vandenberg AFB, Calif.** 93437-5000; 8 mi. NNW of Lompoc. **Phone:** 805-606-1110; DSN 276-1110. **Majcom:** AFSPC. **Host:** 30th SW. **Mission:** conducts polar-orbiting space launches and supports R&D tests and launch range operations for DOD, USAF, and NASA space, ballistic missile, and aeronautical systems and commercial space launches; provides test support for DOD space and ICBM systems; furnishes facilities and essential services to more than 36 aerospace contractors. **Major tenants:** 14th Air Force (AFSPC); 381st Training Gp. (AETC); 576th Flight Test Sq. (Space Warfare Center). **History:** originally Army's Camp Cooke. Activated October 1941; taken over by USAF June 7, 1957. Renamed for Gen. Hoyt S. Vandenberg, USAF's second Chief of Staff. **Area:** 98,400 acres. **Runway:** 15,000 ft. **Altitude:** 367 ft. **Personnel:** permanent party military, 2,700; DOD civilians, 1,100. **Housing:** single family, officer, 343, enlisted, 993; unaccompanied, dorm rooms, 668, UOQ, 43, UAQ/UEQ, 59; visiting, VOQ, 111, VAQ/VEQ, 124, DV, 18, TLF, 26. **Clinic.**

**Whiteman AFB, Mo.** 65305-5000; 2 mi. S of Knob Noster. **Phone:** 660-687-1110; DSN 975-1110. **Majcom:** ACC. **Host:** 509th BW. **Mission:** B-2 operations. **Major tenants:** 442nd FW (AFRC), A/OA-10; 1st Battalion, 135th Aviation Regiment (ARNG); Mobile Inshore Undersea Warfare Unit 114 (Navy Reserve). **History:** activated 1942. Named for 2nd Lt. George A. Whiteman, first pilot to die in aerial combat during the attack on Pearl Harbor. **Area:** 4,993 acres. **Runway:** 12,400 ft. **Altitude:** 871 ft. **Personnel:** permanent party military, 5,290; DOD civilians, 748. **Housing:** single family, officer,

88, enlisted, 837; unaccompanied, 686; visiting, VOQ, 52, VAQ/VEQ, 35, TLF, 31. **Clinic.**

**Wright-Patterson AFB, Ohio** 45433; 10 mi. ENE of Dayton. **Phone:** 937-257-1110; DSN 787-1110. **Majcom:** AFMC. **Host:** 88th ABW. **Mission:** Aeronautical Systems Center develops, acquires, modernizes, and sustains aerospace systems. **Major tenants:** AFMC; Air Force Research Laboratory (AFMC); Air Force Security Assistance Center (AFMC); 445th AW (AFRC), C-5; Air Force Institute of Technology (AETC); National Air and Space Intelligence Center; National Museum of the US Air Force. **History:** originally separate, Wright Field and Patterson Field were merged and redesignated Wright-Patterson AFB Jan. 13, 1948. Named for aviation pioneers Orville and Wilbur Wright and for 1st Lt. Frank S. Patterson, killed June 19, 1918. The Wright brothers did much of their early flying on Huffman Prairie, now in Area C of the present base. The prairie is part of the Dayton Aviation Heritage National Historical Park. Site of US Air Force Marathon, held annually on Saturday nearest Sept. 18. **Area:** 8,357 acres. **Runway:** 12,600 ft. **Altitude:** 824 ft. **Personnel:** permanent party military, 5,863; DOD civilians, 10,954. **Housing:** single family, officer, 182, enlisted, 294; unaccompanied, UAQ/UEQ, 408; privatized housing, officers, 566, enlisted, 970; visiting, 414, TLF, 41. **Wright-Patterson Medical Center.**

**Yokota AB, Japan,** APO AP 96328-5000; approx. 28 mi. W of downtown Tokyo. **Phone:** (cmcl, from CONUS) 011-81-311-755-1110; DSN 315-225-1110. **Majcom:** PACAF. **Host:** 374th AW. **Mission:** C-12J, C-130, and UH-1N operations. Primary aerial port in Japan. **Major tenants:** US Forces, Japan; 5th Air Force (PACAF); 730th AMS (AMC); Det. 1, Air Force Band of the Pacific-Asia; American Forces Network Tokyo; DFAS-Japan. **History:** opened as Tama AAF by the Japanese in 1939. **Area:** 1,750 acres. **Runway:** 11,000 ft. **Altitude:** 457 ft. **Personnel:** permanent party military, 2,737; DOD civilians, 199. **Housing:** single family, officer, 683, enlisted, 1,956; unaccompanied, UOQ, 184, UAQ/UEQ, 896; visiting, VOQ, 202, VAQ/VEQ, 23, TLF, 189. **Hospital.**

At Whiteman AFB, Mo., two B-2s taxi past another pair of Spirits.

# ANG and AFRC Installations

This section consolidates Air National Guard and Air Force Reserve Command facilities into a single listing. Units are listed by base names or according to the airports whose facilities they share. In addition, some ANG and AFRC units are located on USAF bases and are included as major tenants on those bases in the "Major Active Duty Installations" section.

ANG and AFRC personnel are organized into two categories. Part-time personnel are traditional Guardsmen and Reservists who work in the private sector during the week, serve in ANG or AFRC one weekend each month, and go on active duty for two weeks during the year. If called up by the President, they go on active military status.

ANG's second category, full-time support personnel, are Title 32 Active Guard Reserve (AGR), Title 32 civilians, and Title 5 civilians. Guard AGR positions are controlled by the state. They do not serve at the national level. They receive the same benefits as regular active duty military. Title 32 civilian personnel are civilians employed full-time by the Guard and must also serve in military status one weekend per month and for two weeks of training per year. They can also be activated and mobilized during times of national crisis. Title 5 civilian personnel are federal civilian employees who hold administrative positions in ANG.

AFRC's second category, full-time support personnel, are Title 32 AGR, Title 32 Air Reserve Technicians (ART), and Title 5 civilians. Reservists in AGR positions serve primarily in flight training and flight testing units, as recruiters, or at the headquarters level. They receive the same benefits as regular active duty military. Title 32 ARTs are full-time federal civilian employees who serve in the same position as Reservists at least one weekend per month and for two weeks of training per year. They can also be activated and mobilized during times of national crisis. Title 5 personnel are federal civilian employees who hold administrative positions in AFRC.

**Abraham Lincoln Capital Arpt.**, Ill. 62707-5001; 4 mi. NW of Springfield. **Phone:** 217-757-1219; DSN 892-8219. **Unit:** 183rd Fighter Wing (ANG). **Area:** 91 acres. **Runways:** 8,000 ft., 7,000 ft., and 5,300 ft. **Altitude:** 588 ft. **Full-time personnel:** 304.

Note: Inventory numbers are total active inventory figures as of Sept. 30, 2007.

## Bombers

### B-1 Lancer

**Brief:** A long-range, air refuelable multirole bomber capable of flying missions over intercontinental range, then penetrating enemy defenses with the largest payload of guided and unguided weapons in the Air Force inventory.

**Function:** Long-range conventional bomber.

**Operator:** ACC, AFMC.

**First Flight:** Dec. 23, 1974 (B-1A); Oct. 18, 1984 (B-1B).

**Delivered:** June 1985-May 1988.

**IOC:** Oct. 1, 1986, Dyess AFB, Tex. (B-1B).

**Production:** 104.

**Inventory:** 67.

**Unit Location:** Dyess AFB, Tex., Ellsworth AFB, S.D., Edwards AFB, Calif.

**Contractor:** Boeing; AIL Systems; General Electric.

**Power Plant:** four General Electric F101-GE-102 turbofans, each 30,780 lb thrust.

**Accommodation:** four, pilot, copilot, and two systems officers (offensive and defensive), on zero/zero ACES II ejection seats.

**Dimensions:** span spread 137 ft, swept aft 79 ft, length 146 ft, height 34 ft.

**Weights:** empty equipped 192,000 lb, max operating weight: 477,000 lb.

**Ceiling:** more than 30,000 ft.

**Performance:** max speed at low level high subsonic; 900+ mph (Mach 1.2 at S/L); range intercontinental.

**Armament:** three internal weapons bays capable of accommodating a wide range of weapons incl up to 84 Mk 82 (500-lb) bombs or Mk 62 Quick Strike naval mines; up to 30 CBU-87/103 Combined Effects Munitions (CEMs), 30 CBU-89 Gator munitions, and 30 CBU-97 Sensor Fuzed Weapons (SFWs); potentially a combination of up to 30/15/15 (fwd/mid/aft bay) CBU-103/104/105 Wind-Corrected Munitions Dispensers (WCMD); up to 24 GBU-31 (2,000-lb) or 15 GBU-38 (500-lb) Joint Direct Attack Munitions (JDAMs), and 24 AGM-158A Joint Air-to-Surface Standoff Missiles (JASSMs).

#### COMMENTARY

Of blended wing/body configuration, the B-1's variable-geometry design and turbofan engines combine to provide greater range and high speed at low level, with enhanced survivability. Unswept wing settings provide for maximum range during high-altitude cruise. The fully swept position is used in supersonic flight and for high subsonic, low-altitude penetration.

The bomber's offensive avionics include a strategic Doppler radar, enabling aircrews to navigate, update target coordinates in flight and precision bomb. Radar features include synthetic aperture radar (SAR), ground moving target indicator (GMTI), ground moving target track (GMTT), and terrain-following. Offensive avionics also include an extremely accurate Global Positioning System/inertial navigation system (GPS/INS) and computer-driven avionics.

The current defensive avionics package, built around the ALQ-161 electronic countermeasures (ECM) system, is supplemented by the ALE-50 towed decoy and chaff and flares to protect against radar-guided and heat-seeking missiles. Aircraft structure and radar-absorption materials reduce the aircraft's radar signature to approximately one percent that of a B-52. The ALE-50 provides greater protection against RF threats.

**B-1A.** USAF acquired four prototype flight-test models of this new strategic bomber in the 1970s, but the program was canceled in 1977. Flight-test of the four B-1A models continued through 1981.

B-1B Lancer (Richard VanderMeulen)

**B-1B.** Initiated in 1981, the first production model of the improved variant B-1 flew in October 1984. USAF produced a total of 100. The active B-1B inventory was reduced to 67 aircraft (from the remaining 92) with consolidation to two main operating bases within Air Combat Command at Dyess AFB, Tex., and Ellsworth AFB, S.D. First used in combat against Iraq during Desert Fox in December 1998.

B-1B's speed, superior handling qualities, and large payload make it a key element of any joint/composite strike force, combining long endurance with the flexibility to deliver a wide range of guided or unguided weapons to strike emerging targets rapidly and efficiently.

The conventional mission upgrade program (CMUP) has significantly enhanced B-1B lethality and survivability. Block D upgrades include GPS receivers, a MIL-STD-1760 weapon interface, secure interoperable radios, and capability to employ precision weapons. Block E, which completed its final delivery in August 2006, includes follow-on computer and software upgrades permitting simultaneous carriage of mixed guided and unguided weapons and WCMD/JASSM and GBU-38 JDAM integration. Future upgrades will provide improved network-centric warfighting capability with cockpit avionics upgrades to enhance crew communications and situational awareness. A program to provide a fully integrated data link capability, including Link 16 and Joint Range Extension along with upgraded displays at the rear crew stations, began in FY05. In addition, a radar maintainability improvement effort began in FY06, to be followed by integration of a targeting pod capability beginning in FY10. USAF is fielding an interim targeting pod modification in mid-2008 as a quick reaction capability using the rear station laptop computer for pod control.

### B-2 Spirit

**Brief:** Stealthy, long-range multirole bomber that can deliver conventional and nuclear munitions anywhere on the globe by flying through previously impenetrable defenses.

**Function:** Long-range heavy bomber.

**Operator:** ACC.

**First Flight:** July 17, 1989.

**Delivered:** Dec. 20, 1993-2002.

**IOC:** April 1997, Whiteman AFB, Mo.

**Production:** 21.

**Inventory:** 21.

**Unit Location:** Whiteman AFB, Mo.

**Contractor:** Northrop Grumman; Boeing; Vought.

**Power Plant:** four General Electric F118-GE-100 turbofans, each 17,300 lb thrust.

**Accommodation:** two, mission commander and pilot, on zero/zero ejection seats.

**Dimensions:** span 172 ft, length 69 ft, height 17 ft.

**Weight:** empty 125,000-153,700 lb, typical T-O weight 336,500 lb.

**Ceiling:** 50,000 ft.

**Performance:** minimum approach speed 140 mph, typical estimated unrefueled range for a hi-lo-hi mission with 16 B61 nuclear free-fall bombs is 5,000 miles, with one aerial refueling more than 10,000 miles.

**Armament:** in a nuclear role: up to 16 nuclear weapons (B61 Mod 7, B61 Mod 11, B83) on rotary launchers. In a conventional role, 80 Mk 82 500-lb bombs, 34 tactical munitions dispensers, 80 Mk 62 sea mines, or 80 GBU-38 (500-lb) JDAMs mounted on bomb rack assemblies, or up to 16 rotary launcher-mounted weapons: 16 GBU-31 (2,000-lb) JDAMs, or a penetration version of a BLU-109, or 16 Mk 84 2,000-lb bombs; 16 JSOWs, 16 JASSMs, or eight 4,700-lb GBU-37/GBU-28C/B guided weapons.

#### COMMENTARY

The B-2 bomber is a unique, highly advanced system, combining sophisticated technologies, notably low observable (LO) stealth design, with high aerodynamic efficiency, enabling it to attack heavily defended targets and neutralize enemy defenses.

Based on the flying wing concept, the B-2 has no vertical tail surfaces. The smoothly blended "fuselage" section accommodates two flight crew and two large weapons bays side by side in the lower centerbody. These bays contain rotary launchers or bomb rack assemblies capable of carrying up to 40,000 lb of weapons.

Four nonafterburning turbofan engines are mounted in pairs within the wing structure, with scalloped over-wing intake ducts and shielded over-wing trailing edge nozzles. The aircraft has a quadruple-redundant fly-by-wire digital flight-control system, actuating moving surfaces at the wing trailing edges that combine aileron, elevator, and rudder functions. A landing gear track of 40 ft enables the B-2 to use any runway that can handle a Boeing 727 airliner.

**B-2A.** B-2 production represents three successive blocks of capability. Block 10 aircraft carried B83 nuclear bombs or 16 Mk 84 2,000-lb conventional munitions. Block 20

**B-2 Spirit** (TSgt. Cecilio Ricardo)

aircraft additionally carried B61/7 and B61/11 nuclear bombs, as well as GPS-aided munitions (GAMs), and GBU-36B, on two rotary launcher assemblies, providing an interim, near-precision strike capability. All Block 10 and 20 aircraft are upgraded to Block 30. (The last original Block 20 B-2, used as a test aircraft at Edwards AFB, Calif., was refurbished as an operational bomber and entered operational service in September 2002.)

Block 30 configuration added significant new weapons capability. Using the rotary launcher assembly, all B-2s are capable of employing 16 Mk 84 JDAMs, 16 JSOWs, 16 JASSMs, 16 BLU-109 JDAMs or eight GBU-37s or GBU-28C/Bs. All B-2s are also capable of substituting bomb rack assemblies in place of the rotary launchers, providing the capability to employ 80 500-lb Mk 82s, 34 tactical munitions dispensers, or 80 Mk 62 sea mines. Modifications to the bomb racks add carriage of 80 independently targeted GBU-38 (500-lb) JDAMs. Other Block 30 enhancements include fully operational defensive and offensive avionics, a more sophisticated mission planning system, and additional operating modes for the synthetic aperture radar. A new stealth coating introduced under the Alternative High Frequency Material (AHFM) program is dramatically improving combat readiness. The entire fleet will be converted by 2012.

Beyond Block 30, USAF plans to add UHF/EHF satellite communications systems and Link 16 digital data sharing capability and to replace the current mechanically scanned phased-array antenna with an active electronically scanned array.

The first use of B-2s in combat took place March 24, 1999, against Serb targets in Allied Force, with two aircraft each dropping 16 JDAMs. In October 2001, B-2s flew the longest combat sorties during Enduring Freedom, flying 44-hour sorties from Whiteman AFB, Mo., striking targets in Afghanistan, then landing in Diego Garcia for an engine running crew change, with the second crew flying a 29-hour sortie back to Whiteman. B-2s operate from three forward locations—Andersen AFB, Guam, RAF Fairford, UK, and Diego Garcia in the Indian Ocean.

#### **B-52 Stratofortress**

**Brief:** A long-range, heavy multirole bomber that can carry nuclear or conventional ordnance or cruise missiles, with worldwide precision navigation capability.

**Function:** Long-range heavy bomber.

**Operator:** ACC, AFMC, AFRC.

**First Flight:** April 15, 1952 (YB-52 prototype).

**Delivered:** November 1955-October 1962.

**IOC:** June 19, 1955.

**Production:** 744.

**Inventory:** 94.

**Unit Location:** Barksdale AFB, La. (ACC, AFRC), Edwards AFB, Calif. (AFMC), Minot AFB, N.D.

**Contractor:** Boeing.

**Power Plant:** eight Pratt & Whitney TF33-P-3 turbofans, each 17,000 lb thrust.

**Accommodation:** two pilots, side by side, plus navigator, radar navigator, and electronic warfare officer.

**Dimensions:** span 185 ft, length 159.3 ft, height 40.7 ft.

**Weight:** empty approx 188,000 lb, gross 488,000 lb.

**Ceiling:** 50,000 ft.

**Performance (approx):** max level speed 449 mph, range more than 10,000 miles.

**Armament:** 12 AGM-86B Air Launched Cruise Missiles (ALCMs) externally, with provision for eight more ALCMs or gravity weapons internally. Conventional weapons incl AGM-86C/D Conventional ALCMs (CALCMs), naval mines, bombs up to 2,000 lb, CBU 87/89/97 unguided munitions, CBU-103/104/105 Wind-Corrected Munitions

-29WA engines. First flown March 1956; 35 were delivered June-December 1956. Majority retired 1971.

**B-52D.** Long-range bomber version, first flown June 1956 and used during the Vietnam War. Total of 170 built, with deliveries beginning late 1956. Retired 1982-83.

**B-52E.** Version with improved bombing, navigation, and electronics systems. First flown October 1957. One hundred delivered October 1957-June 1958. Retired 1969-70.

**B-52F.** Version with updated J57-P-43WA engines, first flown in May 1958. Eighty-nine delivered June 1958-February 1959. Retired 1978.

**B-52G.** Introduced important design changes, including a redesigned wing containing integral fuel tanks for increased range, fixed under-wing external tanks, a shorter tail fin of greater chord, and a remotely controlled tail gun turret that allowed the gunner to be repositioned with the rest of the crew. Initial flight August 1958, with the first of 193 aircraft entering service in February 1959. Operated as the primary bomber during the first Gulf War. Retired 1994.

**B-52H.** The only version still in service, the H introduced TF33 turbofans, providing increased unrefueled

**B-52H Stratofortress** (Butch Ramsey)

Dispenser (WCMD) guided munitions, GBU-31 and GBU-38 JDAMs, JASSMs, and GBU-10/12/28 laser guided bombs. Future weapons incl the Miniature Air Launched Decoy (MALD).

#### **COMMENTARY**

The B-52's still-expanding weapons capability reflects its continued ability to perform a wide range of missions, including show of force, maritime operations, long-range precision strikes, close air support (CAS), offensive counterair, air interdiction, and defense suppression. USAF still is considering whether to use B-52s as standoff electronic warfare platforms.

Equipment includes GPS, ARC-210 radios with Have Quick II anti-jam feature, KY-100, providing secure transmission, an electro-optical (EO) viewing system that uses forward-looking infrared (FLIR) and high-resolution low-light-level television (LLTV) sensors to augment the targeting, battle assessment, flight safety, and terrain avoidance systems, improving combat and low-level flight capability. Pilots have night vision goggles (NVGs) to further enhance operation. The majority of B-52s are modified to carry weapons targeting pods. Future plans include modification of the entire fleet with an integrated self-targeting and battle damage assessment (BDA) capability. B-52s support a MIL-STD-1760 interface resulting in an improved weapons capability for precision weapons externally, including naval mines, precision guided weapons, and advanced weapons such as JDAM, JASSM, and WCMD. The B-52's ECM suite uses a combination of electronic detection, jamming, and infrared (IR) countermeasures to protect against hostile air defense systems.

AFMC is using a B-52 to conduct synthetic fuel experiments.

Several versions of the Stratofortress were produced, including:

**B-52A.** Initial production version, with J57-P-1W engines and provision for in-flight refueling. First flown Aug. 5, 1954, the three aircraft built were used by Boeing for technical development purposes. Delivered to SAC November 1957. Finally retired 1969.

**B-52B.** First operational version, 23 of which were built. Also, 27 RB-52B dual-role bomber/reconnaissance variants. First flown January 1955, with deliveries between June 1955-August 1956; powered by J57-P-1W, -19W, -29W, or -29WA engines. Retired in the mid-1960s.

**B-52C.** Multimission version with increased gross weight and larger under-wing tanks. Powered by J57-P-19W or

range, and improved defensive armament. First flown July 1960, 102 were built, with deliveries between May 1961 and October 1962.

The B-52 currently is employable for both conventional and nuclear missions. As the Air Force's only nuclear cruise missile carrier, it performs multiple cruise missile launches at high altitude, often followed by B-52 penetration to attack other targets. When tasked with precision weapons delivery, it conducts close air support and attacks targets using GPS/INS guided weapons.

Ongoing modernization of its conventional capabilities is extending the B-52's service life well into the 21st century, with the ability to provide massive firepower in low- to mid-threat environments supplemented by a standoff attack capability. Iraqi Freedom saw B-52s delivering laser guided bombs for the first time using Litening targeting pods. Use of heavy stores adapter beams enable aircraft to carry most B-52-certified munitions. ALCMs and CALCMs are carried on unique pylons or internally on a rotary launcher. Avionics improvements include the avionics midlife improvement (AMI) program, which replaces the current system processors, inertial navigation unit (INU), and data transfer system (DTS) cartridges. Electronic attack improvements include the ECM improvement upgrade to the ALQ-172 set. The Combat Network Communications Technology (CONNECT) improvement provides a modern cockpit information avionics architecture, in-flight beyond-line-of-sight (BLOS) data link connectivity, and mission/weapon reprogramming capability.

## **Fighter and Attack Aircraft**

### **A-10 Thunderbolt II**

**Brief:** A simple, effective, and survivable twin-engine aircraft specifically designed for close air support (CAS) of ground forces against a wide range of ground targets, including tanks and other armored vehicles.

**Function:** Attack aircraft.

**Operator:** ACC, AFMC, PACAF, USAF, ANG, AFRC.

**First Flight:** Feb. 15, 1975 (preproduction).

**Delivered:** November 1975-March 1984.

**IOC:** October 1977.

**Production:** 713.

**Inventory:** 247 (A-10); 106 (OA-10).

**Unit Location:** Active: Davis-Monthan AFB, Ariz., Eglin AFB, Fla., Moody AFB, Ga., Nellis AFB, Nev., Osan AB, South Korea, Spangdahlem AB, Germany. ANG: Battle Creek ANGB, Mich., Boise Air Terminal, Idaho, Fort Smith Arpt., Ark., Martin State Arpt., Md. AFRC: Barksdale AFB, La., Whiteman AFB, Mo.

**Contractor:** Fairchild Republic; now Lockheed Martin.

**Power Plant:** two General Electric TF34-GE-100 turbofans, each 9,065 lb thrust.

**Accommodation:** pilot only, on zero-height/518 mph-zero-speed ejection seat.

**Dimensions:** span 57.5 ft, length 53.3 ft, height 14.7 ft.

**Weight:** empty 28,000 lb, max gross 51,000 lb.

**Ceiling:** 37,000 ft.

**Performance:** speed 518 mph, combat range with 9,500 lb of weapons and 1.7 hr loiter, 20 min reserve, 288 miles.

**Armament:** one 30 mm, seven-barrel, 1,174-rd capacity GAU-8 Gatling gun capable of carrying inert target practice (TP) rds, straight high-explosive incendiary (HEI), or anti-armor tailored HEI/API "combat mix"; 11 hardpoints for up to 16,000 lb of ordnance, incl various types of free-fall or guided bombs such as Mk 82, Mk 84, GBU-10/12/16/38, CBU-87 Combined Effects Munition (CEM), WCMC, 2.75-in high-explosive, white phosphorus, and overt/covert illumination rockets, SUU-25 overt/covert flare dispensers, up to six AGM-65B/D/G/H/K Maverick missiles, and up to four AIM-9 Sidewinder missiles. Up to 480 chaff and flares carried internally to counter radar or IR threats. Up to three 600-gallon fuel tanks can also be carried.

#### COMMENTARY

Supporting the CAS, airborne forward air controller (FAC(A)), interdiction, combat search and rescue (CSAR) ("Sandy") missions, and special operations forces (SOF) support, the A-10 combines large diverse weapons payload, long loiter, austere airfield capability, maneuverability, and wide combat radius with the ability to operate under 1,000-ft ceilings, with 1.5-mile visibility, or up to 25,000 ft with advanced targeting pods and GPS-guided munition or in darkness with NVGs. In a typical mission, the A-10, nicknamed Warthog, can fly 150 miles with a standard payload and remain on station (loiter) for two hours or much longer with air refueling. The 30 mm GAU-8 gun provides a cost-effective weapon with which to defeat a wide array of ground targets, including heavily armored tanks. The gun-rocket-Maverick medley provides a unique combination of "point-shoot," low-collateral damage, and mobile target capabilities demanded by the danger-close proximity to friendly forces or urban terrain. The cockpit is protected with titanium armor, capable of withstanding projectiles up to 23 mm. A-10s were used extensively in Desert Storm, Allied Force, Enduring Freedom, and Iraqi Freedom, the last operation seeing several A-10 combat firsts, including first use of Litening II targeting pod, first self-lased laser guided bomb (LGB) delivery, and first AGM-65H/K employment. The A-10 is projected to serve well into the 2020s.

**A/OA-10A** equipment includes an enhanced GPS/INS (EGI), head-up display (HUD), NVGs, and an Integrated Flight and Fire Control Computer (IFFCC) to enhance weapons delivery accuracy, cockpit presentations, targeting pod integration, and terrain avoidance. Other equipment consists of Pave Penny laser target identification pod and self-protection/penetration aids including ALO 131/184 ECM pods, ALR-69 radar warning receiver and countermeasures system (CMS) to digitally integrate the ALE-40 chaff-flare dispenser and automate future extended IRCM solutions.

**A/OA-10C** is the new designation for aircraft currently being upgraded with the precision engagement modification, with new glass cockpit displays, full targeting pod integration, hands-on throttle and stick (HOTAS), digital stores management, a Situational Awareness Data Link (SADL), and JDAM/WCMD integration. IOC occurred in August 2007, with the first combat deployment one month later. All aircraft are scheduled to be modified by FY11. Other planned improvements include enhanced communication and improved situational awareness systems and Sniper and Litening targeting pod capability. These improvements will permit the A-10 to attack from higher altitudes and provide a better logistical and maintenance footprint. Additionally, the entire fleet is to receive structural improvements including rewinging where necessary.

Aircraft designated **OA-10A/C** are used primarily for FAC(A), combat escort, CSAR, and visual reconnaissance missions. The OA-10 is identical to the A-10. Mission configurations typically include large weapons loads of white phosphorus marking rockets and covert/overt illumination rockets/flares to mark/illuminate targets for strike aircraft or friendly ground forces. The first OA-10 unit reached initial operational capability (IOC) in October 1987.

**A-10C Thunderbolt II** (Rick Llinares)

#### AC-130 Gunship

**Brief:** Heavily armed aircraft using side-firing weapons integrated with sophisticated sensor, navigation, and fire-control systems to provide precise firepower or area saturation for long periods, at night and in adverse weather.

**Function:** Attack aircraft.

**Operator:** AFSOC.

**First Flight:** 1967.

**Delivered:** 1968-present.

**IOC:** 1972 (AC-130H); 1996 (AC-130U).

**Production:** 43; incl four recent conversions.

**Inventory:** eight (AC-130H); 17 (AC-130U).

**Unit Location:** Hurlburt Field, Fla.

**Contractor:** Lockheed Martin (airframe); Boeing (AC-130H); Rockwell, now Boeing (AC-130U).

**Power Plant:** four Allison T56-A-15 turboprops, each 4,910 shp.

**Accommodation:** AC-130H crew of 14; AC-130U crew of 13.

**Dimensions:** span 132.6 ft, length 99 ft, height 38.5 ft.

**Weight:** gross 155,000 lb.

**Ceiling:** 25,000 ft.

**Performance:** speed 289 mph, range 1,500 miles, with air refueling unlimited.

**Armament:** two 20 mm Vulcan cannons with 3,000 rd (AC-130H); one 25 mm Gatling gun (AC-130U); one 40 mm Bofors cannon with 256 rd, and one 105 mm Howitzer with 100 rd; 30 mm Bushmaster cannons with 200 rd replace 25 mm and 40 mm guns in new conversions.

#### COMMENTARY

The AC-130 is a C-130 modified with gun systems, electronic and EO sensors, fire-control systems, enhanced navigation systems, sophisticated communications, defensive systems, and in-flight refueling capability. These systems give the gunship crew the capability to acquire and identify targets day or night, coordinate with ground forces and command and control (C2) agencies, and deliver surgical firepower in support of both conventional and special operations missions. For operations in Afghanistan and Iraq, the AC-130 gunships work in conjunction with the MQ-1 Predator, the latter providing live video and target referencing information.

**AC-130A** was the initial version, deployed in Vietnam 1968-69. Eighteen produced.

**AC-130E**, an improved version, of which eight were built.

Converted to H standard after service in Vietnam.

**AC-130H Spectre** aircraft serve with the 1st SOW. The unit has eight, each equipped with a digital fire-control computer. They employ EO sensors and target-acquisition systems, including FLIR and LLLTV, and are capable of in-flight refueling. Fire-control computers, navigation, communications, and sensor suites have been upgraded. Future modifications include a new ground mapping/weather radar, enhanced traffic collision avoidance system (ETACS), large aircraft infrared countermeasures (LAIRCM), and expanded precision weapons capability.

**AC-130U Spooky** aircraft serve with 1st SOW and are gunship conversions by Rockwell, of which 13 were delivered to AFSOC's 4th SOS in 1994-95. Four additional aircraft were recently converted by Boeing to U standard. The fleet is currently undergoing weapons modifications to replace the 40 mm gun with a 30 mm Bushmaster cannon; anticipated completion is 2010. All weapons can be subordinated to the APQ-180 digital fire-control radar, FLIR, or all-light-level television (ALLTV) for adverse weather attack operations. Future modifications include ETACS, Link 16, an advanced gunship multispectral sensor, and expanded precision weapons capability.

Although the AC-130H Spectre and AC-130U Spooky gunships use dissimilar avionics and other systems, fire support to troops on the ground is generally comparable. The primary mission for the gunship is close air support for special operations forces. Other missions include armed reconnaissance, interdiction, point defense, armed escort, and surveillance.

#### F-15 Eagle

**Brief:** A supersonic, all-weather, highly maneuverable tactical fighter designed to permit USAF to swiftly gain and maintain air superiority in aerial combat.

**Function:** Air superiority fighter.

**Operator:** ACC, AETC, AFMC, PACAF, USAFE, ANG, AFRC.

**First Flight:** July 27, 1972.

**Delivered:** November 1974-85.

**IOC:** September 1975.

**Production:** 874.

**Inventory:** 437.

**Unit Location:** Active: Eglin AFB, Fla., Elmendorf AFB, Alaska, Kadena AB, Japan, Langley AFB, Va., Mountain Home AFB, Idaho, Nellis AFB, Nev., RAF Lakenheath,

**AC-130 Gunship** (SrA. Julianne Showalter)

UK, Robins AFB, Ga., Tyndall AFB, Fla. ANG: Barnes Arpt., Mass., Hickam AFB, Hawaii, Jacksonville Arpt., Fla., Klamath Falls Arpt., Ore., Lambert-St. Louis Arpt., Mo., NAS JRB New Orleans, La., Portland Arpt., Ore. AFRC: Langley AFB (assoc.), Va.

**Contractor:** McDonnell Douglas (now Boeing); Raytheon.

**Power Plant:** F-15C: two Pratt & Whitney F100-PW-220 turbofans, each 25,000 lb thrust, with max afterburner.

**Accommodation:** pilot only in F-15A/C; two seats in F-15B/D.

**Dimensions:** span 42.8 ft, length 63.8 ft, height 18.7 ft.

**Weight:** empty 28,600 lb, gross 68,000 lb.  
**Ceiling:** 65,000 ft.

**Performance:** F-15C: max speed Mach 2.5, T-O run 900 ft, landing run without braking parachute 3,500 ft, ferry range with external fuel tanks more than 2,878 miles.

**Armament:** one internally mounted M61A1 20 mm six-barrel cannon; up to four AIM-9L/M/X Sidewinder and up to four AIM-7 Sparrow air-to-air missiles, or up to eight AIM-120 Advanced Medium-Range Air-to-Air Missiles (AMRAAMs), carried externally.

**COMMENTARY**

For more than 30 years, the F-15 has provided the capability to penetrate hostile defenses and establish air superiority over enemy systems through a combination of superior maneuverability and acceleration, range, weapons, and avionics. F-15 fighters deployed to the Persian Gulf for Desert Storm accounted for 34 of the 37 USAF air-to-air victories, and in Iraqi Freedom F-15Cs led coalition aircraft in maintaining aerial dominance.

**F-15A** (single-seat) and **F-15B** (two-seat) fighters became USAF's front-line fighter immediately upon introduction in the mid-1970s. A multimission avionics system includes APG-63 pulse-Doppler radar for long-range detection and tracking of small high-speed objects down to treetop level and effective weapons delivery, a HUD for close-in combat, identification, friend or foe (IFF), and INS. F-15A/Bs now serve with ANG. F-15A/Bs retrofitted with E-kit upgrades have additional thrust and improved combat capability.

**F-15C** (single-seat) and **F-15D** (two-seat) models followed in June 1979. Improvements included 2,000 lb of additional internal fuel and provision for carrying conformal fuel tanks (CFTs), reducing in-flight refueling requirements and increasing time in the combat zone. From 1983 through 1997, tactical capabilities were enhanced extensively through the multistaged improvement program (MSIP), a program of installation of new or modification of existing avionics equipment, allowing for the carriage of more advanced weapons, and increased self-protection. The last 43 aircraft were delivered with the APG-70 radar. The F-15C/Ds that USAF expects to remain in the fleet until 2025 have been further upgraded with the APG-63(V)1. One squadron in Alaska received the later APG-63(V)2, featuring an active electronically scanned array (AESA), permitting the aircraft to track multiple targets and to guide air-to-air missiles against them. The Joint Helmet Mounted Cueing System (JHMCS), a "look and shoot" head-mounted system, is intended, along with the AIM-9X, to significantly enhance lethality in close-range aerial combat. Other modifications include improved engines, GPS equipment, Litening targeting pods, and the Link 16 fighter data link; a proportion will receive the next generation APG-63(V)3 AESA radar. USAF is still considering its options for some 150 F-15s with known structural integrity issues.

**F-15E Strike Eagle**

**Brief:** A heavily modified, two-seat, dual-role variant

of the original F-15, with weapons systems totally integrated for all-weather deep interdiction missions as well as air-to-air combat.

**Function:** Dual-role fighter.  
**Operator:** ACC, AFMC, PACAF, USAFE.  
**First Flight:** Dec. 11, 1986.  
**Delivered:** April 1988-2004.  
**IOC:** May 1989.  
**Production:** 236.  
**Inventory:** 223.

**Unit Location:** Eglin AFB, Fla., Elmendorf AFB, Alaska, Mountain Home AFB, Idaho, Nellis AFB, Nev., RAF Lakenheath, UK, Robins AFB, Ga., Seymour Johnson AFB, N.C.

**Contractor:** McDonnell Douglas (now Boeing); Raytheon.

**Power Plant:** two Pratt & Whitney F100-PW-220, each 25,000 lb thrust; or F100-PW-229 turbofans, each 29,000 lb thrust with max afterburner.

**Accommodation:** crew of two, on zero/zero ejection seats.

**Dimensions:** span 42.8 ft, length 63.8 ft, height 18.5 ft.

**Weight:** empty 45,000 lb, gross 81,000 lb.

**F-15 Eagle** (SSgt. Aaron Allmon)

**Ceiling:** 50,000 ft.  
**Performance:** max level speed at altitude Mach 2.5, ferry range with CFTs 3,000 miles.

**Armament:** one internally mounted M61A1 20 mm six-barrel cannon; up to four AIM-9 Sidewinder and up to four AIM-7 Sparrow air-to-air missiles, or up to eight AIM-120 AMRAAMs; up to six AGM-65 Maverick air-to-surface missiles; AGM-130, EGBU-15 and GBU 10/12/15/24/28/31/38 guided munitions; CBU 87/89/97 unguided munitions; CBU-103/104/105 WCMD guided munitions, GBU-39 SDB, and nuclear weapons.

**COMMENTARY**

**F-15E** aircraft have a strengthened airframe for increased gross weight at takeoff and maneuver at nine Gs throughout the flight envelope. Cockpit controls and displays are improved, and a wide-field-of-view (WFOV) HUD is included.

For low-altitude, high-speed penetration and preci-

sion attack on tactical targets at night and in adverse weather, the F-15E carries a high-resolution APG-70 radar which provides a high-resolution synthetic aperture radar (SAR) map and LANTIRN (Low-Altitude Navigation and Targeting Infrared for Night) pods, with wide-field FLIR. The APG-70 gives the F-15E, with its AMRAAM, AIM-7, and AIM-9 load, a true multirole capability with the inherent air-to-air capability of the F-15C. The triple-redundant digital flight-control system, in combination with the LANTIRN navigation pod and the WFOV HUD, permits automatic terrain following. Other improvements include an EGI and Link 16 data link. F-15E aircraft have been JDAM- and WCMD-capable since 2003. In addition, some F-15E aircraft have been equipped with Litening and Sniper targeting pods for improved precision attack capability. External CFTs have been fitted to increase combat range while carrying ordnance. System upgrades under way include programmable armament control sets (PACS), ready-installed software for delivery of JDAM and WCMD, and an enhanced night vision capability. New core processors ensuring increased capability and reliability are being retrofitted to allow employment of the GBU-39 SDB. A number of F-15Es are to receive an AESA radar to improve targeting and mapping capabilities.

During Desert Storm, 48 USAF F-15Es were deployed to the Persian Gulf where they operated mainly at night, hunting Scud missile launchers and artillery sites using the LANTIRN system. The Strike Eagle can operate in conjunction with E-8 Joint STARS ground surveillance aircraft and has taken on a CAS role for Afghanistan operations.

**F-16 Fighting Falcon**

**Brief:** A compact, versatile, and low-cost multirole fighter aircraft that is highly maneuverable and has repeatedly proved itself in air-to-air combat and air-to-surface attack.

**Function:** Multirole fighter.  
**Operator:** ACC, AETC, AFMC, PACAF, USAFE, ANG, AFRC.

**First Flight:** Dec. 8, 1976 (full-scale development).  
**Delivered:** August 1978-2005.  
**IOC:** October 1980, Hill AFB, Utah.  
**Production:** 2,206.  
**Inventory:** 1,248.  
**Unit Location:** 13 active wings, 23 ANG, and two AFRC units (one associate).

**Contractor:** Lockheed Martin; Northrop Grumman.  
**Power Plant:** one augmented turbofan. General Electric F110-GE-100 (27,600 lb thrust) and Pratt & Whitney F100-PW-220 (23,450 lb thrust) are alternative standard engines. Increased performance engines (IPEs) in aircraft delivered from late 1991: Block 50: F110-GE-129 (29,000 lb thrust); Block 52: F100-PW-229 (29,100 lb thrust).

**Accommodation:** pilot only, on zero/zero ejection seat.  
**Dimensions:** wingspan with missiles 32.7 ft, length overall 49.4 ft, height 16.7 ft.

**Weight:** (F-16C) empty (F100-PW-229) 18,591 lb, (F110-GE-129) 18,917 lb; gross, with external load (Block 40/42) 42,000 lb.

**Ceiling:** 50,000 ft.  
**Performance:** max speed Mach 2, radius of action: Block 40 with two 2,000-lb bombs, two AIM-9 missiles, and external fuel, hi-lo-lo-hi 852 miles; combat range 575 miles.

**Armament:** one M61A1 20 mm multibarrel cannon, with 511 rd, mounted in fuselage; wingtip-mounted missiles; seven other external stores stations for fuel tanks and a range of air-to-air and air-to-surface munitions.

**F-16 Fighting Falcon** (Rick Llinares)

**F-22A Raptor** (Rick Llinares)

**COMMENTARY**

The F-16 is the workhorse of the USAF fighter fleet, supporting the majority of precision guided munitions taskings in combat operations. The 200+ USAF F-16 multimission fighters deployed to the Persian Gulf Theater flew more sorties than any other type during Desert Storm, with 13,500 missions. In the initial stages of Iraqi Freedom, the F-16 flew hundreds of missions helping to destroy the unit cohesion of the Republican Guard.

**F-16A** (single-seat) and **F-16B** (two-seat) versions, incorporated advanced technologies from the start, making these aircraft two of the most maneuverable fighters built. Equipment included a multimode radar with a clutter-free look-down capability, advanced radar warning receiver (RWR), HUD, internal chaff/flare dispensers, and a 500-rd 20 mm internal gun.

Production of the F-16A and B for USAF ended in 1985. A midlife update program, undertaken cooperatively by USAF and NATO operators, improved the radar, fire-control computer, stores-management computer, and avionics software, giving F-16A/Bs the ability to use next generation air-to-air and air-to-surface weapons. A new ring-laser gyro INS and installation of the upgraded F100-PW-220E turbofan engine improved reliability and maintainability.

The Multinational Staged Improvement Program, implemented in 1980, ensured the aircraft could accept systems under development, thereby minimizing retrofit costs. All F-16s delivered since November 1981 feature built-in structural and wiring provisions and systems architecture that expand the single-seater's multirole flexibility to perform precision strike, night attack, and beyond-visual-range intercept missions. USAF has retired almost all its F-16A/B aircraft, but the versions are still in use with many international operators.

**F-16C** (single-seat) and **F-16D** (two-seat) aircraft were introduced at production Block 25 with MSIP II improvements in the cockpit, airframe, and core avionics and an increased-range APG-68 radar. Block 30 and 40 aircraft incorporate the General Electric F110-GE-100 engine. Deliveries began in 1984. With the exception of AFMC, all of the active, Guard, and Reserve units have since converted to F-16C/Ds. Block 30/40 aircraft are now GBU-31/38 JDAM and AGM-158 JASSM capable.

ANG and AFRC Block 25/30/32 F-16s are receiving upgrades aimed at increasing throughput and memory for new weapon capabilities, including GBU-38 JDAM, plus Advanced Identification Friend/Foe (AIFF) to reduce the risk of fratricide. These aircraft also carry the Theater Airborne Reconnaissance System (TARS), a podded system with EO sensors and future high-capacity data link to move the imagery to users on the ground.

ANG F-16s are equipped with Litening II/Litening ER targeting pods.

**F-16CG** Block 40/42 aircraft specialize in night attack operations with precision guided weapons. Follow-on improvements include ALE-47 improved defensive countermeasures, ALR-56M advanced RWR (Block 40 only), Very High Speed Integrated Circuit (VHSIC) technology in the APG-68(V5) fire-control radar, a ring-laser gyro INS, GPS, a LANTIRN nav/attack system, core avionics hardware, enhanced-envelope gunsight, digital flight controls, automatic terrain following, increased takeoff weight and maneuvering limits, an 8,000-hour airframe, IPEs, and expanded envelope nine-G capability.

F-16CJ designated Block 50/52 aircraft are equipped

with the High-speed Anti-Radiation Missile (HARM) targeting system (HTS) for suppression of enemy air defenses (SEAD). Block 50/52 F-16CJs have MSIP Stage III improvements, which also show up in selected retrofits of earlier F-16 blocks. These aircraft incorporate the General Electric F110 and Pratt & Whitney F100 increased performance engines (IPEs), the latest cockpit control and display technology, including a wide-angle HUD. Weapons improvements include multishot AMRAAM compatibility, GBU-31/38 JDAM, AGM-154 JSOW, and Wind-Corrected Munitions Dispenser (WCMD).

Block 50/52 aircraft, followed by Block 40/42 from 2006-10, have been undergoing a program of retrofit with a new modular mission computer developed under an F-16 common configuration implementation program (CCIP), aimed at extending operational flexibility and maintenance commonality. The software effort includes the participating European governments of the F-16 Multinational Fighter Program. CCIP also includes new color displays, Sniper XR targeting pod, JHMCS, AIM-9X, Link 16, and improved weapons capabilities. First delivery was made January 2002, and modification of Block 50/52 aircraft was completed in 2006; the program is expected to finish by 2010. The Block 50/52 aircraft have dual/alternate carriage of HARM targeting system (HTS) and Smart Targeting and Identification via Networked Geolocation (STING) and advanced targeting pods (ATP). Planned future upgrades include enhanced GPS/INS (CG/CJ aircraft).

Under Falcon STAR (Structural Augmentation Roadmap), F-16 aircraft are undergoing a structural modification program to remedy fatigue problems caused by increased usage rates and heavier than forecast gross weights. Delivery of modified aircraft started October 2004.

**F-22A Raptor**

**Brief:** High-technology follow-on for the F-15C. An all-weather, multirole fighter that combines an extremely maneuverable airframe with stealth technologies, supercruise, and integrated sensors and avionics to penetrate advanced anti-air threats and achieve air dominance.

**Function:** Multirole fighter.  
**Operator:** ACC, AETC, AFMC, PACAF, ANG, AFRC.  
**First Flight:** Sept. 7, 1997.  
**Delivery:** 2002 (first production representative aircraft).  
**IOC:** Dec. 15, 2005.  
**Production:** 183 (planned).  
**Inventory:** 97.  
**Unit Location:** Edwards AFB, Calif., Elmendorf AFB, Alaska, Langley AFB, Va. (first operational location), Nellis AFB, Nev., Tyndall AFB, Fla.  
**Contractor:** Lockheed Martin; Boeing.  
**Power Plant:** two Pratt & Whitney F119-PW-100 turbofans, each in 35,000-lb thrust class.  
**Accommodation:** pilot only, on zero/zero ejection seat.  
**Dimensions:** span 44.5 ft, length 62 ft, height 16.6 ft.  
**Weight:** gross 50,000 lb.  
**Ceiling:** above 50,000 ft.  
**Performance** (design target): max level speed at S/L 900+ mph, range more than 2,000 miles.

**Armament:** one internal M61 A2 20 mm gun, two AIM-9 Sidewinders stored internally in the side weapons bays; six AIM-120 AMRAAMs or two AIM-120 AMRAAMs and two GBU-32 JDAMs for ground attack, stored internally in the main weapons bay; beginning 2011, up to eight SDBs can replace two JDAMs.

**COMMENTARY**

Built to lead USAF's "kick down the door" force, by day and night and in adverse weather and across the spectrum of missions, the **F-22A** represents an unparalleled combination of stealth, supercruise (ability to cruise at supersonic speed without using its afterburners), maneuverability, and integrated avionics allowing it to counter multiple anti-access threats. Integrated avionics and intraflight data link permit simultaneous engagement of multiple targets. The combination of flight controls, structural strength, and high-performance engines with thrust vectoring nozzles results in exceptional maneuverability. The cockpit is fitted with six color LCDs. The Primary Multifunction Display provides a view of the air and ground tactical situation, including threat identity, threat priority, and tracking information, with two Secondary Multifunction Displays showing air and ground threats, stores management, and air threat information. Two additional displays give navigation, communication, identification, and flight information. A HUD displays target status, weapon status, weapon envelopes, and shoot cues. Other equipment includes AN/APG-77 radar, an electronic warfare system with radar warning receiver and missile launch detector, JTIDS, IFF, laser gyroscope inertial reference, and GPS.

The F-22A entered engineering and manufacturing development (EMD) in August 1991. Nine aircraft were built, three without avionics to explore flight characteristics, flutter, loads, propulsion, envelope expansion, and weapons separation, and six with avionics to complete integration work, refine the pilot vehicle interface, and fly guided weapons launch tests. In addition, one static and one fatigue test airframe were built. One de-engineered aircraft is now used for ground maintenance training at Tyndall AFB, Fla.

Initial operational test and evaluation (IOT&E) examining the Raptor's air dominance mission concluded mid-September 2004. JDAM capability was demonstrated that same month. Follow-on OT&E (FOT&E) completed in 2005. The F-22A had proved its air-to-air and air-to-ground attack capability when it reached IOC in December 2005, and on Jan. 21, 2006, it flew its first operational sortie from Langley AFB, Va., as part of Noble Eagle.

Production aircraft have been delivered to operational units at Langley and Elmendorf. USAF also plans to put operational F-22s at Hickam AFB, Hawaii, and Holloman

**F-35 Lightning II** (Lockheed Martin photo)

AFB, N.M. All F-22 squadrons will involve Total Force integration with Guard and Reserve forces.

#### F-35 Lightning II

**Brief:** An affordable, highly common family of next generation strike aircraft.

**Function:** Multirole fighter.

**Operator:** ACC for USAF.

**First Flight:** Dec. 15, 2006 (F-35A prototype).

**Delivery:** 2009 (anticipated first production aircraft).

**IOC:** 2013 (USAF).

**Production:** planned: 1,763 (USAF), 680 total F-35B (USMC) and F-35C (USN), 150 (UK), more to eight development partner countries.

**Inventory:** TBD.

**Unit Location:** Planned: Edwards AFB, Calif.; Eglin AFB, Fla.; Hill AFB, Utah; Kadena AB, Japan; Nellis AFB, Nev.; Shaw AFB, S.C. ANG; McEntire ANGB, S.C.

**Contractor:** Lockheed Martin, with Northrop Grumman and BAE Systems; Pratt & Whitney is propulsion contractor; General Electric is second source engine contractor for the production phase.

**Power Plant:** currently one Pratt & Whitney F135, in 40,000-lb thrust class.

**Accommodation:** pilot only, on zero/zero ejection seat.

**Dimensions:** approx. span 35 ft, length 50.5 ft, height 17.3 ft.

**Weight:** TBD.

**Ceiling:** TBD.

**Performance** (design targets): mil power level speed at S/L, 630 knots calibrated airspeed (KCAS) for the F-35A conventional takeoff and landing (CTOL) variant (Mach 1 max power for CTOL only) and the F-35C carrier variant (CV), and 600 KCAS for the F-35B short takeoff and vertical landing (STOVL) aircraft, combat radius more than 590 miles for CTOL variant, 600 miles for CV, and 450 miles for STOVL.

**Armament:** (main weapons bay): CTOL: one internal 25 mm gun, two AIM-120Cs, and two GBU-31 JDAMs. CV: two AMRAAMs and two GBU-31 JDAMs. STOVL: two AMRAAMs and two GBU-32 JDAMs. External carriage also will be available. (Note: Numerous other weapons capabilities will be added as system development continues.)

**COMMENTARY:** The F-35 Lightning II Joint Strike Fighter is a multinational cooperative development program aimed

Martin completed assembly of the first F-35A flight-test aircraft in February 2006 and flight testing commenced Dec. 15, 2006. Flight testing was suspended for five months during 2007 following the discovery of an electrical fault in May. The first flight by a USAF test pilot took place on Jan. 30, 2008. The F-35 is powered by the F135, a derivative of the Pratt & Whitney F119 engine. General Electric has been under contract to develop an interchangeable power plant, the F136, but the future for the alternative production engine is currently unclear.

#### F-117 Nighthawk

**Brief:** World's first operational aircraft designed to exploit low observable (LO) stealth technology to expand the range of heavily defended critical targets that can be attacked.

**Function:** Attack aircraft.

**Operator:** ACC, AFMC.

**First Flight:** June 18, 1981.

**Delivered:** 1982-summer 1990.

**IOC:** October 1983.

**Production:** 59.

**Inventory:** 44.

**Unit Location:** Eglin AFB, Fla., Holloman AFB, N.M.

**Contractor:** Lockheed Martin; Raytheon.

**Power Plant:** two General Electric F404-GE-F1D2 nonafterburning turbojets, each 9,040 lb thrust.

**Accommodation:** pilot only, on zero/zero ejection seat.

**Dimensions:** span 43.3 ft, length 65.9 ft, height 12.4 ft.

**Weight:** empty (estimated) 29,500 lb, max gross 52,500 lb.

**Ceiling:** 35,000 ft.

**Performance:** high subsonic, top speed 646 mph (0.9 Mach), mission radius, unrefueled (5,000-lb weapons load) 656 miles.

**Armament:** full internal carriage of a variety of tactical weapons, incl laser- and GPS-guided 2,000-lb munitions, unguided general-purpose bombs, and cluster munitions. JDAM capability being introduced.

#### COMMENTARY

F-117 was the Air Force's primary attack aircraft for penetrating high-threat target areas with precision weapons. Its small radar signature, LO technologies, and advanced targeting system allow the aircraft to penetrate dense threat environments and to deliver precision weapons

against heavily defended, high-value targets with pinpoint accuracy. Primary missions include precision attack, air interdiction, SEAD, and special operations.

Acknowledged publicly in November 1988, the F-117's first operational deployment was to Panama in 1989 for Just Cause.

F-117A development and manufacture began simultaneously in November 1978 within a highly classified environment, using many parts either transferred or modified from existing aircraft. The F-117As were deployed with the 4450th Tactical Group (redesignated 37th TFW in 1989) at Tonopah Test Range Airfield, Nev., where operations were restricted mainly to night flying to maintain secrecy. In 1992, they were transferred to the 49th FW at Holloman AFB, N.M.

To achieve the aircraft's minimal radar signature, the skin panels of the arrowhead-shaped airframe are divided into many small, perfectly flat surfaces (facets), which deflect at a variety of angles all signals from probing hostile ground or airborne radars. In addition, much of the aircraft's external surface is made of composites and radar-absorbent materials. The F-117A's dull black finish reflects little light, and the engine air intakes and exhaust nozzles are above the wings and rear fuselage, respectively, to shield them from IR seekers below. The two nonafterburning turbofans give the aircraft low noise signature and high subsonic performance.

Key features include a state-of-the-art digital avionics suite integrating sophisticated navigation and attack systems, complemented by a specially developed automated mission-planning system. A high-precision INS coupled to GPS is installed. An upgraded dual-turret IR targeting system, combined with boresight laser designators and autotracker, ensures precision attack.

Other improvements since 1989 have included upgraded cockpit display and instrumentation and adverse weather capability via advanced weapons. USAF plans to retire the F-117 in the spring of 2008.

#### MQ-9 Reaper

**Brief:** A medium-to-high altitude, long-endurance remotely piloted UAV. Joint force commander multimission asset as a persistent hunter-killer against emerging targets.

**Function:** Unmanned attack and reconnaissance aircraft.

**Operator:** ACC.

**First Flight:** February 2001.

**Delivered:** November 2003.

**IOC:** FY07.

**Production:** 92 (planned).

**Inventory:** 13.

**Unit Location:** Creech AFB, Nev.

**Contractor:** General Atomics Aeronautical Systems.

**Power Plant:** one Honeywell TPE-331-10GDT turbo-prop engine.

**Accommodation:** unmanned system.

**Dimensions:** length 36.2 ft, span 66 ft.

**Weight:** empty 4,900 lb, gross 10,500 lb.

**Ceiling:** 30,000+ ft.

**Performance:** cruise speed 230 mph, endurance 14+ hours.

**Armament:** combination of AGM-114 Hellfire missiles, GBU-12, and GBU-38 JDAM.

#### COMMENTARY

Officially combat-operational in Afghanistan since September 2007, the MQ-9 Reaper is larger than the MQ-1, has eight times the range, and flies twice as high. The typical MQ-9 system consists of several aircraft, a GCS, communications equipment/links, spares, and

F-117A Nighthawk (TSgt. James R. Hart Jr.)

at developing and fielding an affordable, highly common family of next generation strike fighters. For US forces, these comprise the F-35A CTOL version, the F-35B STOVL version for USMC, and F-35C CV carrier version for USN. USAF's F-35A will replace its current force of F-16 and A-10 aircraft with a stealthy multirole fighter that will comprise the bulk of USAF's fighter fleet for up to 50 years. This advanced multimission fighter is designed to penetrate high-threat enemy airspace and engage all enemy targets in any conflict. In addition to its advanced stealth design, the F-35 incorporates maneuverability, long range, and highly advanced avionics to accomplish the bulk of USAF missions. Its fully integrated avionics and weapons systems will permit simultaneous engagement of multiple targets in enemy airspace.

The concept demonstration phase (CDP) of the program commenced November 1996, with competitive contract awards to Lockheed Martin (X-35A) and Boeing (X-32A). CDP concluded in fall 2001 with Lockheed Martin declared the winner. The system development and demonstration (SDD) phase, begun in October 2001, focuses on system development, test and evaluation, logistics support, and LRIP planning. A total of 18 test aircraft are being built, 12 for flight testing, six for nonairborne activities. Lockheed

YAL-1A Airborne Laser (Bobbi Zapka, Boeing photo)

active duty and/or contractor personnel. The crew is one pilot and one sensor operator. To meet combatant commanders' requirements, the MQ-9 delivers tailored capabilities using mission kits that may contain various weapons and sensors payload combinations.

The sensor suite for targeting includes a color/monochrome daylight TV, infrared, image intensified TV with a laser rangefinder/designator to precisely designate targets for laser guided munitions. The SAR enables GBU-38 JDAM targeting. The sensor is capable of very fine resolution in both spotlight and strip modes. The SAR also has ground moving target indicator capability.

**YAL-1A Attack Airborne Laser**

**Brief:** The prototype YAL-1A, using a modified 747-400F platform, will be used to demonstrate the ability of an airborne high-energy laser to shoot down ballistic missiles in their boost phase.

**Function:** Airborne laser.

**Operator:** AFMC.

**First Flight:** July 18, 2002 (Block 04 test bed).

**Delivered:** 2002.

**IOC:** TBD.

**Production:** TBD.

**Inventory:** TBD.

**Unit Location:** Edwards AFB, Calif.

**Contractor:** Boeing (ABL platform; battle management (BM) system); TRW (now Northrop Grumman) (COIL and subsystems); Lockheed Martin (beam control system).

**Power Plant:** four GE CF6-80 turbofans, each 61,500 lb thrust.

**Accommodation:** flight crew of two, plus four mission specialists.

**Dimensions:** span 211.4 ft, length 228.8 ft, height 63.7 ft.

**Weight:** empty 423,882 lb, gross 800,000 lb.

**Ceiling:** 45,000 ft.

**Performance:** max operating speed Mach 0.83, max laser weapon range hundreds of miles, unrefueled endurance at 40,000 ft with operational laser weapon load approx six hr. Chemical fuel carried on board will enable more than 20 shots.

**COMMENTARY**

The Airborne Laser (ABL) has been projected as the first directed energy weapon in the US arsenal. However, the Fiscal 2007 defense budget downgraded the program to a demonstration project, culminating in a planned test destruction of a boosting ballistic missile over the Pacific in late 2009. Overall direction and budget authority for the program lies with the Missile Defense Agency (MDA), while USAF continues to man and develop the program through its Airborne Laser System Program Office at Kirtland AFB, N.M. Planning and engineering for future operational aircraft is on hold pending the results of the test.

Operational concepts call for ABLs to fly continuous patrols over deployed US forces, at an altitude of 40,000 ft. The aircraft would detect and shoot down any ballistic missiles launched at US forces or nearby allied nations. The ABL also would have the capability of determining hostile launch locations and passing that information to other US assets.

Central to the system is a Chemical-Oxygen Iodine Laser (COIL) system, running down the interior of the aircraft. Laser fire will emerge through a large ball turret in the nose. The system is designed to track ballistic missiles and maintain laser focus on their skin, which, when sufficiently heated, will cause the pressurized fuel within to explode.

The lightweight, megawatt-class COIL technology can deliver high energy over a great distance largely because of its IR wavelength. In addition to the COIL, the ABL houses three other lasers: the active ranger system, which provides preliminary tracking data; the track illuminator laser, which produces more refined data; and the beacon illuminator laser, which measures atmospheric disturbance.

Following a two-year structural modification, the ABL platform's first flight took place July 18, 2002 from Boeing's Wichita, Kan., facility. A 10-month laser module test was completed in 2002, and, in December 2002, the platform was flown to Edwards AFB, Calif., for system installation. With YAL-1A in the hangar, tests were conducted independently on the ABL optical system and the six laser modules that make up the complete COIL system. All six modules were successfully tested on Nov. 10, 2004. The aircraft resumed airworthiness flight testing in December 2004, following installation of the beam control/fire-control system; performance demonstration of these systems was completed in August 2005. The aircraft was modified during 2006 to prepare for installation of the COIL laser, which was completed in early 2008. The integrated system is slated to begin ground and flight testing this summer, working toward shutdown of a boosting ballistic missile in 2009.

E-3 Sentry (Richard VanderMeulen)

## Reconnaissance and Surveillance Aircraft

**E-3 Sentry**

**Brief:** Heavily modified Boeing 707-320B aircraft, fitted with an extensive complement of mission avionics providing all-weather air surveillance and command, control, and communications for tactical and air defense forces.

**Function:** Airborne early warning, tactical battle management, and C2 of theater air forces.

**Operator:** ACC, PACAF, AFRC (assoc.).

**First Flight:** Oct. 31, 1975 (full avionics).

**Delivered:** March 1977-84.

**IOC:** 1977.

**Production:** 34.

**Inventory:** 32.

**Unit Location:** Elmendorf AFB, Alaska, Kadana AB, Japan, Tinker AFB, Okla. AFRC: (assoc.) Tinker AFB, Okla.

**Contractor:** Boeing; Northrop Grumman (radar); Lockheed Martin (computer).

**Power Plant:** four Pratt & Whitney TF33-PW-100/100A turbofans, each 21,000 lb thrust.

**Accommodation:** flight crew of four; 13-19 mission specialists.

**Dimensions:** span 145.8 ft, length 152.9 ft, height 41.5 ft.

**Weight:** gross 347,000 lb.

**Ceiling:** 38,000 ft.

**Performance:** optimum cruise Mach 0.78, endurance eight hr unrefueled.

**COMMENTARY**

The E-3 Airborne Warning and Control System (AWACS) aircraft is capable of surveillance from Earth's surface up to the stratosphere, over land or water, at more than 200 miles. During conflict it will coordinate the actions of hundreds of strike, support, and cargo aircraft. As an

integrated Air Force command control battle management (C2BM) surveillance, target detection, and tracking platform, AWACS is directly subordinate to the joint air operations center. Its extensive range of mission avionics enables it to provide an accurate real-time battlespace picture of friendly, neutral, and hostile activity; command and control of an area of responsibility; battle management of theater forces; all-altitude/all-weather surveillance of the battlespace; and early warning of enemy actions.

AWACS may be employed alone or horizontally integrated with other C2BM and ISR elements. It provides the theater with the ability to find, fix, track, and target airborne or maritime threats and to locate and identify emitters. It can operate beyond the coverage of ground-based C2 and can exchange data with other C2 platforms and weapon systems.

**E-3A.** Of the 24 built for USAF in standard production configuration, 22 were later upgraded.

An improved US/NATO Standard E-3A configuration was initiated with the 25th USAF Sentry, delivered in December 1981, with a larger-memory computer and a maritime detection capability. Nine were built new for USAF, and one of the original E-3As was upgraded.

**E-3B** is the upgraded earliest version E-3A. Twenty-two product prototypes were produced. Improvements include much-enhanced computer capabilities, jam-resistant communications, austere maritime surveillance capability, additional radio communications, and five additional display consoles.

**E-3C** is an upgrade to the original 10 US/NATO Standard E-3A aircraft, with additional radio, console, and radar capabilities. Redelivered 1984.

A series of major sustainability, reliability, and availability upgrades for USAF E-3s has been undertaken to support the continuing demands on the system. Upgrades include new passive detection systems, known as electronic support measures (ESM), that complement the active beaming radar, enabling the aircraft to detect signals emitted by both hostile and friendly targets, improved Joint Tactical Information Distribution System (JTIDS), jam-resistant communications,

E-8 Joint STARS (USAF photo)

increased computer capacity, and GPS capability. Radar system improvements permit AWACS aircraft operating in the pulse-Doppler mode to detect smaller, stealthier targets. Installation begun in 2005 of new air traffic management systems, and advanced satellite communications permits use of optimum altitudes and flight routes. A single, long-term contract awarded in 2001 provides for ongoing improvement and management support.

#### E-8 Joint STARS

**Brief:** A modified Boeing 707 equipped with a large, canoe-shaped radome mounted under the forward part of the fuselage, housing long-range, air-to-ground radar capable of locating, classifying, and tracking vehicles moving on Earth's surface out to distances in excess of 124 miles. Such data are then transmitted via data link to ground stations or other aircraft.

**Function:** Ground surveillance, battle management (BM), C2 aircraft.

**Operator:** ACC and ANG, as the blended 116th Air Control Wing.

**First Flight:** December 1988.

consoles, two of which double as communications stations, all the aircraft have been modified to the more capable Block 20 aircraft, featuring more powerful computers and an Internet protocol local area network. The first E-8C became operational in 1996, and these aircraft are expected to remain airworthy until at least 2034. System improvements under way include Link 16 upgrade for improved control and battle management; enhanced radar modes; new satellite communications radios; upgrades to allow Joint STARS to assume the Airborne Battlefield Command and Control Center (ABCCC) mission of attack support to ground force commanders; installation of the Force XXI Battle Command Brigade and Below (FBCB2) terminal, greatly enhancing situational awareness to friendly forces; IP connectivity; and communications navigation surveillance air traffic management upgrades to permit use of optimum altitudes and flight routes in increasingly congested commercial airspace in response to new stringent international navigation standards. USAF is now beginning the process of re-engining the E-8C to improve operational performance following cancellation of the E-10 program.

MQ-1 Predator (USAF photo)

**Delivered:** May 1996-present

**IOC:** Dec. 18, 1997.

**Production:** 18.

**Inventory:** 18.

**Unit Location:** Robins AFB, Ga.

**Contractor:** Northrop Grumman; Motorola; Cubic; Raytheon.

**Power Plant:** four Pratt & Whitney TF33-102C turbojets, each 19,200 lb thrust.

**Accommodation:** mission crew of 21 Air Force/Army operators (can be augmented to 34).

**Dimensions:** span 145.8 ft, length 152.9 ft, height 42.5 ft.

**Weight:** gross 336,000 lb.

**Ceiling:** 42,000 ft.

**Performance:** max operating speed Mach 0.84, endurance with one in-flight refueling 20 hr.

#### COMMENTARY

Joint STARS (Surveillance Target Attack Radar System) is a battle management (BM) platform capable of providing commanders with transformational C2 and near-real-time wide area surveillance ultimately passing targeting information to air and ground commanders. Joint STARS battle managers use the sensor and a robust communications suite to engage enemy forces in day, night, and adverse weather conditions. The radar subsystem features a multimode, side-looking, phased-array radar that provides interleaved moving target indicator (MTI) information, synthetic aperture radar (SAR) imagery, and fixed target indicator imagery. Joint STARS downlinks via a secure, jam-resistant digital data link and beyond-line-of-sight satellite radio communications. Multiple receivers are in use, predominantly the US Army's Common Ground Station and Joint Services Work Station.

As part of their operational test and evaluation, Joint STARS aircraft flew more than 150 operational missions during Desert Storm (with two E-8A development aircraft) and Joint Endeavor (with one E-8A and one test bed E-8C). During Iraqi Freedom, EC-8C Joint STARS aircraft were airborne 24 hours a day to help coalition forces maintain battlefield awareness. The E-8C's unique, long-dwell MTI capability is being used in increasingly creative ways, keeping it relevant to the joint force commander.

**E-8A.** Prototype version, with specialized equipment installed aboard two specially modified 707-300 airframes. One was converted to an in-flight pilot trainer in 1997, and the second was scrapped.

**E-8C.** Production version, based on former commercial 707-300 airframes. Equipped with 18 operations and control

#### MQ-1 Predator

**Brief:** A medium-altitude, long-endurance unmanned aerial vehicle (UAV), flown remotely, providing joint force commanders with a multimission asset, by combining imagery sensors with strike capability.

**Function:** Armed reconnaissance, airborne surveillance, target acquisition.

**Operator:** ACC; AFSOC; ANG.

**First Flight:** July 1994.

**Delivered:** July 1994 (USAF from 1996)-present.

**IOC:** 2003.

**Production:** 170 air vehicles (objective force).

**Inventory:** 131.

**Unit Location:** Cannon AFB, N.M. (planned), Creech AFB, Nev., Nellis AFB, Nev. ANG: Davis-Monthan AFB, Ariz., Ellington Field, Tex., Hector Arpt., N.D., March AFB, Calif.

**Contractor:** General Atomics Aeronautical Systems.

**Power Plant:** one Rotax 914F turbocharged engine.

**Accommodation:** unmanned system.

**Dimensions:** Block 5/10/15: length 27 ft, height 6.9 ft, span (Block 5) 48.7 ft, (Block 10/15), 55.2 ft.

**Weight:** empty 950 lb, gross 2,250 lb.

**Ceiling:** 25,000 ft.

**Performance:** cruise speed 80 mph, up to 138 mph, endurance 24 hr (460 miles with 16 hr on station).

**Armament:** Two Hellfire missiles.

#### COMMENTARY

Since its introduction in the mid-1990s, the Predator UAV has evolved into a vital component of USAF's warfighting inventory. A Predator system includes four air vehicles, a ground control station (GCS), satellite link, and about 55 personnel for 24-hour operations. The Predator crew comprises a pilot and two sensor operators.

DOD first used the advanced concept technology demonstration (ACTD) Predator in 1995 to support Provide Promise. In 1996, USAF took over the Predator program, and in 1999, while the UAV was still in development, the service deployed the system operationally for surveillance missions over Bosnia and Iraq. In February 2001, USAF successfully completed Phase 1 of the Hellfire demonstration. Since then, Predators armed with the Hellfire missiles have been used to attack targets in Afghanistan and Iraq. USAF changed the designation for Predator A to MQ-1 to denote its multimission capability for both reconnaissance and strike. Currently, the Predator performs remote split operations by forward deploying Launch and Recovery GCS (LRGCS) aircraft and support

personnel for takeoff and landing operations, while the CONUS-based GCS conducts the mission via extended communication links.

**MQ-1** designates the multimission weaponized Predator A. It carries an MTS A sensor ball supplied by Raytheon in place of the Wescam sensor ball. The MTS A provides a laser target designator with EO/IR sensors in a single package. The SAR must be removed to make room for some of the laser designator equipment. The MQ-1 can be controlled via direct line of sight or via satellite from a remote location.

**RQ-1A.** The ACTD version of Predator A.

**RQ-1B.** The reconnaissance-only version of Predator A, with an internal 450-lb surveillance payload, including two EO and one IR video cameras carried in a ball-shaped turret under the nose and produced by Wescam. The internal sensor payload includes a SAR still imagery camera for a day/night, all-weather reconnaissance capability. USAF has retrofitted RQ-1Bs to MQ-1 configuration.

#### OC-135 Open Skies

**Brief:** A modified C-135 aircraft that flies unarmed observation and verification flights over nations that are parties to the 1992 Open Skies Treaty.

**Function:** Reconnaissance aircraft.

**Operator:** ACC.

**First Flight:** 1993.

**Delivered:** 1993-96.

**IOC:** October 1993.

**Production:** three.

**Inventory:** two.

**Unit Location:** Offutt AFB, Neb.

**Contractor:** Boeing.

**Power Plant:** four Pratt & Whitney TF33-P-5 turbofans, each 16,050 lb thrust.

**Accommodation:** seating for 35, incl cockpit crew, aircraft maintenance crew, foreign representatives, and crew members from the Defense Threat Reduction Agency.

**Dimensions:** span 131 ft, length 135 ft, height 42 ft.

**Weight:** gross 297,000 lb.

**Ceiling:** 50,000 ft (basic C-135).

**Performance:** speed: 500+ mph, unrefueled range 3,900 miles.

#### COMMENTARY

A modified version of the WC-135, used for specialized arms control treaty observation and imagery collection missions with vertical-looking and panoramic optical cameras installed in the rear of the aircraft.

**OC-135B** modifications include one vertical and two oblique KS-87E framing cameras, used for photography approximately 5,000 ft above the ground, and one KA-91C panoramic camera, which pans from side to side to provide a wide sweep for each picture, used for high-altitude photography up to approximately 35,000 ft. Data is processed and recorded by a recording and annotation system.

#### RC-135

**Brief:** Specially configured variant of the Boeing C-135 Stratolifter, having an elongated nose and cheeks containing highly advanced electronic signal collection systems. Used to acquire real-time electronic and signals intelligence data for theater and tactical commanders.

**Function:** Electronic reconnaissance aircraft.

**Operator:** ACC.

**First Flight:** not available.

**Delivered:** circa 1973-99.

**IOC:** circa 1973 (Rivet Joint).

**Production:** (converted).

**Inventory:** 22.

**Unit Location:** Offutt AFB, Neb.

**Contractor:** Boeing (airframe); L3 Communications; Textron.

**Power Plant:** four CFM International F-108-CF-201 turbofans, each 24,000 lb thrust.

**Accommodation:** flight crew of three; 25-35 mission crew.

**Dimensions:** span 131 ft, length 140 ft, height 42 ft

**Weight:** max gross 299,000 lb.

**Ceiling:** 35,000 ft.

**Performance:** speed 500+ mph, range, with air refueling, unlimited.

#### COMMENTARY

The 55th Wing at Offutt AFB, Neb., operates a highly specialized fleet of RC-135s for worldwide reconnaissance missions. All are subject to ongoing modernization, with upgrade of avionics and primary mission equipment to expand capability and maintain effectiveness.

**RC-135S Cobra Ball (CB).** Three aircraft. Cobra Ball collects measurement and signature intelligence (Masint) data, providing the capability to monitor missile-associated signal activity and to track missiles during boost and re-entry phases of flight. Cobra Ball can deploy anywhere in the world in 24 hours and provide on-scene EO reconnaissance for treaty verification and theater ballistic missile proliferation. Equipment includes wide-area IR sensors, long-range optical cameras, and an advanced communications suite.

**RC-135U Combat Sent (CS).** Two aircraft. Each Combat Sent aircraft has a specifically designed signals intelligence (Sigint) suite used primarily to collect scientific and technical (S&T) electronic intelligence (Elint) data against air-, land-, and sea-based emitter systems. The accuracy of CS data is critical to the effective design, programming, and reprogramming of radar warning receivers as well as jammers, decoys, and anti-radiation missiles and to the development of effective threat simulators.

**RC-135V/W Rivet Joint (RJ).** Seventeen aircraft. Rivet Joint is a self-contained standoff airborne signals intelligence (Sigint) collection system. Its primary role is to exploit the "electronic" battlefield and deliver near-real-time (NRT) intelligence-surveillance-reconnaissance (ISR) information to tactical forces, combatant commanders, and national command authorities across the full spectrum of conflict. Onboard collection capabilities encompass rapid search, detection, measurement, identification, demodulation, geolocation, and fusion of data from potentially thousands of electronic emitters.

**TC-135S/W.** Used for training purposes.

**U-2 Dragon Lady** (A1C Chad Ströhmeier)

**RQ-4 Global Hawk** (Bobbi Zapka, Northrop Grumman photo)

**RQ-4 Global Hawk**

**Brief:** A high-altitude, long-range, long-endurance UAV.

**Function:** Unmanned surveillance and reconnaissance aircraft.

**Operator:** ACC.

**First Flight:** Feb. 28, 1998.

**Delivered:** seven ACTD (no longer in inventory); seven Block 10 production aircraft.

**IOC:** ACTD system used operationally from November 2001 in Afghanistan and Iraq. Block 10s currently employed in CENTCOM theater.

**Production:** 54 (planned).

**Inventory:** 12.

**Unit Location:** Beale AFB, Calif., Grand Forks AFB, N.D. (planned), three forward operating bases planned for AFCENT, PACAF, and USAFE.

**Contractor:** Northrop Grumman (prime); Raytheon. **Power Plant:** one Rolls Royce-North American AE 3007H turbofan, 7,600 lb thrust.

**Accommodation:** unmanned system.

**Dimensions:** Block 10: length 44.4 ft, height 15.2 ft, span 116.2 ft; Block 20/30/40: length 47.6 ft, span 130.9 ft.

**Weight:** gross Block 10: 25,600 lb; Block 20/30/40: 32,250 lb.

**Ceiling:** Block 10: 60,000+ ft; Block 20/30/40: up to 60,000 ft.

**Performance:** Block 10/20/30/40 endurance at least 28 hr. Block 10 cruise speed 340 knots. Block 20/30/40 cruise speed projected at 310 knots.

**Armament:** none.

**COMMENTARY**

The RQ-4 provides high-altitude, persistent (28+ hours) remotely piloted ISR capability. The system consists of an aircraft, GCS, and a suite of highly capable sensors.

The RQ-4 Global Hawk is being fielded in four distinctive blocks. Block 10 is in an imagery intelligence (Imint) configuration (EO/IR/SAR) and is basically a derivative of the ACTD aircraft successfully employed in Afghanistan and Iraq. Two Block 10s are currently flying operational missions supporting the war on terror. Block 20s (Imint) are larger versions of the Block 10; the first of six is expected to be operational by the end of FY09. Block 30 multi-int aircraft will add a high- and low-band signals intelligence (Sigint) capability to Block 20 Imint capability; fielding of 26 is projected from early FY12. Fifteen Block 40 multimission aircraft

will provide radar Imint and battle management and command and control (BMC2) support with the multiprogram radar technology improvement program (MP-RTIP); active electronically scanned array (AESA) sensor.

**U-2 Dragon Lady**

**Brief:** Single-seat, single-engine, high-altitude endurance reconnaissance aircraft carrying a wide variety of sensors and cameras, providing continuous day or night high-altitude, all-weather area surveillance in direct support of US forces.

**Function:** High-altitude reconnaissance.

**Operator:** ACC.

**First Flight:** Aug. 4, 1955 (U-2<sup>\*</sup>); 1967 (U-2R); October 1994 (U-2S).

**Delivered:** 1955-October 1989.

**IOC:** circa 1956.

**Production:** 35 (U-2S/ST).

**Inventory:** 33.

**Unit Location:** Beale AFB, Calif.

**Contractor:** Lockheed Martin.

**Power Plant:** F118-GE-101 turbojet.

**Accommodation:** one (two for trainer).

**Dimensions:** span 103 ft, length 63 ft, height 16 ft.

**Weight:** gross 40,000 lb.

**Ceiling:** above 70,000 ft.

**Performance:** speed 475 mph; range more than 4,500 miles; max endurance 10+ hr.

**COMMENTARY**

The U-2 is the Air Force's premier high-altitude reconnaissance platform, capable of carrying multi-int sensors simultaneously, making it USAF's only truly operational multi-intelligence platform and a key performer in combat operations.

Although the U-2 was designed initially in the 1950s, current aircraft were produced primarily in the 1980s when the production line was reopened to produce the TR-1, a significantly larger and more capable version than the earlier aircraft. Deliveries ended in October 1989.

**U-2R** (single-seat) and **U-2RT** (two-seat) aircraft. In 1992, all existing U-2s and tactical TR-1s were consolidated under the designation U-2R.

**U-2S** (single-seat) and **TU-2ST** (two-seat). The current designations of all aircraft in the inventory. Conversion to S model configuration began in October 1994. Included in the ongoing \$1.5 billion improvement program are

new F118-GE-101 engines. Each current operational U-2 is now the Block 20 version with a new glass cockpit using multifunction displays (MFDs), a digital autopilot, and a new electronic warfare system. Sensor upgrades include the ASARS-2A SAR sensor, which provides enhanced imaging modes and improves geolocation accuracy; the SYERS-2 EO imagery system providing DOD's only multispectral and IR capability; enhanced RF intelligence capability and new data links, enabling the U-2 to connect in near real time with network-centric hubs as well as line-of-sight ground stations, airborne data relays, and beyond-line-of-sight satellite data relays simultaneously.

NASA has two ER-2 versions of the U-2 used for high-altitude scientific experiments and atmospheric research, including investigation of global ozone depletion.

## Special Duty Aircraft

**E-4B National Airborne Operations Center**

**Brief:** A four-engine, swept-wing, long-range, high-altitude airplane providing a highly survivable C3 center allowing national/defense leaders to direct US forces, execute emergency war orders, and coordinate actions by civil authorities.

**Function:** Airborne operations center.

**Operator:** ACC.

**First Flight:** June 13, 1973 (E-4A); June 10, 1978 (E-4B).

**Delivered:** December 1974-85.

**IOC:** December 1974 (E-4A); January 1980 (E-4B).

**Production:** four.

**Inventory:** four.

**Unit Location:** Offutt AFB, Neb.

**Contractor:** Boeing; Rockwell; Raytheon E-Systems.

**Power Plant:** four General Electric CF6-50E2 turbofans, each 52,500 lb thrust.

**Accommodation:** up to 114 (63 crew/battle staff; 51 passengers).

**Dimensions:** span 195.7 ft, length 231.3 ft, height 63.4 ft.

**Weight:** gross 800,000 lb.

**Ceiling:** above 40,000 ft.

**Performance:** 6,300+ miles; unrefueled endurance in excess of 12 hr; with aerial refueling up to 72 hr.

**COMMENTARY**

A militarized version of the Boeing 747-200, E-4B aircraft perform the National Airborne Operations Center (NAOC) mission. The E-4B fleet provides a survivable C3 platform throughout the full threat spectrum, including sustained operations in a nuclear environment. First operational mission was flown in March 1980.

E-4Bs are hardened against the effects of nuclear explosions, including electromagnetic pulse, and have in-flight refueling capability. A 1,200-kVA electrical system supports advanced system electronics as well as state-of-the-art communications and data processing equipment such as EHF Milstar satellite terminals and six-channel International Maritime Satellite (Inmarsat). A triband radome also houses the E-4B's superhigh frequency (SHF) frequency division multiple access (FDMA) communications antenna, the only such system on an airborne platform.

The E-4B system is capable of linking with commercial telephone and radio networks and could be used for radio broadcasts to the general population. E-4Bs also support the Federal Emergency Management Agency (FEMA).

In October 2006, the E-4B entered a new era when the first Modernization Block 1 (MB 1) upgrade aircraft reached

IOC. MB 1 updates the electronic infrastructure supporting the aircraft's primary mission equipment and increases the bandwidth of external communications and onboard data transfer. These updates, along with changes to the aircraft's interior configuration, internal noise reduction modifications, BM improvements, and Global Air Traffic Management (GATM) avionics modifications, ensure the E-4B effectiveness for the foreseeable future. Two E-4B aircraft have received the MB 1 upgrade and a third is undergoing modification.

#### EC-130 Commando Solo

**Brief:** A heavily modified C-130 used for EW and electronic combat.

**Function:** psychological warfare.

**Operator:** ANG.

**First Flight:** January 1990.

**Delivered:** March 1990 (J model from 2003).

**IOC:** December 1990.

**Production:** (no new-build E); seven (J).

**Inventory:** seven (J).

**Unit Location:** ANG: Harrisburg Arpt., Pa.

**Contractor:** Lockheed Martin; Raytheon; General Dynamics.

**Power Plant:** (EC-130E) T-56-A-1S turboprops, each 4,200 shp; (EC-130J) four Rolls Royce-Allison AE2100D turboprops, each 4,591 shp.

**Accommodation:** three flight crew, six mission (J).

**Dimensions:** EC-130J: span 132.6 ft, length 97.8 ft, height 38.9 ft.

**Weight:** EC-130J: gross 175,000 lb.

**Ceiling:** EC-130J: 30,500 ft.

**Performance:** speed 299 mph, range in excess of 2,100 miles; (C-130J) 393 mph, range 4,140 miles.

#### COMMENTARY

**EC-130E ABCCC** Airborne Battlefield Command and Control Center. Seven aircraft were updated by Unisys to ABCCC III standard. The advanced JTIDS received data transmitted by AWACS aircraft and other systems, enabling the crew to see a real-time picture of air operations over a combat area. Now retired.

**EC-130E Commando Solo.** Version used by the ANG as a broadcasting station for psychological warfare operations. Specialized modifications include enhanced

**Production:** (converted).

**Inventory:** 14.

**Unit Location:** Davis-Monthan AFB, Ariz.

**Contractor:** Lockheed Martin.

**Power Plant:** four Allison T56-A-15 turboprops, each 4,910 shp.

**Accommodation:** standard crew 13, incl 9 mission.

**Dimensions:** span 132.6 ft, length 99 ft, height 38 ft.

**Weight:** 155,000 lb.

**Ceiling:** 25,000 ft.

**Performance:** speed 374 mph at 20,000 ft.

#### COMMENTARY

A variant used as an airborne communications jamming and information warfare platform. The system disrupts enemy C2 communications. Modifications include electronic attack (EA) system and air refueling capability. Programmed upgrades will expand the EC-130H's mission by procuring a secondary EA capability against early warning and acquisition radars. Completion expected FY11.

#### WC-130 Hercules

**Brief:** A high-wing, medium-range aircraft flown by AFRC for weather reconnaissance missions. It flies into the eye of tropical cyclones or hurricanes, collecting weather data from within the storm's environment.

**Function:** Weather reconnaissance aircraft.

**Operator:** AFRC.

**First Flight:** circa 1959.

**Delivered:** October 1999-2002.

**IOC:** 1959.

**Production:** no new-build WC-130H; 10 WC-130J.

**Inventory:** 10 (H); 10 (J).

**Unit Location:** AFRC: Keesler AFB, Miss.

**Contractor:** Lockheed Martin.

**Power Plant:** WC-130J: four Rolls Royce AE2100D3 turboprops, each 4,500 shp.

**Accommodation:** six.

**Dimensions:** WC-130J: span 132.6 ft, length 97.8 ft, height 38.9 ft.

**Weight:** WC-130J: gross 175,000 lb.

**Ceiling:** WC-130J: 30,500 ft.

**Performance:** speed 374 mph at 20,000 ft.

#### COMMENTARY

The WC-130 is flown by AFRC's "Hurricane Hunters."

The hurricane reconnaissance area includes the Atlantic Ocean, Caribbean Sea, Gulf of Mexico, and central Pacific Ocean areas.

**WC-130B/E.** Early version C-130 modified for weather reconnaissance. Now retired.

**WC-130H.** Later version C-130s modified for weather reconnaissance duties, equipped with two external 1,400-gallon fuel tanks, an internal 1,800-gallon fuel tank, and updated Allison T56-A-15 turboprops, each 4,910 shp. The 10 WC-130H aircraft still counted in the inventory have been recycled for other operational uses.

**WC-130J.** Weather reconnaissance version of the most recent C-130 model, operated by the 53rd WRS for weather reconnaissance duties, including penetration of tropical storms, to obtain data for forecasting storm movements. Features include improved radar, four Rolls Royce AE2100D3 turboprops, and Dowty 391 six-bladed composite propellers.

An average weather reconnaissance mission might last 11 hours and cover almost 3,500 miles while the crew collects and reports weather data every minute. Results are transmitted via satellite to the National Hurricane Center, Miami.

## Tanker Aircraft

#### HC-130N/P

**Brief:** An extended-range, combat search and rescue (CSAR)-configured C-130 that extends the range of rescue helicopters through in-flight refueling and performs tactical delivery of pararescue jumper (PJ) specialists and/or equipment in hostile environments.

**Function:** Aerial refueling/transport.

**Operator:** ACC, AETC, ANG, AFRC.

**First Flight:** Dec. 8, 1964 (as HC-130H).

**Delivered:** from 1965.

**IOC:** 1966.

**Production:** (converted).

**Inventory:** 10 (N); 23 (P).

**Unit Location:** Active: Davis-Monthan AFB, Ariz., Kirtland AFB, N.M., Moody AFB, Ga. ANG: Francis S. Gabreski Arpt., N.Y., Kulis ANGB, Alaska. AFRC: Patrick AFB, Fla.

**Contractor:** Lockheed Martin.

**Power Plant:** four Allison T56-A-15 turboprops, each 4,910 shp.

**Accommodation:** four flight crew, plus mission crew. **Dimensions:** span 132.6 ft, length 98.8 ft, height 38.5 ft.

**Weight:** gross 155,000 lb.

**Ceiling:** 33,000 ft.

**Performance:** speed 289 mph, range more than 4,000 miles.

#### COMMENTARY

The HC-130 can perform extended visual/electronic searches over land or water and operate from unimproved airfields. A three-man PJ team, trained in emergency trauma medicine, harsh environment survival, and assisted evasion, is part of the normal mission crew complement.

Combat air forces' HC-130 aircraft are equipped with an integrated GPS/INS navigation package, radar/missile warning receivers, and chaff/flare countermeasures dispensers. Some aircraft have FLIR systems and personnel locating systems (PLS) compatible with aircrew survival radios. Additional modifications include an improved digital low-power color radar, integrated satellite communications radio, NVG-compatible interior/exterior lighting, and cockpit armor. The C-130 avionics modernization program (AMP)

**EC-130J Commando Solo II** (SSgt. Tia Schroeder)

navigation systems, self-protection equipment, and worldwide color television configuration. Replaced by EC-130J version.

**EC-130J Commando Solo II.** Specialized versions of the latest-model C-130 aircraft, ordered to replace E models, with current mission equipment transferred from the older E model Commando Solo aircraft. Entered service in 2004 with the 193rd SOW (ANG). Modifications include enhanced navigation systems, additional self-protection equipment, air refueling, and the ability to broadcast radio and color TV on all worldwide standards.

Commando Solo aircraft have been used in every war and most contingency operations since 1980, supporting a broad spectrum of information operations and psychological operations missions.

#### EC-130H Compass Call

**Brief:** A heavily modified C-130 for electronic combat.

**Function:** Electronic warfare.

**Operator:** ACC.

**First Flight:** 1981.

**Delivered:** 1982.

**IOC:** 1983; (Block 30) February 1999.

**KC-135 Stratotanker** (Lt. Peter Scheu, USN)

**MC-130P Combat Shadow** (MSgt. Michael Farris)

provides for complete update of the KC-130 avionics. Four retired EC-130E ABCCC and 10 WC-130H aircraft are being converted to HC-130 standard.

**KC-10 Extender**

**Brief:** A modified McDonnell Douglas DC-10 that combines in a single aircraft the operations of aerial refueling and long-range cargo transport.

**Function:** Aerial refueling/transport.

**Operator:** AMC, AFRC (assoc.).

**First Flight:** April 1980.

**Delivered:** March 1981-April 1990.

**IOC:** August 1982.

**Production:** 60.

**Inventory:** 59.

**Unit Location:** Active and AFRC assoc.: McGuire AFB, N.J., Travis AFB, Calif.

**Contractor:** McDonnell Douglas (now Boeing).

**Power Plant:** three General Electric CF6-50C2 turbofans, each 52,500 lb thrust.

**Accommodation:** crew of four; additional seating possible for up to 75 persons with 17 pallets; max 27 pallets; max cargo payload 169,409 lb.

**Dimensions:** span 165.4 ft, length 181.6 ft, height 58.1 ft.

**Weight:** gross 593,000 lb.

**Ceiling:** 42,000 ft.

**Performance:** cruising speed Mach 0.825, range with max cargo 4,400 miles.

**COMMENTARY**

The KC-10 combines the tasks of tanker and cargo aircraft in a single unit, enabling it to support worldwide fighter deployments, strategic airlift, strategic reconnaissance, and conventional operations.

The KC-10 can be air refueled by a KC-135 or another KC-10, increasing its range and diminishing the need for forward bases, leaving vital fuel supplies in the theater of operations untouched.

**KC-10A** is a DC-10 Series 30CF, modified to include fuselage fuel cells, an air refueling operator's station, aerial refueling boom and integral hose reel/drogue unit, a receiver refueling receptacle, and military avionics. Wing-mounted pods enhance the aircraft's capabilities. Other modifications include the addition of communications, navigation, and surveillance equipment to meet civil air traffic control requirements.

Because it has both types of tanker refueling equipment installed, the KC-10A can service USAF, USN, USMC, and allied aircraft on the same mission. Special lighting permits night operations.

**KC-135 Stratotanker**

**Brief:** A short- to medium-range tanker aircraft, meeting the air refueling needs of USAF bomber, fighter, cargo, and reconnaissance forces. It also supports USN, USMC, and allied aircraft.

**Function:** Aerial refueling/airlift.

**Operator:** AETC, AFMC, AMC, PACAF, USAFE, ANG, AFRC.

**First Flight:** August 1956.

**Delivered:** January 1957-65.

**IOC:** June 1957, Castle AFB, Calif.

**Production:** 732.

**Inventory:** 88 (B/E); 363 (R); 54 (T).

**Unit Location:** Altus AFB, Okla., Fairchild AFB, Wash., Grand Forks AFB, N.D., Kadena AB, Japan, MacDill AFB, Fla., McConnell AFB, Kan., RAF Mildenhall, UK, Robins AFB, Ga., ANG: 19 units, AFRC: nine units.

**Contractor:** Boeing.

**Power Plant:** KC-135R/T: four CFM International F108-

CF-100 turbofans, each 22,224 lb thrust; KC-135E: four Pratt

& Whitney TF33-PW-102 turbofans, each 18,000 lb thrust.

**Accommodation:** crew of four; up to 80 passengers.

**Dimensions:** span 130.8 ft, length 136.2 ft, height 38.3 ft.

**Weight:** empty 119,231 lb, gross 322,500 lb (KC-135E 301,600 lb).

**Ceiling:** 50,000 ft.

**Performance:** max speed at 30,000 ft 610 mph, range with max fuel 11,015 miles.

**COMMENTARY**

Mainstay of the USAF tanker fleet, the long-serving KC-135 is similar in size and appearance to commercial 707 aircraft but was designed to military specifications, incorporating different structural details and materials. The KC-135 fuel tanks are located in the "wet wings" and in fuel tanks below the floor in the fuselage.

**KC-135A.** Original version with J57 turbojets. USAF built 732, since modified to other standards.

**KC-135E.** The JT3D re-engining program upgraded USAF, AFRC, and ANG KC-135As to KC-135E standard with JT3D turbofans and related components removed from surplus commercial 707s; fuel carrying capacity increased by 20 percent. The KC-135Es in service with ANG represent some of the oldest aircraft in the USAF inventory. USAF plans to retire E model aircraft in 2008.

**KC-135R/T.** Designation of re-engined KC-135A/Es with F108 turbofans. They embody modifications to 25 major systems and subsystems and not only carry more fuel farther but have reduced maintenance costs, are able to use shorter runways, and meet Stage III (noise abatement) requirements. The first KC-135R flight was in October 1982, and deliveries began in July 1984. KC-135T aircraft (formerly KC-135Q) were capable of refueling the now-retired SR-71s and retain the capability to carry different fuels in the wing and body tanks. Eight KC-135Rs are air refuelable. Twenty KC-135Rs have wing-mounted refueling pods for enhanced refueling of USN and NATO aircraft.

Ongoing modifications are extending the capability and operational utility of the KC-135 well into the 21st century. The Pacer CRAG avionics modernization program, completed in 2002, installed a new compass, radar, and GPS navigation systems, a traffic alert and collision avoidance system (TCAS), and new digital multifunctional cockpit displays. The Global Air Traffic Management (GATM) modification further improves the avionics, adding communications, navigation, and surveillance equipment ensuring access to reduced horizontal and vertical global airspace. Forty KC-135R/T aircraft are outfitted with the capability to relay Link 16 tactical information beyond line of sight of other aircraft.

**MC-130P Combat Shadow**

**Brief:** Aircraft that flies clandestine or low-visibility, low-level missions into denied areas to provide air refueling for special operations forces (SOF) helicopters or to air-drop small special operations teams, small bundles, and zodiac and combat rubber raiding craft.

**Function:** Air refueling for SOF helicopters/airdrop.

**Operator:** AETC, AFSOC, ANG, AFRC.

**First Flight:** Dec. 8, 1964 (as HC-130H).

**Delivered:** from 1965.

**IOC:** 1986.

**Production:** (converted).

**Inventory:** 27.

**Unit Location:** Active: Eglin AFB, Fla., Kadena AB, Japan, Kirtland AFB, N.M., RAF Mildenhall, UK, ANG: Moffett Field, Calif, AFRC: Duke Field, Fla.

**Contractor:** Lockheed Martin (airframe); Boeing.

**Power Plant:** four Allison T56-A-15 turboprops, each 4,910 shp.

**Accommodation:** four flight crew, plus four mission crew.

**Dimensions:** span 132.6 ft, length 98.8 ft, height 38.5 ft.

**Weight:** gross 155,000 lb.

**Ceiling:** 33,000 ft.

**Performance:** speed 290 mph, range with max normal payload 1,208 miles, unlimited with air refueling.

**COMMENTARY**

**MC-130P Combat Shadow** aircraft fly clandestine formation or single-ship intrusion of hostile territory missions to provide aerial refueling of special operations vertical-lift and tilt-rotor assets and the infiltration, exfiltration, and resupply of SOF by airdrop or air-land operations.

Recent modifications to the MC-130P feature improved navigation, communications, threat detection, and countermeasures systems. The Combat Shadow fleet has a fully integrated inertial navigation and Global Positioning System and night vision goggle-compatible interior and exterior lighting. It also has FLIR, radar and missile warning receivers, chaff and flare dispensers, NVG-compatible HUD, satellite and data-burst communications, as well as in-flight refueling capability as a receiver. Secondary capabilities include the ability to air-drop small teams, bundles, and rubber raiding craft. The aircraft are programmed to be modified with a cargo handling system by 2011 to provide the ability to handle palletized cargo and heavy equipment.

**MC-130W**

**Brief:** Aircraft that flies clandestine or low-visibility, low-level missions into denied areas to provide air refueling for special operations forces (SOF) helicopters or to air-drop

**C-5M Galaxy** (Lockheed Martin photo)

small special operations teams, small bundles, and zodiac and combat rubber raiding craft.

**Function:** Air refueling for SOF vertical lift assets/airdrop.

**Operator:** AFSOC.

**First Flight:** Dec. 8, 1964 (as HC-130H).

**Delivered:** June 2006.

**IOC:** 2006.

**Production:** 12 (converted).

**Inventory:** three.

**Unit Location:** Cannon AFB, N.M.

**Contractor:** Boeing.

**Power Plant:** four Allison T56-A-15 turboprops, each 4,910 shp.

**Accommodation:** four flight crew, plus three mission crew.

**Dimensions:** span 132.6 ft, length 98.8 ft, height 38.5 ft.

**Weight:** gross 155,000 lb.

**Ceiling:** 33,000 ft.

**Performance:** speed 290 mph, range with max normal payload 1,208 miles, unlimited with air refueling.

#### COMMENTARY

Transferred from the 1st SOW at Hurlburt Field, Fla., in October 2007, the MC-130W is operated by the 73rd SOS at the redesignated 27th SOW at Cannon. The aircraft is a C-130H(2) airframe significantly modified to include an electronic warfare capability, low-light-level operational capability, and a strengthened tail to permit high-speed, low-level airdrop operations. The MC-130W is equipped with technically advanced refueling pods, providing the ability to refuel SOF helicopters and the CV-22. It also is capable of supporting limited command and control operations. The aircraft itself can be air refueled to extend its mission range. The MC-130Ws supplement AFSOC MC-130Hs lost in combat since the beginning of Operation Enduring Freedom.

of Army combat equipment the C-5 can't carry. Possible loads: six Apache helicopters, two M1 main battle tanks (each weighing 135,400 lb), six Bradley vehicles, three CH-47 helicopters, the 74-ton mobile bridge, a quarter-million pounds of relief supplies, or a maximum of 340 passengers in an Airbus configuration. Airdrop capability for single platforms weighing up to 42,000 lb.

**Dimensions:** span 222.8 ft, length 247.9 ft, height 65.1 ft.

**Weight:** empty 374,000 lb, gross 769,000 (wartime 840,000) lb.

**Ceiling:** 45,000 ft.

**Performance:** max speed at 25,000 ft 571 mph, T-O run at S/L 8,300 ft, landing run, max landing weight at S/L 2,380 ft, range with max payload 3,434 miles, range with max fuel 7,245 miles. Normal cruising speed at altitude 518 mph (Mach 0.77).

#### COMMENTARY

One of the world's largest aircraft, the C-5 is able to carry unusually large and heavy cargo for intercontinental ranges at jet speeds. It can take off and land in relatively short distances and taxi on substandard surfaces during emergency operations. Front and rear cargo openings permit simultaneous drive-through loading and off-loading.

**C-5A.** USAF took delivery of 81 of these basic models between December 1969 and May 1973. A major wing modification was subsequently undertaken, extending the aircraft's service life by 30,000 flight hours. Additionally, the avionics subsystems developed for the C-5B have been incorporated into the C-5A fleet. USAF has proposed retiring the C-5As but is pursuing a reliability and maintainability assessment.

**C-5B.** Generally similar to the C-5A but embodies all the improvements introduced since completion of C-5A production, including the strengthened wings, improved

**Operator:** AETC, AFMC, AMC, ANG, AFRC, PACAF.

**First Flight:** Sept. 15, 1991.

**Delivered:** June 1993-ongoing.

**IOC:** Jan. 17, 1995.

**Production:** 190 (contractual).

**Inventory:** 169.

**Unit Location:** Active: Altus AFB, Okla., Charleston AFB, S.C., Dover AFB, Del., Edwards AFB, Calif., Elmendorf AFB, Alaska, Hickam AFB, Hawaii, McChord AFB, Wash., McGuire AFB, N.J., Travis AFB, Calif. ANG: Allen C. Thompson Field, Miss., Elmendorf AFB (assoc.), Alaska, Hickam AFB (assoc.), Hawaii. AFRC: Charleston AFB (assoc.), S.C., Dover AFB (assoc.), Del., March ARB, Calif., McChord AFB (assoc.), Wash., McGuire AFB (assoc.), N.J., Travis AFB (assoc.), Calif.

**Contractor:** Boeing.

**Power Plant:** four Pratt & Whitney F117-PW-100 turbofans, each 40,440 lb thrust.

**Accommodation:** normal flight crew of three (two pilots plus loadmaster); additional pilot may be carried. Provisions for full range of military airlift missions, incl capacity for up to 189 passengers, 102 paratroops, or 36 litters; range of military cargo incl tanks and up to three AH-64A helicopters; three Bradley vehicles; one M1A2 main battle tank with other equipment; airdrop capability for single platforms weighing up to 60,000 lb; palletized passenger seats.

**Dimensions:** span over winglet tips 169.8 ft, length 173.9 ft, height 55.1 ft.

**Weight:** empty 277,000 lb, max payload 170,900 lb, gross 585,000 lb (extended range).

**Ceiling:** 45,000 ft.

**Performance:** normal cruising speed 484 mph at 35,000 ft or 518 mph (Mach .77) at 28,000 ft, unrefueled range with 160,000-lb payload 2,760 miles, additional 690 miles with extended-range fuel containment system (ERFCS), unlimited with refueling.

#### COMMENTARY

As the US military's core airlifter, the C-17 is able to operate routinely into small, austere airfields (3,000 ft x 90 ft) previously limited to C-130s and provides the only capability to air-land or air-drop outside cargo directly to the tactical environment. C-17 aircraft have assumed the special operations low level (SOLL) mission previously supported by the C-141. They have flown numerous operational and humanitarian missions, including aeromedical evacuation since their introduction into the USAF inventory. The C-17 has been the only aircraft capable of delivering outside cargo into austere operations in Afghanistan and Iraq. The first C-17 operational strategic brigade airdrop occurred in March 2003, when a formation of 15 aircraft delivered a US Army brigade, complete with equipment, directly into northern Iraq.

C-17 is the first military transport to feature a full digital fly-by-wire control system and two-person cockpit, with two full-time, all-function HUDs and four multifunction electronic displays. Defensive systems include Large Aircraft Infrared Countermeasures (LAIRCM) and flares. Ongoing modernization, both through new block configuration to production aircraft and block upgrades to fielded aircraft, continues to improve C-17 operational capability. Significant improvements since 2001 include: (Block 12) ERFCS upgrade, a terrain awareness warning system (TAWWS), and Mobility 2000 (M2K) C2 modernization program; (Block 15) a new Communications Open System Architecture (COSA) radio system; and (Block 16) a weather radar replacement. Block 17 marks the last block upgrade for the fleet; improvements include NVG-friendly combat lighting, upgraded electronic flight-control system, high frequency data link (HFDL), and formation flight system (FFS). Full retrofit up to Block 17 of previously delivered aircraft will take approximately 11 years.

C-17 Globemaster III (Jim Dunn)

## Strategic Transports

### C-5 Galaxy

**Brief:** A heavy-lift, air refuelable cargo transport for massive strategic airlift over long ranges, including outside cargo. Supports special operations missions.

**Function:** Cargo and troop transport.

**Operator:** AETC, AFMC, AMC, ANG, AFRC.

**First Flight:** June 30, 1968.

**Delivered:** October 1969-April 1989.

**IOC:** September 1970.

**Production:** 131.

**Inventory:** 59 (A), 47 (B), two (C).

**Unit Location:** Active: Altus AFB, Okla., Dover AFB, Del., Travis AFB, Calif. ANG: Eastern West Virginia Arpt., W.Va., Memphis Arpt., Tenn., Stewart Arpt., N.Y. AFRC: Dover AFB (assoc.), Del., Lackland AFB, Tex., Travis AFB (assoc.), Calif., Westover ARB, Mass., Wright-Patterson AFB, Ohio.

**Contractor:** Lockheed.

**Power Plant:** four General Electric TF39-GE-1C turbofans, each 41,000 lb thrust. C-5M: four General Electric CF6-80C2 turbofans.

**Accommodation:** normal crew of six (two pilots, two engineers, and two loadmasters), plus rest area for 15 (relief crew, etc.) and seating for 73. There is no piece

turbofans, and updated avionics, with color weather radar and triple INS. The first C-5B flew for the first time in September 1985 and was delivered to Altus AFB, Okla., in January 1986. To enhance force protection, a number of C-5Bs have been equipped with an aerial defense system.

**C-5C.** Two C-5As assigned to Travis AFB, Calif., were modified to carry outside space cargo for NASA by extending the cargo bay and modifying the aft doors.

**C-5M.** All USAF Galaxies are slated to undergo the avionics modernization program (AMP), installing a state-of-the-art cockpit and ensuring global access navigation safety compliance; first upgraded aircraft flew December 2002. Additionally, the Air Force plans to conduct the reliability enhancement and re-engining program (RERP) for B and C model C-5 aircraft to include the General Electric CF6-80C2 turbofan. The first of three production representative C-5Ms made its debut flight on June 16, 2006 at Dobbins ARB, Ga. Program completion is currently scheduled for 2020.

### C-17 Globemaster III

**Brief:** A heavy-lift, air refuelable cargo transport for intertheater (strategic) and intratheater (tactical) direct delivery airlift of all classes of military cargo, including outside items.

**Function:** Cargo and troop transport.

## Theater and Special Use Transports

### C-9 Nightingale

**Brief:** A twin-engine, medium-range, swept-wing jet aircraft used for DV duties.

**Function:** DV duties.

**Operator:** AFRC.

**First Flight:** August 1968.

**Delivered:** August 1968-February 1975.

**IOC:** circa 1968.

**Production:** 24.

**Inventory:** three (C).

**Unit Location:** Scott AFB, Ill.

**Contractor:** Boeing (McDonnell Douglas).

**Power Plant:** two Pratt & Whitney JT8D-9A turbofans, each 14,500 lb thrust.

**Accommodation:** crew of three.

**Dimensions:** span 93.2 ft, length 119.2 ft, height 27.4 ft.

**Weight:** gross 108,000 lb.

**Ceiling:** 35,000 ft.

**Performance:** max cruising speed at 25,000 ft 565 mph, range 2,500 miles.

#### COMMENTARY

**C-9A.** A derivative of the DC-9 Series 30 commercial airliner, the C-9A was the only USAF aircraft modified specifically for the aeromedical evacuation mission, a role now undertaken by C-130 and C-17 aircraft.

**C-9C.** Three specially configured C-9s, delivered to Andrews AFB, Md., in 1975 for the special air mission (SAM) supporting the President and other US government officials, are now in use by AFRC. Upgrades included improvements to the passenger communications equipment, GATM, TAWS, and vertical separation equipment.

#### C-12 Huron

**Brief:** Aircraft to provide airlift support for attache and military advisory groups worldwide.

**Function:** Special airlift.

**Operator:** AFMC, PACAF.

**First Flight:** Oct. 27, 1972 (Super King Air 200).

**Delivered:** 1974-late 1980s.

**IOC:** circa 1974.

**Production:** 88.

**Inventory:** 28.

**Unit Location:** Elmendorf AFB, Alaska, Yokota AB, Japan, various overseas embassies.

**Contractor:** Beech.

**Power Plant:** (C-12J) two Pratt & Whitney Canada PT6A-65B turboprops, each 1,100 shp.

**Accommodation:** crew of two; C-12C: up to eight passengers; C-12J: up to 19 passengers.

**Dimensions:** (C-12J) span 54.5 ft, length 43.8 ft, height 15 ft.

**Weight:** (C-12J) empty 9,850 lb, gross 16,600 lb.

**Ceiling:** (C-12J) 25,000 ft.

**Performance:** (C-12J) max cruising speed at 16,000 ft 307 mph, range with 10 passengers 1,806 miles.

#### COMMENTARY

The C-12 is a military version of the Beechcraft King Air A200 series.

**C-12C.** Re-engined C-12As, with PT6A-41 turboprops, deployed to overseas embassies.

**C-12D.** Similar to C model and also deployed to overseas embassies.

**C-12F.** With updated PT6A-42 engines, can support medical airlift.

**C-12J.** A military version of the larger Beechcraft Model 1900, operated by PACAF.

#### C-20 Gulfstream

**Brief:** A twin-engine turboprop aircraft acquired to provide airlift for high-ranking government and DOD officials.

**Function:** Operational support airlift; special air missions.

**Operator:** AMC, USAFE.

**First Flight:** December 1979.

**Delivered:** September 1983-89.

**IOC:** circa 1983.

**Production:** not available.

**Inventory:** 10.

**Unit Location:** Andrews AFB, Md., Ramstein AB, Germany.

**Contractor:** Gulfstream.

**Power Plant:** C-20A/B: two Rolls Royce-Spoy MK511-8 turboprops, each 11,400 lb thrust; C-20H: two Rolls Royce-Tay MK611-8 turboprops, each 13,850 lb thrust.

**Accommodation:** crew of five; 12 passengers.

**Dimensions:** span 77.8 ft; length (C-20A/B) 83.1 ft, (C-20H) 88.3 ft; height 24.3 ft.

**Weight:** C-20A/B gross 69,700 lb; C-20H gross 74,600 lb.

**Ceiling:** 45,000 ft.

**Performance:** max cruising speed 576 mph, range 4,800 miles.

#### COMMENTARY

**C-20A.** Three Gulfstream III transports were acquired to replace aging C-140B aircraft. They provided USAFE's operational support airlift fleet with intercontinental range and ability to operate from short runways. Retired in September 2002.

**C-20B.** Five C-20B versions, with advanced mission communications equipment and revised interior, were acquired in the late 1980s.

**C-20H.** Two Gulfstream IV SP aircraft, with advanced-technology flight-management systems and upgraded Rolls Royce engines, were acquired by USAF to meet expanding SAM requirements. The two C-20H aircraft were reassigned to USAFE to replace retired C-20As.

Upgrade for C-20B/H aircraft includes GPS, vertical separation equipment, GATM, and TCAS.

#### C-21

**Brief:** Aircraft designed to provide cargo and passenger airlift and transport litters during medical evacuations.

**Function:** Pilot seasoning, passenger and cargo airlift.

**Operator:** AETC, AMC, PACAF, USAFE, ANG.

**First Flight:** January 1973.

**Delivered:** April 1984-October 1985.

**IOC:** April 1984.

**Production:** 84.

**Inventory:** 57.

**Unit Location:** Keesler AFB, Miss., Peterson AFB, Colo., Ramstein AB, Germany, Scott AFB, Ill, ANG: Bradley AFB, Conn., Hector AFB, N.D.

**Contractor:** Gates Learjet.

**Power Plant:** two AlliedSignal TFE731-2 turbofans, each 3,500 lb thrust.

**Accommodation:** crew of two and up to eight passengers or 3,153 lb cargo. Convertible to aeromedical evacuation configuration.

**Dimensions:** span 39.5 ft, length 48.6 ft, height 12.2 ft.

**Weight:** empty, equipped 10,119 lb, gross 18,300 lb.

**Ceiling:** 51,000 ft.

**Performance:** max level speed at 25,000 ft 542 mph, range with max passenger load 2,306 miles, with max cargo load 1,653 miles.

#### COMMENTARY

**C-21A** aircraft provide operational support airlift for time-sensitive movement of people and cargo throughout the US and the Pacific and European Theaters, including aeromedical missions if required. Upgrades include GATM and TCAS. Older aircraft are being retired.

#### C-27J Spartan

**Brief:** A small tactical transport capable of carrying heavy loads into a wide range of airfields, including unprepared strips at high altitude.

**Function:** Tactical airlift.

**Operator:** USAF/USA.

**First Flight:** September 1999 (developmental aircraft).

**Delivery:** 2010 (USAF, planned).

**IOC:** TBD.

**Production:** 78 under contract; 24, USAF; 54, USA.

**Inventory:** TBD.

**Unit Location:** TBD.

**Contractor:** L-3 Communications.

**Power Plant:** two Rolls Royce 4E 2100-D2 turboprops, rated at 4,637 shp.

**Accommodation:** two flight crew; up to 68 troops or 24 paratroops, plus two loadmasters, or 36 litters plus six attendants; up to 25,353 lb cargo; 19,842 lb low velocity airdrop.

**Dimensions:** (basic G.222 airframe) span 94.1 ft, length 74.5 ft, height 32.1 ft.

**Weight:** gross 70,000 lb.

**Ceiling:** 30,000 ft.

**Performance:** T-O run 1,903 ft; range, with 22,046 lb payload 1,000 nm.

#### COMMENTARY

In June 2007, the Air Force and Army selected the C-27J Spartan, a derivative of the Alenia G.222, to fulfill the Joint Cargo Aircraft (JCA) requirement. Plans call initially for 78 aircraft. USAF will use its aircraft to support ground forces served only by the most basic airstrips, often at high altitude, or for missions where the C-130 is currently operating at half-load capacity.

The Air Force also is considering purchasing additional C-27s to function in a gunship role with AFSOC. The currently planned buy would go primarily to ANG units.

#### C-32

**Brief:** A modified Boeing 757-200 used to provide backup transportation for the President. It is the primary means of travel for the vice president, Cabinet, Congressional members, and other high-ranking US and foreign officials.

**Function:** VIP air transport.

**Operator:** AMC.

**First Flight:** Feb. 19, 1982 (LSAF Feb. 11, 1998).

**Delivery:** June-December 1998.

**IOC:** 1998.

**Production:** six.

**Inventory:** six.

**Unit Location:** Andrews AFB, Md.

**Contractor:** Boeing.

**Power Plant:** two Pratt & Whitney PW2040 turbofans, each 41,700 lb thrust.

**Accommodation:** 16 crew and 45 passengers.

**Dimensions:** span 124.8 ft, length 155.2 ft, height 44.5 ft.

**Weight:** empty 127,800 lb, gross 255,000 lb.

**Ceiling:** 41,000 ft.

**Performance:** cruise speed Mach 0.8-0.86 (530 mph), range 5,750 miles.

#### COMMENTARY

A military version of the commercial Boeing 757-200, four new C-32As were purchased as replacements for C-137B/C aircraft. The commercial DV interior includes a crew rest area, DV stateroom, conference area, and general passenger area. The passenger communications

system provides worldwide clear and secure voice and data communications. Modern flight deck avionics allow operations to any suitable airfield in the world and provide an upgrade path as new capabilities become available. Upgrades include installation of a digital communications management system and broadband data transmit and receive, providing an office-in-the-sky capability.

#### C-37A

**Brief:** A modified Gulfstream V utilized as part of the executive fleet, providing transportation for the vice president, Cabinet, Congressional members, Secretary of Defense, service Secretaries, and other prominent US and foreign officials.

**Function:** VIP air transport.

**Operator:** AMC, PACAF, USAFE.

**First Flight:** USAF October 1998.

**Delivery:** October 1998-present.

**IOC:** Dec. 9, 1998.

**Production:** 10.

**Inventory:** nine.

**Unit Location:** Andrews AFB, Md., Chievres, Belgium, Hickam AFB, Hawaii, MacDill AFB, Fla.

**Contractor:** Gulfstream.

**Power Plant:** two BMW-Rolls Royce BR710A1-10 turbofans, each 14,750 lb thrust.

**Accommodation:** five crew and 12 passengers.

**Dimensions:** span 93.5 ft, length 96.4 ft, height 25.8 ft.

**Weight:** empty 47,601 lb, gross 90,500 lb.

**Ceiling:** 51,000 ft.

**Performance:** cruise speed Mach 0.8 (530 mph), range 6,095 miles.

#### COMMENTARY

The C-37A is a military version of the Gulfstream V. Two C-37As, along with the C-32s, were purchased as replacements for the VC-137B/C aircraft. The interior includes separate DV and passenger areas and a communications system capable of worldwide clear and secure voice and data. Aircraft are capable of operations at any suitable civilian or military airfield worldwide. A third C-37A was purchased for combatant commander support airlift and was based at Chievres, Belgium. It has since been reassigned to Andrews AFB, Md. One C-37 was purchased for crisis response support. Five C-37As are being leased from Gulfstream Aerospace as combatant commander support aircraft; three are assigned to MacDill AFB, Fla.; one to Chievres; and one to Hickam AFB, Hawaii. Upgrades include GATM and continuing passenger communications system upgrades to the Andrews-based aircraft.

#### C-38A

**Brief:** A twin-engine transcontinental aircraft used to provide transportation for DVs such as Congressional or high-ranking military members. It can also be configured for medevac and a wide range of special missions including C3 in time of war.

**Function:** VIP air transport and operational support.

**Operator:** ANG.

**First Flight:** 1998.

**Delivered:** April-May 1998.

**IOC:** 1998.

**Production:** two.

**Inventory:** two.

**Unit Location:** Andrews AFB, Md.

**Contractor:** Tracor (Israel Aircraft Industries Ltd).

**Power Plant:** two AlliedSignal TFE731-40R-200G, each 4,250 lb thrust.

**Accommodation:** typically two crew and eight passengers. In medevac role, two Spectrum 500 Life Support Units and two medical attendants. All seats removable for cargo.

**Dimensions:** span 54.6 ft, length 55.6 ft, height 18.2 ft.

**Weight:** gross 24,800 lb.

**Ceiling:** cruise, 33,000 ft.

**Performance:** cruise speed Mach 0.87.

#### COMMENTARY

The C-38A is a military version of the Astra SPX produced by IAI and supported worldwide by Galaxy Aerospace. Equipment includes the most up-to-date navigation, communication, vertical separation, and safety equipment as well as state-of-the-art avionics.

#### C-40

**Brief:** A Boeing 737-700 used for medium-range airlift of personnel.

**Function:** Passenger transportation.

**Operator:** AMC, PACAF, USAFE, ANG, AFRC.

**First Flight:** USN C-40A: April 14, 1999.

**Delivered:** 2002.

**Production:** 10.

**Inventory:** nine.

**Unit Location:** Andrews AFB, Md., Hickam AFB, Hawaii, Ramstein AB, Germany. ANG: Andrews AFB, Md.

AFRC: Scott AFB, Ill.

**Contractor:** Boeing.

**C-130 Hercules** (SSgt. Tia Schroeder)

**Power Plant:** two General Electric CFM56-7 turbofans, each 24,000 lb thrust.

**Accommodation:** flight crew of four, plus three or four cabin crew; up to 89 passengers.

**Dimensions:** span 112 ft 7 in, length 110 ft 4 in, height 4' 2 in.

**Weight:** gross 171,000 lb.

**Ceiling:** 41,000 ft.

**Performance:** cruise speed 0.78-0.82 Mach, range 3,450 miles.

**COMMENTARY**

The C-40 is the military version of the commercial Boeing 737-700 increased gross weight aircraft. C-40s are used for transporting senior government officials and regional combatant commanders.

**C-40B.** The B model is equipped with a DV suite, staff work area, conference area, and worldwide secure communications and data capability. USAF purchased three and leased one C-40B. Two are assigned to Andrews and one each to Hickam and Ramstein.

**C-40C.** The C model has a DV seating area, general passenger seating area, and secure communications capability. Three leased C-40Cs operate from Andrews. The new C-40s allocated to AFRC's 932nd AW at Scott feature upgraded avionics and auxiliary fuel tanks to allow nonstop flight to Hickam and Ramstein.

**C-130 Hercules**

**Brief:** A rugged aircraft capable of operating from rough dirt strips to provide theater airlift and paratrooping of troops and equipment into hostile areas.

**Function:** Inter- and intratheater airlift.

**Operator:** AETC, AMC, PACAF, USAF, ANG, AFRC.

**First Flight:** August 1954 (C-130A).

**Delivered:** December 1956-present (C-130J).

**IOC:** circa 1958.

**Production:** more than 2,200.

**Inventory:** 120 (E); 284 (H); 44 (J).

**Unit Location:** Active: Dyess AFB, Tex., Elmendorf AFB, Alaska, Little Rock AFB, Ark., Pope AFB, N.C., Ramstein AB, Germany, Yokota AB, Japan. ANG: 22 units. AFRC: nine units. AFRC/ANG assoc.: one.

**Contractor:** Lockheed Martin.

**Power Plant:** (C-130H) four Rolls Royce-Allison T56-A-15 turboprops, each 4,300 shp. (C-130J) four Rolls Royce-Allison AE2100D3 turboprops, each 4,591 shp.

**Accommodation:** (C-130H) crew of five; up to 92 ground troops, 64 paratroops, 74 litter patients plus attendants, 54 passengers on palletized seating, or up to five 463L standard freight pallets, etc.; max load, 45,000 lb.

**Dimensions:** span 132.6 ft, length 97.8 ft, height 38.1 ft.

**Weight:** C-130H: empty 81,000 lb, fuel/cargo max gross 155,000 lb; C-130J: gross 175,000 lb.

**Ceiling:** 33,000 ft at 100,000 lb T-O weight.

**Performance:** (C-130H) max cruising speed 430 mph, T-O run 3,585 ft, landing run (at 130,000 lb) 1,700 ft range with 40,000-lb payload 2,240 miles; range 3,450 miles.

**COMMENTARY**

First delivered more than 50 years ago, the C-130 Hercules transport continues in production and has been delivered to more than 60 countries. Basic and specialized versions operate throughout USAF, performing diverse roles in both peace and war situations, including airlift support, Arctic ice cap resupply, aeromedical missions, aerial spray missions (AFRC), fire-fighting duties (AFRC and ANG) for the US Forest Service, and natural disaster and humanitarian relief missions.

**C-130A, B, and D.** Early versions, now retired. The initial production C-130A had four Allison T56-A-11 or -9 turboprop engines. USAF ordered a total of 219. The C-130B had improved range and higher weights and introduced Allison T56-A-7 turboprops; 134 were produced, with delivery from April 1959. Twelve were modified beginning 1961 as **JC-130Bs** for air-snatch satellite recovery together with three early H models. Twelve C-130Ds were modified as for Arctic operations.

**C-130E** is an extended-range development of the C-130B, with large under-wing fuel tanks; 389 were ordered, with deliveries beginning in April 1962. A wing modification to correct fatigue and corrosion extended the life of the aircraft well into this century. Other modifications include a self-contained navigation system, with an integrated communications/navigation management suite, GPS capability, and a state-of-the-art autopilot that incorporates a ground collision avoidance system. USAF is retiring some of the older aircraft.

**C-130H** is generally similar to the E model but has updated turboprops, a redesigned outer wing, and improved pneumatic systems; delivery began in July 1974. Subsequent improvements include updated avionics, improved low-power color radar, and other minor modifications. Night vision instrumentation system was introduced from 1993. TCAS II in new aircraft from 1994. **ANG LC-130H** aircraft are modified with wheel-ski gear to support Arctic and Antarctic operations. Two **DC-130Hs** were modified for UAV control duties.

A major AMP for the C-130 includes digital displays, flight-management systems, multifunction radar, new communications systems, and a single air data computer. Planned completion is for 2016. The AMP upgrade includes all C-130 models except the C-130E, older or worn-out C-130Hs, and the new C-130J aircraft. In addition, work has begun to replace wing boxes on 155 C-130s in a move to alleviate/pre-empt operational restrictions; completion is planned for 2020. Some 600

C-130s will also receive landing gear modifications beginning in 2010.

**C-130J.** Most recent model featuring a three-crew flight operation system, 6,000 shp Rolls Royce-Allison AE2100D engines, all composite six-blade Dowty Aerospace R391 propeller system, digital avionics, and mission computers. Compared to earlier production C-130Es, its speed is up 21 percent, cruising altitude is 40 percent higher, and range 40 percent longer. The J also features improved reliability and maintainability. ANG and AFRC units began receiving J models in 1999. First active duty unit, the 48th AS at Little Rock AFB, Ark., received its first C-130J aircraft in March 2004. First wartime deployment occurred December 2004, although official IOC was only declared in October 2006. The stretch version of the C-130J (**C-130J-30**), with an additional 15 feet of fuselage and capable of carrying up to 128 ground troops or 92 paratroops, is replacing the oldest 1960s-vintage C-130Es. Deliveries to ANG began in 2001 and to USAF and AFRC in 2004.

**CV-22**

**Brief:** A tilt-rotor, multimission transport aircraft designed to have the maneuverability and lift capability of a helicopter and the speed of a fixed-wing aircraft.

**Function:** Multimission airlift.

**Operator:** AETC, AFSOC.

**First Flight:** March 19, 1989 (V-22).

**Delivery:** 2006.

**IOC:** 2009 (planned).

**Production:** 50 (planned).

**Inventory:** seven.

**Unit Location:** Hurlburt Field, Fla., Kirtland AFB, N.M.

**Contractor:** Bell Boeing; Raytheon.

**Power Plant:** two Rolls Royce-Allison AE1107C turbo-shafts, each 6,200 shp.

**Accommodation:** four (two pilots, two flight engineers); additional pilot for extended duration missions; up to 18 troops or 8,000 lb internal cargo.

**Dimensions:** proprotor diameter 38 ft, width, rotors turning 84.6 ft, fuselage length 57.3 ft, height 22 ft.

**Weight:** gross weight 34,900 lb, max VTO 52,870 lb; STO 57,000 lb, self-deploy T-O 60,500 lb.

**Ceiling:** 26,000 ft.

**Performance:** typically will carry troops or cargo over a 500-mile combat radius at 265 mph. Self-deployment range with one air refueling 2,417 miles.

**COMMENTARY**

**CV-22** is the designation for the US Special Operations Command variant of the V-22 Osprey. The CV-22 is a multi-engine, dual-piloted, self-deployable, medium-lift vertical takeoff and landing (VTOL) tilt-rotor aircraft for the conduct of special operations, including nuclear, biological, and chemical (NBC) warfare conditions. It will operate from land bases and austere forward operating locations, as well as air capable ships without reconfiguration or modification. An in-flight refueling capability extends combat mission range when required, and the aircraft will be self-supporting to the maximum practical extent. The CV-22's mission is long-range clandestine penetration of denied areas in adverse weather and low visibility to infiltrate, exfiltrate, and resupply SOF.

CV-22 avionics include a fully integrated precision navigation suite, with GPS and INS; a digital cockpit management system oriented around four multifunction displays (MFDs); FLIR; an integrated NVG HUD; terrain-following/terrain-avoidance (TF/TA) radar; and digital map system. Additionally, it is equipped with robust self-defensive avionics and secure

**CV-22** (Ted Carlson)

anti-jam, redundant communications compatible with current and planned systems used by command and control agencies and ground forces. The CV-22 unrefueled combat range satisfies current and emergent major theater war (MTW) requirements, as well as national mission tasking. The aircraft is capable of completing most assigned missions during one period of darkness.

A third aircraft joined the two test aircraft based at Edwards AFB, Calif., in February 2005. The first production example was delivered to USAF in September 2005 and the first combat-configured aircraft in March 2006. Operational utility evaluation was completed in summer 2006 and flight crew training began in late 2006 at Kirtland AFB, N.M. The first operational CV-22 squadron, the 8th SOS at Hurlburt Field, Fla., received its first aircraft in January 2007. IOT&E was scheduled for completion by April 2008, with IOC expected at Hurlburt in early 2009. USAF may place detachments of CV-22s in US European Command and US Pacific Command theaters.

#### MC-130E/H Combat Talon

**Brief:** A modified C-130 able to provide global, day, night, and adverse weather capability to air-drop personnel and to deliver personnel and equipment to support US and allied SOF.

**Function:** SOF infiltration, exfiltration, and resupply.

**Operator:** AETC, AFSOC, AFRC.

**First Flight:** circa 1965 (E); January 1990 (H).

**Delivered:** initially 1966.

**IOC:** 1966 (E); June 1991 (H).

**Production:** 22 new-build Hs.

**Inventory:** 14 (E); 20 (H).

**Unit Location:** Active (assoc.) and AFRC MC-130Es at Duke Field, Fla. Active: MC-130H at Hurlburt Field, Fla., Kadzina AB, Japan, Kirtland AFB, N.M., RAF Mildenhall, UK.

**Contractor:** Lockheed Martin (airframe); Boeing integrated weapons system support.

**Power Plant:** four Allison T56-A-15 turboprops, each 4,910 shp.

**Accommodation:** E: crew of nine; 53 troops or 26 paratroops; H: crew of seven; 77 troops, 52 paratroops, or 57 litters.

**Dimensions:** span 132.7 ft, height 38.6 ft, length 100.8 ft (E), 99.8 ft (H).

**Weight:** empty 72,892 lb, gross 155,000 lb.

**Ceiling:** 30,000 ft.

**Performance:** max speed 289 mph, range 3,110 miles, unlimited with refueling.

#### COMMENTARY

MC-130 Combat Talon aircraft are equipped with terrain following and terrain-avoidance radars, precision navigation systems using INS/GPS, and electronic and infrared countermeasures for self-protection. Both E and H aircraft are capable of in-flight refueling, are NVG-compatible, and have a modified tail empennage for their high-speed aerial delivery system. The primary mission of the aircraft is to conduct infiltration, resupply, and exfiltration of special operations forces (SOF). They are also capable of supporting psychological operations. Combat Talons are able to air-drop or to land on austere unmarked landing or drop zones.

**MC-130E Combat Talon I.** Fourteen modified C-130E aircraft were additionally equipped with a pod-based system to air refuel SOF helicopters and tilt-rotor aircraft.

**MC-130H Combat Talon II.** C-130H(2) aircraft modified with an integrated glass cockpit were acquired in the late 1980s and early 1990s to supplement the Combat Talon Is. All are modified with a state-of-the-art pod-based aerial refueling system to augment the MC-130E and MC-130P aerial refueling fleet. The 1st, 7th, and 15th SOSs provide support to SOF in Europe, the Pacific, and CONUS, respectively. The 58th SOS at Kirtland AFB, N.M., is responsible for MC-130H mission qualification training.

#### VC-25 Air Force One

**Brief:** A specially configured Boeing 747-200B used for air transport of the President and his entourage. When the President is aboard, it has the radio call sign "Air Force One."

**Function:** Air transport of the President.

**Operator:** AMC.

**First Flight:** first flown as Air Force One Sept. 6, 1990.

**Delivered:** August-December 1990.

**IOC:** circa 1990.

**Production:** two.

**Inventory:** two.

**Unit Location:** Andrews AFB, Md.

**Contractor:** Boeing.

**Power Plant:** four General Electric CF6 turbofans, each 56,700 lb thrust.

**Accommodation:** crew of 26; up to 76 passengers.

**Dimensions:** span 195.7 ft, length 231.8 ft, height 63.4 ft.

**Weight:** long-range mission T-O weight 803,700 lb., gross 833,000 lb.

**Ceiling:** 45,000 ft.

MC-130E Combat Talon I (USAF photo)

**Performance:** speed 630 mph (Mach 0.92), normal cruising speed Mach 0.84, unrefueled range 7,820 miles.

#### COMMENTARY

Based on the Boeing 747-200B airframe, two VC-25As assigned to Andrews AFB, Md., support the President. Aircraft are equipped with staff work areas, a conference room, a general seating area, and an executive office. Communications capability includes worldwide secure and clear communications equipment. Upgrades include GATM and installation of a broadband data transmit and receive capability to provide video teleconferencing and office-in-the-sky capability.

## Trainer Aircraft

#### T-1A Jayhawk

**Brief:** A medium-range, twin-engine jet trainer version of the Beechcraft 400A. It is used by the Air Force to train student airlift and tanker pilots and student combat systems operators.

**Function:** Advanced pilot training.

**Operator:** AETC, AFRC, USN.

**First Flight:** Sept. 22, 1989 (Beechcraft 400A).

**Delivered:** Jan. 17, 1992-July 1997.

**IOC:** January 1993.

**Production:** 180.

**Inventory:** 179.

**Unit Location:** Active: Columbus AFB, Miss., Laughlin AFB and Randolph AFB, Tex., Vance AFB, Okla., NAS Pensacola, Fla. (forward operating station), AFRC: (assoc.) Randolph AFB, Tex.

**Contractor:** Raytheon.

**Power Plant:** two Pratt & Whitney Canada JT15D-5B turbofans, each 2,900 lb thrust.

**Accommodation:** two, side by side, and one to the rear; rails are fitted to accommodate an extra four seats to permit transport of maintenance teams.

**Dimensions:** span 43.5 ft, length 48.4 ft, height 13.9 ft.

**Weight:** empty 5,200 lb, gross 16,100 lb.

**Ceiling:** 41,000 ft.

**Performance:** max speed at 27,000 ft 538 mph, range 2,400 miles.

#### COMMENTARY

The swept-wing T-1A Jayhawk is a military version of the Beech 400A used in the advanced phase of joint specialized undergraduate pilot training (JSUPT) for students selected to go on to fly tanker, transport, and electronic warfare aircraft. It is also used to train student combat systems operators (CSO) and naval flight officers in the intermediate stages of their training.

The T-1A has cockpit seating for an instructor and two students. Special mission equipment includes GPS, an electronic flight instrument system (EFIS) avionics system, a single-point refueling system, an additional fuselage fuel tank, and increased bird-strike protection in the windshield and leading edges for sustained low-level operation. T-1As typically log 100,000 flying hours a year, supporting all-weather training operations at high and low altitudes.

#### T-6A Texan II

**Brief:** A single-engine turboprop aircraft used for train-

ing student pilots, combat systems officers, and naval flight officers in fundamentals of aircraft handling and instrument, formation, and night flying.

**Function:** Primary trainer.

**Operator:** AETC, AFRC, USN.

**First Flight:** July 15, 1998.

**Delivery:** May 2000-present (operational aircraft).

**IOC:** November 2001.

**Production:** Planned: USAF 372, USN 328.

**Inventory:** 320 (USAF).

**Unit Location:** USAF: Active: Columbus AFB, Miss., Laughlin AFB and Randolph AFB, Tex., Vance AFB, Okla., Planned: Sheppard AFB, Tex. USN: NAS Corpus Christi, Tex., NAS Whiting, Fla.

**Contractor:** Hawker Beechcraft (formerly Raytheon). **Power Plant:** one Pratt & Whitney Canada PT6A-68 turboprop, 1,100 shp.

**Accommodation:** two, in tandem, on zero/zero ejection seats.

**Dimensions:** span 33.5 ft, length 33.4 ft, height 10.7 ft.

**Weight:** empty (approx) 4,707 lb; gross 6,500 lb.

**Ceiling:** 31,000 ft.

**Performance:** max speed 368 mph, range 920 miles.

#### COMMENTARY

The Joint Primary Aircraft Training System (JPATS) T-6A Texan II is based on the Swiss Pilatus PC-9 aircraft, modified to include a strengthened fuselage, zero/zero ejection seats, increased aircrew accommodation, upgraded engine, increased fuel capacity, pressurized cockpit, larger, bird-resistant canopy, and new digital avionics. The JPATS replaces USAF's T-37Bs and USN's T-34Cs in primary pilot training, as well as supporting undergraduate naval flight officer and USAF combat systems officer training.

#### T-37 Tweet

**Brief:** A twin-engine jet aircraft used for training undergraduate pilots in fundamentals of aircraft handling and instrument, navigation, formation, and night flying.

**Function:** Primary trainer.

**Operator:** AETC.

**First Flight:** September 1955.

**Delivered:** December 1956-68.

**IOC:** 1957.

**Production:** 985.

**Inventory:** 87.

**Unit Location:** Active: Columbus AFB, Miss., and Sheppard AFB, Tex.

**Contractor:** Cessna.

**Power Plant:** two Continental J69-T-25 turbojets, each 1,025 lb thrust.

**Accommodation:** two, side by side, on ejection seats.

**Dimensions:** span 33.7 ft, length 29.2 ft, height 9.1 ft.

**Weight:** empty 3,870 lb, gross 6,625 lb.

**Ceiling:** 35,000 ft.

**Performance:** max speed at S/L 315 mph, range 460 miles.

#### COMMENTARY

USAF's first purpose-built jet trainer, the T-37 has been AETC's standard two-seat primary trainer for several decades. Its distinctive blue-and-white finish is intended to help formation training and ease maintenance.

T-37A, with J69-T-9 turbojets; all have been modified to T-37B standards.

**T-38 Talon** (SrA. Matthew C. Simpson)

**T-37B.** The original T-37A was superseded in November 1959 by the T-37B, with improved radio navigational equipment, UHF radio, and upgraded instruments. Kits were subsequently produced to extend the capability of the T-37 by modifying or replacing critical structural components. AETC has been replacing the T-37B with the T-6A Texan II since 2000.

**T-38 Talon**

**Brief:** A twin-engine, high-altitude, supersonic jet trainer used in a variety of roles, primarily for undergraduate pilot, pilot instructor training, and introduction to fighter fundamentals training.

**Function:** Trainer.

**Operator:** ACC, AETC, AFMC, AFRC.

**First Flight:** April 1959.

**Delivered:** 1961-72.

**IOC:** March 1961.

**Production:** more than 1,100.

**Inventory:** 462.

**Unit Location:** Active: Beale AFB and Edwards AFB, Calif., Columbus AFB, Miss., Holloman AFB, N.M., Laughlin AFB, Randolph AFB, and Sheppard AFB, Tex., Vance AFB, Okla., Whiteman AFB, Mo. AFRC: (assoc.) Randolph AFB, Tex.

**Contractor:** Northrop Grumman.

**Power Plant:** two General Electric J85-GE-5A turbojets, each 2,680 lb thrust dry, 2,900 lb thrust with afterburning.

**Accommodation:** two, in tandem, on ejection seats.  
**Dimensions:** span 25.3 ft, length 46.3 ft, height 12.8 ft.

**Weight:** empty 7,164 lb, gross 12,500 lb.

**Ceiling:** above 55,000 ft.

**Performance:** max level speed 812 mph, range 1,000 miles.

**COMMENTARY**

Most of the T-38s in service are used by AETC for advanced bomber-fighter training track in JSUPT and IFFT. Capabilities are being enhanced through an ongoing program of modifications and structural renewal, including a full avionics upgrade with a HUD and integrated GPS/INS, and a propulsion modernization. As a result of the reduction in the T-38's workload through introduction of the T-1A and JSUPT, the service life of the T-38s should extend well beyond 2020.

**T-38A.** Close in structure to the F-5A export tactical fighter, the T-38A was the world's first supersonic trainer aircraft. It is used to teach supersonic techniques, aerobatics, formation, night and instrument flying, and cross-country and low-level navigation. The aircraft is also used by AFMC to train test pilots and flight-test engineers at Edwards AFB, Calif., in experimental techniques, and by ACC as a companion trainer to maintain pilot proficiency.

**AT-38B.** A slightly different version, with a gunsight and practice bomb dispenser, the AT-38B is used by AFMC for test and evaluation.

**T-38C.** C model T-38s are rewinged A and B airframes with modifications of the avionics systems to include a HUD. The first T-38C was delivered late summer 2002; last delivery was made in summer 2007. The propulsion system is also being upgraded to improve performance and reliability. In addition, the Escape System Upgrade Program is under way to further improve safety and sustainability of the aircraft and improve aircrew accommodation.

**T-41 Mescalero**

**Brief:** Short-range, high-wing trainer used primarily for aerodynamic and navigation courses.

**Function:** Training, support.

**Operator:** AETC.

**Delivered:** 1969.

**Inventory:** four.

**Unit Location:** USAFA, Colo.

**Contractor:** Cessna.

**Power Plant:** one Continental IO-360-DB piston engine, 210 hp.

**Accommodation:** two, side by side.

**Dimensions:** span 36.1 ft, length 26.5 ft, height 8.9 ft.

**Weight:** gross 2,550 lb.

**Ceiling:** 16,000 ft.

**Performance:** speed 182 mph, range 690 miles.

**COMMENTARY**

The T-41D, a military version of the Cessna 172, is an all-metal, strut-braced high-wing monoplane. The aircraft is equipped with modern avionics, GPS, and other equipment appropriate to its mission. It is used for Aero 456 flight testing, USAFA flying team support, and orientation flights.

**T-43**

**Brief:** A medium-range, swept-wing jet aircraft equipped with navigation and communications equipment to train navigators for strategic and tactical aircraft.

**Function:** Navigation trainer.

**Operator:** AETC.

**First Flight:** April 1973.

**Delivered:** September 1973-July 1974.

**IOC:** 1974.

**Production:** 19.

**Inventory:** eight.

**Unit Location:** Randolph AFB, Tex.

**Contractor:** Boeing.

**Power Plant:** two Pratt & Whitney JT8D-9 turbofans, each 14,500 lb thrust.

**Accommodation:** crew of two; 12 students and six instructors.

**Dimensions:** span 93 ft, length 100 ft, height 37 ft.

**Weight:** gross 115,500 lb.

**Ceiling:** 37,000 ft.

**Performance:** econ cruising speed 535 mph (Mach 0.7), operational range 2,995 miles.

**COMMENTARY**

**T-43A.** The T-43A was derived from the commercial Boeing Model 737-200 and was equipped with the same onboard avionics as most USAF operational aircraft, including mapping radar, VHF omnidirectional radio and Tacan radio systems, INS, radar altimeter, all required communications equipment, and celestial navigation capability. A number of T-43s are configured for passengers and provide operational support to assigned commands.

**T-51**

**Brief:** A light aircraft used by USAFA flying team for training and competition.

**Function:** Training, competition.

**Operator:** AETC.

**Inventory:** three.

**Unit Location:** USAFA, Colo.

**Contractor:** Cessna.

**Power Plant:** one Lycoming O-320 E2D piston engine, 150 hp.

**Accommodation:** two, side by side.

**Dimensions:** span 33.3 ft, length 24.8 ft, height 8.5 ft.

**Weight:** (Cessna 150M) gross 1,600 lb.

**Ceiling:** 14,000 ft plus.

**Performance:** speed 124 mph, range 475 miles.

**COMMENTARY**

The T-51 is a military version of the Cessna 150 used by students at USAFA for training and competition.

**TG-10B Merlin**

**Brief:** Two-seat medium-performance sailplane used for introductory glider training, instructor upgrade training, spin training, and basic cross-country soaring training.

**Function:** Trainer.

**Operator:** AETC.

**Delivered:** May 2002.

**IOC:** December 2002.

**Production:** 12.

**Inventory:** 12.

**Unit Location:** USAFA, Colo.

**Contractor:** Blanik.

**Accommodation:** two.

**Dimensions:** span 55.4 ft, length 27.9 ft, height 6.2 ft.

**Weight:** 1,168 lb.

**Performance:** speed 142.6 mph, glide ratio 28:1.

**COMMENTARY**

The TG-10B is an L-23 Super Blanik dual sailplane, produced in the Czech Republic and used by USAFA to introduce cadets to flight through the Basic Soaring program.

**TG-10C Kestrel**

**Brief:** Two-seat medium-performance sailplane used for spin and aerobatic training.

**Function:** Trainer.

**Operator:** AETC.

**TG-14A** (USAF photo)

**Delivered:** May 2002.  
**IOC:** December 2002.  
**Production:** five.  
**Inventory:** five.  
**Unit Location:** USAFA, Colo.  
**Contractor:** Blanik.  
**Accommodation:** two.  
**Dimensions:** span 46.6 ft, length 27.6 ft, height 6.9 ft.  
**Weight:** 1,100 lb.  
**Performance:** speed 146.1 mph, glide ratio 26:1.  
**COMMENTARY**  
 The TG-10C is an L-13AC Blanik dual sailplane, produced in the Czech Republic and used primarily for spin and aerobatic training.

**TG-10D Peregrine**  
**Brief:** Single-seat medium-performance sailplane used for cross-country soaring training and high-altitude wave flight.  
**Function:** Trainer.  
**Operator:** AETC.  
**Delivered:** May 2002.  
**IOC:** December 2002.  
**Production:** four.  
**Inventory:** four.  
**Unit Location:** USAFA, Colo.  
**Contractor:** Blanik.  
**Accommodation:** single.  
**Dimensions:** span 46.3 ft, length 21.7 ft, height 4.7 ft.  
**Weight:** 750 lb.  
**Performance:** speed 149.5 mph, glide ratio 33:1.  
**COMMENTARY**  
 The TG-10D is an L-33 Solo Blanik sailplane produced in the Czech Republic. It is a medium-performance sailplane that allows students to master basic flight maneuvers while solo, before progressing to a more advanced sailplane. It is primarily used for cross-country training and high-altitude wave flight.

**TG-14A**  
**Brief:** A two-place, side-by-side motorized glider for use by USAFA in its Introductory Flight Training Program (IFTP) flight screening/primary training program.  
**Function:** Trainer.  
**Operator:** AETC.  
**Delivered:** September 2002.  
**IOC:** December 2002.  
**Production:** 14.  
**Inventory:** 14.  
**Unit Location:** USAFA, Colo.  
**Contractor:** Grupo Aeromot, Brazil.  
**Power Plant:** one Rotax 912A, 81 hp engine.  
**Accommodation:** two, side by side.  
**Dimensions:** span 57.3 ft, length 26.4 ft, height 6.3 ft.  
**Weight:** gross 1,874 lb.  
**Performance:** cruise speed 110 mph, glide ratio 31:1, range 690 miles at high-speed cruise, max endurance seven hr.

**COMMENTARY**  
 The TG-14A is a version of the Ximango AMT-200S Sport Grupo Aeromot selected for use at USAFA in IFTP, replacing the Enhanced Flight Screening Program performed by civilian flying schools since the grounding of the T-3A Firefly in 1997. Cockpit and avionics are arranged for military use. Students use it to practice multiple pattern, aerial maneuvers, and landing procedures, reducing by half the number of sorties needed to achieve a solo flight.

**TG-15A**  
**Brief:** A two-seat high-performance advanced training/cross-country sailplane for use by USAFA cadets in support of glider competition events nationwide.  
**Function:** Trainer/cross-country competition sailplane.  
**Operator:** AETC.  
**Unit Location:** USAFA, Colo.  
**Inventory:** two.  
**Contractor:** Schempp-Hirth, Germany.  
**Accommodation:** two-seat.  
**Dimensions:** span 65.6 ft, length 28.3 ft.  
**Weight:** gross 1,543 lb.  
**Performance:** max permitted speed 155 mph, aspect ratio 24:4.

**COMMENTARY**  
 The TG-15A is a high-performance advanced training/cross-country sailplane manufactured by Schempp-Hirth of Germany under the civilian designation Duo Discus. This world-class competition glider is dual seated and is intended for use nationwide by USAFA cadets for glider competition events.

**TG-15B**  
**Brief:** A single-seat high-performance advanced training/cross-country sailplane for use by USAFA cadets for glider competition events nationwide.

**HH-60G Pave Hawk** (TSgt. Parker Gyokeres)

**Function:** Trainer/cross-country competition sailplane.  
**Operator:** AETC.  
**Unit Location:** USAFA, Colo.  
**Inventory:** three.  
**Contractor:** Schempp-Hirth Germany.  
**Accommodation:** single seat.  
**Dimensions:** span 49.2 ft, length 32.3 ft.  
**Weight:** gross 1,157 lb.  
**Performance:** max permitted speed 155 mph, aspect ratio 22:2.

**COMMENTARY**  
 The TG-15B is a high-performance advanced training/cross-country sailplane manufactured by Schempp-Hirth of Germany under the civilian designation Discus 2b. This world-class competition glider is single seated and is intended for use nationwide by USAFA cadets for glider competition events.

**UV-18 Twin Otter**  
**Brief:** Modified utility transport used for parachute jump training.  
**Function:** Paratroop.  
**Operator:** AETC.  
**First Flight:** May 1965 (commercial version).  
**Delivered:** 1977.  
**IOC:** 1977.  
**Production:** three.  
**Inventory:** three.  
**Unit Location:** USAFA, Colo.  
**Contractor:** de Havilland Aircraft of Canada.  
**Power Plant:** two Pratt & Whitney Canada PT6A-27 turboprops, each 620 ehp.  
**Accommodation:** crew of two and up to 20 passengers.  
**Dimensions:** span 65 ft, length 51.8 ft, height 19.5 ft.  
**Weight:** gross 12,500 lb.

**Ceiling:** 26,700 ft.  
**Performance:** max cruising speed 210 mph, range with 2,500 lb payload 806 miles.  
**COMMENTARY**  
 The UV-18B is a military version of the DHC-6 Twin Otter STOL utility transport used for parachute jump training at USAFA.

## Helicopters

**HH-60G Pave Hawk**  
**Brief:** Specially modified helicopters used primarily for combat search and rescue; also aeromedical evacuation, civil SAR, and other support missions.  
**Function:** CSAR medium-lift helicopter.  
**Operator:** ACC, AETC, AFMC, PACAF, USAF, ANG, AFRC.

**First Flight:** October 1974.  
**Delivered:** from 1982.  
**IOC:** circa 1982.  
**Production:** 105.  
**Inventory:** 101.  
**Unit Location:** Davis-Monthan AFB, Ariz., Kadena AB, Japan, Kirtland AFB, N.M., Moody AFB, Ga., Nellis AFB, Nev., RAF Lakenheath, UK, ANG: Francis S. Gabreski Arpt., N.Y., Kulis ANGB, Alaska, Moffett Field, Calif. AFRC: Davis-Monthan AFB, Ariz., Patrick AFB, Fla.  
**Contractor:** Sikorsky.  
**Power Plant:** two General Electric T700-GE-700/701C turboshafts, each 1,560-1,940 shp.  
**Accommodation:** crew of six; 6-12 troops, two litters, or internal or external cargo.

**MH-53 Pave Low** (SrA. Julianne M. Showalter)

**Dimensions:** rotor diameter 53.6 ft, length of fuselage 64.7 ft, height 16.7 ft.

**Weight:** max gross 22,000 lb.

**Ceiling:** 14,200 ft.

**Performance:** max speed 173 mph, max range 373 miles (internal fuel), 500 miles (auxiliary tank).

**Armament:** two 7.62 mm miniguns, with provision for two .50-caliber machine guns in cabin doors.

#### COMMENTARY

Black Hawk helicopters were modified to HH-60G Pave Hawk configuration in the early 1980s. Since that time, they have been in continuous use by active duty, ANG, and AFRC air rescue units for CSAR, humanitarian, and medevac mission activities worldwide. The Pave Hawk is a highly modified version of the Army Black Hawk helicopter, featuring an upgraded communications/navigation suite that includes INS/GPS/Doppler navigation systems, satellite communications (SATCOM), secure/anti-jam communications, and a PLS that provides range/steering data to compatible survivor radios.

Additional modifications include an automatic flight-control system, NVG lighting, FLIR, color weather radar, engine/rotor blade anti-ice system, retractable in-flight refueling probe, internal auxiliary fuel tanks, and an integral rescue hoist. Combat enhancements include RWR, IR jammer, flare and chaff countermeasures dispensing system, and two 7.62 mm or .50-caliber machine guns.

#### MH-53 Pave Low

**Brief:** Specially outfitted heavy-lift helicopters used by Air Force special operations forces for infiltration/exfiltration as well as CSAR missions.

**Function:** SOF heavy-lift helicopter.

**Operator:** AFSOC.

**First Flight:** March 1967.

**Delivered:** from July 1987 (MH-53J).

**IOC:** 1988 (MH-53J).

**Production:** not available.

**Inventory:** two (J); 20 (M).

**Unit Location:** Hurlburt Field, Fla.

**Contractor:** Sikorsky; Texas Instruments.

**Power Plant:** two General Electric T64-GE-100 turbo-shafts, each 4,330 shp.

**Accommodation:** crew of six; up to 38 troops.

**Dimensions:** rotor diameter 72.2 ft, length of fuselage (without refueling probe) 67.2 ft, height 25 ft.

**Weight:** gross 50,000 lb.

**Ceiling:** 16,000 ft.

**Performance:** speed 164 mph, max range 630 miles, unlimited with air refueling.

**Armament:** mounts for any combination of three 7.62 miniguns and .50-caliber machine guns.

#### COMMENTARY

**MH-53H.** Older version of the helicopter, all of which, together with all HH/CH-53B/Cs, were upgraded to MH-53J Pave Low III "Enhanced" standard from 1986.

**MH-53J.** A long-range deep penetration helicopter, adverse weather capable and equipped for extended operations when air refueled. Equipped with a nose-mounted FLIR, an integrated digital avionics suite that includes TF/TA radar, Kalman filtered navigation suite (GPS, INS, Doppler), projected map display, secure UHF, VHF, FM, HF communications, PLS, SATCOM, hover coupler, rescue hoist, mission commander's C2 panel, armor plating, and an ECM suite with radar and IR missile jammers, flare/chaff dispensers, RWR, and missile launch detectors.

A service life extension program (SLEP) upgraded the aircraft's hydraulics, wiring, and basic airframe structure for increased gross weight, and an automated blade/pylon fold system optimized for shipboard compatibility. All aircraft modified to support aircrew eye/respiratory protection system.

**MH-53M.** MH-53J helicopters upgraded to Pave Low IV standard, delivered from 1999. Upgrades include the interactive defensive avionics suite/multimission advanced tactical terminal capability which integrates onboard EW systems with off-board, over-the-horizon, near-real-time intelligence, and mission software improvements. Cockpit modifications include three MFDs, integrated digital map, and mission commander situation awareness panel in the cabin area.

The remaining aircraft in the inventory are scheduled for retirement by the end of September 2008.

#### UH-1

**Brief:** Modified Bell helicopter used to support Air Force ICBM facilities, undergraduate pilot training, aviation advisory aircrew flight proficiency, and administrative airlift.

**Function:** Utility and training helicopter.

**Operator:** AETC, AFMC, AFSOC, AFSPC, AMC, PACAF.

**First Flight:** 1956.

**Delivered:** from September 1970.

**IOC:** circa 1970.

**Production:** 79 (USAF).

**Inventory:** 27 (H); 62 (N).

**Unit Location:** Andrews AFB, Md., Fairchild AFB, Wash., F.E. Warren AFB, Wyo., Ft. Rucker, Ala., Hurlburt Field, Fla., Kirtland AFB, N.M., Malmstrom AFB, Mont., Minot AFB, N.D., Robins AFB, Ga., Yokota AB, Japan.

**Contractor:** Bell.

**Power Plant:** UH-1H: one Lycoming T53-L-13B turbo-shaft, 1,400 shp. UH-1N: Pratt & Whitney Canada T400-CP-400 Turbo "Twin-Pac," 1,290 shp.

**Accommodation:** two pilots and 14 passengers or cargo, or external load of 4,000 lb.

**Dimensions:** UH-1H: rotor diameter 48.3 ft, fuselage length 57.1 ft, height 13 ft. UH-1N: rotor diameter (with tracking tips) 48.1 ft, fuselage length 42.3 ft, height 14.3 ft.

**Weight:** UH-1H: gross 9,500 lb. UH-1N: gross 11,200 lb.

**Ceiling:** UH-1H: 15,000 ft. UH-1N: 13,000 ft.

**Performance:** max cruising speed at S/L 115 mph, max range, no reserves, 261 miles.

**Armament:** (optional) two General Electric 7.62 mm miniguns or two 40 mm grenade launchers; two seven-tube 2.75-in rocket launchers.

#### COMMENTARY

**UH-1H** is a former Army-owned training helicopter transferred to USAF in 2004 for use by the 23rd Flying Training Squadron at Ft. Rucker, Ala., for Air Force undergraduate helicopter pilot training. It is a single-engine version of the UH-1 utility helicopter (Bell Model 205) equipped with a rescue hoist. Two UH-1H helicopters are maintained by AFSOC for aviation advisory aircrew flight proficiency.

**UH-1N** is a twin-engine version of the UH-1 utility helicopter (Bell Model 212), most of which are allocated for AFSPC missile security and for administrative/DV airlift. The UH-1N is also used by AETC's 58th SOW, Kirtland AFB, N.M., for training purposes and by the 336th TRG, Fairchild AFB, Wash., for aircrew survival training. Two UH-1N helicopters are maintained by AFSOC for aviation advisory aircrew flight proficiency.

**TH-1H** is the modified version of the UH-1H slated to be the Air Force's newest undergraduate helicopter pilot trainer. The TH-1H is a "zero-time" aircraft that includes upgraded power train components and a "glass" cockpit. Student training is scheduled to begin in October 2008.

## Strategic Missiles

#### AGM-86 Air Launched Cruise Missile

**Brief:** A small, subsonic, winged air vehicle, deployed on B-52H aircraft, which can be equipped with either a nuclear or conventional warhead and can be used to help destroy/defeat air defenses and complicate an enemy's air defense task.

**Function:** Strategic air-to-surface cruise missile.

**Operator:** ACC.

**First Flight:** June 1979 (full-scale development).

**Delivered:** from 1981.

**IOC:** December 1982, Griffiss AFB, N.Y.

**Production:** 1,700+.

**Unit Location:** Barksdale AFB, La., Minot AFB, N.D.

**Contractor:** Boeing.

**Power Plant:** Williams/Teledyne CAE F107-WR-10 turbofan, 600 lb thrust.

**Guidance:** AGM-86B: inertial plus Terrain Contour Matching (TERCOM); AGM-86C: inertial plus GPS.

**Warhead:** AGM-86B: W80-1 nuclear; AGM-86C: blast/fragmentation conventional; AGM-86D: hard target penetrating warhead.

**Dimensions:** length 20.8 ft, body diameter 2 ft, wingspan 12 ft.

**Weight:** 3,150 lb (B), 3,277 lb (C).

**Performance (approx):** speed 550 mph (Mach 0.6), range 1,500+ miles (AGM-86B).

#### COMMENTARY

**AGM-86A.** A prototype cruise missile, developed in the mid-1970s. Slightly smaller than the later versions, it never entered production.

**AGM-86B.** First production version, the B is programmed for strategic attack on surface targets. Small radar signature and low-level flight capability enhance the missile's effectiveness. The last of 1,715 production models was delivered in October 1986. A SLEP has been ongoing to extend service life to 2030; however, USAF now plans to retire all but 528.

**AGM-86C.** A conventional warhead version, developed from June 1986, the Conventional Air Launched Cruise Missile (CALCM) was first used operationally during Gulf War I and has since been used widely in combat operations. CALCM provides an adverse weather, day/night, air-to-surface, accurate, standoff outside theater defenses strike capability, with a range greater than 500 miles and a 3,000-lb class warhead. CALCM has proved equally effective for stand-alone, clandestine/punitive strikes and fully integrated theater warfare. From 1986, Boeing

converted 622 Bs to the conventional configuration, the first of which was delivered in December 1987. The remaining CALCMs feature Block 1A enhancements with improved accuracy and increased immunity to electronic jamming. Since Iraqi Freedom, few CALCMs remain.

**AGM-86D.** CALCM penetrator version with a Lockheed Martin AJP-3(M) warhead. The CALCM penetrator provides a standoff outside theater defenses capability against a wide range of hardened, deeply buried targets. The CALCM penetrator was used with success in Iraqi Freedom.

#### AGM-129 Advanced Cruise Missile

**Brief:** A stealthy, long-range, winged air vehicle equipped with a nuclear warhead and designed to evade enemy air and ground-based defenses in order to strike hard, heavily defended targets at standoff distances.

**Function:** Strategic air-to-surface cruise missile.

**Operator:** ACC.

**First Flight:** July 1985.

**Delivered:** June 1990-August 1993.

**IOC:** circa 1991.

**Production:** 461.

**Unit Location:** Barksdale AFB, La., Minot AFB, N.D.

**Contractor:** General Dynamics (now Raytheon); McDonnell Douglas (now Boeing).

**Power Plant:** Williams International F112-WR-100 turbofan.

**Guidance:** inertial, with TERCOM update.

**Warhead:** W80-1 nuclear.

**Dimensions:** length 20.8 ft, body width 2.2 ft, wingspan 10.2 ft.

**Weight:** 3,700 lb.

**Performance (approx):** range 2,300+ miles, speed 550 mph.

#### COMMENTARY

**AGM-129A.** Embodying stealth technology, the AGM-129A is an air-launched strategic cruise missile, carried externally on B-52H aircraft, with significant improvements over the AGM-86B in range, accuracy, and survivability. Despite modification to extend its service life to 2030, USAF now plans to retire its entire ACM inventory.

#### LGM-30 Minuteman

**Brief:** A solid-fuel ICBM capable of being fired from silo launchers and delivering a thermonuclear payload of one to three warheads with high accuracy over great distances.

**Function:** Strategic surface-to-surface ballistic missile.

**Operator:** AFSPC.

**First Flight:** February 1961.

**Delivered:** 1962-December 1978.

**IOC:** December 1962, Malmstrom AFB, Mont.

**Production:** 1,800.

LGM-30 Minuteman III  
(USAF photo)

**AGM-88 HARM** (DOD photo)

**Unit Location:** F.E. Warren AFB, Wyo., Malmstrom AFB, Mont., Minot AFB, N.D.

**Contractor:** Boeing.

**Power Plant:** stage 1: Thiokol M-55 solid-propellant motor, 210,000 lb thrust; stage 2: Aerojet General SR19-AJ-1 solid-propellant motor, 60,300 lb thrust; stage 3: Thiokol SR73-AJ-1 solid-propellant motor, 34,400 lb thrust.

**Guidance:** inertial guidance system.

**Warheads:** one-three Mk 12/12A MIRVs (downloaded to one).

**Dimensions:** length 59.8 ft, diameter of first stage 5.5 ft.

**Weight:** launch weight (approx) 78,000 lb.

**Performance:** speed at burnout more than 15,000 mph, highest point of trajectory approx 700 miles, range with max operational load more than 6,000 miles.

**COMMENTARY**

A key element in the US strategic deterrent posture, Minuteman is a three-stage, solid-propellant ICBM, housed in an underground silo.

**LGM-30A/B.** Minuteman I version deployed in the early 1950s. The last Minuteman I missile was removed from its silo at Malmstrom AFB, Mont., in February 1969. USAF had deployed 150 A and 650 B models in 16 squadrons.

**LGM-30F.** Minuteman II version incorporated a larger second stage, an improved guidance package, greater range and payload capability, and hardening against the effects of nuclear blast. IOC was reached in October 1965 at Grand Forks AFB, N.D. USAF deployed 450 in nine squadrons.

**LGM-30G.** The Minuteman III became operational in June 1970, providing improved range, rapid retargeting, and the capability to place three MIRVs on three targets with a high degree of accuracy. USAF initially deployed 550 in 11 squadrons, later reducing to 500 based at F.E. Warren, Malmstrom, and Minot. Deactivation of a further 50 Minuteman IIIs began in June 2007 at Malmstrom. Components of the dismantled missiles are to be used for flight-test operations programs.

In accordance with strategic arms control negotiations, all the three-warhead Minuteman III missiles at F.E. Warren have been downloaded to single re-entry vehicles.

An extensive life extension program is ensuring Minuteman III's viability to 2020. Major upgrades include refurbishment of liquid propulsion post-boost rocket engine, remanufacture of the solid-propellant rocket motors, replacement of the environmental control system, repair of launch facilities, installation of updated, survivable communications equipment, and a C2 sustainment program. Further proposed incremental upgrades from 2020 are intended to maintain the ICBMs' viability to 2040 and beyond.

## Tactical Missiles and Weapons

**AGM-65 Maverick**

**Brief:** A tactical, TV- or imaging infrared (IIR)-guided air-to-surface missile carried by fighters and designed for use in CAS, interdiction, and defense suppression missions, having standoff capability and high probability of strike against a wide range of targets.

**Function:** Air-to-surface guided missile.

**First Flight:** August 1969.

**Delivered:** from August 1972

**IOC:** February 1973.

**Production:** sustainment phase.

**Contractor:** Raytheon.

**Power Plant:** Thiokol TX-481 solid-propellant rocket motor.

**Guidance:** self-homing, EO guidance system (IIR on D and G models).

**Warhead:** AGM-65A/B/D/H 125-lb high-explosive, shaped charge; AGM-65G/K 298-lb blast fragmentation.

**Dimensions:** length 8.2 ft, body diameter 1 ft, wingspan 2.3 ft.

**Weight:** launch weight (AGM-65A) 462 lb, (AGM-65G) 670 lb.

**Performance:** range about 9.2 miles.

**COMMENTARY**

Maverick missiles have a long and distinguished combat record. They were first employed by USAF in Vietnam and were used extensively during Gulf War I and II. The weapon is integrated with A-10, F-15E, and F-16 aircraft for use against tanks and columns of vehicles and in the SEAD role.

**AGM-65A.** The basic Maverick is a launch-and-leave, TV-guided air-to-surface missile that enables the pilot of the launch aircraft to seek other targets or leave the target area once the missile has been launched. Production was initiated in 1971, following successful test launches over distances ranging from a few thousand feet to many miles and from high altitudes to treetop level.

**AGM-65B.** A version with a "scene magnification" TV seeker that enables the pilot to identify and lock on to smaller or more distant targets.

**AGM-65D.** System developed to overcome limitations of the TV Maverick, which can be used only in daylight and clear-weather conditions. This version has an IIR seeker as well as a lower-smoke motor. IIR Maverick became operational in February 1986 on A-10 aircraft.

**AGM-65E.** A laser guided version ordered by USN and USMC. To meet short-term operational requirements, USAF has used missiles from the Navy's inventory in combat operations, beginning June 2007. A new production state-of-the-art version of the laser guided Maverick for the Navy and Air Force is anticipated for 2009.

**AGM-65G.** Uses the IIR seeker with an alternate 298-lb blast fragmentation warhead for use against hardened targets. Software is modified to include options for targeting ships and large land targets as well as mobile armor. This version also has a digital autopilot and a pneumatic, rather than hydraulic, actuation system. USAF received its first G model in 1989.

**AGM-65H.** AGM-65B modified with an upgraded TV seeker providing significant reliability, maintainability, and performance improvements over the AGM-65B seeker and double the standoff range.

**AGM-65K.** AGM-65G modified with the same upgraded TV seeker as in the AGM-65H to provide a TV-guided version of the Maverick with the 298-lb blast fragmentation warhead.

**AGM-88 HARM**

**Brief:** An air-to-surface tactical missile designed to seek and destroy enemy radar-equipped air defense sites, using an advanced guidance system that senses and homes in on enemy radar emissions.

**Function:** Air-to-surface anti-radiation missile.

**First Flight:** April 1979.

**Delivered:** 1982-98.

**IOC:** circa 1984.

**Production:** sustainment phase.

**Contractor:** Raytheon.

**Power Plant:** Thiokol smokeless, dual-thrust, solid-propellant rocket motor.

**Guidance:** passive homing guidance system, using seeker head that homes on enemy radar emissions.

**Warhead:** high-explosive fragmentation, weighing 145 lb.

**Dimensions:** length 13.7 ft, body diameter 10 in, wingspan 3.7 ft.

**Weight:** 795 lb.

**Performance:** cruising speed supersonic, altitude limits S/L to 40,000 ft, range more than 10 miles.

**COMMENTARY**

The High-speed Anti-Radiation Missile (HARM) exhibits great velocity along with an ability to cover a wide range of frequency spectrums through the use of programmable digital processors in both the carrier aircraft's avionics equipment and in the missile. The combination gives this second generation anti-radiation missile (ARM) greatly improved capability over first generation Shrikes and Standard ARMs. The AGM-88 proved highly effective against enemy ground radar in Gulf War I and in subsequent operations. HARMs equip F-16 Block 50/52s (F-16CJ) dedicated to the SEAD mission.

**AGM-88A.** A factory-programmed version used to equip the now-retired F-4G Wild Weasel to increase its lethality in electronic combat. No longer operational.

**AGM-88B.** Incorporated erasable electronically programmable read-only memory, permitting changes to missile memory in the field. Older versions of the AGM-88B have software upgrades to satisfy current-standard capability requirements.

**AGM-88C.** This current production version has a more lethal warhead, containing tungsten alloy cubes, rather than steel, and the enhanced-capability AGM-88C-1 guidance head.

Upgrade initiatives are aimed at increasing capability of both B and C versions against target shutdown, blanking, and blinking and at reducing potential damage to friendly radars in the target area. Further upgrades being evaluated include GPS precision navigation capability through a modification of the control section known as the HARM Destruction of Enemy Air Defenses (DEAD) Attack Module, or HDAM.

**AGM-154 Joint Standoff Weapon**

**Brief:** Joint USAF and Navy family of low-cost, glide weapons with a standoff capability.

**Function:** Air-to-surface guided missile.

**First Flight:** December 1994.

**Delivered:** from 2000.

**IOC:** 2000 (USAF).

**Production:** 6,114 (originally planned).

**Contractor:** Raytheon.

**Guidance:** INS/GPS.

**Dimensions:** length 13.3 ft.

**Weight:** 1,065-1,500 lb.

**Performance:** range low-altitude launch 17 miles, high-altitude launch 40+ miles.

**COMMENTARY**

A medium-range, INS/GPS-guided, standoff air-to-ground weapon designed to attack a variety of soft and armored area targets (fixed, relocatable, and mobile) during day/night/adverse weather conditions. JSOW enhances aircraft survivability by providing the capability for launch aircraft to stand off outside the range of enemy point defenses. JSOW accuracy and launch-and-leave capability allows several target kills per aircraft sortie. JSOW arms B-2 and F-16 aircraft. Production for USAF terminated FY05.

**AGM-154A.** The baseline BLU-97 variant for use against area targets.

**AGM-154B.** The BLU-108 variant provides anti-armor capability; development complete, production deferred.

**AGM-154C.** The third variant (used by Navy only), JSOW/Unitary integrates an IIR terminal seeker and a 500-lb inert warhead.

**AGM-158A Joint Air-to-Surface Standoff Missile**

**Brief:** An advanced weapon designed to attack heavily defended targets with high precision at great standoff range.

**Function:** Air-to-surface guided weapon.

**First Flight:** April 8, 1999.

**Delivered:** through FY19 (planned).

**IOC:** September 2003. JASSM-ER projected 2010.

**Production:** 2,400, plus 2,500 JASSM-ER (planned).

**Contractor:** Lockheed Martin; Raytheon; Honeywell.

**Guidance:** INS, GPS, and IIR terminal seeker.

**Power Plant:** Teledyne Continental Motors.

**Dimensions:** length 14 ft.

**Weight:** 2,250 lb.

**Performance:** 1,000-lb class penetrator and blast-

fragmentation warheads; standoff range greater than 200 miles.

#### COMMENTARY

JASSM is a next generation missile that enables Air Force fighters and bombers to destroy the enemy's war-sustaining capabilities from outside the ranges of enemy air defenses. This autonomous precision strike weapon has a range greater than 200 miles and can attack both fixed and relocatable targets, ranging from nonhardened above ground to moderately hardened buried targets. JASSM is equipped with INS/GPS guidance, an IIR terminal seeker, and a stealthy LO airframe. The system also offers low operational support costs. IOC has been declared on the B-1B, B-2, B52H, and F-16. Integration on F-15E aircraft is in progress. The B-1B is the only aircraft capable of redirecting a JASSM route prior to launch. An extended-range version (JASSM-ER), with a range of more than 500 miles, entered development in FY04; flight testing began in 2005. USAF expected in late spring 2008 to make a decision regarding the future of the JASSM, following a series of earlier test failures.

#### AIM-7 Sparrow

**Brief:** A supersonic, medium-range, semiactive radar-guided air-to-air missile with all-weather, all-altitude, and all-aspect offensive capability and a high-explosive warhead, carried by fighter aircraft.

**Function:** Air-to-air guided missile.

**First Flight:** December 1983 (AIM-7M).

**Delivered:** from 1956.

**IOC:** April 1976 (AIM-7F).

**Production:** sustainment phase.

**Contractor:** Hughes; General Dynamics (now Raytheon).

**Power Plant:** Hercules Mk 58 Mod 0 4.5 sec boost-11 sec sustain rocket motor.

**Guidance:** AIM-7M: monopulse semiactive radar.

**Warhead:** high-explosive, blast fragmentation, weighing 86 lb.

**Dimensions:** length 12 ft, body diameter 8 in, wingspan 3.3 ft.

**Weight:** launch weight 504 lb.

**Performance (estimated):** max speed more than 2,660 mph (Mach 3.5), range more than 34 miles.

#### COMMENTARY

**Early versions.** Production of Sparrow has been under way for nearly half a century. Approximately 34,000 early models (AIM-7A/B/C/D/E) were produced. Compared to the earlier versions, the advanced solid-state AIM-7F, introduced into USAF service in 1976, had a larger motor, Doppler guidance, improved ECM, and better capability over both medium and "dogfight" ranges. USAF produced approximately 5,000, but none are now in USAF service.

**AIM-7M.** A joint Navy-USAf project aimed at producing a monopulse version of Sparrow at reduced cost and with improved performance in the ECM and look-down clutter regions. It began operational service in FY83. This version provides all-weather, all-altitude, all-aspect capability and equips USAF F-15s and F-16s (ADF) and Navy F-18s.

**AIM-7P.** Block 1 retrofit to AIM-7M guidance and control sections (GCSs), providing low-altitude guidance and fuzing capability. Block 2 provides new-build for AIM-7P GCSs.

#### AIM-9 Sidewinder

**Brief:** A supersonic, short-range, IR-guided air-to-air missile carried by fighter aircraft, having a high-explosive warhead.

**Function:** Air-to-air missile.

**First Flight:** September 1953.

**Delivered:** 1957-present. First production AIM-9X delivered May 1, 2002.

**IOC:** circa 1983 (AIM-9M).

**Production:** sustainment phase (AIM-9M); LRIP from November 2000, with full rate from November 2004 (AIM-9X).

**Contractor:** Raytheon; Loral.

**Power Plant:** Thiokol Mk 36 Mod 11 solid-propellant rocket motor.

**Guidance:** solid-state IR homing guidance.

**Warhead:** high-explosive, weighing 20.8 lb.

**Dimensions:** length 9.4 ft, body diameter 5 in, wingspan 2.1 ft.

**Weight:** launch weight 190 lb.

**Performance:** max speed Mach 2+, range 10+ miles.

#### COMMENTARY

**Early versions.** AIM-9A was the prototype version. The AIM-9B, initial production version, entered the inventory in 1957 and was effective only at close range during day. These shortcomings were eliminated on subsequent AIM-9E/H/J/P versions. The third generation Sidewinder, AIM-9L, added a more powerful solid-propellant rocket motor as well as tracking maneuvering ability. Production and delivery began in 1976; production ended in 1981.

**AIM-9M.** A joint Navy-USAf project aimed at producing

AIM-9 Sidewinder (TSgt. Jeffrey Allen)

an improved version of AIM-9L with all-altitude, all-aspect, launch-and-leave intercept capability. Can equip: A-10, F-15, F-16, F-16 ADF, and F-18 aircraft. This version has increased infrared counter-countermeasures (IRCCM) capability, improved background discrimination, and a reduced-smoke rocket motor. First flight of prototype was in February 1978. Full production began in FY81.

**AIM-9M-9.** A modification to improve IRCCM capability of early missiles. Complete.

**AIM-9X.** Deriving from a jointly funded Navy-USAf project, the AIM-9X entered LRIP in November 2000. In November 2003, USAF's F-15-equipped 12th and 19th FS, part of the 3rd Wing at Elmendorf AFB, Alaska, were the first operational units to receive AIM-9Xs. Full-rate production was contracted in November 2004. USAF plans to buy 5,097 missiles.

The AIM-9X incorporates advanced technologies such as a focal plane array imaging seeker, high off-boresight sensor (HOBS), and a highly maneuverable jet-vane control system. The missile utilizes the existing AIM-9M rocket motor, warhead, and fuze. Carrier aircraft include the F-15, F-16, F-22, F-35, and F/A-18.

#### AIM-120 AMRAAM

**Brief:** A next generation supersonic, medium-range, active radar-guided air-to-air missile with a high-explosive warhead.

**Function:** Air-to-air guided missile.

**First Flight:** December 1984.

**Delivered:** 1988-July 2010 (planned).

**IOC:** September 1991.

**Production:** 10,917+ planned for USAF/USN.

**Contractor:** Raytheon.

**Power Plant:** Alliant boost-sustain solid-propellant rocket motor.

**Guidance:** inertial/command, inertial with active radar terminal homing.

**Warhead:** high-explosive directed fragmentation weighing 48 lb.

**Dimensions:** (A/B models) length 12 ft, body diameter 7 in, span of tail control fins 2.1 ft.

**Weight:** 335 lb.

**Performance:** cruising speed approx Mach 4, range more than 23 miles.

#### COMMENTARY

A joint project between the Navy and USAf, the AIM-120 Advanced Medium-Range Air-to-Air Missile (AMRAAM) is a replacement for the AIM-7 Sparrow. The AIM-120 equips F-15, F-16, F-22, F-35, and F/A-18 fighters. Inertial and command inertial guidance and active radar terminal homing provide launch-and-maneuver capability. Significant improvements in operational effectiveness over the AIM-7 include increased average velocity, reduced miss distance, improved fuzing, increased warhead lethality, multiple target engagement capability, improved clutter rejection in low-altitude environments, enhanced electronic protection capability, increased maximum launch range, a reduced-smoke motor, and improved maintenance and handling.

**AIM-120A** was the first production version, delivered by Hughes in 1988 to the 33rd TFW at Eglin AFB, Fla.

**AIM-120B/C/D** are upgraded, reprogrammable variants of the AIM-120. The AIM-120C currently in production has smaller, clipped control surfaces to provide for internal carriage in the F-22A and F-35, and involves HOBS launch capability. The latest development effort (AMRAAM Phase 4) adds GPS to improve navigational accuracy and enhanced data link capabilities in the AIM-120D version. Production began 2006.

#### CBU-87/103 Combined Effects Munition

**Brief:** The CBU-87 CEM is an area munition effective

against light armor, materiel, and personnel and used by USAF and Navy fighters and bombers for interdiction.

**Function:** Area munition.

**Production:** sustainment phase.

**Contractor:** Aerojet General; Honeywell; Alliant Tech.

**Guidance:** none (CBU-87).

**Dimensions:** length 7.7 ft; diameter 1.3 ft.

**Weight:** 949 lb.

**Performance:** dispenses 202 BLU-97 combined effects bomblets over an area roughly 800 ft by 400 ft.

#### COMMENTARY

The CBU-87 Combined Effects Munition dispenses BLU-97 shaped charge anti-personnel/anti-materiel fragmentary/incendiary bomblets over the target in a rectangular pattern. It is currently delivered by USAF and Navy aircraft as an unguided gravity weapon. Density and size of the area covered depends on release parameters and spin rates.

**CBU-103.** Unguided CBU-87 CEMs retrofitted with the Wind-Corrected Munitions Dispenser (WCMD) tail kit. The WCMD improves the munitions delivery accuracy when released from medium to high altitude.

#### CBU-89/104 Gator

**Brief:** The CBU-89 Gator is an anti-armor/anti-personnel mine dispenser used by USAF and Navy fighters and bombers for interdiction.

**Function:** Scatterable mines.

**Production:** sustainment phase.

**Contractor:** Honeywell; Aerojet General; Olan; Alliant Tech.

**Guidance:** none (CBU-89).

**Dimensions:** length 7.7 ft; diameter 1.3 ft.

**Weight:** 705 lb.

**Performance:** dispenses 72 BLU-91 anti-armor and 22 BLU-92 anti-personnel mines.

#### COMMENTARY

The CBU-89 Gator dispenser holds 94 mines, of which 72 are anti-tank and 22 are anti-personnel. The mines are dispersed over the target in a circular pattern. The anti-tank mines, which can be fuzed for three different time delay settings, have a magnetic influence fuze to sense armor.

**CBU-104.** Gators retrofitted with the WCMD tail kit, improving the munitions delivery accuracy when released from medium to high altitude.

#### CBU-97/105 Sensor Fuzed Weapon

**Brief:** The CBU-97 SFW is an anti-armor munition used by fighters and bombers for multiple kills per pass against moving and stationary land combat vehicles.

**Function:** Wide-area munition.

**First Flight:** circa 1990.

**Delivered:** 1994-2013 (planned).

**IOC:** 1997.

**Production:** 6,500 (planned).

**Contractor:** Textron Systems.

**Guidance:** IR sensors in each warhead search for targets, then detonate over them.

**Dimensions:** length 7.7 ft; diameter 1.3 ft.

**Weight:** 920 lb.

**Performance:** delivers 40 lethal projectiles over an area of about 500 ft by 1,200 ft.

#### COMMENTARY

The CBU-97 Sensor Fuzed Weapon (SFW) comprises an SUU-66/B tactical munitions dispenser with an FZU-39 fuze and a payload of 10 BLU-108 submunitions. Each tactical munitions dispenser contains 10 BLU-108 submunitions, and each submunition contains four "skeet" projectiles that, upon being thrown out, seek out their target and deliver an explosively formed penetrator. Each SFW can

deliver a total of 40 lethal projectiles. The skeet's active laser and passive IR sensors can detect a vehicle's shape and IR signature; if no target is detected, the warhead detonates after a preset time. The SFW's primary targets are massed tanks, armored personnel carriers, and self-propelled targets. It also provides direct attack capability and interdiction against C2 centers.

The CBU-97 SFW is delivered as an unguided gravity weapon from the A-10, B-1, B-2, B-52H, F-15E, and F-16. The initial baseline SFW systems contained the BLU-108/B and BLU-108A/B submunition. A preplanned product improvement SFW submunition, the BLU-108B/B, entered production in 2001, incorporating improvements such as an active laser sensor, multimission warhead, and increased footprint.

**CBU-105.** Designation of an unguided CBU-97 equipped with a Wind-Corrected Munitions Dispenser (WCMD) tail kit. The CBU-105 can be delivered accurately from high altitude and in adverse weather from the B-1, B-52H, F-15E, and F-16. Combat debut for the CBU-105 occurred April 2003, during Iraqi Freedom, from a B-52H.

#### **CBU-107 Passive Attack Weapon**

**Brief:** The CBU-107 Passive Attack Weapon (PAW) provides the capability to attack nonhardened surface targets, with a minimum of collateral and environmental damage.

**Function:** Wide-area munition.

**First Flight:** 2002.

**Delivered:** 2002-03.

**IOC:** December 2002.

**Production:** not available, but completed March 2003.

**Contractor:** General Dynamics (kinetic energy penetrator payload and cannister); Lockheed Martin (WCMD); Textron (tactical munition dispenser kit).

**Guidance:** via WCMD.

**Dimensions:** length 7.7 ft; diameter 1.3 ft.

**Weight:** 1,000 lb.

**Performance:** delivers a high-speed volley of 3,000+ metal "arrows" projected from a single canister; three types of projectiles: 350 x 15 in-long rods, 1,000 x 7 in-long rods, and 2,400 small-nail size.

#### **COMMENTARY**

The CBU-107 Passive Attack Weapon (PAW) was developed from September 2002 to provide USAF aircraft with a new weapon that destroys targets with kinetic energy rods rather than explosives, thereby minimizing collateral and environmental damage. Following release from an aircraft, the WCMD-equipped weapon glides toward its target. Before impact, the inner chamber containing the rods begins to rotate and the "arrows" are ejected in rapid succession by centrifugal force, penetrating a target within a 200-ft radius. Two CBU-107s were used during Iraqi Freedom. CBU-107s are intended for use on B-52, F-15E, and F-16 aircraft.

#### **GBU-10 Paveway II**

**Brief:** An unpowered laser guided bomb (LGB) used to destroy high-value enemy targets from short standoff distances.

**Function:** Air-to-surface guided munition.

**First Flight:** early 1970s.

**Delivered:** from 1976.

**IOC:** 1976.

**Production:** 10,000; continuing.

**Contractor:** Lockheed Martin; Raytheon.

**Guidance:** semiactive laser.

**Warhead:** GBU-10C/D/E/F: Mk 84 bomb (2,000-lb unitary); GBU-10G/H/J: BLU-109.

**Dimensions:** length GBU-10C/D/E/F: 14.1 ft; GBU-10G/H/J: 14 ft, body diameter GBU-10C/D/E/F: 1.5 ft; GBU-10G/H/J: 1.2 ft, wingspan 5.5 ft.

**Weight:** 1,985 lb.

**Performance:** circular error probable (CEP) 29.7 ft; range 9.2 miles.

#### **COMMENTARY**

Folding-wing Paveway II weapons are improved versions of the earlier fixed-wing Paveway I. The GBU-10 is used primarily for precision bombing against nonhardened targets but is capable of greater penetration than previous versions. It can operate in cloud ceilings down to 2,500 ft. GBU-10 platforms include A-10, B-52, F-15E, F-16, and F-117 aircraft.

#### **GBU-12 Paveway II**

**Brief:** An unpowered LGB used to destroy high-value enemy targets from short standoff distances.

**Function:** Air-to-surface guided munition.

**First Flight:** early 1970s.

**IOC:** 1976.

**Production:** about 30,000; continuing.

**Contractor:** Lockheed Martin; Raytheon.

**Guidance:** semiactive laser.

**Warhead:** Mk 82 (500 lb) blast/fragmentation bomb.

**Dimensions:** length 10.9 ft, body diameter 10.7 in, wingspan 4.4 ft.

**Weight:** 603 lb.

**Performance:** CEP 29.7 ft; range about 6 miles.

#### **COMMENTARY**

Folding-wing Paveway II weapons are improved versions of the earlier fixed-wing Paveway I. The LGB is used primarily to strike fixed armor. It can operate in cloud ceilings down to 2,500 ft. GBU-12 platforms include A-10, B-52, F-15E, F-16, and F-117 aircraft.

#### **GBU-15**

**Brief:** An unpowered bomb carried by the F-15E and used to destroy high-value enemy targets from short standoff distances.

**Function:** Air-to-surface guided munition.

**First Flight:** 1975.

**Delivered:** 1983-complete.

**IOC:** 1983.

**Production:** more than 2,000.

**Contractor:** Boeing; Raytheon.

**Guidance:** TV or IIR seeker.

**Warhead:** Mk 84 bomb (2,000-lb unitary) or BLU-109.

**Dimensions:** length 12.8 ft, body diameter 1.5 ft, wingspan 4.9 ft.

**Weight:** 2,500 lb.

**Performance:** cruising speed subsonic; range about 17 miles; CEP about 10 ft.

#### **COMMENTARY**

GBU-15 is an air-launched, cruciform-wing glide bomb fitted with a guidance system designed to give it pinpoint accuracy from low or medium altitudes. It also has a standoff capability. Development began in 1974, based on experience gained in Vietnam with the earlier Paveway Strike GBU-8 modular weapon program. The GBU-15 is intended for tactical use to suppress enemy defenses and to destroy heavily defended targets. The target-detecting device is carried on the front of the warhead. The control module, with autopilot and data link module, attaches to the rear.

The weapon has two modes of attack. In direct attack, the weapon is locked on to the target before launch and flies a near-line-of-sight profile to impact. In the indirect mode, the seeker can be locked on to the target after launch, or the operator can fly the weapon manually to impact, using guidance updates provided through the data link. A "buddy" system may be operated whereby the weapon is launched from one aircraft and controlled by another. The GBU-15 is deployed with the F-15E.

**GBU-15(V)1/B.** A TV-guided variant, qualified for operational service in 1983.

**GBU-15(V)2/B.** IIR version entered service in 1987.

**GBU-15-I.** Combines accuracy of GBU-15 with the penetration capability of the improved 2,000-lb BLU-109/B penetrator bomb.

**EGBU-15.** GPS-guided variant, allowing pilot to select either TV, IR, or GPS guidance over the target, depending on weather and/or threat conditions. USAF had 100 initially produced for Allied Force, in addition to the field-level upgrade of over 1,200 existing GBU-15s.

#### **GBU-16 Paveway II**

**Brief:** An unpowered LGB used to destroy high-value enemy targets from short standoff distances.

**Function:** Air-to-surface glide munition.

**First Flight:** early 1970s.

**IOC:** 1976.

**Production:** not available.

**Contractor:** Lockheed Martin; Raytheon.

**Guidance:** semiactive laser.

**Warhead:** Mk 83 (1,000 lb) bomb.

**Dimensions:** length 12.1 ft, body diameter 1.2 ft, wingspan 5.5 ft.

**Weight:** approx 1,000 lb.

**Performance:** CEP about 29 ft; range 9.2 miles.

#### **COMMENTARY**

Folding-wing Paveway II weapons are improved versions of the earlier fixed-wing Paveway I. The GBU-16 LGB is used primarily to strike fixed armor. Its platforms include A-10, F-15E, and F-16 aircraft.

#### **GBU-24 Paveway III**

**Brief:** A precise air-to-ground low-level LGB (LLLGB) equipped with an advanced guidance kit.

**Function:** Air-to-surface penetrating glide bomb.

**First Flight:** GBU-24A/B (USAF) in service May 1985; GBU-24B (Navy) June 1992.

**Delivered:** from 1986.

**IOC:** 1986.

**Production:** USAF 14,000; Navy 12,000.

**Contractor:** Raytheon.

**Guidance:** semiactive laser.

**Warhead:** BLU-109 (A/B); BLU-116 (C/D).

**Dimensions:** length 14.2 ft.

**Weight:** 2,350 lb.

**Performance:** range more than 11.5 miles.

#### **COMMENTARY**

**GBU-24A/B.** An air-to-ground weapon equipped with the third generation Paveway III guidance kit, integrated

with a BLU-109 penetrating warhead. The kit consists of an advanced guidance section and high-lift airframe. It is extremely precise and highly effective against a broad range of high-value hard targets. The system can be employed from low, medium, and high altitudes, providing operational flexibility through the use of an adaptive digital autopilot and large field-of-regard, highly sensitive scanning seeker. The GBU-24A/B was highly successful during Desert Storm.

**GBU-24C/D.** Variant integrated with the BLU-16 advanced unitary penetrator (AUP). The GBU-24 adapts to conditions of release, flies an appropriate midcourse, and provides trajectory shaping for enhanced warhead effectiveness. The weapon is deployed on USAF F-15E, F-16, and F-117 and Navy F/A-18 aircraft.

#### **GBU-27**

**Brief:** A precise air-to-ground penetrating LGB equipped with an advanced guidance kit.

**Function:** Air-to-surface guided glide bomb.

**First Flight:** not available.

**Delivered:** from 1988.

**IOC:** 1988 (unconfirmed).

**Production:** approx 3,000.

**Contractor:** Raytheon.

**Guidance:** semiactive laser.

**Dimensions:** span 5.5 ft, length 13.9 ft.

**Weight:** 2,170 lb.

**Performance:** range more than 11.5 miles.

#### **COMMENTARY**

To meet the unique requirements of the F-117A, the GBU-24A/B was adapted to GBU-27 standard, incorporating specific guidance features to accomplish this mission. The GBU-27 is extremely precise and was used to great effect in Desert Storm.

**EGBU-27.** Integrates GPS/INS guidance into the existing GBU-27 laser seeker to provide adverse weather capability and improved target location. Entered production in FY98. First operational use was in Iraqi Freedom.

#### **GBU-28**

**Brief:** A large 5,000-lb class air-to-ground penetrating warhead (BLU-113/B) equipped with an advanced laser guidance kit, used for striking and destroying hard and deeply buried targets.

**Function:** Air-to-surface guided glide bomb.

**First Flight:** February 1991.

**Delivered:** circa 1991.

**IOC:** 1991.

**Production:** approx 500.

**Contractor:** Raytheon.

**Guidance:** laser.

**Dimensions:** length 19.2 ft, diameter 1.2 ft.

**Weight:** 4,676 lb.

**Performance:** range more than 5.75 miles.

#### **COMMENTARY**

Under USAF's rapid-response program, the GBU-28 bunker-busting LGB was developed for Desert Storm for use against deeply buried, hardened C2 facilities. Four of the GBU-28 weapons were used during the war: two for testing and two by F-117s against a bunker complex Feb. 27, 1991. Guidance is by a modified GBU-27 system.

**GBU-28B/B.** Integrates GPS/INS guidance into the existing GBU-28 guidance control unit to provide adverse weather capability and improved target location. Entered production in FY99.

**GBU-28C/B.** Utilizes the improved BLU-122/B warhead for increased penetration, lethality, and survivability. Guidance and control is provided by an Enhanced Paveway III system with GPS/INS and laser capability. Entered production in FY05.

#### **GBU-31/32/38 Joint Direct Attack Munition**

**Brief:** A joint USAF-Navy INS/GPS-guided weapon, carried by fighters and bombers, that provides highly accurate, autonomous, all-weather conventional bombing capability.

**Function:** Air-to-surface guided bomb.

**First Flight:** Oct. 22, 1996.

**Delivered:** 1998-2013 (planned).

**IOC:** 1998.

**Production:** 213,521 (planned).

**Contractor:** Boeing; Textron; Honeywell.

**Guidance:** INS/GPS.

**Dimensions:** Mk 84 with JDAM 12.8 ft; BLU-109 with JDAM 12.4 ft; Mk 83 with JDAM 10 ft; Mk 82 with JDAM 8 ft.

**Weight:** Mk 84 2,036/2,056 lb (USAF/USN); BLU-109 2,115/2,135 lb; Mk 83 1,013/1,028 lb; Mk 82 552/558 lb.

**Performance:** range up to 17 miles, CEP with GPS 16.4 ft; CEP with INS only 98 ft.

#### **COMMENTARY**

JDAM upgrades the existing inventory of general-purpose bombs by integrating them with a GPS/INS guidance kit to provide accurate all-weather attack from medium/high altitudes. While still aboard the launch aircraft, JDAM is passed target information through the

**GBU-32 Joint Direct Attack Munition** (MSgt. Michael Ammons)

aircraft's avionics system. Once released, the inertial guidance kit takes over and, with periodic GPS updates to the INS, guides the weapon to its target. JDAM is integrated on A-10, AV-8B, B-1, B-2, B-52, F-15E, F-16, F-22, F-117A, F/A-18C/D/E/F, and MQ-9 aircraft, with future integration on F-35 aircraft.

**GBU-31.** Variant that adds an INS/GPS guidance kit to the 2,000-lb general-purpose Mk 84 bomb or the 2,000-lb BLU-109 penetrator. First used in combat March 24, 1999.

**GBU-32.** Variant that adds an INS/GPS guidance kit to the 1,000-lb general-purpose Mk 83 bomb or the 1,000-lb BLU-110 thermal coated bomb.

**GBU-38.** Variant that adds an INS/GPS guidance kit to the 500-lb general-purpose Mk 82 bomb or the 500-lb BLU-111 thermal coated bomb. First production deliveries were in 2004 for the B-2.

#### **GBU-39B Small Diameter Bomb**

**Brief:** Extended range all-weather, day/night 250-lb class near-precision guided munition. Provides increased loadout to achieve multiple kills per sortie and decreases collateral damage.

**Function:** Air-to-surface guided munition.

**First Flight:** May 23, 2003 (guided).

**Delivered:** from 2006.

**IOC:** 2007.

**Production:** 24,000 munitions and 2,000 carriages (planned).

**Contractor:** Boeing.

**Guidance:** GPS/INS augmented by Differential GPS. **Dimensions:** length 70.8 in (munition); 126.4 in (carriage); 143.1 in (carriage with four munitions).

**Weight:** 285 lb (munition); 320 lb (carriage); 1,460 lb (carriage with four munitions).

**Performance:** near-precision capability at standoff range up to 46 miles.

#### **COMMENTARY**

The Small Diameter Bomb (SDB) system employs a BRU-61/A smart carriage capable of carrying four 250-lb class GBU-39/B near-precision guided air-to-surface munitions.

**SDB I** is capable of destroying high-priority fixed and stationary targets from both fighters and bombers in internal bays or on external hardpoints. SDBs can be targeted and released against single or multiple targets. Target coordinates are loaded in the weapon prior to release either on the ground or in the air by aircrew. Once the weapon is released, it relies on GPS/INS augmented by Differential GPS to self-navigate to the impact point. SDB increases loadout, decreases collateral damage, and improves aircraft sortie generation times. GBU-39 went operational in July 2006 on the F-15E. Objective aircraft include the A-10, B-1, B-2, B-52, F-16, F-22, F-35, and MQ-9. Boeing was awarded the contract to develop the SDB in October 2003. A focused lethality munition (FLM) warhead for the SDB I is being developed under a joint capability technology demonstration (JCTD) program, aimed at providing pinpoint strike capability with low collateral damage.

**SDB II.** Increment 2 under development in a joint interest program between a Boeing/Lockheed Martin team and Raytheon, providing a capability to attack mobile targets from standoff in all weather. One contractor will be selected following the risk reduction phase, expected to run through late 2009.

#### **Massive Ordnance Air Blast (MOAB) Bomb**

**Brief:** A massive precision guided munition (PGM) designed to be dropped by B-1, B-2, or B-52 bombers.

**Function:** Massive bomb.

**Guidance:** GPS/INS.

**Warhead:** 18,000 lb, high explosive.

**Dimensions:** length 30 ft, diameter 3.3 ft.

**Weight:** 21,500 lb.

#### **COMMENTARY**

On March 11, 2003, USAF live-tested the largest PGM developed to date. Unlike the earlier unguided "Daisy Cutter" bomb, the MOAB does not require a parachute.

#### **Wind-Corrected Munitions Dispenser (WCMD)**

**Brief:** A tail kit fitted to various dispenser weapons that provides inertial guidance system corrections for launch transients and wind effects to enhance accuracy.

**Function:** Guidance tail kit.

**First Flight:** February 1996.

**Delivered:** from 2000.

**IOC:** FY00.

**Production:** WCMD: 27,700 (planned). WCMD-ER: 100.

**Contractor:** Lockheed Martin.

**Dimensions:** length 1.4 ft, diameter 1.3 ft.

**Weight:** WCMD: 100 lb. WCMD-ER: about 200 lb.

**Performance:** WCMD: range about eight miles. WCMD-ER: about 40 miles.

#### **COMMENTARY**

**WCMD.** USAF is modifying standard SUU-64/65/66 tactical munition dispensers with guidance kits to compensate for wind drift on downward flight from high altitudes. The combat-proven WCMD kits include an INS guidance unit, movable tail fins that pop out in flight, and a signal processor. The kits when fitted on CBU-87/89/97 inventory cluster weapons are designated: CEM (CBU-103), Gator (CBU-104), SFW (CBU-105), and PAW (CBU-107). Successful flight testing began in February 1996; WCMDs are now operational on A-10, B-1, B-52, F-15E, and F-16 aircraft. Objective aircraft include B-2 and F-35.

## Satellite Systems

#### **Advanced EHF (AEHF)**

**Brief:** Joint service satellite communications system that provides global, secure, protected, and jam-resistant communications for high priority air, ground, and sea assets.

**Function:** Near-worldwide, secure, survivable satellite communications.

**Operator:** AFSPC.

**First Launch:** late 2008 (planned).

**IOC:** June 2010 (planned).

**Constellation:** three satellites.

**Design Life:** 14 years.

**Launch Vehicle:** SV 1: Atlas V; SV 2 and 3, TBD.

**Unit Location:** Schriever AFB, Colo.

**Orbit Altitude:** 22,000+ miles (geosynchronous).

**Contractor:** Lockheed Martin, Northrop Grumman team for system development and demonstration.

**Dimensions:** length 32 ft (across payload axis), width 75.8 ft (across solar array axis).

**Weight:** approx 14,500 lb at launch, 9,000 lb on orbit.

**Performance:** 10 times the capability of the Milstar Block II satellite.

#### **COMMENTARY**

The Advanced Extremely High Frequency (AEHF)

system comprises three geosynchronous Earth orbit (GEO) satellites that will provide 10 times the capacity of the 1990s-era Milstar satellites. Advanced EHF allows the President, Secretary of Defense, and combat forces to control their tactical and strategic forces at all levels of conflict through general nuclear war and supports the attainment of information superiority. AEHF will provide connectivity across the spectrum of mission areas, including air, land, and naval warfare; special operations; strategic nuclear operations; strategic defense; theater missile defense; and space operations and intelligence.

#### **Defense Meteorological Satellite Program**

**Brief:** Satellites that collect air, land, sea, and space environmental data to support worldwide strategic and tactical military operations. Also shares data with civil agencies.

**Function:** Environmental monitoring satellite.

**Operator:** National Polar-orbiting Operational Environmental Satellite System (NPOESS) integrated program office.

**First Launch:** May 23, 1962.

**IOC:** 1965.

**Constellation/on-orbit:** two.

**Design Life:** 48 months.

**Launch Vehicle:** Delta IV and Atlas V.

**Unit Location:** Suitland, Md. (operations); Schriever AFB, Colo. (AFRC-manned backup operations center).

**Orbit Altitude:** approx 527 miles.

**Contractor:** Lockheed Martin; Northrop Grumman.

**Power Plant:** solar arrays generating 1,200-1,300 watts.

**Dimensions:** length 25 ft (with array deployed), width 4 ft.

**Weight:** 2,545 lb (including 772-lb sensor).

**Performance:** DMSP satellites orbit Earth in polar orbits and primary sensor scans an area 1,800 miles wide. Each system covers the Earth in about 12 hr.

#### **COMMENTARY**

For the last 40-plus years, the DMSP constellation has provided high-quality, timely weather information to strategic and tactical warfighters worldwide. The operational linescan sensor "sees" visible and IR cloud-cover imagery to analyze cloud patterns. Secondary instruments include microwave imagers and sounders and a suite of space environment sensors that provide critical land, sea, and space environment data required by US forces across the globe. This data is also shared with civil agencies. The DMSP constellation will be replaced by the tri-agency NPOESS late in this decade.

**Block 5D-2.** The last Block 5D-2 satellite was launched in December 1999.

**Block 5D-3.** Two operational DMSP Block 5D-3 satellites survey the entire Earth four times a day. DMSP F16, the first Block 5D-3 satellite, was launched successfully on Oct. 18, 2003. (DMSP F15, which used a 5D-3 satellite bus but 5D-2 sensors, was launched Dec. 12, 1999 and is credited as the first 5D-3 launch.) Block 5D-3 satellites have an improved spacecraft bus and sensors that provide for longer and more capable missions. The SLEP planned for F19 and F20, and the successful flyout of the DMSP Block 5D-3 satellites, will help ensure a seamless transition to the NPOESS program.

#### **Defense Satellite Communications System**

**Brief:** A spacecraft traveling in geosynchronous orbit used to transmit SHF high-priority C2 communication.

**Function:** Communications satellite.

**Operator:** AFSPC.

**First Launch:** 1971 (DSCS II); 1982 (DSCS III); 2000 (DSCS III/SLEP).

**IOC:** Dec. 13, 1978 (DSCS II).

**Constellation:** five (III).

**Design Life:** 10 yr (III).

**Launch Vehicle:** Atlas II.

**Unit Location:** Schriever AFB, Colo.

**Orbit Altitude:** 22,000+ miles in geosynchronous orbit.

**Contractor:** Lockheed Martin.

**Power Plant:** solar arrays generating 1,269 watts, decreasing to 980 watts after 10 yr; 1,500 watts (SLEP).

**Dimensions:** rectangular body 6 x 6 x 7 ft; 38-ft span with solar arrays deployed.

**Weight:** 2,580 lb; 2,716 lb (SLEP).

**Performance:** DSCS satellites orbit Earth at about 22,000 miles altitude and employ six SHF transponder channels for secure voice and high-rate data communications.

#### **COMMENTARY**

**DSCS III** satellites support globally distributed DOD and national security users. The final four of 14 satellites received SLEP modifications, providing substantial capacity improvements through higher power amplifiers, more sensitive receivers, and additional antenna connectivity options. The DSCS communications payload includes six independent super high frequency (SHF) transponder channels that cover a 500 MHz bandwidth.

Three receive and five transmit antennas provide selectable options for Earth coverage, area coverage, and/or spot beam coverage. A special-purpose single channel transponder is also on board.

The DSCS III system provides the capabilities needed for effective implementation of worldwide military communications. It can adapt to dynamic operating conditions and perform under stressed environments, providing nuclear hardened, anti-jam, high data rate, long-haul communications to military users globally. The final DSCS III satellite was launched in August 2003. The modernization of satellite communications will continue with the deployment of the Wideband Global SATCOM (WGS).

#### Defense Support Program

**Brief:** An early warning spacecraft that travels in geosynchronous orbit and provides alert of possible ballistic missile attack on US forces or homeland.

**Function:** Strategic and tactical launch detection system.

**Operator:** AFSPC.

**First Launch:** November 1970.

**IOC:** circa 1972.

**Constellation:** classified.

**Design Life:** three yr requirement and five yr goal.

**Launch Vehicle:** Titan IV with inertial upper stage; Delta IV Heavy EELV.

**Unit Location:** Buckley AFB, Colo.

**Orbit Altitude:** 22,000+ miles in geosynchronous orbit.

**Contractor:** TRW (now Northrop Grumman); Aerojet.

**Power Plant:** solar arrays generating 1,485 watts.

**Dimensions:** diameter 22 ft, height 32.8 ft, with solar paddles deployed.

**Weight:** 5,000 lb (approx).

**Performance:** orbits at approx 22,000 miles altitude in geosynchronous orbit; uses IR sensors to sense heat from missile and booster plumes against Earth's background.

#### COMMENTARY

The incredibly flexible Defense Support Program (DSP) satellite system was used extensively in Desert Storm to detect theater missile launches against coalition forces. Though not designed to spot and track smaller missiles, the system was highly successful in detecting launches, enabling timely warnings of Iraqi Scud attacks. The Space Based Infrared System (SBIRS) mission control station (MCS), located at Buckley AFB, Colo., became operational in December 2001 and now performs both the strategic and theater missile warning missions.

DSP satellites are a key part of the North American and theater early warning systems, capable of detecting missile launches and nuclear detonations. Warning data are fed to NORAD and US Strategic Command early warning centers at Cheyenne Mountain AFS, Colo. Since the first launch, DSP satellites have provided an uninterrupted early warning capability to the US. The 23rd and final DSP launched in November 2007. America's early warning capability will be modernized with the introduction of the new SBIRS to be phased in at a future date.

#### Global Positioning System

**Brief:** A space-based radio-positioning system that provides 24-hour worldwide highly accurate three dimensional

location information and precision velocity and timing services to military and civilian users.

**Function:** Worldwide navigation satellite constellation.

**Operator:** AFSPC.

**First Launch:** Feb. 22, 1978.

**IOC:** Dec. 9, 1993.

**Constellation:** Nominal 24 satellites in six orbital planes; max 30 sats; currently 28 operational.

**Design Life:** 7.5 yr (I/IIA); 10 yr (IIR/IIR-M); 12 yr (IIF).

**Launch Vehicle:** Delta II, Delta IV, Atlas V.

**Unit Location:** Schriever AFB, Colo.

**Orbit Altitude:** 10,988 miles.

**Contractor:** Boeing (II, IIA, IIF); Lockheed Martin (IIR, IIR-M).

**Power Plant:** solar panels generating 700 watts (I/IIA); 1,136 watts (IIR/IIR-M); up to 2,600 watts (IIF).

**Dimensions:** IIR/IIR-M: 5 x 6.3 x 6.25 ft, span incl solar panels 38 ft; IIF: 9.6 ft x 6.5 ft x 12.9 ft (span incl solar panels 43.1 ft).

**Weight:** on orbit: 2,370 lb (IIR/IIR-M); 3,439 lb (IIF).

**Performance:** GPS satellites orbit the Earth every 12 hr, emitting continuous navigation signals. The signals are so accurate that time can be figured to within one-millionth of a second, velocity within a fraction of a mile per hr, and location to within a few ft. Receivers are used in aircraft, ships, and land vehicles and can also be handheld.

#### COMMENTARY

Worldwide military operations such as precision bombing, CSAR, mapping, and rendezvous, are successful in part due to the 24-hour, worldwide position navigation and timing service provided by the Global Positioning System (GPS) navigation satellite constellation. Accurate three-dimensional (latitude, longitude, and altitude) position, velocity, and precise time are provided continuously in real time to support an unlimited number of users around the globe, both civilian and military. Concern over potential enemy denial of GPS is being addressed under GPS modernization efforts. The modified Block IIR-M satellites, launched beginning September 2005, offers a variety of enhanced features for the GPS user, such as two new signals, enhanced encryption and anti-jamming capabilities for the military user, as well as a second civil signal. Block IIF satellites will have an extended design life, faster processors, and a new civil signal on a third frequency. Launch is scheduled for August 2008. Future generation GPS satellites are slated for launch 2013.

#### Milstar Satellite Communications System

**Brief:** A joint service satellite communications system that provides global, secure, protected, and jam-resistant strategic and tactical communications at all levels of conflict for high-priority air, ground, and sea assets.

**Function:** Communications satellite.

**Operator:** AFSPC.

**First Launch:** Feb. 7, 1994.

**IOC:** July 1997 (Milstar I).

**Constellation:** five.

**Design Life:** 10 yr.

**Launch Vehicle:** Titan IV/Centaur.

**Unit Location:** Schriever AFB, Colo.

**Orbit Altitude:** 22,300 miles.

**Contractor:** Lockheed Martin; Boeing; TRW (now Northrop Grumman).

**Power Plant:** solar arrays generating 8,000 watts.

**Dimensions:** length 51 ft, width 116 ft with full solar array extension.

**Weight:** 10,000 lb.

**Performance:** constellation consists of five satellites in low-inclined geosynchronous orbit, providing worldwide coverage between 65° north and 65° south latitude. The oldest two satellites are still working beyond their 10-yr design life.

#### COMMENTARY

The backbone of strategic-tactical communications, Milstar is a joint service communications system that provides secure, jam-resistant worldwide communications through crosslinked satellites, eliminating the need for ground relay stations. Worldwide operations are made possible by this 24-hour, all-weather capability, ready to support any deployment at a moment's notice. The Milstar inventory was fully deployed in 2003, and modernization of satellite communications will continue with the Advanced EHF (AEHF) constellation deployment.

#### Polar MILSATCOM

**Brief:** Payload on a classified satellite that provides secure, survivable communications, supporting peacetime, contingency, and wartime operations in the North Pole region, above 65° north latitude.

**Function:** Communications satellite.

**Operator:** USN.

**First Launch:** late 1997.

**IOC:** 1997.

**Constellation:** three.

**Design Life:** host satellite dependent.

**Launch Vehicle:** not available.

**Unit Location:** Schriever AFB, Colo.

**Orbit Altitude:** 25,300 miles.

**Contractor:** classified.

**Power Plant:** 410 watts consumed by payload (power from host solar array).

**Dimensions:** numerous items integrated throughout host.

**Weight:** 470 lb (payload).

#### COMMENTARY

Augmenting the Milstar constellation, the Polar MILSATCOM payload is a cost-effective means of providing secure communications for the northern polar region. The system enables northern latitude operations by linking forces with secure, jam-resistant EHF communication links. Polar 2 availability occurred in 2006, with Polar 3 due in 2008. An improved next generation polar system is planned.

#### Space Based Infrared System High

**Brief:** Advanced surveillance system for missile warning, missile defense, battlespace characterization, and technical intelligence. System includes satellites in geosynchronous Earth orbit (GEO) and highly elliptical orbit (HEO).

**Function:** IR space surveillance.

**Operator:** AFSPC.

**First Launch:** (planned) GEO: October 2008.

**IOC:** TBD.

**Constellation:** four GEO sats, two HEO sensors.

**Design Life:** not available.

**Launch Vehicle:** GEO: Atlas V.

**Unit Location:** Buckley AFB, Colo.

**Orbit Altitude:** High at approx 22,300 miles.

**Contractor:** Lockheed Martin; Northrop Grumman.

**Power Plant:** solar array, 2,435 watts.

**Dimensions:** 6 x 7 x 17 ft.

**Weight:** 5,442 lb.

#### COMMENTARY

The follow-on to the DSP is the Space Based Infrared System (SBIRS). The system includes GEO satellites, HEO payloads, and ground assets.

SBIRS is being fielded incrementally. Increment 1 consolidated all DSP ground processing in one CONUS master control station at Buckley AFB, Colo. IOC was declared Dec. 18, 2001. Increment 2 will field the space and ground assets. SBIRS is in the EMD phase led by a Lockheed Martin team. HEO-1 initial early on-orbit checkout of the first SBIRS payload was announced in November 2006. The payload operating in HEO is the first component of the Increment 2 constellation.

#### Space Based Surveillance System (SBSS)

**Brief:** Planned replacement for the Midcourse Space Experiment/Space Based Visible (MSX/SBV) satellite that undertakes tracking and optical signature collection of Earth-orbiting objects.

**Function:** Space surveillance.

**Operator:** AFSPC.

**First Launch:** December 2008 (planned).

**IOC:** TBD.

**Constellation:** none.

**Design Life:** not available.

**Launch Vehicle:** Minotaur IV.

**Unit Location:** not available.

**Orbit Altitude:** 528 miles.

GPS (Boeing illustration)

**Contractor:** Northrop Grumman; Boeing subcontractor for Pathfinder satellite.

**Power Plant:** not available.

**Dimensions:** not available.

**Weight:** not available.

**COMMENTARY**

SBSS is a planned follow-on to the experimental MSX/SBV satellite and will track and collect optical signatures of Earth-orbiting objects. One Pathfinder satellite is due to be launched late 2008 and four operational satellites are planned for around 2014.

**Space Tracking and Surveillance System**

**Brief:** Advanced surveillance system with IR and visible sensors for detecting and tracking ballistic missiles. STSS (formerly SBIRS Low) will have satellites in low Earth orbit (LEO) that work in concert with SBIRS High and other missile defense systems.

**Function:** Missile defense.

**Operator:** Missile Defense Agency.

**First Launch:** 2008 (planned).

**IOC:** TBD.

**Constellation:** two demonstration sats; operational sats TBD.

**Design Life:** not available.

**Launch Vehicle:** Delta II.

**Unit Location:** Colorado Springs, Colo.

**Orbit Altitude:** 830+ miles.

**Contractor:** Northrop Grumman (completion and launch of two R&D satellites); Raytheon (payload).

**Power Plant:** TBD.

**Dimensions:** not available.

**Weight:** not available.

**COMMENTARY**

The Missile Defense Agency manages the Space Tracking and Surveillance System (STSS), which, in December 2002, replaced the program known as SBIRS Low. In April 2002, MDA ended the SBIRS Low program definition and risk reduction competition and named TRW (now Northrop Grumman) as prime contractor for a redefined space-based sensor R&D element of MDA's integrated Ballistic Missile Defense System (BMDS). The initial STSS contract calls for completion and launch of two LEO satellites under Block 2006. New technologies will be inserted into subsequent R&D satellites, leading to an operational system.

**Wideband Global SATCOM (WGS)**

**Brief:** Satellites that provide high-capacity communications for deployed forces (air, land, and sea).

**Function:** Communications satellite.

**Operator:** AFSPC.

**First Launch:** October 2007.

**IOC:** January 2009 (planned).

**Constellation:** six satellites.

**Design Life:** 14 years.

**Launch Vehicle:** Atlas V, Delta IV.

**Unit Location:** Schriever AFB, Colo.

**Orbit Altitude:** GEO.

**Contractor:** Boeing.

**Power Plant:** solar arrays generating 9,934 watts.

**Dimensions:** based on Boeing 702 Bus.

**Weight:** 13,000 lb at launch.

**Performance:** approx 12 times the capability of a DSCS satellite.

**COMMENTARY**

Wideband Global SATCOM, previously known as the Wideband Gap-filler System, will augment DSCS III and the Navy's Global Broadcast System (GBS) Phase II. WGS is a fully duplexed communications platform offering warfighters a significant increase in capacity, connectivity, and interoperability. It will provide two-way services for national leaders, Diplomatic Telecommunications Service, Defense Information System Network, and all military ground fixed and mobile users. In addition, it will provide direct broadcast of digital multimedia, high-bandwidth imagery, and video information directly from global and theater sites to deployed warfighters. Primarily a commercial product, the satellites will have X-band (DSCS III-like), Ka-band broadcast (GBS Phase 2-like), two-way Ka-band services, and cross-channelization between its X- and Ka-band services.

## Aerial Targets

**BQM-34 Firebee**

**Brief:** A jet-powered, variable speed, recoverable target drone.

**Function:** Aerial target.

**Operator:** ACC.

**First Flight:** 1951; 1958 (BQM-34A).

**Delivered:** from 1951.

**IOC:** circa 1951.

**Production:** 1,800+.

**Inventory:** 33.

**BQM-34 Firebee** (Northrop Grumman photo)

**Unit Location:** Tyndall AFB, Fla.

**Contractor:** Teledyne Ryan.

**Power Plant:** one General Electric J85-GE-100 turbojet, 2,850 lb thrust.

**Guidance and Control:** remote-control methods incl choice of radar, radio, active seeker, and automatic navigator developed by Teledyne Ryan; the current model of the BQM-34A is configured to accommodate the Gulf Range Drone Control Upgrade System (GRDCUS), which allows multiple targets to be flown simultaneously.

**Dimensions:** length 22.9 ft, body diameter 3.1 ft, span 12.9 ft.

**Weight:** launch weight 2,500 lb.

**Performance:** max level speed at 6,500 ft 690 mph, operating height range 10 ft to more than 60,000 ft, max range 796 miles, endurance (typical configuration) 30 min.

**COMMENTARY**

Current BQM-34As, with an upgraded General Electric J85-100 engine that provides a thrust-to-weight ratio of 1:1, offer higher climb rates and six-G maneuvering capability. A new microprocessor flight-control system provides a prelaunch and in-flight self-test capability. BQM-34s are used for research, development, test, and evaluation and the Weapon System Evaluation Program.

**BQM-167 Skeeter**

**Brief:** A jet-powered, variable speed, recoverable target drone.

**Function:** Aerial target.

**Operator:** ACC.

**First Flight:** Jan. 3, 2005.

**Production:** initial production began 2004.

**Unit Location:** Tyndall AFB, Fla.

**Contractor:** Composite Engineering Inc.

**Power Plant:** Microturbo Tri 60-5+ turbojet.

**Guidance and Control:** remote piloting methods.

**Dimensions:** length 20 ft, body diameter 2 ft, span 11 ft.

**Weight:** not available.

**Performance:** max level speed Mach 0.9 mph, operating height range 20,000-50,000 ft, endurance 3 hr.

**COMMENTARY**

**BQM-167A** is replacing both the aging MQ-107 and BQM-34A as the Air Force's subscale aerial target. It features an increased load capability, higher speeds and G-loads, a digital architecture for avionics, and a composite airframe making it significantly lighter than the earlier platforms. Development on this target will take it to supersonic speeds, internalize and miniaturize many countermeasures systems, and expand the flight envelope beyond any target system in the inventory today.

**MQM-107 Streaker**

**Brief:** A jet-powered, variable speed, recoverable target drone.

**Function:** Aerial target.

**Operator:** ACC.

**First Flight:** not available.

**Delivered:** from 1984 (B).

**IOC:** 1987.

**Production:** 70 (B); 221 (D); 78 (E).

**Unit Location:** Tyndall AFB, Fla.

**Contractor:** Raytheon (D model); Marconi (formerly Tracor) (E model).

**Power Plant:** initially on D model, one Teledyne CAE 373-8 engine, 950 lb thrust; MQM-107Ds delivered since 1989 have 950 lb thrust TRI 60-5 turbojets, Microturbo TRI 60-5 engine, 1,061 lb thrust or TCAE 373-8B (E model).

**Guidance and Control:** analog or digital, for both ground control and preprogrammed flight (D model); high-G autopilot provisions; digital autopilot and remote control by the Gulf Range Drone Control Upgrade System (GRDCUS), a multifunction C2 multilateration system (E model).

**Dimensions:** length 18.1 ft, body diameter 1.3 ft, span 9.8 ft.

**Weight:** max launch weight (excl booster) 1,460 lb.

**Performance:** operating speed 207-630 mph, operating height 50-40,000 ft, endurance 2 hr 15 min.

**COMMENTARY**

**MQM-107D.** A third generation version of the MQM-107 Streaker, recoverable, variable-speed target drone used for research, development, test, and evaluation and the Weapon System Evaluation Program.

**MQM-107E.** Improved performance follow-on to the MQM-107D. In operational service, it replaces the MQM-107D and expands the flight envelope.

MQM-107 Streakers are being replaced by the BQM-167 Skeeter.

**QF-4**

**Brief:** A converted, remotely piloted F-4 Phantom fighter used for full-scale training or testing.

**Function:** Aerial target.

**Operator:** ACC.

**First Flight:** August 1993.

**IOC:** not available.

**Unit Location:** Tyndall AFB, Fla. (detachment at Holloman AFB, N.M.)

**Contractor:** Marconi (formerly Tracor).

**Power Plant:** two General Electric J79-GE-17 turbojets, each with approx 17,000 lb thrust with afterburning.

**Guidance and Control:** remote-control methods incl the GRDCUS (Tyndall) and the Drone Formation and Control System (Holloman); will also accommodate the triservice Target Control System currently under development.

**Dimensions:** length 63 ft, height 16.5 ft, wingspan 38.4 ft.

**Weight:** mission operational weight 49,500 lb.

**Performance:** max speed Mach 2+, ceiling 55,000 ft, range (approx) 500 miles.

**COMMENTARY**

The QF-4 replaced the QF-106 Full-Scale Aerial Target (FSAT) in 1998 when the F-106 inventory was depleted. The QF-4 provides for a larger operational performance envelope (maneuvering) and greater payload capability compared with its predecessors.

More than 160 F-4 surplus aircraft have been converted to QF-4 FSATS since 1995. QF-4s are used for research, development, test, and evaluation and the Weapon System Evaluation Program.

## Just Some German Dude

"Nearly a quarter cannot identify Adolf Hitler, with 10 percent thinking Hitler was a munitions manufacturer."—*Survey of 1,200 high school students by Common Core, a non-profit educational research organization, Feb. 26.*

## Losing in Afghanistan

"Make no mistake. NATO is not winning in Afghanistan. Unless this reality is understood and action is taken promptly, the future of Afghanistan is bleak. ... If NATO cannot provide new forces to fight in the south, its credibility will be dealt a powerful blow, throwing into doubt its future cohesion and, hence, viability."—*"Saving Afghanistan," Atlantic Council report, January.*

## Second Opinion

"No one can return from the battlefields in Iraq and Afghanistan, as I recently did, without believing that these are wars that can still be won. They are also clearly wars that can still be lost, but visits to the battlefield show that these conflicts are very different from the wars being described in American political campaigns and most of the debates outside the United States."—*Anthony H. Cordesman, Center for Strategic and International Studies, op-ed column, Washington Post, Feb. 24.*

## Hands Across the Ocean

"China's limited armed forces are totally for the purpose of safeguarding independence, sovereignty, and territorial integrity. China will not pose a threat to any country."—*Jiang Enzhu, spokesman for the Chinese Parliament, announcing a 17.6 percent increase in China's military budget for 2008, International Herald Tribune, March 4.*

## Capability Missing

"Although our conventional forces are second to none, we no longer have these forces forward deployed permanently throughout the world. Therefore, it is prudent to have the ability to defeat attacks and eliminate high value targets at global ranges on short notice. We have a prompt global strike delivery capability

on alert today, but it is configured only with nuclear weapons, which limits the options available to the President and may in some cases reduce the credibility of our deterrence. The capability we lack is the means to deliver prompt, precise, conventional kinetic effects at intercontinental ranges."—*Gen. Kevin P. Chilton, commander, US Strategic Command, House Armed Services Committee, Feb. 27.*

## On Course for More Trouble

"This past November, one of our 666 F-15s literally fell out of the sky from structural failure. Last week we lost another one. Only 73 percent of those fighters have been returned to flight and we do not know how many of the remaining 182 aircraft will fly again. Beginning in 2008, 764 aircraft—nearly 14 percent of the Air Force—are grounded or operating under restricted flying conditions. The Air Force that prevented death to any American soldier from enemy aircraft for over half a century may not be up to the task in the years ahead due to lack of adequate investment."—*Col. Mace Carpenter and Lt. Gen. David A. Deptula, op-ed column, Washington Times, Feb. 21.*

## Jammed Up in Space

"During Operation Iraqi Freedom, we experienced GPS jamming and since then we have witnessed a worldwide proliferation of technology that can be used against our space systems. Our space capabilities face a wide range of threats including radio frequency jamming, laser blinding, and anti-satellite systems. The emergence of these threats requires a broad range of capabilities, from diplomatic to military, to protect our interest in space."—*Gen. C. Robert Kehler, commander, Air Force Space Command, Senate Armed Services strategic forces subcommittee, March 4.*

## Can't Fool Her

"Did a man really walk on the moon? I saw plenty of documentaries on it, and I really wondered. And in any case I don't believe all they tell me, that's for sure."—*Academy Award-winning actress Marion Cotillard of France, London Sunday Telegraph, March 2.*

## Percentages

"It cost almost 50 percent of the nation's gross domestic product (GDP) to pay for World War II. Fighting the Korean War consumed about 14 percent of GDP, Vietnam about nine percent. Even with the supplemental spending to fight radical Islamist terrorists in Iraq and Afghanistan, the President's defense budget is about four percent of GDP. America is engaged in a Long War. We should be prepared to pay for it."—*James Jay Carafano, Heritage Foundation, op-ed column, Washington Times, Feb. 21.*

## Don't Hold Your Breath

"Some of our partners can't wait to see me stop fulfilling my duties so that they could deal with another man. But [newly elected Russian President Dimitry Medvedev] is no less of a Russian nationalist—in a positive way—than me. And I don't think it will be easier for our partners to deal with him."—*Russian President Vladimir V. Putin, Associated Press, March 9.*

## The Gentrifying of Terror

"The al Qaeda men who are coming today are not farmers, illiterate people. They are Ph.D.s, professors."—*Qari Mohammed Yusuf, cameraman for al-Sahab, a multimedia production company affiliated with the terror movement in Afghanistan, Associated Press, March 9.*

## Into "Recallable Storage"

"I'm happy to hear they are putting it in a place where they could bring it back if they ever needed it."—*Brig. Gen. Gregory A. Feest, first person to fly an F-117 in combat (in Panama in 1989), as the Nighthawk moves from active duty into "recallable storage," Associated Press, March 11.*

## Lego Force

"If someone can shoot me down, and I can say, 'Not a problem,' and be back up in a matter of days or a matter of hours, it kind of removes their incentive to shoot our stuff down."—*Air Force Chief Scientist Mark J. Lewis, looking ahead to satellites that could be built from off-the-shelf parts and launched within days, New York Daily News, March 6.* ■

By Frances McKenney, Assistant Managing Editor

## History Lesson

Air Force Senior NCO Academy students met Air Force Association officials twice during the course of seven weeks of instruction at Maxwell AFB, Ala.

AFA Chairman of the Board Robert E. "Bob" Largent attended the graduation ceremony for Class 08-B in February to present MSgt. William L. Humphrey with AFA's CMSAF James M. McCoy Academic Achievement Award. Humphrey is from Wright-Patterson AFB, Ohio.

A few weeks earlier, other AFA connections had led to an Air Force history lesson, delivered to the same class by the Lincoln (Neb.) Chapter's aerospace education vice president.

Diane R. Bartels spoke to the group in January, relating the story of World War II WASP pilot Evelyn G. Sharp.

Sharp grew up in Ord, Neb., in the 1930s. She earned a private pilot's license at 17 and had taught more than 350 people to fly by the time World War II began. She joined the Women's Auxiliary Ferrying Squadron, which later became the Women Airforce Service Pilots (WASPs). Sharp had flown nearly every airplane type in the Army Air Forces before her death in 1944 in a P-38 crash.

It was Col. Thomas D. Klinicar, commander of the College for Enlisted Professional Military Education at Maxwell, who led to Bartels making the SNCOA presentation. He and Bartels met last September at the dedication ceremony for the airman leadership school in Offutt AFB, Neb. The school was dedicated in the name of James M. McCoy, the sixth Chief Master Sergeant of the Air Force and also an AFA National President and Chairman of the Board (1992-96).

At the ceremony, Bartels mentioned to Klinicar that she had written a book in 1996, titled *Sharpie*, and asked if she could present the aviator's life story to the students under his purview.

Bartels' audience included 336 senior NCOs from the Air Force's active and reserve components, as well as from the Army, Navy, Coast Guard, and Canada.

## Wing Dinner

In February, members of the Northern Shenandoah Valley Chapter (Va.) visited the Air National Guard's 167th

USAF photo by Melanie E. Rodgers

**AFA Board Chairman Bob Largent presents MSgt. William Humphrey with the academic achievement award at graduation ceremonies in February for the Senior NCO Academy's Class 08-B.**

Airlift Wing at the Eastern West Virginia Airport in Martinsburg, W.Va., for a tour of the unit and an awards dinner.

It was, according to Chapter President Norman M. Haller, "a long-awaited get-together."

The wing has transitioned from C-130 to C-5 airlifters, and Capt. Melissa Shade and CMSgt. John Alderton from the 167th arranged for guests to see the Galaxy transport up close. The visitors also toured the unit's Starbase facility. Starbase is a federally funded science and math education program for elementary and high school students. It is hosted at some 45 USAF, Navy, and Marine Corps sites. At the 167th, Starbase targets fifth-graders for its program of experiential learning, simulations, and experiments in aviation and aerospace.

Sherra Triggs, Starbase deputy director at the 167th, was among the award recipients at the dinner that evening. She was named Teacher of the Year.

The dinner began with a presentation of the colors by the wing's color guard. After the awards ceremonies, retired Lt. Gen. Kenneth E. Eickmann spoke to the gathering on recent studies covering propulsion, re-engining, and wings for Air Force aircraft. Eickmann retired 10 years ago as Aeronautical Systems Center commander and early in his career

had been a reliability and maintainability engineer on the C-5.

Those traveling to West Virginia for this chapter-wing dinner included Central East Region President Mason S. Botts and Virginia State President Scott P. Van Cleef.

## More Chapter News

■ AFA Board Chairman Bob Largent welcomed more than 500 defense contractors to the 2008 Hill Air Force Base Requirements Symposium co-hosted by Utah AFA Industrial Associates in March in Layton, Utah. The symposium provides businesses with insight into the base's upcoming requirements. It takes place every two years. The industrial associates are 38 businesses associated with AFA Utah: the Northern Utah Chapter, Salt Lake Chapter, and Ute-Rocky Mountain Chapter.

■ US Rep. Emanuel Cleaver II (D-Mo.) surprised the Harry S. Truman Chapter members by dropping in for a quick visit before their meeting in Kansas City, Mo., in March. Chapter President James Snyder explained that the Missouri Democrat is a minister and returns to Kansas City regularly to conduct services. While in town this time, Cleaver spent nearly an hour chatting with chapter members and cadets from an AFJROTC color

guard who had come to the meeting from Blue Springs South High School. Their senior aerospace science instructor is retired Maj. Paul W. Bekebrede, a chapter member.

■ CMSAF Rodney J. McKinley spoke to the **Montgomery Chapter** in Alabama about his experience testifying on Capitol Hill about Air Force achievements and requirements. He told the chapter that the service's top priorities were the Global War on Terror; recruiting and training personnel; and recapitalization of the aircraft fleet. Taking care of Air Force people is essential, he told the chapter, echoing what he had said earlier that month, at a Hill hearing. Chapter President Thomas Gwaltney presented the chief with a handmade model of the Wright Flyer and thanked him for his years of service.

■ The **Strom Thurmond Chapter** in Clemson, S.C., helped sponsor the second annual Doug Harris Memorial Run in March. Col. Lance S. Young, chapter president, presented a donation on behalf of the chapter to cadet Charles E. Polley, a chapter member from Clemson University's AFROTC Det. 770. Harris was a freshman cadet in the detachment when he died in an auto accident in November 2006. Proceeds from the half-marathon and 10K race go to scholarships for Air Force cadets at Clemson.

■ Don Deering, the community liaison for US Rep. Jim Cooper (D-Tenn.), spoke at the March meeting of the **Maj. Gen. Dan F. Callahan Chapter** in Nashville, Tenn. A retired Army armor officer, Deering spoke about a roles and missions panel chaired by Cooper, a member of the House Armed Services Committee. He also described the Congressman's role in supporting the transition of the 118th Airlift Wing (ANG), Nashville Airport, to its new mission of training allied airmen on C-130 operations.

■ According to **Southern Indiana Chapter** President Marcus R. Oliphant,

USAF photo by Jennifer Duncan

**S. Sanford Schliitt, AFA's Vice Chairman of the Board for Aerospace Education (fifth from the left), hosted a recent presentation by retired Gen. Gregory Martin (fourth from the left) to the Air and Space Basic Course at Maxwell AFB, Ala. Martin retired as AFMC commander in 2005. The audience at his presentation included brand-new second lieutenants. AFA sponsors these meetings with a senior USAF or defense industry leader several times a year.**

retired Maj. Gen. Frank L. Hettlinger covered people, places, and airplanes during his remarks as chapter guest speaker in March. A former commander of the Indiana Air National Guard, Hettlinger enlisted in the Air Force in 1951 and was commissioned 18 months later at Williams AFB, Ariz. He flew 12 types of aircraft—from the F-86 to the C-131—on active duty and in the ANG. At the chapter meeting, Hettlinger, who retired in 1989, showed photos from a career that included active duty for the Berlin Airlift.

■ In Arlington, Va., the **Donald W. Steele Sr. Memorial Chapter** held the latest in its series of Salutes to Air Force action officers, honoring in February a group from the Office of the Deputy Chief

of Staff for Air, Space, and Information Operations, Plans and Requirements. More than 150 attendees listened to guest speaker Lt. Gen. Daniel J. Darnell, the A3/5, describe the office visits he'd conducted earlier that day on Capitol Hill. Receiving awards that evening were: Lt. Col. Thomas James, Lt. Col. Fred Shiner, Maj. Chuck Menza, Maj. Gregory Miller, Maj. Jeffrey R. Stein, TSgt. Anthony Boykin, SSgt. Sergio Berricos, SSgt. LaTash S. Mason, and Terry Tallent.

■ Borrowing a page from the **Steele Chapter**, the **Gen. Charles A. Gabriel Chapter (Va.)** co-hosted a salute of its own in February, the second annual Salute to Space: SAF/US. Guest speaker was Gary E. Payton, deputy undersecretary of the Air Force for space programs. With support from a half-dozen industry sponsors, Jor Safley, the leadership development VP, and Matt O'Kane, the DEV for unit recognition, organized the reception. Receiving awards as outstanding action officers were: Lt. Col. David Beckwith, Lt. Col. Paul Dotzler, Cmdr. Lynn Mackovick, Lt. Col. Kenneth Warcholik, Maj. Chris Brann, Maj. Jeff Hardy, Maj. Andre Lobo, Maj. Darren Rhyne, Capt. Rebecca Hamilton, Capt. Michael Manning, MSgt. John Villasista, SSgt. Michelle Davenport, and Brian Shannon. The Global Positioning System team was named 2007 Team of the Year. Maj. Tim McKenzie accepted the team's award.

■ The executive director of the Cyber Innovation Center of Bossier City, La., spoke to a group of **Ark-La-Tex Chapter**

## AFA Conventions

|             |   |
|-------------|---|
| May 9-10    | <b>South Carolina State Convention</b> , Shaw AFB, S.C.     |
| May 9-10    | <b>Tennessee State Convention</b> , Nashville, Tenn.        |
| May 13-15   | <b>New Jersey State Convention</b> , Atlantic City, N.J.    |
| July 11-12  | <b>Florida State Convention</b> , Cape Canaveral, Fla.      |
| July 11-12  | <b>Texas-Oklahoma State Convention</b> , Oklahoma City      |
| July 19     | <b>North Carolina State Convention</b> , Fayetteville, N.C. |
| July 25-26  | <b>California State Convention</b> , Edwards AFB, Calif.    |
| July 25-26  | <b>Colorado State Convention</b> , Colorado Springs, Colo.  |
| Aug. 2      | <b>Massachusetts State Convention</b> , Boston              |
| Aug. 9      | <b>Georgia State Convention</b> , Robins AFB, Ga.           |
| Aug. 9      | <b>Pennsylvania State Convention</b> , State College, Pa.   |
| Aug. 12     | <b>Michigan State Convention</b> , Mount Pleasant, Mich.    |
| Sept. 13-14 | <b>AFA National Convention</b> , Washington, D.C.           |
| Sept. 14-17 | <b>AFA Air &amp; Space Conference</b> , Washington, D.C.    |

members in February. Craig Spohn provided an update on the center, an office complex adjacent to Barksdale AFB, La. The center is to work with defense contractors, think tank scholars, and others supporting Cyber Command. Chapter President Jack Skaggs said Spohn explained the command's impact and the need for the kind of assistance the center plans to provide.

■ In Gainesville, Fla., **Red Tail Memorial Chapter** President Michael H. Emig and Chapter Secretary Stephen C. Spiers continued to build the chapter's relationship with University of Florida AFROTC cadets by attending Det. 150's pass in review in March. The detachment's cadets include recipients of two AFA awards for cadets: Maureen A. Hartney, the AFA 2007 AFROTC Cadet of the Year, and chapter member Tyler F. Holley who was to receive AFA's 2008 W. Randolph Lovelace Memorial Award in April.

■ The **Mount Clemens Chapter** (Mich.) carried out its annual Aid to Military Families project in December, providing gift cards that could be used at a local department-grocery store. Some half a dozen of these cards went to families selected by first sergeants from the 127th Wing (ANG) and 927th Air Refueling Wing (AFRC), Selfridge ANGB, Mich. ■

## Reunions

reunions@afa.org

**8th TFW** in Thailand. Aug. 25-28 in San Antonio. **Contact:** Pete Nash, 22018 N. Giovota Dr., Sun City West, AZ 85375 (480-223-2351) (prkmnash@aol.com).

**13th BS Assn.** Sept. 10-14 in Colorado Springs, CO. **Contact:** Brian Parker, 10527 Nunn Jones Rd., College Station, TX 77845 (979-776-0207) (btparker13@suddenlink.net).

## F/RF-101 Voodoo

The sleek and powerful F/RF-101 Voodoo fighter was the first production airplane capable of achieving a speed of 1,000 mph in level flight. It was also the heaviest single-seat fighter USAF had ever accepted to that point. The RF version became the world's first supersonic reconnaissance aircraft, and it made a name for itself in combat missions over North Vietnam and during the 1962 Cuban Missile Crisis.

The McDonnell aircraft had several significant versions. These include the F-101A fighter-bomber, F-101B long-range interceptor, and RF-101A/C photoreconnaissance variant. All traced their origins to the short-lived 1946 McDonnell XF-88, developed as a "penetration fighter" to escort Strategic Air Command B-36 bombers. That concept was dropped but was revived in the early 1950s. The second generation, dubbed "Voodoo," was enlarged and equipped with more powerful engines, and eventually saw service in multiple

roles. In October 1959, eight RF-101As were sold to Taiwan, which used them to overfly mainland China. For the US, reconnaissance Voodoos played a key role in the Cuban Missile Crisis. On Oct. 23, 1962, the 363rd Tactical Reconnaissance Wing's RF-101A and RF-101C aircraft confirmed the Soviet missile buildup in Cuba; 15 pilots were awarded Distinguished Flying Crosses for their work. The RF-101C was the only version to see action in Vietnam. Their flights began in 1961. With demand for photoreconnaissance growing, USAF based Voodoos in Thailand as well as Vietnam. On Feb. 8, 1965, RF-101Cs serving as Pathfinders led the first US strike (by F-100s) on North Vietnam.

The Voodoo's fighter-bomber and reconnaissance roles eventually were taken over by the F-4 Phantom II. It often is viewed as an important evolutionary step toward the Phantom, which replicated its upswept aft fuselage and dual crew.

—Walter J. Boyne

**This aircraft:** RF-101C Voodoo—#60054—as it looked in October 1961 when assigned to the 15th TRS, Kadena AB, Japan.

*A flight of F-101B Voodoo interceptors.*

### In Brief

Designed, built by McDonnell Aircraft ★ first flight Sept. 29, 1954 ★ crew of one or two ★ number built 807 ★ **Specific to F-101B:** two PW J57-P-55 turbojet engines ★ armament two AIM-4D air-to-air missiles, two AIR-2A Genie nuclear missiles ★ max speed 1,094 mph ★ cruise speed 546 mph ★ max range 1,754 mi ★ weight (loaded) 52,400 lb ★ span 39 ft 8 in ★ length 71 ft 1 in ★ height 18 ft.

### Famous Fliers

**Notables:** Robin Olds (Air Force Cross, ace), James R. Brickel (Silver Star), Charles E. Shelton (Vietnam KIA), Lonnie R. Moore (Korean War ace, killed in F-101 test), John R. Lasater, Fred Mellor, George L. Monahan Jr. **Record Setters:** Adrian Drew (1957, absolute speed); Robert Sweet (1957, speed westbound coast-to-coast); Gustav Klatt (1957, speed eastbound coast-to-coast); George A. Edwards (1959, speed over closed course).

### Interesting Facts

Nicknamed "One-Oh-Wonder" and "Longbird" ★ reached Vietnam in October 1961, first USAF jet aircraft to arrive ★ led first USAF attack on North Vietnam (Feb. 8, 1965) ★ achieved best first-year safety record of any USAF jet fighter ★ downed 30 times in Vietnam ★ had nuclear capability in B and C models ★ operated by Taiwan and Canada.

# War won't wait.

The enemy is on the move, and you have to deploy now. Not later, when the parts and supplies become available. Not if they arrive. That's why modern militaries turn to AAR for the logistics support and mobility systems they need.

Empty shelves don't cut it. Neither do empty promises.

When it comes to supporting the warfighter with readiness and sustainment solutions, no one does it better than AAR. Because war won't wait.

## READINESS FOR TODAY AND TOMORROW.

Today, as demands on the warfighter increase, Boeing is delivering innovative customer solutions to ensure total readiness. For airlifters, fighters, rotorcraft, tankers, weapons, bombers, satellites and network systems. Boeing brings together an unmatched breadth of expertise for total life-cycle sustainment. It's a commitment of unequivocal support for the warfighter, now and in the future.
